THE UNDERSIGNED OFFERS FOR SALE, SAFETY VALVES, effectually guarded against tampering, invented and patented by himself; patent bearing date Sept. 14th, 1869.

Said Valves are sold with Spring, Guard, Studs, and Nuts, complete, and all ready to put on to boiler domes. Price for size suitable for Locomotives, $27 50.

The Valve and Seat are made of hard composition. Spring of best cast steel.

The above Valve is sensitive, and is not liable to stick from corrosion; and is particularly well suited for large stationary and marine boilers, giving large area for escape of steam, and requiring a short lever, and light weight or spring, for holding Valve against pressure.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

BRADY'S RAILROAD LANTERNS.

The strongest and best in use; are made principally of Malleable Iron. Here lies the secret of their strength, the frame being capable of supporting a weight of Four or Five Hundred Pounds; and yet they are little heavier than ordinary Lanterns. The guards are rivited through the top and bottom flanges, the rings wound with wire where they cross the guards, and the whole frame tinned, uniting each piece with the other, making it the *strongest* Lantern ever offered to the public. RAILROAD MEN *especially* cannot fail to see that it will be economy to purchase these Lanterns, as there is no part that can be broken with ordinary use, except the Globe, which being adjustable, is easily and cheaply replaced with any color and at a small cost; the greater weight being at the bottom, it cannot readily upset. Now used on the following Railroads: New York and New Haven; Hartford and New Haven; Shore Line, Conn.; Providence and Worcester; Boston and Maine; Conn. and Passumpsic Rivers; Fitchburg; Rensselaer and Saratoga; Troy and Boston; Boston and Providence; Boston, Clinton and Fitchburg; Charlotte, Columbia and Augusta; Connecticut River; European and North American; Hartford, Providence and Fishkill; Mobile and Ohio; Portland and Kennebec; Boston, Hartford and Erie; Worcester and Nashua; Lake Superior and Miss.; Hudson River, and many others.

The trade supplied from our Store, or from the Factory, New Britain, Conn.,

Chesapeake and Ohio Railroad.

THE CHESAPEAKE AND OHIO RAILROAD will unite the harbors of the Atlantic coast with the inland navigation of the West, by a short, constant and economical line. The greater part of it is already in active operation, and a force of 7,000 men is engaged on the construction of the remainder.

When completed from the deep waters of the James River to the confluence of the Big Sandy with the Ohio, it will afford the shortest, cheapest and most reliable route for the products of the West and Southwest to the seaboard, and the quickest for passenger travel to and from the national capital. Connecting and tributary lines of railroad are projected and constructing in Ohio and Kentucky, which will give ready transit to and from the great railroad centres of the Mississippi Valley and the Pacific Railroads.

Inexhaustible deposits of iron ore and free-burning coal are found along the line of the road, which must contribute an important local traffic, in addition to that already drawn from the rich agricultural regions adjacent.

The Loan intrusted to our hands is one of the most important ever negotiated in this country; it is based upon a mortgage covering four hundred and thirty-seven miles of main line, equipment, &c., for which there is ample *present* security in completed road and work done.

The Bonds we offer have assurances of prominence and activity in the money markets of the world.

It is of great importance to purchasers of railroad securities to secure those which shall be widely known and actively dealt in and have a ready market hereafter.

For Trustees of Estates, Widows, Orphans, Clergymen, Farmers, and prudent investors generally, who desire to invest money securely, at a reasonable rate of interest, and avoid paying the premium on Government Bonds, the loan of the CHESAPEAKE AND OHIO RAILROAD COMPANY affords the desired channel for investment, and has been selected by us with special reference to this extensive want.

The Loan is in Bonds of $100, $500 and $1,000, Coupon or Registered. They have thirty years to run. Interest six per cent., payable May 1 and November 1. Principal and interest payable in Gold in the city of New York.

Price, 90 and accrued interest.

Bonds delivered at all points free of express charges.

FISK & HATCH,

Electric Signal Apparatus for Railroads.

The following article, which we copy from the *Journal of the Telegraph*, is from the pen of GEORGE B. PRESCOTT, Esq., Electrician Western Union Telegraph Company, and author of the "History, Theory and Practice of the Electric Telegraph:"

One of the earliest and most important applications of electro-magnetism was made in connection with the operation of railroads. On some roads the movement of trains is entirely regulated by telegraphic signals. The conditions under which trains or engines are allowed to move are, that every train leaving or passing a station is signalled out to the next station, and must not go on till the out signal is taken. Its arrival is signalled back to the last station, and no second train is allowed to follow until the first has arrived; for no two trains are permitted to be on the same length of railway between two signal stations at the same time. A train is considered in when within the protection of the semaphore signals of the station, and the telegraph permission for a second train to follow refers only to the open line, as far as the previous train is concerned, and extends only to the distant signals of the station. On approaching the station, the train is subservient to the visible signals.

The most ingenious and reliable apparatus for railway signals which I have ever seen are those in operation on the New York and New Haven Railroad, invented by Mr. THOMAS S. HALL, of Stamford, Conn., consisting of a series of automatic electro-magnetic signals for switches, draw-bridges and road crossings. The signals are both sonorous and visual, a red disc being displayed, and a bell rung, whenever a switch is displaced, a draw-bridge opened, or a train approaches a road crossing. The apparatus for raising the signals and ringing the bells, is the same in principle for every application, the difference in the various devices consisting in the method for operating the signals. The movement of a switch causes a circuit to be closed which rings a bell and exhibits a red signal until the switch is replaced. The removal of the bolt which permits the opening of a draw-bridge, causes a bell to ring and a danger signal to be exhibited until the draw-bridge is closed. The road crossing signals are operated by the pressure of the car wheels upon a lever attached to the rail, which closes an electric circuit and holds it closed until the train passes the crossing and the wheels press upon another lever, which opens the circuit, when the danger signal drops and the bell stops ringing. These signals are admirably adapted for the use upon single track railroads for perventing collisions, and upon both single and double track roads for preventing trains from running into each other from behind. They can very readily be arranged for signalling the position of every train upon the entire length of a road so as to render it impossible—unless the engineer should wilfully disregard the signals—for any two trains to collide, or for one train to run into another from behind. For deep cuts or short curves where the track cannot be see for any considerable distance ahead, these signals would prove of the most invaluable service, and if generally adopted upon all the railways in the country would be the means of largely decreasing the annual destruction by railway accidents of both life and property.

The operation of these signals being automatic, they are not subject to the contingencies which render those made by hand so unreliable, for the most careful of men will sometimes forget to exhibit the signals, or become confused and give the wrong ones, while these automatic signals will not fail by night or day to perform their ap-

pointed duty with all the reliability and precision of perfect mechanism.

These instruments being inexpensive, simple in design, effectual and reliable in operation and constructed in the most thorough and durable manner, will, I trust, meet the consideration which they deserve, and ultimately be generally adopted upon all railroads.

☞ The Houston (Texas) *Union* says the grading and bridging on the railroad line from Brenham to Burton, fourteen miles, is as good as completed.

Illinois Central Railroad.

The receipts from operations of this road for the year ending December 31, 1869, were as follows:

From freight		$4,602 817 06
" passengers		1,702,629 35
" sleeping cars		24 547 00

General Statement of Accounts.

Balance of net cash assets as shown in last annual report		$2,012,927 83
Gross earnings, as above, in 1869		8,823,482 20
Net receipts of Land Department		2,422,850 83
Decrease in working st'k of supplies		79,912 36
Six per cent. Sterling Redemption bonds issued in exchange for six per cent. Construction bonds		103,500 00
		$13,442,673 22
Permanent expenditures		$884,776 99
Operation expenses, as above		4,924,594 20
Tax paid the State of Illinois, being 7 per cent. on the gross earnings for the year ending October 31, 1869		464,933 31
Tax paid the State of Iowa on the gross earnings of leased lines to December 31, 1869		14,424 84
Rent of leased lines in Iowa for the year ending December 31, 1869		532,154 47
Interest on funded debt		580,900 00
Sterling exchange on coupons payable in London		64,536 90
Dividends paid in 1869, being 10 per cent. on the capital stock, and including United States tax		2,660,247 37
Bonds purchased in 1869—		
7 per cent. Construction	$767,500	
6 per cent. Construction	2,000	
Sterling Redemption	28,000	
Currency Redemption	60,500	
		858,000 00
Construction 6 per cents received in exchange for new Sterling Redemption bonds		103,500 00
Premiums and commissions paid on bonds called, purchased and exchanged		143,825 09
Amount of construction bond fund		519,500 00
Balance, consisting of net cash assets in New York and Chicago, and exclusive of the working stock of supplies		1,691,280 05
		$13,442,673 22

It will be seen that the gross earnings were $8,823,482 20, working expenses $4,924,594 20, State taxes $479,358 15, and rent of leased lines in Iowa $532,154 47, leaving net earnings $2,887,375 38, against $2,414,984 58 in 1868, being a gain of $472,390 80, or 19½ per cent. The per centage of expenses to earnings, including State taxes, was 61.25 per cent. against 64.37 in 1868.

The gross earnings in Illinois were $7,380,997 90, and the net $2,782,756 16, being an increase over last year of $438,009 43.

The gross earnings of the leased lines, included in above amount, were $1,442,484 30, working expenses $741,285 77, State taxes $14,424 84, and rent $532,154 47, leaving a net profit of $154,619 22. The President in his report says:

It will be observed that there is an increase of 103½ miles in leased lines in Iowa, as compared with last report. The extension comprises 54 miles of the Cedar Falls and Minnesota Railroad, and 49 miles of the Iowa Falls and Sioux City Railroad—making a total length of 258½ miles now worked in Iowa. The harvest has been ample, and we have found profitable employment there for all the motive power and rolling stock we have been able to spare from the line in Illinois. The Iowa line has been worked successfully; the great benefit resulting has been found in the increase of traffic upon the line in Illinois north of Mendota.

As the Southern States have become more prosperous, our traffic with that section has considerably increased. I recommend the most intimate relations with the Railways of the South, and with that view shall deem the construction of a line from Columbus to Cairo most fortunate for this company, the distance being twenty-four miles, and the line, when built, placing us in connection by rail with the Mobile and Ohio Railroad.

The tonnage hauled during the year was 1,601,972 tons, against 1,439,675 in 1868, and the average distance each ton was hauled was 158.14 miles, against 157 miles in 1868. This, owing to the decline in the value of cereals, has been transported at a considerably reduced rate per ton per mile, as compared with the previous year.

Our expenditures on maintenance of way during the year amounted to $1,314,028 86, which includes the cost of 8,255.6 tons new iron. The length of track relaid with new iron was 85.35 miles, and with repaired iron 75.42 miles; of which 14.76 miles with new iron, and 3.77 miles with repaired iron, were in Iowa. Of the $98,820 98 charged to account of bridging, a large amount was expended in the cost of six spans of iron bridge over the Illinois River, replacing the same length of wooden bridge.

The amount charged to permanent expenditure was $884,776 99, of which $431,592 70 was for construction, and $441,713 for equipment. Construction includes the cost of ballasting with rock and gravel 52.78 miles of track, amount, $93,313 50; bridging, $67,923 03; new station buildings, $73,181 43; additional water works, $18,063 20; 9.24 miles of new sidings, $125 953 73. Of the total amount charged to construction, $60,815 91 was expended on leased lines for new sidings, ballasting, station buildings, etc. The track has been improved; motive power and rolling stock have been well maintained, important additions having been made to both during the year by building 7 new engines and 3 hundred and 80 cars.

The bridge across the Mississippi, between Dunleith and Dubuque, opened on the 1st of January, 1869, has been used successfully, and enabled us to transport without interruption a large amount of freight.

The amount paid for dividends, including Government tax, during the year was two million six hundred and sixty thousand two hundred and forty-seven dollars and thirty-seven cents; six hundred and forty-five thousand four hundred and thirty-six dollars and ninety cents was paid for interest on Funded Debt and Sterling Exchange, leaving a balance of one million six hundred and ninety-one thousand two hundred and eighty dollars and five cents cash assets. We hold a stock of working supplies costing seven hundred and twenty-six dollars and ninety-three cents; a fund of five hundred and nineteen thousand and five hundred dollars set aside for the purchase of Construction Bonds, and two million five hundred and seventy-nine thousand dollars of Construction Bonds in hands of Trustees in anticipation of collections. It will be observed that the net from traffic in Illinois was more than equal to our dividend in 1869.

The Funded Debt was redneed $858,000, and on the 1st January amounted to $8,519,500, or, deducting the special fund above referred to, leaves an even sum of $8,000,000.

The low price of wheat, and the almost total failure of corn through the central portion of the State, made it difficult for the farmers to pay up in full to the Land Department. The collections amounted to $2,551,717 70. During the year there were surrendered to the Trustees, $1,467,000 of Construction Bonds. Of the $3,335,774 Construction Bonds now in hands of Trustees, $2,579,000 are in advance of collections. There were 85,860 acres sold to 1,521 purchasers, for $899,348 71, being an average of $10.48 per acre, and of 56 acres to each purchaser. Up to the close of the year, 1,356,830.51 acres of the original grant of land had been deeded to purchasers, and returns thereof made to the State authorities. The amount owing to the company for lands sold, was $4,492 351 60, and the number of acres unsold, 457,779.17, of which nearly 400,000 acres are located south of the centre of the State.

The annual meeting of the shareholders will be held in Chicago, on Wednesday, the 25th day of May next. The term of service of three directors will expire at that date.

Capital stock has been increased $1,440 by the conversion of cancelled bond scrip.

The working stock of supplies consist of wood, coal, etc., on Chicago, North and Iowa Divisions, $64,135 78; engineering materials and tools, $361,847 37; materials at shops, $334,732 01; stationery, $3,511 77—total, at debit in General Balance Sheet, $764,226 93.

The lands remaining unsold are located as follows: on Main Line—between Cairo and the Ohio and Mississippi Railroad 272,812.52 acres; between the Ohio and Mississippi Railroad and Decatur 61,054.64; between Decatur and Dixon, 17,794.26; between Dixon and Dunleith, 16,533 02. On the Chicago Branch—between the Ohio and Mississippi Railroad and Tolono, 54,355.14; and between Tolono and Chicago, 35,729.59—total, 457,779.17 acres.

During the year 7 new first class engines were built at the company,s works, making the number owned by them at the close of the year, 177; of these, 30 were employed on passenger trains, 107 on freight, 24 on other trains, and 16 undergoing repairs. 42 engines have received general repairs, 54 thorough repairs, of which 10 have been rebuilt, and 5 have been altered to burn coal, leaving but 3 wood burners on the road.

The number of miles run by engines with passenger trains, was 1,225,430; with freight trains; 3,437,072; with construction trains, 154,485; switching, 497,316—total, 5,414,303, an increase of 820,857 over the previous year. Cost of repairs, $610,566 03. Cost of repairs per mile run, 11.27 cents against 12.72 cents in 1868. The total cost per mile, including wages, fuel, oil, waste, tallow and cleaning, has been 25.49 cents, against 27.57 cents in 1868, 29.62 cents in 1867, and 32.67 cents in 1866—the total cost being $1,381,349 88, against $1,266,531 96 in 1868, and $1,116,102 66 in 1867. The cost of oil, waste and tallow per mile run, has been 0.73 cents; of fuel, 6.56 cents. Av. miles run to a pint oil, 14.37; to a ton of coal, 37.07.

The company have 85 passenger, 1 officers', 1 pay, 41 baggage, mail and express, 13 sleeping, 2,481 grain, 50 Blue Line, 320 stock, 319 flat, 1,019 coal, 2 powder, 4 derrick, 3 tool and 2 tank cars, and 4 large and 10 small snow plows. There have been added to the rolling stock 4 sleeping, 2 baggage and smokers', 224 grain and 150 flat cars. 6 passenger and 102 freight cars were rebuilt. 4,790 new wheels were used in repairs of cars during the year. The cost of repairing passenger cars has been 4.19 cents, and of freight cars 0.67 cents per mile run.

The total number of passengers carried was 1,399,416—an increase over the previous year of 86,785. Number carried one mile, 52,306,016—an increase of 5,678,195. Av. number of miles traveled by each passenger, 38.09. Av. fare of each passenger, $1 50.28. Revenue per mile of road, $2,178 13.

Tons of freight transported 1,601,972—an increase of 162,297. Tons carried one mile, 253,336,118—an increase of 27,482,708. Tons carried one mile north, 131,855,431; do., south, 121,480,687. Tons of local freight carried one mile, 242,140,616; do., through do., 11,195,502. Av. distance each ton was carried 158.14 miles. Av. revenue per ton, $3 93.88. Revenue per mile of road, $6,535 33.64.

The amount of expenditures in road department, has been for operation, $1,607,773 87 and permanent, $441,959 53. There were used in repairs of road, 341,179 cross ties, 591,720 lbs. spike, 21,262 chairs, 60,609 fish plates and bolts, 38,198 bars of new iron, 45,383 bars of repaired iron, 10,921 bars of old iron and 1,073 bars of steel and steel headed rail. The length of track relaid was 183.46 miles.

President.—John M. Douglass.

Directors.—His Excellency, John M. Palmer, Governor of Illinois, Ex Officio. Thomas E. Walker, Wilson G. Hunt, Jonathan Sturges, until May, 1870; R. Daniel Wolterbeek, Cunningham Borthwick, H. H. Hunnewell, until May 1871; Abram S. Hewitt, William Tracy, W. H. Osborn, until May, 1872; Henry Chauncey, George Bliss, John M. Douglas, until May, 1873.

Gen'l Superintendent.—Marvin Hughitt.

Treasurer.—Thomas E. Walker.

Land Commissioner.—John B. Calhoun.

Homogeneous Rails.

The Chief Engineer of the Allegheny Valley Railroad, H. Blackstone, Esq., in his report to the company, makes the following comparison between iron and steel rails:

In regard to the durability of iron rails I have never seen a rail perfectly homogeneous worn out; neither have I ever heard any civil engineer say that he had, and I have frequently asked the question. In speaking of these things to a prominent iron manufacturer of this city, he kindly proposed to furnish to this company a couple of iron rails made from his common merchant bar. These were received and laid on the track in March 1868, and on the opposite side of the track were laid steel headed-rails, manufactured in Michigan. Both were laid at a point where it was supposed they would receive the roughest service. In less than six months some of the steel rails were given out, and shortly after they were lifted and Brady's Bend rails supplied. These were worn out and others supplied and worn out, while the two rails furnished by the party above referred to, remain in the track apparently little the worse of the service.

Steel Rails.

The President of the Baltimore and Ohio Railroad Company in his last annual report says:

The experience of the company in the use of steel rails has resulted very favorably. Steel rails laid in 1864, where the wear had been great, and frequent renewals of iron had been required, continue still in excellent condition. The great durability of steel, compared with iron rails, will make the comparative ultimate cost, in roads with heavy traffic, much in favor of the former. During the past year 2,717 tons of steel rails have been placed in our tracks, and arrangements have been made for a large additional quantity for the current year.

☞ The field work on the Martinsburg and Potomac railroad is expected to be completed to Martinsburg by the 10th of April; the proposals for construction ready by the 25th, and the contracts all made and the first spade put into the ground on the 1st of June next. Orders have been given for the immediate construction of the bridge across the Potomac to the point at which the location of the road will commence.

☞ The ordinance recently passed by the Baltimore City Council, and sanctioned by the Legislature of Maryland, authorizing the city to subscribe one million dollars to the stock of the Virginia Valley Railroad Company, and a loan to pay such subscription, has been ratified by a vote of the citizens.

Allegheny Valley Railroad.

At an adjourned meeting of the stockholders of this company, held in Pittsburg on the 24th ult., the annual reports of the Board of managers and officers was presented. From these we learn that the earnings of the road during the year ending January 31, 1870, were:

From passengers	$436,074 69
" freights	851,125 68
" express	7,200 00
" mail	6,585 00
" rents	2,375 87
" miscellaneous	1,415 78
	$1,204,777 02

And the expenses were:

Conducting transp.	$183,065 44	
Motive power	175,203 86	
Maintenance of way	180,456 73	
Maintenance of cars	38,138 56	
General expenses	116,987 75	
		693,852 84
Leaving net earnings		$510,924 68

The gross earnings of the year ending January 31, 1869, were $928,083 87; and the expenses, $682,863 69—leaving net earnings for that year, $245,219 68; showing an increase in gross earnings of $276,693 65, with an increase in expenses of only $10,988 65—the increase of net earnings being $265,705.

The total expenses were 57.6 per cent., including the general expenses which were 9.7 per cent. The actual expenses chargeable to transportation were 47.9 per cent. of the gross earnings.

The number of barrels of crude petroleum transported during the year was 726,800, against 564,667 the previous year—an increase of 161,433. Refined oil, 508,899 barrels, against 595,577 barrels in 1868-'69—decrease, 86,678. Bituminous coal northward, 81,895 tons—an increase over the previous year of 61,008 tons. Bituminous coal southward, 208,192 tons—a decrease of 5,800 tons. The entire tonnage both ways was 667,821 tons. The number of passengers carried was 465,338—an increase of 102,585. The increase in local freight earnings was $160,393 17; and in through freight earnings, $43,392 38—total, $203,785 55. The increase in local passenger traffic was $66,178 49; and in through passenger traffic, $6,352 64—total, $72,531 13.

Four new locomatives, four first class passenger coaches, one baggage car, and one mail car were purchased during the year. One first class locomotive was built in the Company's shop, and two more under way will be completed during the year. The Superintendent thinks that four new freight engines will be required this year to perform the large and increasing business of the company.

The President in his report says that a considerable sum will be required during the coming year for general purposes. The new bridge must be covered and some of those on the old part of the line will have to be rebuilt and others thoroughly strengthened; additional water stations and sidings are also necessary, and the long line of trestle work at Scrubgrass and Foster must be filled in.

The business of the road requires a double track between Pittsburgh and Hulton; its construction will be commenced early in the spring, and it should be extended to Freeport and still further northward as the finances of the company will permit.

The equipment of the road is in good order, but not adequate to the business, and a large increase will be necessary during the present year. One hundred and fifty freight cars have already been contracted for, and an additional number of passenger and freight cars and locomotives will be needed under the new arrangement for a through line between Pittsburgh and Buffalo.

The bonded and other indebtedness of the Company on the 31st of January, 1869, was as follows:

First mortgage bonds	$354,000 00
Second mortgage bonds	172,000 00
General mortgage	3,118,000 00
Floating debt	2,362,328 67
Bond for real estate	21,564 78
	$6,027,893 40

The bonded and other indebtedness on the 31st of January, 1870, was:

First mortgage	$146,000 00
Second mortgage	39,000 00
General mortgage	3,785,000 00
Bonds paid to the Commonwealth of Pennsylvania in exchange for Sunbury and Erie bonds	3,500,000 00
First mortgage bonds, Eastern Extension	59,000 00
Floating debt	531,113 77
Bonds for real estate	21,564 78
	$8,081,678 50

Increase of bonded debt, $3,885,000; decrease of floating debt, $1,831,214 90.

The 7 3-10 general mortgage bonds were issued and sold with the understanding that a portion of them would be retained in the hands of the Company equal in amount to the bonds of the first and second mortgage, and to be exchanged therefor. Up to the present time $429,000 in bonds have been thus exchanged, and $185,000 remain to be exchanged. It is presumed the holders of the remainder of the first and second mortgage will be glad to exchange them during the coming year.

The reduction of the floating debt, together with the surplus of expenditure over and above the gross receipts of the Company for the year 1869 was realized from the sale of the Sunbury & Erie bonds received from the Commonwealth of Pennsylvania.

The expenditures for construction during the year were $332,965 32.

The total length of the main track from Canal street, Pittsburg, to Venango City is 131.50 miles. The main track to connect with the Oil City and Allegheny River Railroad from the passenger station to the bridge is 1,100 feet; length of bridge, 676 feet; length of north approach, 1,090 feet, making 0.52 mile, which gives a total length of road of 132.02 miles. Including individual and company's sidings it is 160.42 miles.

The bridge over the Allegheny River was completed and first used for traffic on the 2d of February.

With the exception of one note of $8,000, not yet due, the personal liabilities of the managers, which at one time amounted to over a million and a half of dollars, in behalf of the company, have been paid off during the last fiscal year.

The President has succeeded in negotiating a contract with the Oil City and Allegheny River Railroad, the Buffalo, Corry and Pittsburg Railroad, and the Lake Shore and Michigan Southern Railroad, for the establishment of a through line of passengers and freight between Pittsburg and Buffalo without change of cars. In the transportation of freight it is believed this line will successfully compete with any other, and for passengers the beauty of its scenery on the Allegheny, the strange sights of the Oil Regions, through the heart of which it passes, the attractions of Chautauque Lake, which it strikes in Western New York; its equal rapidity of transit, and its advantages of being without change of cars, will cause it to be greatly preferred. The first through shipment from Buffalo arrived on the 19th of March.

The work on the eastern extension of the road, it is said, will be commenced early in the spring, and pushed vigorously.

The office of the company is at Pittsburg, Pa. The officers are: President, Wm. Phillips; General Superintendent, J. J. Lawrence; Assistant Superintendent, Thomas M. King; Chief Engineer, H. Blackstone; Treasurer, John Ballantine; Auditor, A. F. Rowland; Master Mechanic, George D. Glass.

☞ The Troy Board of Trade has appointed a committee to have a survey made of the proposed railroad between that city and Guilderland, to connect with the Albany and Susquehanna Railroad. The following gentlemen compose the committee: Wm. Kemp, Hannibal Green, Townsend Burden, Chester Griswold and Walter P. Warren.

☞ The engineers are now making their final survey for the route of the Western Maryland Railroad from Owings' Mills into the city of Baltimore, to the mouth of the proposed tunnel of the Baltimore and Potomac Railroad, on Kirby's Lane, at the junction of Winchester street. That end of the road is to be commenced forthwith, so so soon as the survey is completed.

Pennsylvania Railroad.

We gave in our issue of February 26th, the Report of the President of the Pennsylvania Railroad Company for the year ending December 31, 1869. The following is the

GENERAL ACCOUNT.

To capital stock	$33,493,112 50
First mort. six per cent. bonds, due in 1880	4,972,000 00
Second mort. six per cent. bonds, due in 1875	4,866,840 00
General mort. six per cent. bonds, due in 1910	6,826,500 00
Lien of the State upon the Public Works between Philadelphia and Pittsburg, purchased by this company, bearing 5 per cent. interest, payable in annual instalments of $460,000, applicable first to the interest, and the remainder to principal—original amount of which was $7,500,000	6,082,588 14
Short bonds or debentures, six per cent., due in 1871	1,114,224 00
Mortgages and ground rents, at six per ct., remaining on real estate purchased	102,809 52
Bills and accounts payable, including dividend due to stockholders unpaid	5,573,323 10
Contingent fund	1,000,000 00
Balance	998,955 46
	$65,030,302 52

By balance standing on books of the company for the construction of the railway between Harrisburg and Pittsburg, including branches to Indiana and Hollidaysburg (in all 276 miles); also for cost of stations, warehouses, shops and shop machinery on the whole road from Philadelphia to Pittsburg		$14,087,741 13
Balance standing on books of the company for the purchase of the Philadelphia and Columbia Railroad		5,375,733 43
Balance standing to the debit of equipment of road, consisting of 608 locomotives, 294 passenger cars, 123 baggage, mail and express cars, 9,200 freight cars, and 1,054 road cars		6,182,448 17
Cost of real estate of company and telegraph line		4,271,506 88
Extension of Pennsylvania Railroad to south bank of the Monongahela, and to the Delaware river, including wharves and grain elevator		2,475,437 10
15,365 shares Harrisburg and Lancaster Railroad stock		768,250 00
25,547 shares Connecting railway stock		1,277,350 00
31,686 shares capital stock of the Philadelphia and Erie Railroad Company, exclusive of 48,000 shares of preferred 8 p. ct. stock in the sinking fund		779,637 26
Stock and bonds upon the line of railway between Pittsburg and Columbus, Ohio, as standing upon the books of the company at this date		7,676,695 31
70,231 shares of capital stock of the Pennsylvania Canal Company		1,101,156 00
Amount of bonds and stock of municipal and other railroad corporations		6,019,221 01
Cost of bonds and stocks in the sinking fund, to pay Pennsylvania Railroad second mortg'ge bonds, and the bonds of the Harrisburg and Lancaster Railroad Company		2,433,432 35
Amount of fuel and materials on hand for repairs to locomotives, cars, and maintenance of way, &c., on the Pennsylvania Railroad		1,899,428 49
Amount advanced to pay for fuel and materials on hand for repairs to locomotives and cars, and maintenance of way for the Philadelphia and Erie Railroad		407,854 00
Amount advanced to operate the Philadelphia and Erie Railroad.		538,837 50
Amount of bills and accounts receivable, and amount due from other railroads		8,086,147 79
Balance in hands of agents		804,182 36
Balance in hands of treasurer		845,743 74
		$65,030,302 52

THOS. T. FIRTH, *Treasurer.*

Philadelphia, December 31, 1869.

Columbia and Port Deposit Railroad.

The Columbia (Pa.) and Port Deposit (Md.) Railroad has been placed under contract to the Pennsylvania line, from the point to where it is completed above Port Deposit. The distance to be graded in Maryland is about six miles, which the contract requires to be finished by September next. Messrs. J. J. Heckart, John Keaveney and Joseph W. Reynolds, of Port Deposit, are the parties who have taken the contract, and will commence work in a few days. Twelve miles of the road, in Pennsylvania, will be put under contract next month, and the prospect seems favorable for the completion of the road in 1871.

Pittsburg, Ft. Wayne & Chicago Railway.

The annual meeting of the stockholders of this company was held in Pittsburg on the 28d ult. The meeting was organized with Col. Wm. Thaw as President and F. M. Hutchinson, Esq., as Secretary.

Gen. Cass, President of the company, presented the annual report of the Board of Directors, from which we extract the following:

The report which your Board makes to you to-day is of a character different from any heretofore submitted. The duties and responsibilities of your Board are very much diminished, and wholly changed, and your relations to your property are correspondingly modified. The lease of your railway and property, which was executed on the 7th of June last, approved by you on the 24th of June, was carried into practical execution on the 1st of July, following, by a surrender of the same to the Pennsylvania Railroad Company, and by that company received according to the terms of the lease, and since managed and controlled exclusively by that company.

During the six months of the lease the gross earnings were as follows:

Earnings of main line		$3,950,409 10
Sixty per cent. of the earnings of New Castle Branch		73,542 53
Sixty per cent. of earnings of Lawrence Branch		86,078 07
Sixty per cent. of earnings of Akron Branch		79,908 77
Interest due from Cleveland and Pittsburg Railroad Co		6,943 75
		$4,146,882 22
Expenses of main line	$2,143,145 62	
Expenses of New Castle Branch	38,476 83	
Expenses of Lawrence Branch	27,994 35	
Expenses of Akron Br.	68,261 33	
		2,277,878 18
Leaving a profit of		$1,869,004 09
Amount paid and payable by the terms of the lease	$1,283,956 80	
Due Cleveland & Pittsburg Railroad Company in division of earnings	29,369 75	
		1,313,326 55
Excess of net earnings—being an apparent profit for the first six months of the lease		$555,677 54

The whole of this amount, excepting $36,829 50 was expended on the road for construction, equipment and extraordinary expenses, $78,913 having been expended in ten new locomotives, and $140,167 22 in new freight cars, &c., &c.

The total business of the six months of the lease was $186,215 15 less than the corresponding months of last year; but the diminished expenses made a net result of $152,850 07 in favor of the six months over the corresponding period of last year. The diminished receipts were caused by a general depression of business in part, and in part by the policy of the lessee confining their general manager to the Chicago and Northwestern business, (a part of which was divided with the Columbus route,) and throwing the western and southwestern business on other leased lines to the exclusion of your road. The general fall on the price of materials and labor, and the diminished expenses, by reason of regulating competition between parallel lines west from Pittsburgh, will account for the diminished cost of operating the road, during the past six months, than during the corresponding six months of the year previous. In this connection, it is right to add that the general manager, (J. N. McCullough, Esq.,) on behalf of the lessee, managed the property with zeal, ability, and judgment, looking to the permenent interest of the property, as well as to immediate favorable results for the lessee.

The report announces the contract made with the Grand Rapids and Indiana Railroad Company, by which the building of that line is more certain, and its large business thereby secured for the road of this company. It also says: On the application of the lessees of your road, and without prejudice to the lease, your Board has sold the Akron Branch Road, so called, to a new organization called the Cleveland, Mount Vernon and Delaware Railroad Company, for $1,100,000 of the stock of that company, said company assuming to pay the $153,000 outstanding bonds against the Akron Branch road.

The earnings and expenses for the six months terminating June 30, 1869, were as follows:

Earnings main line		$3,965,007 68
Earnings New Castle Branch		73,272 52
Earnings Lawrence Branch		5,628,95
Interest from C. & P. R. R. Co		6,943 75
Total		$4,050,852 85
Expenses main line	$2,690,442 14	
Expenses New Castle Branch	43,946 18	
		2,743,388 32
Income for six months		$1,316,464 53
Which was appropriated as follows:		
Interest on bonds		$458,673 04
Dividend and taxes		605,134 20
The C. & P. R. R. Co. on division of earnings		124,686 62
Amount to income account		127,970 67
		$1,316,464 53

The earnings for the first six months of last year exceeded those of the preceding year by $195,220 18, being a fraction over five per cent., and the earnings for the whole year exceeded the preceding year by $15,832 73, a fraction less than two per cent. A faithful administration of the property which includes the bringing upon it all the business legitimately due to this railway, cannot but ensure to lessee a reasonable profit after making all the payments required under the lease. The report was received and approved.

After the report had been read and acted upon, the stockholders went into an election for three Directors to serve in place of those whose term of service expired by law. Messrs. Pliny Hoagland, of Indiana, R. R. Springer, of Ohio, and Springer Harbaugh, of Pennsylvania, were chosen.

Classification of Directors.

The following is a copy of the Act recently passed by the Legislature of Wisconsin, "to provide for the classification and election of Railroad Directors:"

SECTION 1. The terms of office of the directors of any railroad or railway company of the State may be extended in the manner herein provided.

SEC. 2. Any railroad or railway company organized and doing business under any law or laws of this State may, by resolution of its board of directors, divide its board of directors into three classes, numbered consecutively, each of which shall be composed, as nearly as may be, of one-third of the directors; the term of office of the first class to expire on the day of the annual election of said company then next ensuing; the second class one year thereafter, and the third class two years thereafter. At each annual election after such classification, the stockholders of such company shall elect, for a term of three years, a number of directors equal to the number in the class whose term expires on the day of such election; all other vacancies to be filled in accordance with the by-laws of said company.

SEC. 3. This act shall be a public act, to take effect and be in force from and after its passage

Approved March 16, 1870.

American Railroad Journal.

Saturday, April 2, 1870.

Stock Exchange and Money Market.

There has been undiminished ease in Money. The supply has been in excess of the comparatively moderate calls of borrowers, for both speculative and mercantile purposes. The city banks reported, in their last weekly statement, very slight changes in their averages; the most important having been an addition of $804,886 to their loan and discount line, and of about one-fourth of a million to their specie reserve. They gained in deposits, $93,890 and lost of legal tender notes, $89,357. Their daily exchanges through the week averaged much less than during either of the two weeks preceding. The U. S. Sub-Treasury had its general balance enlarged over a million, chiefly in the form of coin reserve. The current rates for Money at call were 4@6 per cent.; and in the discount form, 7@10 per cent. per annum.

The specie reserve of the city banks according to the latest return is $32,271,252, against $12,073,722 same time last year. The city bank deposits are now $208,910,713, against $180,113,910 week ending March 27, 1869. The legal tender reserve amounts to $52,685,063, against $50,555,103 same time last year. The circulation now stands at $33,674,394, against $24,777,814 same time last year. The loans are now $270,807,768, against $268,909,589 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged about $80,208,839 a day, against a daily average of $87,513,258 the preceding week, and $91,336,000 the week ending with Mar. 13, 1870. The current week's exchanges average about 85 millions a day. The city banks, last week, reported a gain of $256,505 of specie, and of $93,890 of deposits, with a loss of $89,357 of legal tender notes. They increased their loans, $804,086; and reduced their circulation, $25,169.

National Bank notes to the amount of $287,840 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $322,362,531, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $22,748,307, leaving, with the existing 1,614 banks, (having an aggregate capital of $426,399,151,) an actual circulation at this date, of $299,614,224. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,392,650; and for the public deposits, $17,139,500—making a total of $359,532,150. The Treasury Department last week redeemed and destroyed $487,159 of worn and mutilated fractional currency, and issued $454,933 of new.

The U. S. Sub-Treasury receipts, week ending with March 26, were $3,897,968 in coin, (including $2,626,000 from customs duties,) and $3,510,147 in currency; payments, $2,708,246 in coin, (including $227,437 of coin interest,) and $3,522,609 in currency; balance at the close of the week, $82,741,585 (including $77,159,538, of coin, and $4,432,895 of currency,) against $81,653,246 at the close of the preceding week, showing an increase of $1,088,339. The business of the Office on the opening day of the current week, was as follows: On Monday, receipts, $679,699 in coin, (including $624,968 from customs,) and $319,053 in currency; payments, $48,334 in coin, (including $41,000 of coin interest,) and $327,340 in currency. On Tuesday, receipts, $476,150 in coin (including $476,000 from customs), and $220,997 in currency; payments, $491,878 in coin (including $37,000 of coin interest and $422,860 of canceled coin certificates) and $378,393 of currency. The balance at the close of business on Tuesday stood at $82,100,437, (including $4,230,033 of currency, and $77,775,174 of coin,) against $81,059,987 a week previous; and $81,303,476 on March 11, 1870. The aggregate receipts of the office in February were $38,237,062, including $11,951,925 from customs; aggregate payments, $35,331,006 including $1,749,000 of coin interest; balance at the close of the month, $83,673,026, against $80,766,970 at the close of January.

The U. S. Sub Treasurer retired, last week, $2,415,059 of coin certificates, received for customs.

The U. S. Sub-Treasury general balance on Thursday morning was $82,369,916.

Government revenues have been yielding moderately, since our last. The excises, during the week

yielded about three millions; customs at the port of New York, $2,551,059, and at the outports about $839,000 (in coin) more, making the grand total income for the week equal to about $6,814,000 in currency. The receipts from excises, thus far in the current fiscal year, commencing with July 1, 1869, have been 126 millions. It has been estimated that the total income of the Government from all sources in March will reach twenty-five millions.

The Gold speculation has been moderately active, since our last, and the range of the price has been from 111¼@112⅝, leaving off on Wednesday at 112⅛. There has been a less urgent inquiry for coin for custom house purposes, as well as for export. The anticipated failure of the funding project now before Congress tended to strengthen the confidence of operators toward the close. Government has already made public its financial programme for April. It will sell two millions of Gold, one on the 6th, and another on the 20th April; while it will buy in, four millions of Five Twenties, as follows: Thursday, April 7—$1,000,000, special fund; Wednesday, April 13—$1,000,000, sinking fund; Thursday April 21—$1,000,000, special fund; Wednesday, April 27—$1,000,000, sinking fund. On Wednesday, Government closed its bond purchase for March, by buying in a million of Five-Twenties at from 106 44@107 45, out of an offreing of only $1,185,000. On Thursday it disposed of a million of Gold at about the current rates in the open market.

The coin balance of the U. S. Sub-Treasury on Thursday morning was $78,269,993.

The customs revenue of the port on Wednesday was $408,000.

The coin interest payments of the Sub-Treasury on Wednesday were $27,027.

The customs demand for Gold last week, averaged $437,667 a day; thus far, this week, it has averaged $550,000 a day, or equal to a weekly aggregate of $3,300,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $91,808, and since Jan. 1 1870, $3,931,813, against $3,611,712 same time in 1869. The total customs revenue of the Government, in coin, at this port, thus far in the current fiscal year, commencing with July 1, 1869, has been $97,032,495, against $93,833,860 in 1868–'69.

The customs revenue at the port of San Francisco, from Jan. 1 to March 18th, was $1,504,392, against $1,543,675 same time last year.

The exports of specie, from this port, last week, were $118,091, against $1,357,163 same week last year; total, since July 1, 1869, $23,036,923, against $30,535,028 same time preceding fiscal year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $227,437, and since July 1, 1869, $66,665,828, against $66,714,383 in 1868–'69.

The specie exports from San Francisco, from Jan. 1 to March 18, were $8,611,743, against $8,830,392 same time last year.

Foreign Exchange has been in moderate supply and fair request at rather variable rates. Bankers' prime sixty day bills on London closed steadily on Wednesday at 108¼@108⅝, and on Paris to 5.25@5.22½; sight bills on London to 108¾@109⅛, and on Paris to 5.21¼c.@5.20. The offerings of produce bills have been more extensive. The week's exports of domestic produce have been to the currency value of $3,559,558, making the total since July 1, 1869, $153,480,724, against $119,834,618 same time preceding fiscal year.

Government securities have been in more general demand, especially toward the close, and prices have been gaining strength, since the Treasury programme for April was made public. The inquiry from investment buyers showed a decided improvement on Tuesday and Wednesday, and with very moderate offerings of bonds reported, a more confident temper was noted. The Government purchases on Wednesday finished the Treasury bond operations for March. In April, four millions of Five-Twenties will be bought in, for the Sinking and special funds. A further handsome reduction of the public debt in March was anticipated on Wednesday. The general market closed with a decidedly upward tendency for the coin-bearing obligations.

The currency sixes closed exceptionally weak, under rather freer offerings.

U. S. sixes of 1881 closed here at 114¼@114⅛; U. S. Five-twenties of 1862, 111¼@111½; U. S. Five twenties of 1864 at 109⅞@110; U. S. Five-twenties of 1865 at 110⅝@110¾; U. S. Five-twenties of 1865, consolidated, 108¾@108⅞; U. S. Five-twenties of 1867, 109¾@109⅞; U. S. Five-twenties of 1868, 109¾@110; U. S. Ten-forties at 106¼@106½, ex the March coupon; U. S. Six per cent. currency bonds, 112@112¼.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	March 16.	March 23.	March 30.

Central Pacific Sixes closed on Wednesday at Frankfort at 80½.

State bonds have been in much more general demand, closing strong and buoyant. There has been an improved inquiry for Railway Bonds and Mortgages at the ruling prices. Central Pacific Sixes closed at 92@92½. The new Chesapeake and Ohio First Mortgage Thirty year Bonds were selling rapidly at 90 per cent. and accrued interest in currency. This new loan is based on a mortgage covering over 437 miles of main line, equipment, &c., for which there is ample immediately available security in actually completed road and work done.

Railway and miscellaneous share property has been rather more sought after, chiefly on speculative account, at generally firmer prices, closing strong and buoyant, in most instances.

General business has been on a moderate scale, and prices have been fairly supported. Middling upland cotton closed on Wednesday at 22¾cts. per lb. The stock of cotton now here is given at about 50,000 bales. The receipts at the port this week, have averaged about 1,900 bales a day. The receipts at all the ports, thus far in the year commencing with Sept. 1, 1869, have been 2,321,350 bales, against 1,753,950 bales in 1868–'9; exports, same time 1,494,000 bales, against 959,325 bales same time in 1868–'9; stock on hand at latest dates, 443,750 bales, against 393,300 bales same date 1869. The exports of domestic cotton goods from this port, since Jan. 1, 1870, have been 3,316 pkgs., against 6,439 pkgs., same time in 1869. From Boston, 882 pkgs. in 1870, against 3,050 pkgs. same time in 1869.

There has been rather more animation in the line of foreign goods at essentially unchanged prices. The week's imports of foreign dry goods were to the specie value of $2,593,455; and of foreign merchandise, $4,181,605, making a total of $6,721,060, against $7,802,546 same week last year.

At the auction sale of Scranton Coal on Wednesday, 80,000 tons were sold at higher prices, ranging from 4 25@5 50, as against $3 87½@$5 00 in February, per ton of 2240 lbs., deliverable at Elizabethport, N. J.

At the Live Stock markets, this week, Beeves have been in less demand, at from 10@17c., per lb.; week's receipts, 6,274. Milch cows continue dull, at $40@$100 each, receipts, 146. Veal calves have been in moderate request, and quoted easier at from 8@11¾ c. per lb.; receipts, 1,225. Sheep in less demand at from 6½@9¼c.; lambs at 20@24 c. per lb.; receipts, 20,236. Swine inactive at 9½@10 c. per lb., all live weight; receipts, 10,728.

The ocean freight market has shown much irregularity, and the business has not been remarkably extensive. For Liverpool we quote flour at 1s. 3d. by sail, and 1s. 9@2s. 0d. by steamer, per bbl.; grain at 3½d. by sail, and 3½@4¾d. by steamer, per bushel; cotton at ⅛@$\frac{3}{16}$d. by sail, and ¼d. by steamer per lb.; and heavy goods 12s. 6d.@25s. by sail, and 15s.@35s. by steamer, per ton. Total number of vessels in port on Wednesday, 418.

The balance in the Sub-Treasury on Wednesday was $82,869,916 83.

The following will show the exports (exclusive of specie) from New York to foreign ports for the week ending March 29th, and since the beginning of the year:

	1869.	1870.
For the week	$3,085,895	$3,559,558
Previously reported	34,017,757	37,826,325
Since Jan. 1	$37,103,152	$41,385,883

The imports for the week ending March 26th, and since the beginning of the year, have been as follows:

	1869.	1870.
Dry goods	$1,984,295	$2,539,455
Gen. merchandise	5,818,251	4,181,605
Total for the week	$7,802,546	$6,721,060
Previously reported	61,882,316	61,212,856
Since January 1	$69,684,862	$67,933,916

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—St. Louis, Jacksonville and Chicago 1st mort., 92½; Buffalo, New York and Erie 1st mort., 91; Central of New Jersey new bonds, 99; do., 2d mort., 103; Ohio and Miss. consol. bonds, 84¾; Toledo, Peoria and Warsaw 1st mort., W. ☞ The Snow Hill (Md) *Shield* says that the Worcester Railroad is to be speedily commenced. It was so decided by the Board of Directors at their meeting in Snow Hill on Tuesday last, and which conclusion will meet with general approval. Of course a few weeks must elapse before the grading is undertaken, but the arrangements are being rapidly made for the commencem nt of the work.

☞ The rails have been laid on the Winchester and Strasburg railroad to Cedar Creek, across which a temporary tressling is being built. Beyond this, to the junction with the Manassas Gap railroad, the road bed is ready for the rails, which will be laid, and the road ready for the trains by the 1st of April.

Quincy Mining Co.

From the Report of the Directors of this company for the year ending December 31, 1869, we learn that the shipments of the season amounted to 2,878,128 lbs. of mineral, which has been smelted at Detroit, and yielding nearly 84 per cent, or 2,417,365 lbs. of ingot copper. The product of the mine for the year, as prepared for shipment, was 2,932,054 lbs., or 1466 tons of mineral, of the following descriptions, namely:—Stamp copper, 2,816,900 lbs.; mass copper, 115,154 lbs.; total, 2,932,054 lbs.;—for which, estimating only the product of December, left over at the mine, and the small amount of copper on hand unsold, at 18½ and 21c. per lb., has been realized the gross sum of $528,493 10; in addition to which there has been realized from sale of silver $588 77—making the gross earnings $529,081 87.

The expenses of the year are as follows:—Running expenses $336,995 23; building and construction account $5,847 03; other expenses $60,731 12; total $403,573 88—which, deducted from gross earnings, leaves as profits $125,508 49. There has also been realized during the year, from interest on loans, $3,178 70, giving as net results of year's business $128,687 19.

The balance of assets on hand, as of date January 1, 1869, was $218,980 28; earnings of 1869 $128,687 19; total, $347,667 47. Deduct dividend paid March 29, 1869, $40,000; realized less than estimate $1,764 36; total $41,764 36;—making balance of assets on January 1, 1870, $305,903 11.

There is also in addition the special reserve fund of fifty thousand dollars set apart for the endowment of an insurance and repairs account, and fully secured by mineral, mining supplies and materials, worth to the company at least twice that amount.

From the net earnings of the year the directors have declared a dividend of $120,000, or six dollars per share, payable March 10, a return which must be satisfactory to the stockholders, leaving as it does the accumulated surplus unimpaired, and sufficiently large to carry on all the operations of the company in the most economical manner.

Chicago and Northwestern R. R.

The *Mining Journal*, published at Marquette, Mich., says that the Chicago and Northwestern Railroad Company have decided to extend their road north from Green Bay immediately, and will put a large force of men at work as soon as the snow disappears. They promise to have the cars running to Menominee by the 15th of July, thence to Escanaba at the earliest day practicable. We look forward to the time when trains will run over the Harvey branch direct to Marquette.

☞ *Herapath's Journal* says that £228,000 of the Second Equipment Mortgage bonds of the Grand Trunk Railway are to be immediately issued, which with the £42,500 already issued to the Buffalo and Lake Huron Company will make £270,500 of the whole £500,000 Second Equipment bonds, authorized three years ago. This will leave for issue only £229,500 at some distant period. The bonds bear six per cent interest, and rank next to the First Equipment bonds, and before the First Preference bonds.

New York and Hempstead R. R.

This road, the charter for which has just been obtained under the General Railroad Law, starts from the south of Mr. A. T. Stewart's Hempstead Plains purchase, running through the village of Hempstead, crossing the South Side Railroad at Valley Stream, thence along the southerly part of the village of Jamaica, through Flatbush and New Utrecht, striking New York harbor at Bay Ridge dock, thence by ferry to the foot of Wall street, New York. Five miles will be completed the coming summer, bringing it to where it intersects the South Side Railroad.

Lake Superior Iron Mining.

We have received from A. P. SWINEFORD, Esq., Editor of the *Mining Journal*, Marquette, Michigan, a copy of a pamphlet, compiled by himself, entitled "The Lake Superior Iron District—History of its Mines and Furnaces." The pamphlet contains 92 pages, with an Appendix of 16 pages, and a map of the Lake Superior Iron Region, showing Mines, Furnaces, Railroads, etc. From pages 83, 84 and 85, we copy the following tabular statements:

The following table exhibits, in gross and net tons, the amount of ore shipped from the mines in 1869, and the value when loaded in the cars:

Mine.	Gross Tons.	Net Tons.	Value.
Jackson	128,245	143,635	$641,225
New York	67,698	75,872	338,490
Cleveland	111,897	125,325	559,485
Lake Superior	131,843	147,109	656,715
Washington	58,462	64,979	292,310
Lake Angeline	35,432	39,684	177,160
Barnum	33,484	37,503	167,420
Edwards	19,151	21,450	95,755
Champion	19,458	21,793	97,290
New England	12,632	14,148	63,160
Foster	12,981	14,539	64,905
Marquette	2,051	2,798	10,255
Cascade	404	452	2,020
Total	633,238	709,687	$3,166,190

The following table exhibits the total product of each mine during the whole of the time they have been worked:

Mine.	Gross Tons.
Jackson	823,376
Cleveland	597,112
Marquette	87,872
Lake Superior	766,220
New York	210,640
Lake Angeline	173,414
Edwards	44,282
Iron Mountain	16,594
Barnum	47,864
Foster	18,981
New England	33,114
Washington	149,591
Champion	25,713
Cascade	452
Total	2,944,677

The following table exhibits the total product of all the furnaces for the year 1869, in gross tons, together with the value:

Name of Furnace.	Gross Tons.	Value.
Pioneer	5,494	$267,230
Collins	3,416	153,720
Michigan	5,713	285,085
Greenwood	4,480	201,600
Bancroft	3,407	153,315
Champion	5,560	349,200
Deer Lake	2,574	115,830
Jackson	4,470	201,500
Schoolcraft	3,013	135,540
Marquette & Pacific (bar iron)	377	39,575
Total	39,504	$1,802,245

The following table exhibits the total product of the Lake Superior furnaces since the first iron was made in 1858:

Furnace.	Gross tons.
Pioneer	43,566
Northern	15,068
Collins	29,244
Michigan	14,026
Greenwood	16,698
Morgan	20,891
Bancroft	26,441
Champion	9,842
Jackson	9,016
Schoolcraft	4,748
Deer Lake	3,024
Marquette and Pacific (bar iron)	377
Total	194,162

The following is a comparative statement of the production of ore and pig iron in this district from 1856 to 1869, inclusive:

Year.	Iron Ore.	Pig Iron.	Ore & Pig.	Value.
1856	7,000	.....	7,000	$28,000
1857	21,000	.....	21,000	60,000
1858	31,035	1,629	32,661	249,202
1859	65,679	7,258	72,937	575,529
1860	116,908	5,660	122,658	736,496
1861	45,430	7,970	53,400	419,501
1862	115,721	8,590	124,311	984,977
1863	185,257	9,813	195,070	1,416,935
1864	235,123	13,832	248,955	1,867,215
1865	196,256	12,283	207,539	1,590,430
1866	296,972	18,487	315,309	2,405,960
1867	466,076	30,911	496,987	3,475,820
1868	507,813	38,246	546,059	3,992,413
1869	633,238	39,003	672,241	4,968,435
Total	2,915,468	394,162	3,119,630	$22,769,713

All the ore and pig iron shipped was carried over the two railroads to Marquette and Escanaba. The relative amounts carried over each line was as follows:

Iron Ore:	Net tons.
Chicago and Northwestern Railway to Escanaba	367,833
Marquette and Ontonagon Railroad to Marquette	341,554
In favor of Escanaba	26,269

Pig Iron:	Gross tons.
Marquette and Ontonagon Railroad to Marquette	21,231
Chicago and Northwestern Railway to Escanaba	11,000
In favor of Marquette	10,231

New Jersey Western R. R.

A very important document has just been recorded at the office of the County Register, being no less than a three million dollar mortgage, on which three thousand dollars in revenue stamps are affixed. The mortgage is given to Theodore F. Randolph and Benjamin G. Clarke, as security for the payment of its bonds by the New Jersey Western Railroad, commonly known as the Peapack. The company are to issue three thousand bonds, each of 1,000, to be paid in gold on the first of May, 1900, and bearing interest at seven per cent., payable semi-annually.

The mortgage covers the road from "its easterly terminus at the City of Newark to its westerly terminus in Pennsylvania," and is signed by John H. Lyon, President of the company, and Beverly C. Sanders, its secretary. From the instrument it appears that the road is to have a terminus in this city, thus opening another route to the West from Newark. This fact is not generally known, it having been thought that Elizabeth would be the favored spot. The knowing ones say that the road will enter Newark between Clinton and Springfield avenues.—*Newark Courier.*

Narrow Gauge Railways.

Many persons in England are apt to suppose that we have come to the end of railway extension. Still, those who are acquainted with the demand, must be aware that we are speaking literally when we say that railways are as yet in there infancy. There is an enormous demand for them in India, for instance; and yet every man of common sense must admit that, judging by all English examples, it is perfect madness to construct them on the received system, which means ruinous expenditure and dead loss.

It may be well to begin by reminding our readers that in October last (the 19th and 20th) we gave a pretty full account of what is known as the Fairlie system of railway working—a system by which lines of the lightest construction and very narrow gauge may accomplish work hitherto deemed within the means only of lines of ponderous construction and broad gauge, and by which also the standard lines may either partly diminish expenses, or, without additional cost, well nigh double their carrying capacity. The characteristics of the system will appear in the sequel; for the present we proceed to state that Mr. Power, the vice-chairman of the Porti and Tiflis Railway Company (a railway of 300 versts in the Caucasus), and Mr. Crawley, the contractor for its constructions, were so struck with the merits of the Fairlie system, that they strongly recommended its adoption to the Russian Government, not only for the line prepared in the Caucasus, but also for all lines throughout that vast empire, where railways are of prime necessity, and where now, according to the new plans, five miles can be provided at a cost which was swallowed up in three miles, according to the old one. The recommendation carried the greater weight, inasmuch as the works of the Porti and Tiflis Railway were far advanced, and on a length of 15 versts the rails are actually laid down. The proposition, therefore, was that the Russian Government would find their advantage, even on these conditions, of changing the plans on which so much work had been expended, taking up the rails which have been laid down, and constructing the line on a gauge of 2 ft. 6 in., or exactly half the standard Russian gauge. The Minister for Public Works, Count Bobrinskoy seized upon the idea. Mr. Fairlie went to St. Petersburg to explain his scheme in detail; and the result of all is that an Imperial Commission has been sent over to this country to inspect the actual working of the system in various places, but chiefly on a wonderful little railway of two-foot gauge.

The chief of the Commission is Count Alexis Bobrinskoy, cousin to the Minister of Public Works. He is accompanied by a considerable staff of engineers, foremost among whom may be mentioned Professor Saloff, of the Russian Imperial Institute; and Mr. Roehrberg, the manager of the most successful railway in Russia; and by personal friends, as Count Zamoyski and Count Alexander Berg, who take an interest in the question of railways. At the same time Mr. Fairlie offered to the Indian Government the opportunity of witnessing the experiments to be instituted for the Russian Commissioners; and they, being themselves anxious for the means of improving and economizing their own railway system, at once resolved to take advantage of the offer. They appointed a Commission, consisting of Lieutenant-General Sir William Baker, R. E., and a member of the Council of India; Mr. Thornton, Secretary of the Public Works Department in the India-office; and Mr. Danvers, Government Director of Indian Railway Companies, to accompany the party. Captain Tyler also, the Government Inspector of Railways, who has already reported favorably on the Festiniog Railway of two foot gauge, attended on behalf of the Board of Trade, and Mr. Phil, Chief Engineer of Railways in Norway, was present on the part of the Norwegian Government. Besides these gentlemen, who went to witness the trials officially, others took an interest in the various proceedings in a private capacity; chief among them being the Duke of Sutherland and Count Bela Szechenyi. The Duke took

an especial interest in the inquiry, as he is not only a director of the North Western Railway Company, but is himself the proprietor of a considerable length of railway on his Sutherlandshire estate.

The party thus constituted started off on Thursday, and proceeded by Shrewsbury into Wales. At Portmadoc is the terminus of the line known as the Festiniog Railway, of two foot gauge (really 1 foot 11½ inches), which was the principal subject of investigation.

The Festiniog Railway, which is pronounced by no less authority than Captain Tyler, the Inspector of Railways, to be the most instructive line in the three kingdoms, and which seems destined by its success to give a new impulse to railway engineering, is itself one of the oldest in existence. The Act for it was obtained in 1832, but in the first instance it was constructed only for horse traction. It is a single line, 13¼ miles in length, with a branch of one mile connecting the slate quarries of Festiniog with the quays of Portmadoc. The terminus at Festiniog has 700 feet of elevation above that of Portmadoc, the average gradient being one in 92, which is enough to secure the descent of the trains on the return journey from Festiniog to Portmadoc by the impetus of gravitation. The line runs through a rude, rocky country, and has to adapt itself to an endless variety of curves along the contour of the hills, so that a train of any length has frequently to wriggle in serpentine fashion along two or three reverse curves, some of them sharp enough—the radius being 2½ chains. On these curves the cant or super-elevation of the outer rails is never more than three inches. The line, in the old days when it was worked by horses, was originally laid with rails of 16 lbs. to the yard. When, about eight years ago, it was adapted to the locomotive, it was fitted with rails of 3 lb. to the yard, most of which have been in use ever since. These, however, were found too light for the work, and are now being replaced by double-headed rails of 48½ lbs. to the yard. The wheels of the carriage being less than two feet apart, it is found convenient to arrange most of those for passengers after the fashion of an Irish car, with footboard overhanging the wheels. In this way the carriages are so low hung, and even carriages of the ordinary build are so near the ground in consequence of the small diameter of the wheels, that the expense of platforms at the stations is avoided. The whole expense of constructing and reconstructing the line, including tunnels, one of them 700 yards in length, with branch lines to the slate company's inclined planes and the quays at Portmadoc—in all 14 miles, has been 75,000*l.*, or at the rate of 5,378*l.* per mile. The value of the rolling stock on the line is 28,000*l.*, or at the rate of 2 000*l.* a mile. And now comes the most important point of all, which is that the original capital of the company is 36,185*l.*, and that all the extra money which has been laid out on the line has been taken from the revenue. In this sense, therefore, as the net revenue of the company is 10,622*l.*, it appears that the line yields a dividend of 29½ per cent. on the original capital. A sum of 50,000*l.*, however, paid out of revenue for impravements and reconstructions, has been capitalized—making the total capital 86,000*l.* In this sense the net revenue of the line yields a dividend of 12½ per cent. Which ever way the fact is to be stated, it is a most remarkable one, and must fill many a shareholders heart with envy.

The chief cause of this wonderful result is the narrowness of the gauge, which has enabled the Festiniog Company to economize in many ways. Thus, for example, the trucks for goods or minerals, even when fully loaded, have less of dead weight on a narrow than on a broad gauge. The best wagons on the standard gauge of 4 ft. 8½ in. are reckoned to weigh about 7 cwt., and to carry 12½ cwt. of pig iron or coal for every foot of their length, the dead weight being in the proportion of 56 to 100 of the *maximum* paying load, or 36 per cent. of the entire load. On the other hand, the wagon for a three feet gauge is calculated to weigh 2½ cwt., and to carry 8 cwt. for every foot on its length, the dead weight in this case being a very little over the proportion of 31 to 100 of the *maximum* paying load, and under 24 per cent. of the entire load. But there is still another point of view from which it can be shown that the wagons for goods and minerals on a line of narrow gauge are not so disproportionate in weight to the weight carried as they are on the broad gauge. In goods traffic it is well known that the dead weight of a train is enormous—something like 70 or 80 per cent. of the total weight hauled. If goods are to be delivered on a long line of railway, they are in this country arranged in many more wagons than are necessary to hold them, because a goods wagon cannot, like a passenger carriage, unload itself, and the train cannot wait till the unloading at a particular station is finished. It has to pass on, leaving the wagon of goods for that station behind; and it is more than probable that for this purpose the wagon has been but half or a quarter loaded. This becomes serious when wagons that weigh several tons carry but a fraction, often a small fraction, of their own weight. Such a source of expense disappears to a large extent on a narrow gauge line, where the wagons are comparatively small, and it is but one example of the saving which may be effected in the working of such a line in addition to the saving of cost of construction in the first instance.

This remark would hold good of the narrow gauge in itself and worked according to the ordinary system; but it is in the working of the Fairlie system that the greatest saving of all is effected, and it is mainly, indeed almost entirely, in consideration of the economy, the increased power, and the dimished wear and tear which this system implies that a much narrower gauge than that now in general use has begun to find favor in the eyes of practical men. It was long before the Festiniog Railway Company could get a line of such steep gradients, combined with sharp curves, which they could guarantee. At last Messrs. George England & Co. undertook the task, and supplied engines which worked with perfect success, and then people began to believe in a railway of narrow gauge. One of Mr. Fairlie's engines has now been built for the line—it is called the Little Wonder, as the other engines which have preceded it have been called the Welsh Pony, the Little Giant, as well as by other diminutive names—and the result has so surpassed expectation in the power it exerts, in its gentleness of action, in its economy of fuel, in its saving of the rails, and in its adaptation to troublesome curves and gradients, that for the first time practical men have discovered that a gauge of 2 ft. 6 in., or 3 ft. at the very utmost, is enough for the heaviest traffic. It is no secret that two engineers of eminence, Mr. Fowler and Mr. Fairlie, have pronounced a 3 ft. gauge to be ample for all the requirements of India, and there were men of position in the party which went down to Wales, men with characters to lose, who made what seems to us the hazardous statement that on a gauge of even 2 ft. 6 in. they would undertake, with the Fairlie engine, to work the heaviest traffic in the world—that of the London and North Western Railway. Be that as it may, it must be strange for those who can remember the battle of the gauges to find that what was then known as the narrow gauge is now in its turn attacked as being much too broad, and is even described in the terms which have been applied to more than one scheme of the Brunels as a gigantic folly. Our 4 ft. 8½ in. gauge is now established in so many countries—it is used not only in Great Britain, but also in France, Belgium, Switzerland, Italy, Austria, Prussia, Denmark, Egypt, the Cape of Good Hope, Australia, the United States, and Central America—that we seem to think of it as a standard of perfection. In some countries there will be found a still broader gauge—as in England, itself, in Ireland, in the United States, in Canada, in Australia, in India, South America, in Portugal, in Spain, in Russia; but in very few will a narrower gauge be found. In England we have 14 miles on a 2 ft. gauge, and a few more on a slightly broader gauge; in Belgium there is a 3 ft. 8 in. gauge; in France, a 3 ft. 4 in. gauge; in India may be found a 4 ft. gauge; and in Norway and Sweden one of 3 ft. 6 in.; on the Mont Cenis Railway there is a 3 ft. 7½ in. gauge; and in Queensland one of 3 ft. 6 in.; and now we have opinion tending towards a gauge of 2 ft. 6 in., or of 3 ft., as the standard for the future.

It is easy to determine on light railways of narrow gauge, and to construct them. The difficulty is to work them, and to work them in such a manner that their capacity and their economy shall bear comparison with railways of larger design and more elaborate construction. Hitherto railways of light construction and narrow gauge—that is, narrower than 4 ft. 8½ in.—have been in little favor, because of the limited power and destructive effects of the locomo ive. Take for example, the oscillation. This is very destructive on the standard gauge; it is, indeed, the chief cause of destruction to the permanent way—a fearful item of expense. But it is still worse on a narrow gauge, and necessitates diminished speed on battered rails. Therefore, practically, a narrow gauge was but of limited application to ordinary traffic until a locomotive such as that of Mr. Fairlie, could be invented, free, or nearly free, from oscillation. And again, since a narrow gauge generally implies lightness of construction, and since lightness of construction implies sometimes roughness of workmanhsip, and nearly always such an adaptation of the railway to the surface of the country that it must dispense to a great extent with cuttings, viaducts, and other works and must be ready to accept to the fullest extent possible a line of sharp curves and heavy gradients, it was necessary to devise a locomotive for it capable of good and safe speed on these conditions; and there was none such of sufficient note in existence until the double bogie engine of Mr. Fairlie was produced, which combined great size and power with freedom from oscillation and with a short wheel base that could be worked round curves of 6 ft. radius and even less.

We must reserve for a day or two a full description of the performances of Mr. Fairlie's engines in Wales, because it is desirable to give the results of all the experiments, with their success and their failure, together. The last of the experiments is made to-day, and we shall state all when we know all; but in the meantime we cannot be wrong in saying that there was an absolute unanimity of opinion among all those who witnessed the working of that narrow gauge railway at Festiniog that the standard gauge of 4 ft. 8½ in. is far beyond all ordinary requirements. There may be some difference as to the precise gauge which is best. Mr. Spooner, the engineer of the Festiniog Railway, strongly advocated a gauge of 2 ft. 6 in., and he was supported in this view by practical men of great experience; others seemed to hold that a gauge of 3 ft., giving greater freedom of space, would be best, but all appeared to be convinced that a gauge much narrower than that now in general use is capable of work which is at present little imagined in the railway world. If this view be correct, it involves some most important results.—*London Times.*

☞ In Richmond, Va., on the 22d ult., on the application of S. M. Shoemaker, President of the Alexandria and Washington Railroad Co., Judge Underwood granted an order instructing the receivers to turn the road over to the company. The Alexandria *Gazette* says that the effect of this order is to turn the railroad over from Stevens and Phelps, receivers, to Stevens and Phelps, general superintendent and general manager of the road.

☞ The Shenandoah Valley Railroad Company was recently organized at Luray, Page Co., Va., by the election of a board of directors with Peter D. Borst as President. The directors decided to employ a competent engineer to commence an early survey for location of a route.

Journal of Railroad Law.

RAILROAD COMPANIES—LEGISLATIVE JOURNALS—WHEN LIABLE FOR DESTRUCTION OF ANIMALS.

The action of The Illinois Central Railroad Co., *vs.* Wren, (43 Ill., p. 77,) was brought by Wren against the Illinois Central Railroad Company to recover the value of a cow killed by a passing train in the town of Clinton. The plaintiff recovered a judgment for fifty dollars, from which the defendant took an appeal to the Circuit Court. In that court a jury was waived and cause tried by the court, and judgment rendered in favor of the plaintiff for forty-five dollars. From this judgment the defendant appealed. The following is the opinion of the court delivered by

LAWRENCE, J.—As to the merits of the case before us, a witness called for the plaintiff swears he was standing in the door of a barn, watching the approaching train; that he distinctly saw the cow standing still upon the track; that she was in full view of the engineer from the time the train emerged from a cut until it struck the cow, a distance of two or three hundred yards, and that the speed of the train was not slackened.

The engineer was sworn, and admits the speed was not slackened, but says the cow was not on the track when he emerged from the cut, but was afterwards driven on it by a dog, and so near to the locomotive that he could not avoid running over her. There was a third witness called, but he was not in a position where he could see the cow. The engineer says he was running at about eight or ten miles per hour. If running at this speed, with a cow in full view, standing on the track, while the train was going two hundred yards, he deliberately ran over her without any attempt to check the speed of his train, which in that distance might so easily have been done, it was gross and willful negligence, for which the company must be held responsible. This court has constantly held, from the *Patchin case*, 16 Ill. 198, to the present time, that gross or willful negligence on the part of the road, will make it liable for injury to an animal, even though the animal be improperly on the track. If, on the other hand, in the case before us, the cow was suddenly driven on the track by a dog, and there was no fault on the part of the engineer, the company would not be responsible. But on this point the two witnesses differ, and there is no ground for saying the court gave credence to the less credible of the two. The plaintiff's witness was disinterested and testified clearly and positively. The judgment must be affirmed.

Judgment affirmed.

New Freight Cars.

We have lately examined a new freight car, constructed by the Mobile and Ohio Railroad Company, at Whistler, from plans made by and under the immediate direction of the Chief Engineer and General Superintendent. This car is the first one of three hundred which the company are building for the St. Louis business, to run through from Mobile to St. Louis without breaking bulk. It possesses some new and interesting features, which are best described by an intelligent and experienced superintendent of another road as "entirely removing all danger from the falling of brakes and swinging beams, the pulling out of draw-heads, and the breaking of bunters." It is said that the cars upon this plan can be kept in order at thirty per cent. less cost than those constructed upon the usual plans, besides entire immunity from accidents of the kind referred to. We understand that it is the intention of the company to load this car with coffee of direct importation, and send it through to St. Louis as soon as the inclined planes and steamer for transferring cars are finished.—*Mobile Register.*

Notice to Contractors.

THE WESTERN MARYLAND RAILROAD Company, having secured the aid of the city of Baltimore, will soon be in funds sufficient to complete the road from Pipe Creek Bridge to Hagrestown, and will receive Proposals until 9th April for all the unfinished Grading and Bridging on the uncompleted sections, the work on which has been suspended for a year.

Payments made in cash for all work done.

The work on the Graduation, Masonry, and Superstructure of Bridges will amount to about $200,000.

For all information as to the present condition of the work to be done apply to

W. BOLLMAN, President.
24 North Holliday street,
Baltimore, Md.

RAILROAD CROSS TIES.

LARGE PEREMPTORY SALE.

Very Valuable Machinery.

RICHARD NORRIS & SON'S
LOCOMOTIVE WORKS,
17th Street between Pennsylvania Avenue and Spring Garden Street,
PHILADELPHIA, PENN.

THOS. BIRCH & SON, Auctioneers.

On Tuesday morning, May 3rd, 1870, at 10 o'clock, will be sold at public sale on the premises of Richard Norris & Son's Locomotive Works, 17th Street, between Pennsylvania Avenue and Spring Garden St., the entire valuable machinery, consisting of 5 STATIONARY ENGINES varying from 15 to 100 horse power; 14 Cylinder Boilers; 50 Planing Machines varying from 12 to 60 inches, length of bed from 2 to 36 feet; 100 Slide Rest and Screw Cutting Lathes varying from 12 to 36 inches swing; Length of Shears from 3 to 26 feet; 50 small hand Lathes; 2 very large Slide Rest, Wheel Lathe swing 6 ft. 6 in.; 25 Slotting machines various size strokes; 2 Merrick & Son's Large Steam Hammers; 20 double and Single Drill Presses; 1 Seller's Hydraulic Wheel Press; 1 Seller's large size Boring Mill with universal chuck; 1 Whitworth Radial Drill Press; 1 Whitworth Screw Cutting Slide Rest Lathes large size; 1 Whitworth 48 inch Planer; Double head gear cutting engine, large size; large and heavy Railroad Iron Shears; 1 Tyre Expanding and Rounding machine; 1 Tyre Bending machine with Furnace Castings with Fire Brick; Shafting, Hangers, Pulleys, and Couplings; 3 large Platform Scales; 6 small Platform Scales; 4 new Lever Beams—graduated to weigh 10 Tons each with weight complete—the above Scales made by Abbott & Co.; 2 complete Furnaces for Heating Scrap Iron with Boiler on top—to supply Steam Hammers; 100,000 Lbs. Slabs Wrought Iron faggottit from Boiler and machine shops scraps of the best quality; 1 complete Photographic Apparatus; Tons wrought and cast scrap Iron $50,000 worth; New Bar and Tool Steel; Bar Iron; 10,000 feet of Belting; 50,000 feet of Gas pipe; 200 feet large Lead Water Pipe; Machinists', Blacksmiths' and Boiler makers' Tools; complete assortment of Foundry Flasks; Ladders; 2 Cupolas; Large Foundry Cranes; 1,000 new Birmingham Boiler Flues; 2 in. Diameter No. 12 Wire Gauge; 200 Anvils; 500 Vices; Spinners, Lathes and Tools, Jacket, Machine, Wood Planing machines, Circular Saws, Large Locomotive Trucks, Turn Tables, Carts, Drays, Harness, &c., &c. Catalogue ready April 1st, can be obtained by applying to the Auctioneers. The sale will commence Tuesday, May 3rd, at 10 o'clock, and will be continued daily until the whole is sold. The Factory will be open on Monday, May 2d, for examination.

Locked Safety Valves,

TO

MASTER MECHANICS

AND

LOCOMOTIVE BUILDERS.

THE UNDERSIGNED OFFERS FOR SALE, SAFETY VALVES, effectually guarded against tampering, invented and patented by himself; patent bearing date Sept. 14th, 1869.

Said Valves are sold with Spring, Guard, Studs, and Nuts, complete, and all ready to put on to boiler domes. Price for size suitable for Locomotives, $27 50.

The Valve and Seat are made of hard composition. Spring of best cast steel.

The above Valve is sensitive, and is not liable to stick from corrosion; and is particularly well suited for large stationary and marine boilers, giving large area for escape of steam, and requiring a short lever, and light weight or spring, for holding Valve against pressure.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

BRADY'S RAILROAD LANTERNS.

The strongest and best in use; are made principally of Malleable Iron. Here lies the secret of their strength, the frame being capable of supporting a weight of Four or Five Hundred Pounds; and yet they are little heavier than ordinary Lanterns. The guards are rivited through the top and bottom flanges, the rings wound with wire where they cross the guards, and the whole frame tinned, uniting each piece with the other, making it the *strongest* Lantern ever offered to the public. RAILROAD MEN *especially* cannot fail to see that it will be economy to purchase these Lanterns, as there is no part that can be broken with ordinary use, except the Globe, which being adjustable, is easily and cheaply replaced with any color and at a small cost; the greater weight being at the bottom, it cannot readily upset. Now used on the following Railroads: New York and New Haven; Hartford and New Haven; Shore Line, Conn.; Providence and Worcester; Boston and Maine; Conn. and Passumpsic Rivers; Fitchburg; Rensselaer and Saratoga; Troy and Boston; Boston and Providence; Boston, Clinton and Fitchburg; Charlotte, Columbia and Augusta; Connecticut River; European and North American; Hartford, Providence and Fishkill; Mobile and Ohio; Portland and Kennebec; Boston, Hartford and Erie; Worcester and Nashua; Lake Superior and Miss.; Hudson River, and many others.

The trade supplied from our Store, or from the Factory, New Britain, Conn,

New York Saturday, April 9, 1870.

The Positions and Prospects of the Grand Trunk Railway.

During the three years 1867, 1868 and 1869, 456 miles of the line have been relaid with new rails of a much heavier weight than those originally laid, and during 1870 it is intended to lay about 170 miles, of which 50 miles will be of the very best Bessemer steel, made especially at the Barrow Works, near Furness, in Lancashire. These steel rails are to be laid between Kingston and Sherbrooke, where the climate is most severe and the difficulties of working a railway in winter the greatest. Fifty miles of steel rails will be imported in future every year from England, until the whole distance from Kingston to Sherbrooke is laid with steel rails. It is also intended then to extend the steel rails as far west as Bellville, and east to the boundary with the United States. The balance of the 170 miles to be relaid this year will be of iron manufactured at Portland, Toronto and Detroit. The sleepers throughout the whole line are in a very satisfactory condition. It requires about 400,000 new sleepers every year to keep that branch of the work in good order. About 60 miles were ballasted last year, and it is intended to ballast about 100 miles yearly during this and the two following years. These several improvements will rapidly make the Grand Trunk equal to any railway on this continent. During the last two years the company has received 25 large and powerful freight engines from Glasgow, besides a considerable number built at Portland and by the company itself in Montreal, to replace old or small engines, which from length of service, are no longer of much use. During the last six years, about 30 powerful engines (irrespective of the 25 from Glasgow) have been thus bought or built to improve the stock. Very extensive improvements have also been made to the stock generally, which now amounts in all to 323 engines. During the last two years 200 cars with wheels and axles so constructed that they can run through between Boston and Chicago and St. Louis over the different gauges, have been placed upon the route and 300 more have been ordered, and the whole 500 will be at work by the end of the year.

Within the last few months a number of the leading merchants of Montreal formed a company, to purchase and lend rolling stock to the Grand Trunk or other railway companies. That company has contracted to supply the Grand Trunk Company with 500 box freight cars of the very best kind. Fifty have already been delivered, and the whole 500 will be completed by the end of this year. The Grand Trunk Company will thus be enabled to do a very large increased freight traffic, and thus materially benefit the trade of Canada. Corresponding improvements are also to be made in the extent and character of the passenger trains of the railway. The company at present owns 147 first class and sleeping cars—131 being ordinary passenger cars, and 16 sleeping cars. The oldest of the ordinary cars are to be turned into second class or emigrant cars, and the whole of the present sleeping cars will, as soon as possible, be converted into the very best description of first class day cars. A contract has been made with the "Pullman Car Co." to place their palace sleeping cars upon the Grand Trunk Railway. It will probably take upwards of 20 of these cars to properly stock the line. Some of them will, it is hoped, be running in a few months. Within the last few days a contract has also been made with the "Wason Manufacturing Co." of Springfield, Mass. to build 12 of the very best description of first class passenger cars, to be delivered by the middle of August at the latest. The existing stock of first-class cars are being thoroughly overhauled and improved, and by the end of the present year the passenger cars of the Grand Trunk Railway are intended to be equal in every respect to those on the best line in the United States.

It is also intended to run the passenger trains quicker than has hitherto been done. To assist in this 12 passenger engines have been contracted for within the last few days, especially adapted to this kind of work. Six of them have been ordered from the "Baldwin Locomotive Works," in Philadelphia, and are to be used on the Portland and Detroit divisions, and are to be delivered by June next. The other six, for use in Canada, have been ordered at Kingston, are to be very similar to those to be built at the Baldwin Works. As soon as some of this new stock is received it is intended to improve the train service. Through trains, with Pullman's sleeping cars, will be run between Portland and Sarnia in about thirty-four hours. The time between Montreal and Toronto will probably be about thirteen hours, and passengers leaving either city at night will arrive at Montreal or Toronto at or before 10 o'clock the next morning. These through trains will be in direct connection at Montreal with the through express trains to and from Boston, and also with the Michigan Central from Detroit.

Both as regards passenger and freight business, therefore, the railway is being rapidly placed in first-class condition, and will be enabled to afford increased facilities and despatch to the rapidly growing trade of the country through which it passes.

The gross earnings of the company have increased from about $5,600,000 in 1864, to upwards of $7,100,000 in 1869, and the receipts for the present year so far show a considerable increase over those for 1869.

The Bridge at Buffalo will be proceeded with this spring, and will, it is expected, be completed by the close of 1871. When that is opened it will add largely to the traffic of the line in the western peninsula.—*Montreal Witness.*

New Steel Manufacture.

Keeping in view the importance of Pennsylvania's great staples, coal and iron, and the various products of the latter, we have from time to time, as new developments and discoveries have been made, laid them before the readers of this journal. For several years past, the most active efforts of our "iron men" have been directed towards the discovery of methods for simplifying and cheapening the processes for the production of malleable iron and the manufacture of steel in large quantities, and making them come as directly as possible from the crude ore. The means proposed for accomplishing this great desideratum have been numerous and various, and we believe all of them have been noticed in this journal. Most of them have been of foreign origin. Now, however, we have a new development in our own State. A large deposit of iron ore of a very peculiar nature has been recently opened up in York county, Pennsylvania. This ore, we are informed upon good authority, has the quality of turning pig iron into good merchantable steel, by simple mixture and manipulation with the pig iron in a puddling furnace of the ordinary construction. The proportion of the ore used must of course vary according to the quality of the pig iron and the quality of the steel desired; but experience thus far seems to prove that with eighty per cent. of good iron, twenty per cent. of the ore

in question will produce quite a fine quality of steel. Those acquainted with the process for making steel, even by the most approved modern methods, will of course accept the above statement of the curious and valuable influences of this newly discovered ore, with reserve, as we do ourselves; but the facts seem to be thoroughly vouched for as they come to us. The ore, as we are informed, has been tested in the presence of experienced manufacturers, in the "Abbott" rolling mills in Baltimore; the "Cambria" iron works at Johnstown, Pa.; the "Lochiel" iron works, near Harrisburg; the "Tamaqua" rolling mills; "Coleman, Rahn & Co's" works, at Pittsburg; the "Alliance" rolling mills, at Alliance, Ohio, and at other places; and in all cases it has been shown to possess the remarkable quality claimed for it. The steel produced during these tests was generally used for making steel-capped rails, and one of these bars, made at Pittsburg, was shown to possess a tensile strength of 112,500 pounds to the square inch of cross section.

All this appears to be as valuable as it is remarkable and thus far unaccountable. The chemical analysis of the ore shows the presence of considerable quantities of manganese, silicon and aluminium with the iron. The ore is soft and friable in the bed, so much so that it can be mined with the spade, but upon exposure to the atmosphere it soon hardens. Professor Lesley, who has examined the ore bed, estimated the contents at 17,000,000 tons. For a few months past the discovery has made quite a stir among the iron furnaces and rolling mills of our State and Maryland, and there is quite a strong desire to know more of a matter that seems to promise such important results. We do not yet understand, however, how a homogeneous quality of steel can be made certain by manipulation in a puddling furnace.—*Phila. Ledger.*

Northern Central Railway.

The earnings of the Northern Central Railway and branches during the years ending December 31, 1868 and 1869, were as follows:

	1868.	1869.
Main Line	$2,907,151 82	$2,928,063 28
Wrightsville Branch	43,788 58	61,436 70
Shamokin Division.	277,763 49	261,317 04
Elmira " .	528,626 39	562,932 88
Chemung " .	160,397 58	185,502 65
Canandaigua " .	233,624 05	304,530 99
	$4,151,351 91	$4,303,783 54
Expenses, viz:		
Main Line	$1,893,765 68	$1,885,364 57
Wrightsville Branch	36,370 31	41,110 07
Shamokin Division.	194,252 16	180,850 70
Elmira " .	433,235 36	478,680 06
Chemung " .	161,519 78	172,123 37
Canandaigua " .	243,184 23	258,852 11
	$2,962,327 52	$3,016,980 88
Net revenue	$1,189,021 39	$1,286,802 66

Compared with the preceding year, the gross earnings of 1869 show an increase of $152,431 63; with an increase in expenses of $54,653 36—showing a net gain for the year of $97,778 27, or within a fraction of two per cent. on the capital stock.

The operating expenses of the road were 70.1 per cent. of the receipts—being 1.25 per cent. less than the previous year.

There was moved in 1869 3,413,332 tons of freight, against 3,138,319 tons in 1868—an increase of 275,013. The price received for moving one ton one mile was 2.15 cents, against 2.20 cents in 1868. There were carried during the year 1,137,694 passengers, against 1,021,759 in 1868—an increase of 115,935. The report says:

The coal trade of the Shamokin division and Main line has not been as satisfactory as we hoped it would be. There was a decrease of 24,215 tons in the Shamokin division, and of 66,479 tons on the Main line. The falling off in this tonnage is attributable, to some extent, to the irregularities and interruptions that prevailed through several months in the Lackawanna and Shamokin regions, growing out of the long continued strike of the miners; but we should have made up this deficiency, and had a satisfactory increase over the trade of the preceding year, had it not been for the action of a connecting line, breaking up an arrangement which has existed between the companies for several years, and by which we were, every year, increasing the trade of the line.

This unfortunate occurrence impressed upon our minds the necessity of securing to ourselves the absolute control of a line to the mines. This, after considerable trouble and delay, we have accomplished, by securing a trackage from the Lackawanna and Bloomsburg Railroad Company, so that the regulation of freights from the hard anthracite coal region, to all points on our line is now entirely under our control. And this, together with an arrangement for securing the best coal in that region, will enable us to increase this trade as rapidly as the wants of the community will require.

We have leased a portion of the coal lands of the Shamokin Valley and Pottsville Railroad Company to a responsible party, who is now erecting a first-class breaker upon it, and who expects to be ready to ship coal from it by the first of June next. We are also having other portions of that property tested, with a view to leasing to other persons. So far the examinations have proved exceedingly satisfactory, leaving no doubt in our own minds as to there being an immense body of coal in those lands, which, when fully developed, will produce a large income.

The coal trade northward has increased largely—fully up to our expectations. The total amount shipped to the Elmira division was 153,125 gross tons, against 131,677 gross tons the previous year, showing a gain of 21,448 gross tons. Formerly coal going north over our line for points beyond Elmira, has been transferred to boats on the lake at Watkins. This year we concluded an arrangement with the New York Central Railroad Company, by which this tonnage is taken from us at Canandaigua, and distributed over their line to the different points of destination. By this we get the tonnage upon our Canandaigua division, and the result this year has been an increased net revenue for that division of $55,239 06.

The equipment belonging to the company is now fully up to its requirements, and is in excellent condition. We have 130 locomotives, 22 of which were added during the year—20 purchased, and 2 rebuilt at the shops of the company. The total mileage of engines was 2,369,326 miles.

The total amount of motive power repairs in 1868 was $219,242 67; in 1869, $194,358 49—a decrease in this expenditure of $24,884 18. Total cost of fuel for 1868, $308,299 07; for 1869, $338,209 32; increase in 1869, $29,910 25. Amount of stores in 1869, $34,763 65; in 1868, $33,574 06; increase in 1869, $1,189 59; total increase of motive power expenses over 1868, $6,215 66, while there is an increase in mileage of 156,968 miles. We have of first class passenger cars, 64; second class passenger cars, 3; baggage cars, 22; express cars, 16; total passenger equipment, 105 cars; freight box cars, 8 wheel, 990; freight box cars, 4 wheel, 5; gondola cars, 8 wheel, 544; stock cars, 8 wheels, 51; box stock cars, 8 wheel, 101; stone cars, 8 wheel, 25; coal cars, 8 wheel, 1,068; coal cars, 4 wheel, 2,422; lime cars, 4 wheel, 185; tool cars, 8 wheel, 10; freight caboose cars, 56; maintenance of way cars, 4—total freight cars, 5,461.

There have been added during the year 4 first class passenger cars, 200 box cars, 18 stone cars, 577 eight-wheel coal cars, 16 four-wheel coal cars and 5 lime cars. There have been rebuilt 2 first class passenger cars, 1 baggage car, 2 express cars, 16 box cars, 23 gondolas, 2 stock cars, 13 eight-wheel coal cars, 61 four-wheel coal cars, 8 lime cars, 1 tool car and 2 freight cabooses.

The good condition of the track and bridges has been fully maintained during the year. There have been used in the track 146,348 cross-ties, 13,998 chairs, 173,505 pounds of spikes and 4,715 tons of iron, at a cost of $295,768 62.

The amount expended in 1869 to repair the damage done by the flood of July, 1868, was $22,077 34. The repair of damage by the flood in the Gunpowder during last summer was $10,756 29. We have expended in renewing the masonry of nine bridges and erecting three iron bridges $60,078 08.

There has been charged to equipment account during the last year $868,297 12, in payment of locomotives and cars heretofore referred to. The construction account has increased $565,483 75, which has been expended in completing second track between Dauphin and Millersburg, on the new line in Baltimore, increasing the size of the round-house at Marysville, &c.

The real estate account has been increased $110,678 82, expended principally for land required for the new line and new shops in Baltimore, making a total charge to the principal account of $1,543,959 19, an amount much larger than will be required in any year in the near future. We anticipate a return of a large portion of this amount from the sale of the valuable property belonging to the company, and now occupied by the old shops at Bolton, as soon as the new shops and the new line in Baltimore are completed. We hope to use the new route to Calvert Station by the end of this year.

The receipts and expenditures for the year ending December 31, 1869, were as follows,

Receipts.	
Earnings from freights	$2,968,333 08
" passengers	957,972 10
" express	89,693 20
" U. S. mails	88,507 50
" sundry sources	249,277 71
	$4,303,783 54
Capital stock	201,100 00
Bonds	922,000 00
Floating debt increased	359,626 71
Total	$5,786,510 26
Expenditures.	
Conducting transportation	$1,011,701 15
Motive power	882,495 56
Maintenance of cars	283,242 60
" way	767,334 24
General expenses	72,207 33
	$3,016,980 88
Interest	486,179 08
Dividends on capital stock	299,401 00
Taxes on capital stock, dividends & surplus	28,950 43
Rent of Wrightsville, York and Gettysburg R. R	11,872 68
Rent of Shamokin Valley and Pottsville R. R	101,167 00
Rent of Elmira and Williamsport R. R	165,000 00
Rent of Elmira, Jefferson and Canandaigna R. R	25,000 00
Sinking funds	83,000 00
Second mortgage bonds of York and Cumberland R. R	25,000 00
Construction	565,483 75
Real estate	110,178 32
Equipment	868,297 12
Total, as above	$5,786,510 26

The singing funds have been increased $83,000, the total amount now in the sinking funds amounting to $766,500. The mortgage for $25,000 of the York and Cumberland Railroad Company, due January 7, 1871, has been paid and canceled. The mortgage for $175,000 of the York

and Cumberland Railroad Company, due on the 1st of May, 1870, will be paid at maturity out of the funds now in the sinking fund.

FINANCIAL STATEMENT, December 31, 1869.

Railway and appurtenances		$9,472,736 02
Canton extension		342,182 02

President.—J. D. CAMERON.

Directors.—Wm. Colder, A. E. Kapp, George Small, Edward C. Biddle, John M. Kennedy, B. F. Newcomer, Henry Welsh, Thomas A Scott, Jacob P. Jones, Wistar Morris, S. M. Shoemaker, Edmund Smith.

Vice President.—J. N. DUBARRY.

Secretary.—ROBERT S. HOLLINS.

Treasurer.—JOHN S. LEIB.

Auditor.—STEPHEN LITTLE.

Gen'l Superintendent.—A. R. FISKE.

☞ The officers of the Pittsburg, Cincinnati and St. Louis Railway Company, under the new organization are: Hon. T. L. Jewett, President; H. J. Jewett, First Vice President; D. S. Gray, Second Vice President. John Durand, General Superintendent of the Pittsburg and Cincinnati Division. D. W. Caldwell, General Superintendent of the Indianapolis and Chicago Division. A. J. McDowell, Comptroller; G. D. Whitcomb, Purchasing Agent; W. L. O'Brien, General Passenger and Ticket Agent; C. W. Smith, General Freight Agent; Hon. J. R. Swan, Solicitor. The general office of the company will be at Columbus, Ohio.

☞ At the general meeting of the stockholders of the Northern Central Railway Company, held in Baltimore on the 24th of February, Mr. Samuel T. Hatch offered the following resolution, which, after discussion, was on motion, rejected:

Resolved, That the incoming Directors be requested to adopt the usual mode of paying dividends namely, quarterly instead of semi-annual dividends, as determined by the present Board.

☞ The yield of coal in Nova Scotia in 1869 was 60,000 tons over 1868, the total amount raised and sold being 571,197 tons. Of this quantity Cape Breton produced 305,068 tons, Picton County 198,211 tons, and Cumberland County 8,515 tons.

Pork Packing in the West.

The Cincinnati *Price Current* publishes its annual statement of Pork Packing in the Western States, of which the following is a recapitulation:

	1868–'69.	1869–'70.
Ohio	546,261	517,453
Illinois	805,843	860,231
Indiana	325,514	248,510
Kentucky	183,426	197,010
Missouri	368,633	431,615
Iowa	131,287	139,487
Wisconsin	129,094	172,626
Tennessee	9,115	8,330
Grand totals	2,499,173	2 575,262
		2,499,173
Increase		76,089

The average weight of hogs, and the yield of leaf lard per hog, by States, compare as follows:

	Average weight per hog.		Yield of lard per hog.	
	1869. lbs.	1870. lbs.	1869. lbs.	1870. lbs.
Ohio	214⅓	229 1-5	24⅝	26⅛
Indiana	202 4-5	204⅛	23 5-7	23½
Illinois	205¼	203	23⅝	23⅛
Kentucky	207½	213¾	24¼	21⅛
Missouri	206½	193	23⅝	22⅛
Iowa	207½	203	26	23⅛
Wisconsin	211	200	24	21⅜

The general average compare as follows:

	Hogs, lbs.	Lard, lbs.
1866	231 3-10	31 1-7
1867	232 1-7	29 3-4
1868	201	21 3-4
1869	206 3-4	24 1-4
1870	198 1-9	23 1-8

By multiplying the total number of hogs packed each season, by the general averages, the comparative crop can be ascertained:

Total crop in pounds, 1870	510,188,016
Total crop in pounds, 1869	516,703,942
Decrease in pounds	6,515,926

This is equal to one per cent. in the pork crop the past season, as compared with that of the previous year.

The returns given above are of what is known as leaf lard, and are about 7 pounds per hog less, taking the entire packing, than the aggregate yield, but as the comparison for both years is leaf, this will make no difference in arriving at the per centage of increase. As already shown the general average yield of leaf lard per hog is 23⅛ lbs., and last year it was 24¼ lbs., so that by multiplying the whole number of hogs packed each year by these figures respectively, the comparison is shown as follows:

1869-70, lbs	60,604,945
1868-69, lbs	58,562,934
Net increase	2,952,011

The whole number of hogs packed in the West in each of the last twenty years were as follows:

Year.	No. of Hogs.	Year.	No. of Hogs
1850–51	1,332,867	1860–61	2,155,702
1851–52	1,182,846	1861–62	2,893,666
1852–53	2,201,110	1862–63	4,069,520
1853–54	2,534,770	1863–64	3,261,105
1854–55	2,124,404	1864–65	2,422,779
1855–56	2,489,502	1865–66	1,785,955
1856–57	1,818,468	1866–67	2,490,791
1857–58	2,210,778	1867–68	2.781,084
1858–59	2,465,552	1868–69	2,499,178
1859–60	2,350,822	1869–70	2,575,261

Boston, Barre and Gardiner R. R.

At a meeting of this corporation in Worcester, Mass., on the 22d ult., the act of the Legislature authorizing the company to re-locate its road was accepted, and a vote passed to change the location of the road so as to carry it through the centre of the town of Holden. The town of Holden has subscribed $30,000 to the road, and $14,800 additional on condition that the road should be run through the centre of the town. It was voted to make an assessment of twenty per cent. on the stock subscribed for conditionally.

☞ The Chattanooga railroad bill, recently passed by the Legislature of Louisiana, contains, among other provisions, the following: The subsidy granted is $3,000,000, payable in installments as follows: $750,000 when the road shall have reached Bayou Lafourche, at or near Donaldsonville; $750,000 when it shall have reached a point at or near Vermillionville; $750,000 when it shall have reached the Sabine River; $750,000 when it shall have reached Houston, Texas. The road to be opened for traffic within three years.

☞ The Baltimore City Council have passed an ordinance guaranteeing the bonds of the Maryland Central Railroad Company to the amount of $600,000. This road is to be run from Baltimore City to the Susquehanna river, and there connect with a road now in running condition from the Susquehanna to Philadelphia. It is said that the necessary capital for the speedy construction of the road and its equipment is available, and that this work will be at once constructed.

☞ John Durand has been appointed General Superintendent of the Pittsburg and Cincinnati Division of the Pittsburg, Cincinnati and St. Louis railway, embracing the road proper of the Company and the roads leased from the Little Miami Company; D. W. Caldwell, General Superintendent of the Indianapolis and Chicago Division, embracing the roads leased from the Columbus, Chicago and Indiana Central Company.

☞ The promised early completion of the Chesapeake and Ohio Railroad across the Alleghanies inspires other railroad projects with hope. Among them are the Richmond and Newport News, and the Fredericksburg and Gordonsville roads, in Virginia, and the Eastern Kentucky road, in Kentucky.

☞ A formal transfer has been made of the Little Miami railroad to the Pittsburg, Cincinnati and St. Louis Railroad Company, in conformity with the lease ratified by the stockholders at their last general meeting.

☞ It is expected that the Grand Rapids and Indiana and the Fort Wayne, Jackson and Saginaw railroads will be completed and running into Fort Wayne by the middle of July next.

☞ The Cincinnati Councils have granted a loan of $50,000 to the trustees of the Southern Railroad to be used in making preliminary surveys.

☞ Another section of forty miles of the Superior road is graded, ready for the iron and the track is laid some ten miles beyond Hinckley.

Movements of Produce.

The Receipts of certain articles of domestic produce at the port of New York for the three months from January 1st, were:

	1869.	1870.
Ashes, bbls.	2,132	2,299
Breadstuffs—		
Wheat flour, bbls.	438,330	597,515
Cornmeal, bbls.	105,547	101,608
Wheat, bush.	1,480,494	820,591
Rye, bush.	5,578	1,309
Oats, bush.	341,478	555,941
Barley, bush.	121,557	482,938
Peas, bush.	12,557	28,923
Corn, bush.	1,421,332	348,806
Cotton, bales	250,630	225,919
Naval Stores—		
Crude turp., bbls.	5,237	2,956
Spirits turp., bbls.	10,917	12,943
Rosin, bbls.	127,990	165,102
Tar, bbls.	19,493	24,929
Pitch, bbls.	794	1,387
Provisions—		
Pork, bbls.	40,450	54,397
Beef, pkgs	41,365	48,264
Cutmeats, pkgs	44,306	52,846
Butter, pkgs.	120,933	116,866
Cheese, pkgs	22,013	52,207
Lard, tcs. and bbls.	35,164	45,685
Do., kegs	1,313	7,717
Whiskey, bbls.	33,897	58,196
Petroleum, pkgs	202,818	152,426

The Exports from New York to foreign ports of certain leading articles of domestic produce for three months from January 1st, were:

	1869.	1870.
Ashes, Pots, bbls	871	476
Do., Pearls, bbls	24	14
Beeswax, lbs	43,269	68,214
Breadstuffs—		
Wheat flour, bbls.	239,016	350,894
Rye flour, bbls.	730	829
Cornmeal, bbls.	39,302	19,571
Wheat, bush.	2,030,964	2,101,834
Rye, bush	....	6,709
Oats, bush.	34,059	5,718
Barley, bush.	.....	.....
Peas, bush	23,849	15,934
Corn, bush	716,914	86,453
Candles, bxs.	14,142	8,247
Coal, tons	15,176	13,770
Cotton, bales	68,347	124,629
Hay, bales	5,170	11,442
Hops, bales.	12,486	13,749
Naval Stores—		
Crude turp., bbls	338	300
Spirits turp., bbls	949	5,641
Rosin, bbls.	108,684	137,910
Tar, bbls	6,717	3 928
Pitch, bbls	964	1,073
Oils—whale, galls	424	7,343
Do., sperm, galls	146,363	124,177
Do., lard, galls	8,936	7,975
Do., linseed, galls	1,504	1,624
Provisions—		
Pork, bbls.	13,976	21,349
Beef, bbls.	5,953	5,447
Do., tcs	22,084	15,772
Cutmeats, lbs	15,513,171	15,172,978
Butter, lbs.	199,707	320,356
Cheese, lbs	1,837,834	3,230,287
Lard, lbs.	8,760,389	10,336,861
Rice, tcs	249	697
Do., bbls	1,034	2,661
Tallow, lbs	2,459,615	5,257,694
Tobacco, crude, pkgs.	18,784	12,357
Do., manf., lbs	859,877	1,253,631
Whalebone, lbs	124,600	95,416
Petroleum, galls	10,787,525	14,662,479

☞ The Chief Commissioner of Mines in Nova Scotia in his annual Report give the total yield of gold from the various mines, during the past year at 17,868 oz., being a decrease from the previous year of 2,673 oz.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of March, were:

ENTERED FOR CONSUMPTION.

	1869.	1890.
Manufactures of wool	$2,486,909	$2,370,754
" cotton	2,357,191	2,210,847
" silk	2,721,262	2,813,824
" flax	1,430,378	1,276,861
Miscellaneous dry goods	977,826	1,090,240
Total entered for consump.	$9,973,566	$9,762,526

WITHDRAWN FROM WAREHOUSE.

	1869.	1870.
Manufactures of wool	$1,507,790	$1,891,892
" cotton	628,225	956,938
" silk	500,938	715,029
" flax	641,810	791,802
Miscellaneous dry goods	174,058	176,929
Total withdrawn from warehouse	$3,447,321	$4,032,585
Add entered for consump.	9,973,566	9,762,526
Tot. thrown on the market	$13,420,887	$13,795,111

ENTERED FOR WAREHOUSING.

	1869.	1870.
Manufactures of wool	$1,467,678	$1,202,902
" cotton	580,768	723,254
" silk	581,682	576,002

☞ The Westminster (Md.) *Herald* says that the directors of the Parkton and Manchester Railroad are looking to an early completion of the work. Over four miles of the road have been graded, and more active work is expected with the arrival of warm weather. The road runs from Parkton, Baltimore county, on the Northern Central railway, to Manchester, Carroll county, and will open up an important section of country.

The Public Debt Statement.

The following is a recapitulation of the public debt statement March 31, 1870:

DEBT BEARING COIN INTEREST.

Five per cent bonds	$221,589,300 00
Six per cent. bonds	1,886,352,800 00
Total	$2,107,942,100 00
Accrued interest	43,783,504 95

DEBT BEARING INTEREST IN LAWFUL MONEY.

Three per cent. certificates	$45,565,000 00
Navy Pension fund 3 per cent.	14,000,000 00
Total	$59,565,000 00
Interest	483,859 45
Debt on which interest has ceased since maturity	$3,914,386 64
Interest	$512,908 68

DEBT BEARING NO INTEREST.

Demand and legal tender notes.	$356,109,621 00
Fractional currency	39,568.079 61
Gold certificates of deposit	38,848,500 00
Total	$434,526,200 61
Total amount outstanding	$2,605,947,637 25
Total interest	44,730,273 08
Total debt, principal and interest, to date, including coupons due, and not presented for payment	$2,650,677,910 33

AMOUNT IN TREASURY.

Coin	$105,413,745 08
Currency	7,472,729 65
Sinking fund in United States coin interest bonds, and accrued interest thereon	80,047,642 00
Other United States coin interest bonds purchased, and accrued interest thereon	75,181,665 86
Total	$218,115,782 59
Debt less amount in Treasury	$2,432,562,127 74
Debt less amount in Treasury March 1, 1870	$2,438,328,477 17
Decrease of debt during the past month	$5,766,849 43
Decrease of debt since March 1st, 1869	$92,901,182 27

Bonds issued to the Pacific Railroad Companies, interest 6 per cent. payable in lawful money:

	Amount outstanding.	Accrued interest, not yet paid.
Union Pacific	$27,075,000	$406,125 00
Kansas Pacific, late Union Pacific, Eastern division	6,303,000	95,545 00
Sioux City and Pacific	1,628,320	24,424 80
Central Pacific	25,881,000	382,310 00
Central Branch Union Pacific—assignees of Atchison and Pike's Peak	1,600,000	24,000 00
Western Pacific	1,970,000	28,423 00
Totals	$64,457,320	$959,827 80
Interest paid by United States		$6,881,664 96
Interest repaid by transportation of mails, etc.		2,030,571 04
Balance of interest paid by United States		4,851,093 92

☞ A despatch dated St. Louis, April 3, says that J. S. Morgan & Co., of London, have purchased $2,500,000 of the bonds of the St. Louis Bridge Company, with the option of purchasing the balance of the $4,000,000 issued within thirty days. This completes the financial operations of the company, St. Louis subscribers having taken $1,200,000.

Railroads of the State of Ohio.

A tabular statement of their Capital, Length, Cost, Earnings, Dividends, &c., for the fiscal year ending June 30, 1869.

Compiled from the Annual Reports of Railroad Companies made to the Hon. George B. Wright, Commissioner of Railroads and Telegraphs.

Railroads.	Capital Account. Stock.	Bonds.	Debt.	Total.	Length of Track. Main.	Branch.	Other.	Cost of Road & equipm't.	Road Oper.	Gross Earnings. Passenger.	Freight.	Other.	Total.	Expenses and Rents.	Net Earnings.	Dividends. Am't.	Rate

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisk* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, April 9, 1870.

Stock Exchange and Money Market.

The city banks, in their last weekly exhibit, showed a general falling off in the reserves, nearly 2½ millions of deposits, 2¾ millions of legal tender notes, and 2⅜ millions of specie. They added nearly a million to their loan and discount averages; and a trifle to their circulation. The U. S. Sub-Treasury lost about three-fourths of a million of currency, while it added nearly two millions to its coin reserve, week ending with Tuesday, April 5. The outflow of legal tender notes, and of currency, from the banks and the Government office, has been accounted for, partly by remittances to the South and West, chiefly, it has been stated, to Philadelphia, and further by the withdrawal of lawful money from active circulation, and hoarding it, in private hands, for speculative purposes, mainly with a view to the depression of values at the Stock Exchange. The demand for accommodation, both on speculative account and mercantile use, has been more active, since our last, and lenders have been enabled to exact higher rates, the prevailing call loan figures having been from 5@7; and the discount quotations 6½@10 per cent. per annum for strictly choice to good commercial paper. The legal tender reserve of the city banks is now fifty millions against 58 millions on the 5th of Feb.; the specie hoard is under thirty millions, against 40½ millions Jan. 29; the deposit averages is 206½ millions, against 214¾ millions, Feb. 5; the loan and discount average is 271¾ millions, against 253½ millions at the opening of the year. At the close of March, the cash reserve of the U. S. Treasury Department was $112,886,475 against $112,681,026 at the close of February. The coin balance was 105½ millions, April 1, against 102½ millions, March 1; and the currency balance, 7½ millions April 1, against 10¼ millions March 1, 1870.

The specie reserve of the city banks according to the latest return is $29,887,183, against $10,737,893 same time last year. The city bank deposits are now $206,412,430, against $175,325,789 week ending April 8, 1869. The legal tender reserve amounts to $50,011,793, against $48,496,399 same time last year. The circulation now stands at $33,676,564, against $24,816,916 same time last year. The loans are now $271,756,871, against $261,933,675 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged about $86,008,700 a day, against a daily average of $80,208,839 the preceding week, and $87,513,258 the week ending with Mar. 20, 1870. The current week's exchanges average about 95½ millions a day. The city banks, last week, reported a loss of $2,384,069 of specie, and of $2,498,283 of deposits, with a loss of $2,673,270 of legal tender notes. They increased their loans, $949,103; and their circulation, $2,170.

The city bank exchages on Wednesday were $76,314,423.

National Bank notes to the amount of $212,320 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $322,574,851, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $22,998,957, leaving, with the existing 1,614 banks, (having an aggregate capital of $426,399,151,) an actual circulation at this date, of $299,575,894. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,294,650; and for the public deposits, $16,989,500—making a total of $359,284,150. The Treasury Department last week redeemed and destroyed $560,800 of worn and mutilated fractional currency, and issued $196,500 of new.

The U. S. Sub-Treasury receipts, week ending with April 2, were $3,451,554 in coin, (including $2,879,443 from customs duties,) and $1,406,910 in currency; payments, $1,859,261 in coin, (including $326,474 of coin interest,) and $3,162,407 in currency; balance at the close of the week, $82,674,337 (including $78,751,830, of coin, and $2,677,398 of currency,) against $82,741,585 at the close of the preceding week, showing a decrease of $67,248. The business of the Office on the opening day of the current week, was as follows: On Monday, receipts, $643,763 in coin, (including $590,556 from customs,) and $361,906 in cur-

rency; payments, $48,475 in coin, (including $35,764 of coin interest,) and $420,849 in currency. On Tuesday, receipts, $383,600 in coin (including $376,454 from customs), and $1,175,029 in currency; payments, $46,710 in coin(including $33,680 of coin interest) and $347,556 of currency. The balance at the close of business on Tuesday stood at $83,223,102, (including $3,445,927 of currency, and $79,683,907 of coin,) against $82,100,437 a week previous; and $81,059,987 on March 18, 1870. The aggregate receipts of the office in March were $40,664,411, including $12,264,608 from customs; aggregate payments, $41,481,676 including $3,766,318 of coin interest; balance at the close of the month, $82,854,761, against $83,673,026 at the close of February.

The U. S. Sub-Treasurer issued in March $1,615,000 of coin certificates.

The U. S. Sub Treasurer retired, last week, $2,692,442 of coin certificates, received for customs.

The U. S. Sub-Treasury general balance on Thursday morning was $83,318,859.

Government revenues have been yielding rather more liberally, since our last. The excises, during the week yielded about 3¼ millions; customs at the port of New York, $2,879,443, and at the outports about $950,000 (in coin) more, making the grand total income for the week equal to about $7,553,000 in currency. The receipts from excises, thus far in the current fiscal year, commencing with July 1, 1869, have been 127 millions. The receipts from July 1, 1869, to March 31, 1870, were $124,008,603 against $103,499,334 same time preceding fiscal year.

There has been a moderately active movement, chiefly speculative, reported in Gold since our last, within a range of from 111⅛@112⅜, the closing quotation on Wednesday having been 112. The customs call has been up to a fair average. The export drain has been light. The specie shipments hence were less than a quarter of a million; while the imports of foreign specie were $1,887,141, including $1,559,796 by the *Hammonia* from Havre, $17,158 by the *Bremen*, and $143,361 by the *Dondu*. Government marketed a million of Gold on Wednesday of the current week at from 111 78 to 111 89. The aggregate of the bid was $5,550,000. The Treasury Department held 105½ millions of coin on the 1st Inst. (including 38⅞ millions to the credit of private depositors), against 102½ millions on March 1st. (of which 44⅜ millions were on private deposit, and represented by outstanding coin certificates).

The coin balance of the U. S. Sub-Treasury on Thursday morning was $80,154,327.

The customs revenue of the port on Wednesday was $484,000.

The coin interest payments of the Sub-Treasury on Wednesday were $25,628.

The customs demand for Gold last week, averaged $479,907 a day; thus far, this week, it has averaged $489,750 a day, or equal to a weekly aggregate of $2,938,500. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $1,887,141; and since Jan. 1 1870, $5,818,954, against $3,611,712 same time in 1869. The total customs revenue of the Government, in coin, at this port, thus far in the current fiscal year, commencing with July 1, 1869, has been $99,948,666, against $96,077,182 in 1868–'69.

The customs revenue at the port of San Francisco, from Jan. 1 to March 25th, was $1,713,078, against $1,685,970 same time last year.

The exports of specie, from this port, last week, were $206,952, against $555,585 same week last year; total, since July 1, 1869, $23,243,875, against $31,090,613 same time preceding fiscal year. Government disbursed last week through the U. S. Sub Treasury here, on account of the coin interest on the public debt $326,474, and since July 1, 1869, $66,992,304, against $66,954,177 in 1868–'69.

The specie exports from San Francisco, from Jan. 1 to March 25, were $9,850,562, against $9,512,304 same time last year.

Foreign Exchange has been offered less freely and has been in rather better request at firmer prices. Bankers' prime sixty day bills on London closed rather buoyantly on Wednesday at 108⅝@108⅞, and on Paris to 5.25@5.21¼; sight bills on London to 109⅛@109½, and on Paris to 5.20c.@5.18¾. The offerings of produce bills have been liberal. The week's exports of domestic produce have been to the currency value of $3,109,503, making the total since July 1, 1869, $156,290,390, against $121,684,259 same time preceding fiscal year.

A rather more confident investment demand has been reported for Government securities, which have been in comparatively light supply in the open market, and have been quoted firmer in price, closing with an upward tendency. The April debt exhibit—showing a further liquidation of $5,766,349 in March, making an aggregate reduction since March 1, 1869, of $105,133,358—tended to strengthen confidence in the future of values, regardless of the funding project, of the success of which, at least in its present form, even its advocates have been less sanguine. On Thursday of the current week, Government bought in a million of Five Twenties at about equal to the current market rates. The coin-bearing portion of the public debt on the 1st inst. stood nominally at $2,107,942,100 against $2,107,989,650 on March 1. The currency bearing debt was $124,022,320 April 1, against $124,012,320 a month previously. The Five Twenties bonds outstanding on April 1st amounted to $1,497,445,892 against $1,602,587,350 March 1, 1869.

Government disbursed $16,556,170 in March, on account of the Departments, including civil and miscellaneous, $4,018,831; war, $4,151,431; navy, $1,876,030; interior department, $6,509,878. This amount does not include payments on account of the interest and principal of the public debt.

U. S. sixes of 1881 closed here at 114¼@114⅛; U. S. Five-twenties of 1862, 110⅝@110⅞; U. S. Five-twenties of 1864 at 109¾@110; U. S. Five-twenties of 1865 at 110@110¼; U. S. Five-twenties of 1865, consolidated, 108⅝@108¾; U. S. Five-twenties of 1867, 109⅜@109½; U. S. Five-twenties of 1868, 109½@110¾; U. S. Ten-forties at 106¼@106½, ex the March coupon; U. S. Six per cent. currency bonds, 111¾@112.

Central Pacific Sixes closed on Wednesday at Frankfort at 80.

There has been a moderate inquiry noted for State bonds, since our last, and prices closed buoyantly. Railroad bonds have been in fair investment demand. The Central Pacific Sixes closed at 92@92¼. Union Pacific Sixes at 84½@84⅝; and the new Chesapeake and Ohio First Mortgage Thirty year Bonds at 90 per cent. and accrued interest in currency, the latter showing a steady gain in the favor of buyers for permanent investment.

Railway and miscellaneous share property has been less confidently dealt in, as a rule, at rather widely fluctuating prices. At the close, rather more steadiness was apparent, but the dealings were light.

General business shows some improvement. There has been more activity in domestic produce. Breadstuffs and Provisions have been held with more firmness. Middling upland cotton closed on Wednesday at 23 cts. per lb. The stock of cotton now here is given at about 45,000 bales. The receipts at the port this week, have averaged about 3,600 bales a day. The receipts at all the ports, thus far in the year commencing with Sept. 1, 1869, have been 2,362,800 bales, against 1,787,200 bales in 1868–'9; exports, same time 1,563,325 bales, against 1,018,150 bales same time in 1868–'9; stock on hand at latest dates, 406,900 bales, against 360,800 bales same date 1869. The exports of domestic cotton goods from this port, since Jan. 1, 1870, have been 3,535 pkgs., against 6,530 pkgs., same time in 1869. From Boston, 1,025 pkgs. in 1870, against 3,179 pkgs. same time in 1869.

Foreign goods have been moderately active, but generally depressed in price. The week's imports of foreign dry goods were to the specie value of $2,096,115; and of foreign merchandise, $3,786,597, making a total of $5,882,712, against $7,682,492 same week last year.

At the Live Stock markets, this week, Beeves have been in moderate demand, at from 10@17c., per lb.; week's receipts, 6,194. Milch cows continue dull, at $40@$100 each, receipts, 119. Veal calves have been in less request, and quoted easier at from 8@11¾ c. per lb.; receipts, 1,424. Sheep less active at from 6@9½c.; lambs at 17@22c. per lb.; receipts, 18,416. Swine inactive at 9⅜@9⅞ c. per lb., all live weight; receipts, 11,928.

The ocean freight market has shown less animation, and rates have been quoted lower. For Liverpool we quote flour at 9d.@1s. by sail, and 1s.@1s. 3d. by steamer, per bbl.; grain at 3d. by sail, and 3d. by steamer, per bushel; cotton at $\frac{1}{8}$@$\frac{3}{16}$d. by sail, and ¼d. by steamer per lb.; and heavy goods 12s. 6d.@25s. by sail, and 12s. 6d.@35s. by steamer, per ton. Total number of vessels in port on Wednesday, 420.

The balance in the Sub-Treasury on Wednesday was $83,318,859 13.

The following will show the exports (exclusive of specie) from New York to foreign ports for the week ending March 5th, and since the beginning of the year:

	1869.	1870.
For the week.....	$3,878,954	$3,109,503
Previously reported...	37,103,152	41,385,883
Since Jan. 1.....	$40,982,106	$44,495,386

The imports for the week ending April 2, and since the beginning of the year, have been as follows:

	1869.	1870.
Dry goods	$2,173,266	$2,096,115
Gen. merchandise.....	5,509,226	3,786,697
Total for the week.....	$7,682,492	$5,882,712
Previously reported....	69,684,862	67,933,916
Since January 1.....	$77,367,354	$73,816,628

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ The grading of the Whitl Mountains Extension Railroad is completed some distance north of Burns' Mill within two miles of Whitfield village, and the iron is being laid to the mill. The grading will be completed in a fortnight to Dalton, and the road opened to that point for traffic in May.

☞ The Lynchburg (Va.) *News* says that the surveys of all the proposed routes for the Lynchburg and Danville railroad will be completed early next week, and as soon as practicable thereafter the location will be determined. The road, we have reason to believe, will be put under construction within the next sixty days.

☞ The Moncton (Nova Scotia) *Times* says the owners of the Shale properties on Turtle Creek, in Albert County, are now ready to commence operations, including the building of the Railway, and that Mr. Vernon Smith has been asked to come on to examine and report on the proposed location of the line.

☞ The track of the St. Louis, Vincennes and Terre Haute Railroad and the bridge over the Wabash will be completed by the 10th inst. It is expected that through passenger trains will be run from Indianapolis to St. Louis over this line by the 1st of May.

☞ The South Pacific Railroad has been finished to Mansfield, 218 miles from St. Louis, and will be completed to Springfield by the 1st of May. The Company has iron for fifty miles of track beyond Springfield, and the work will be vigorously and rapidly pushed forward.

☞ The track of the extension of the Wicomico and Pocomoke Railroad is now laid to the north branch of the Wicomico river, the present terminus being near the Main Street Bridge, a distance of almost a mile from where the road intersects the Eastern Shore Railroad.

☞ The Kansas Pacific Railway Company completed their road to Kit Carson, 84 miles west of Sheridan, and 487 miles from Kansas City, on the 28th, and will push the work rapidly to Denver, which point will be reached early in the Fall.

☞ The contract for the superstructure of the St. Louis bridge, which is to be completed by October 1, 1871, has been given to the Keystone Bridge Company of Pittsburg at $1,500,000.

☞ The stockholders of the Marietta and Cincinnati Railroad have authorized the issue of three million dollars of third mortgage bonds, the proceeds to be applied in improving the road.

☞ The New York, Utica and Ogdensburg Railroad Company has been organized. The road is to run from Monticello, on the Erie road, to Utica 120 miles, and cost twelve million dollars. Hon. Francis Morris is to be President.

☞ Proposals will be received at the office of the Western Maryland Railroad Company, in Baltimore, until the 18th of April for the track laying of 35 miles of the road, to be commenced in May or June.

☞ Track is laid on the Indianapolis and St. Louis Railroad to within four miles of Danville.

☞ The line of the land grant railroad from Portage to Ripon, Wis., is being surveyed.

Narrow Gauge Railways.—The Fairlie Engine.

The object of the experiments on the Welsh railways was to ascertain whether or not the Fairlie engine increased the carrying capacity of a railway or diminished the cause of working it. With this view two engines were put on their trial—one, the Little Wonder, on the Festiniog Railway, of 2ft. gauge, in North Wales; the other, the Progress, on the ordinary gauge of 4ft. 8½, in South Wales.

The Fairlie engine consists of one long boiler, having two sets of tubes, with double firebox between, and poised on two bogies. The arrangement is such that an enormously increased power is gained, with an extraordinary facility of movement upon swift curves, and with a freedom from oscillation which makes the Fairlie engine less destructive to the rails than locomotives of much less weight and power. The value of the system depends chiefly on two bogies. It may be necessary to explain for some readers that a bogie is simply the name of a small truck. Instead of resting a wagon or a locomotive upon wheels of its own, which would make a long wheel-base that could not by any possibility get round very sharp curves, and that might get round moderate curves, but only with an amount of flange-friction destructive to the rails and retarding speed, the wagon or locomotive is poised on two independent trucks, which have a short wheel-base, and which can, therefore, find little difficulty in curves of exceeding sharpness. In the small cabbage-garden at Hatcham, half an acre in extent, and laid out with rails of the ordinary gauge, Mr. Fairlie exhibits a steam carriage of 43ft. in length travelling at a speed of 25 miles an hour round curves of 50ft. radius; and they could with equal ease, and even greater safety, travel round curves of 25ft. radius, which is only about that of an ordinary engine turn-table. The engine, therefore, on a pair of bogies is prepared for a circuitous line of country, even on the standard gauge, which engines of the current type could not attempt.

The excellence of the bogie, however, does not merely consist in its adaptation to curves. It has an extraordinary effect in reducing oscillation. An ordinary carriage rests directly upon the ends of axles, and when through any defect in the road, there comes a disturbance in the plane of movement, the carriage, wagon, or locomotive rocks from side to side with immense violence in a series of oscillations that hammer the rails to their destruction. It is calculated that these oscillations in a train going at the rate of 30 miles an hour add more than half as much again to the normal weight upon the wheel; and this is very serious in the wheels of a locomotive, each of which may be loaded up to seven or eight tons. The oscillation is reduced to a *minimum* by means of the bogie, inasmuch as the vast superincumbent weight of the locomotive is balanced on a pin, called the bogie-pin, in its centre. The bogie is a flat table upon wheels, with a great pivot in the middle of it. This table, and the wheels which support it, must naturally submit to whatever deflections there may be in the road, and so far it is impossible to get rid entirely of oscillation; but the great mass of weight above, being poised in the centre of the bogie and upon the centre of the roadway, is comparatively free from the influences of rocking, and transmits little or no hammering to the rails. A child can understand this by watching at see saw the difference between placing a weight in the middle of the plank and dividing it between the ends. Now it is an enormous advantage thus to steady the locomotive, to reduce the tendency to oscillate, and to get rid of the violent impact upon the rails. To steady the locomotive is to make its motion safer, and to diminish the chances of its leaving the rails—a point of considerable importance on the narrow gauge. The most important point of all, however, is to save the rails, which are so perishable under the demands of a heavy traffic that there are instances in which the strongest steel rails have to be replaced in six months. The rails where the line has any curve are torn up by the flange-friction of monster engines with an immense wheel-base, and, whether the line is curved or straight, are hammered out by the oscillations of the same engines. We have already explained how, in the Fairlie engine, the flange-friction is reduced by the substitution of bogies with a short wheel base for the old plan which necessitates a long one; and there is an absolute unanimity of opinion as to the disappearance of oscillation with the use of the double bogie.

We have only one word more of preface before we proceed to state what were the experiments with the Fairlie engine, both on the narrow and on the broad gauge. It is that the statements we are about to make do not rest solely on our authority. The various Commissioners and other observers met together under the presidency of the Duke of Sutherland, compared their notes point by point, and came to a perfect agreement at to the facts which they were prepared to vouch for. Our facts, therefore, have the authority of documents signed by the Duke of Sutherland, as chairman of the different meetings which were held; by the Russian Imperial Commissioners; by the Commissioners of our Indian Government; by Captain Tyler, of the Board of Trade, who acted as secretary, and was mainly instrumental in putting the facts into proper form; and by others who were well able to judge.

The Little Wonder is an eight-wheeled double-bogie engine of four cylinders 8 3-16in. in diameter, with a stroke of 13in. The diameter of its wheels is 2ft. 4in; its average steam pressure is 150lbs.; its weight is 19½ tons; its total length is 27ft.; its total wheel-base is 19ft., and the wheel-base of each bogie, which practically has alone to be considered, is 5ft. This engine was first of all made to carry from Portmadoc to Festiniog a train made up of 90 slate wagons, weighing 57½ tons; 7 passenger carriages and vans, weighing 13½ tons; and 57 passengers, weighing 4 tons—in all, 75 tons. Add to this its own weight, and we have a total load of 94½ tons. The weight, it will be seen, was considerable, if we take into account the size of the engine, the narrowness of the gauge, the steepness of the gradients, and the sharpness and multitude of the curves. But the chief point of interest in this experiment had reference to the length of the train, which was 854 feet—nearly the sixth part of a mile. A train of such a length on such a line had to run often upon two or three reverse curves, some of them with a radius as short as 1½ chains, and it curled and doubled upon itself as it wound among the Welsh hills, so that the passengers in the front carriages could, sitting in their seats, make signals to the passengers in the hindmost ones. The engine, being in full gear, took this very long train up the hills and in and out among the curves at an average speed of 14½ miles an hour, and at a *maximum* speed of 26½ miles. Let us here add by way of parenthesis, in order not to refer to it again, that some days afterwards a similar train of 140 empty and seven loaded wagons, weighing in all 101 tons, and measuring in length 1,323 feet—that is, a quarter of a mile—a train so long, in fact, that there were parts of the road on which it had to run on no less than five reverse curves—was by the same engine hauled up the hills at an average speed of 12½ miles, and a *maximum* of 16½. Now, what was the result observed in wriggling along these curves? It was generally observed (we now quote almost *verbatim* from the protocal signed by the chief witnesses) that even on curves of one and three-quarter chains radius, and at *maximum* speed, there was very little perceptible oscillation or movement on the engine or in the carriages, and by no means such as is felt on comparatively easy curves on ordinary railways. Nor must this remarkable point be forgotten—a fact almost incredible, but yet certified by competent witnesses—that the oscillation diminished as the speed increased. The speed, let it be added, is naturally less on a narrow gauge than on a broad one. Captain Tyler, the Government Inspector of Railways, was at first so doubtful of the safety of a high speed on a railway of such narrow gauge and such wild curves as that at Festiniog that he insisted on limiting the company to a *maximum* speed of twelve miles an hour. Since then, however, his doubts have been so completely dispersed that he has removed all restriction as to the rate of speed; and as a matter of fact the Little Wonder, when necessary, works up to thirty and thirty-five miles an hour.

Next day the oscillation of the Little Wonder was put to a further test, and compared with that of the other engines—the Welsh Pony and the Mountaineer—which are of the ordinary type. In this series of experiments the speed was confined to ten or twelve miles an hour on a comparatively level line, the gradient being one in one thousand two hundred; and the line was laid with rails weighing only thirty pounds to the yard, and not fished at the joints. On the Welsh Pony and the Mountaineer, tank engines of ordinary type, weighing, the one ten and the other eight tons, it was found that there was a strong vertical oscillation and a lateral oscillation not so strong. On the Little Wonder, the double-bogie engine weighing 19½ tons, it was found that when riding on the foot plates there was no oscillation whatever, vertical or lateral, perceptible—only "a smooth floating movement;" and that when riding on the bogie frame there was felt a slight lateral oscillation, though less than on other engines. It is added that the oscillation of the Fairlie engine being confined to the bogie, the influence of impact on the rails from the flanges of the wheels was far less than in the case of the Welsh Pony and Mountaineer, the whole weight of these engines being in the course of their oscillations brought to bear upon the rails.

Next followed some rather tedious but very interesting trials as to the comparative powers of the two classes of engine. The Welsh Pony was selected to represent the common type of engine. It is a four-wheeled locomotive, weighing 10 tons, with cylinders 8½in. diameter, having a stroke of 12in., and with wheels 2ft. in diameter. It was in the first instance tacked on to a load of 50 slate wagons full of slate, weighing 123½ tons. To this add 3½ tons for passengers and 10 tons for its own weight, and we get at the entire load of 136 tons. With this the Welsh Pony started from Portmadoc, and running along the comparative level (1 in 1,200) of the Traeth Mawr Embankment, stopped on a gradient of 1 in 85, unable to proceed further, with 160lb. to the square inch of steam pressure. Hereupon half the number of wagons were removed, and the load (including passengers and the engine itself) was consequently reduced to 72 tons 17 cwt. With this load it was found that the Welsh Pony could mount the gradient of 1 in 85 easily enough. Being successful with 25 wagons, the question arose could it manage more? It was then tried with 30 wagons, but on the gradient of 1 in 85 it was found that it could not start, though, since the engine wheels did not revolve, there was no lack of adhesion. Then again the load was reduced to 26 wagons, weighing (with passengers and engine) 73 tons 16 cwt., and it was found that this was the limit of the Welsh Pony's power. It started with such a load on the gradient of 1 in 85, and carried it as far as was necessary at the rate of five miles an hour—the average pressure being 150lbs. to the square inch. If the Welsh Pony could carry nearly 74 tons up such a gradient, and with this load also start on it, what could the Fairlie engine, the Little Wonder, do? It was supposed that it ought to pull double. If the Welsh Pony could, on a gradient of 1 in 85, manage 26 wagons full of slate, weighing with all else 74 tons, surely the Little Wonder could manage 52. Mr. Fairlie said he was quite prepared for this; he would stake the credit of his little engine on its power to carry such a load; and to show that he could be generous, he even added three wagons to the load; he thought his engine could manage 55 wagons. However, as the Welsh Pony had first of all been tried with an excessive load, it was but fair that the Little Wonder should

be similarly tried. A train was prepared of 72 loaded wagons of slate, weighing 138 tons 17 cwt., with empty ones weighing 43 tons 10 cwt.; and when you add to this 56 passengers, weighing 4 tons, and the weight of the engine itself, 19½ tons, you have a total load of 206 tons. With this load the Little Wonder started from Portmadoc (steam pressure, 165lbs.), and passing along the level embankment, went up the gradient of 1 in 85 with perfect ease, and to the astonishment of all the visitors, who crowded round Mr. Fairlie and shook him heartily by the hand on such a triumph. His engine was warranted to do double the work of ordinary engines, and on trial it was found equal to trebel the work. But then arose the question—The Little Wonder has pulled such a load up the gradient of 1 in 85, having had a good start on the level embankment: can it start with this load on the gradient itself? It was, perhaps, scarcely fair to make the trial, inasmuch as the day was wearing late, and the engine-driver had, through a misapprehension, let the fire run low. Still the trial was made, and with perfect success. There is this further, however, to be added, that whereas the shorter trains were standing when they started, or attempted to start, partly on a curve of 4½ chains radius, partly on a straight line, the train of the Little Wonder being much longer (it was 648 feet), stood partly on the curve of 4½ chains radius and partly on a reverse curve of a little wider sweep, which, of course, means an increased resistance, and might be resolved into an increase of gradient. Also, let us add here, to complete the statement, what really happened four or five days afterwards, that whereas these experiments last described were intended to test the extreme power of the engines, other experiments followed to show what the Little Wonder could do, not merely in a short run, but in its ordinary daily work between Portmadoc and Festiniog. It took, for example, a train 407ft. long, and loaded to 141½ tons, from Portmadoc to Festiniog, at a *maximum* speed of 15 miles an hour and an average one of 11½. The usual practical load, however, of the Little Wonder upon the average gradient of 1 in 92 is from 90 to 100 tons (exclusive of engine), at from 12 to 15 miles an hour. On a level it is calculated that its power is equal to the carriage of 450 tons, at a speed of 14 miles an hour.—*London Times.*

Journal of Railroad Law.

RAILROAD COMPANIES—LEVY OF TAXES UNAUTHORIZED BY LEGISLATURE VOID—WHEN LEGAL AND UNAUTHORIZED TAXES ARE SEPARABLE.

The facts of the late case of Allen, Collector, &c., *vs.* The Peoria and Bureau Valley Railroad Company, (44 Ill., 85,) are fully and clearly stated in the following opinion by

WALKER, CH. J.—The question is presented by this record whether the tax for which this suit was brought was authorized and legal. It appears that the board of supervisors of Bureau County, at their September session in 1864, levied five mills on the dollar of taxable property to defray the expenses of the county; five mills for the benefit of the families of volunteers; one per cent. for the purpose of liquidating the interest on any debt made or to be made and to provide for paying the indebtedness of Bureau County for war purposes, and for paying indebtedness to Buxton & Co., four mills on each dollar of taxable value. Appellee paid all of the taxes levied upon its property, except that to meet interest on any loan made or to be made and to pay indebtedness of the county. The tax for this purpose imposed upon appellee's property amounted to $272, which they contend was levied without legal authority and is void.

. It appears, from the treasurer's report made to the board at the time this tax was laid, that there would be various sums of money required by the county to meet expenses and indebtedness. It appears from that report that the total county indebtedness amounted to $45,563 38. That relief purposes would require $25,000. The expenses of the Circuit Court would require $3,000. Expenses of the county farm, $2,000. Expenses of the county, $12,000. Expenses of collecting tax, etc., $2,000—in the aggregate, $89,563 38. From this sum $4,715 70 cash in the treasury was deducted, leaving a balance of $84,847 68. The various levies not in controversy, on the taxable property of the county, would produce about the sum of $57,163 15, which, deducted from the balance required as shown by the treasurer's report, would leave a deficit of $27,684 53. And the law of February 10, 1863, gave the board of supervisors power to levy not exceeding one per cent. to meet this indebtedness. A levy of sixty eight cents on the $100 of the taxable property of the county would have produced the necessary sum, while the one per cent. which was levied created about $13,000 more than the required sum, which it is claimed vitiated the whole levy of this item.

The first section of the act of 1863, under which authority to make this levy is claimed, is this:

"That the county courts for county business in counties without township organization, and the boards of supervisors of counties under township organization, in such counties as may be owing debts which their current revenue under existing laws is not sufficient to pay, may, if deemed advisable, levy a special tax not to exceed in any one year, one per cent. upon the taxable property of any such county, to be assessed and collected in the same manner, and at the same time and rate of compensation as other county taxes, and when collected to be kept as a separate fund in the county treasury, and to be expended under the direction of the said county court or board of supervisors, as the case may be, in liquidation of such indebtedness.

It will be observed, that, by the provision of this act, the board of supervisors had power to levy a tax, not exceeding one per cent. on the assessed value of the property of the county, to pay debts that may be owing by the county. By fair and reasonable intendment this language can apply to existing indebtedness, but not future anticipated indebtedness. And the language of the latter clause of the section would seem to render it more clear and unmistakable, because it provides that when collected it shall be kept as a separate fund, and be expended in the liquidation of such indebtedness. From this provision it is manifest that it can be applied to no other purpose. And if the future indebtedness should never be incurred, as it seems to be admitted, it was not in this case, then the fund becomes useless, and could only be returned to the tax-payer, involving expense, waste and loss, as many persons from removal, absence or other causes, would never receive back the money they had thus been compelled to pay, even after deducting the expense of collecting and refunding the tax.

In this case the language of the board in laying this tax is "to liquidate interest on loans made, or to be made." It hence appears from this order, and the treasurer's report, upon which they, no doubt, acted, that both kinds of indebtedness were intended to be embraced. It is, however, said, that the tax would be legal if for a purpose authorized by law, although the purpose of the levy was not specified, or even if an improper purpose was recited; this would seem to be no answer, as it affirmatively appears that about thirteen thousand dollars of this levy was unwarranted and not authorized. This access was, therefore, void, and there could be no rightful pretense for its collection.

It is, however, urged, that this levy was rendered valid by the sixth section of the act of the General Assembly, approved January 18, 1866. Private laws, vol. 1, p. 100. An attentive consideration of this act has satisfied us that it does not embrace this levy. It only purports to legalize taxes levied to meet appropriations made, or paying any indebtedness within the county, by reason of bounties offered to volunteers who had enlisted and been mustered into the service of the United States. This act obviously and in terms refers alone to indebtedness already incurred for the specified purposes. It will bear no other construction, and as it does not appear that the county had incurred such indebtedness, and levied this excess for the purpose of discharging the same, it was not cured by this act. Nor do we see that the ninth section of the act of the 2d of February, 1865, (Private Laws, vol. 1, p. 100,) renders this excessive levy legal. It is true that it legalizes taxes levied to meet appropriations made, to meet indebtedness incurred or thereafter to be incurred by the county, by reason of bounties offered to volunteers, or for money paid to drafted men, enlisted men, or such as might be drafted, or should enlist into the service of the United States. There is nothing in this record from which it appears that any such indebtedness had accrued, or did subsequently accrue, hence this levy is not embraced within its provisions.

Did this excess, in the exercise of this power, render the whole tax void, the legal as well as the unauthorized portion? As a general rule, subject it may be to some exceptions, where a person, while exercising delegated powers, whether for the public or for private individuals, performs acts within the scope of his authority, and others beyond its scope the acts well performed will be sustained, and those unauthorized will be held void, where they are of such a nature as to be separated without producing injury. But on the other hand, if the acts are of such a character that the legal cannot be sustained independently of the unauthorized acts, than all must fall together as unwarranted. Then, having seen that the board was authorized to levy a sufficient sum to meet existing indebtedness, but not the excess, the question is presented whether that portion which the board had competent authority to levy, can be separated from that portion which was unwarranted.

Had an application been made for a judgment against real estate, and had the sale been made under an order of the court for the entire sum levied, there can be no question that it would have been illegal, but had the court, on objections interposed, or otherwise, have ascertained, by computation, the portion which could have been legally levied, and have rendered judgment for that portion of the whole levy, could it be said that the sale would be void for that reason? We think not. Such a separation of the legal from the

illegal portion of the act would be easy and certain, and could not produce injury to any one. In the case of Briscoe vs. Allison 43 Ill. 291, where an injunction was sought to restrain a tax which was in part excessive, the excess was enjoined, and the bill dismissed as to the remainder. And we see no valid distinction between that and the case at bar. In this suit for the recovery of the tax, it is agreed that no exception shall be taken to the form of action or the parties, and that being so, no reason is perceived why the plaintiff below may not recover. The court can readily, by computation, ascertain the portion which was authorized from the portion that was unwarranted, and ascertain the amount, and render judgment for its recovery. The judgment must therefore be reversed and the cause remanded for further proceedings.

Judgment reversed.

JOHN BLAKELEY,
DEALER IN
WOOL & COTTON WASTE,
For Railroad and Steamboat Use, Steam Packing, &c.,
No. 233 Church Street, Philadelphia, Pa.,
SOLE AGENT FOR
CLEVELAND STEAM GAUGE CO.,
HOLT'S PATENT STEAM GAUGES,
For Locomotive and Stationary Engines, Locomotive Spring Balances, Water Gauges and Test Pumps.

Notice to Contractors.

SEALED PROPOSALS will be received until the 26th of April next for the grading, masonry, bridging and superstructure of the Sugar River Railroad from Bradford, N. H., about thirty (30) miles to the Sullivan Railroad in Claremont.

The work will be let entire or in sections, as may be desired.

The right to reject all bids not satisfactory is claimed.

Plans, profiles and specifications can be seen at the office of the Company at Newport, N. H., or at the office of the Northern Railroad at Concord, N. H.

RAILROAD CROSS TIES.

Notice to Contractors.

THE COMMISSIONERS appointed to construct the Intercolonial Railway give Public Notice that having annulled the Contracts for Sections Nos. 5, 6 and 7, they are prepared to receive Tenders for re-letting the same.

Section No. 5 is in the Province of Quebec, and extends from the Easterly end of Section No. 2, forty miles east of Riviere du Loup, to the sixty-sixth mile post, near Rimouski, a distance of about 26 miles.

Section No. 6 is in the Province of New Brunswick, and extends from the Easterly end of Section No. 3, opposite Dalhousie, to the West side of the main Post Road, near the forty-eight mile post Easterly from Jacquet River, a distance of about 21 miles.

Section No. 7 is in the Province of Nova Scotia, and extends from the Southerly end of Section 4, near River Philip, to Station O, (formerly Station Fifty,) at Folly Lake a distance of about 24 miles.

The Contracts for the above Sections to be completely finished and ready for laying the track by the 1st of July, 1871.

The Commissioners also give public notice, that they are prepared to receive Tenders for four further sections of the line.

Section No. 17 will be in the Province of Quebec, and will extend from the Easterly end of Section No. 14, down the Matapedia Valley, to Station No. 685, about one mile above the boundary line between the Counties of Rimouski and Bonaventure, a distance of about 20 miles.

Section No. 18 will be in the Province of Quebec, and will extend from the Easterly end of Section No. 17, down the Matapedia Valley to Station No. 380, near Clark's Brook, a distance of about 20 miles.

Section No. 19, will extend from the Easterly end of Section No. 18, in the Province of Quebec, down the Matapedia Valley to its mouth, and thence across the River Restigouche to Station No. 870, at the Westerly end of Section No. 3, in the Province of New Brunswick, a distance of about 9¼ miles, including the bridge over the River Restigouche.

Section No. 20, will be in the Province of New Brunswick, and will extend from the Easterly end of Section No. 10, in the Town of Newcastle, on the Chaplin Island road thence crossing the North West and South West branches of the River Miramichi, and terminating at Station No. 320, about one mile and three quarters South of the South West branch, a distance of about six miles, including the bridges over the branches of the River Miramichi.

The Contracts for Sections Nos. 17, 18, 19 and 20, to be completely finished and ready for laying the track by the first day of July, 1872.

Plans and Profiles, with Specifications and terms of contract for Section No. 7, will be exhibited at the office of the Chief Engineer in Ottawa, and at the offices of the Commissioners in Toronto, Quebec, Rimouski, Dalhousie, Newcastle, St. John and Halifax, on and after Monday the 11th day of April next; for Sections Nos. 5 and 6 at the same offices, on and after Wednesday, the 20th April next, and for Sections Nos. 17, 18, 19 and 20, at the same offices, on and after Tuesday, the 10th day of May next.

Sealed Tenders for Sections 5, 6 and 7 addressed to the Commissioners of the Intercolonial railway, and marked "Tenders" will be received at their office in Ottawa, up to 7 o'clock p. m., on Saturday, the 7th day of May next; and for Sections Nos. 17, 18, 19 and 20, up to 7 o'clock p. m., on Wednesday, the 25th day of May next.

Sureties for the completion of the contract will be required to sign the Tender.

A. WALSH,
ED. CHANDLER,
C. J. BRYDGES,
A. W. McLELAN,
Commissioners.

COMMISSIONERS' OFFICE,
Ottawa, 24th March, 1870.

LARGE PEREMPTORY SALE.

Very Valuable Machinery.

RICHARD NORRIS & SON'S
LOCOMOTIVE WORKS,
17th Street between Pennsylvania Avenue and Spring Garden Street.,
PHILADELPHIA, PENN.

THOS. BIRCH & SON, Auctioneers.

On Tuesday morning, May 3rd, 1870, at 10 o'clock, will be sold at public sale on the premises of Richard Norris & Son's Locomotive Works, 17th Street, between Pennsylvania Avenue and Spring Garden St., the entire valuable machinery, consisting of 5 STATIONARY ENGINES varying from 15 to 100 horse power; 14 Cylinder Boilers; 50 Planing Machines varying from 12 to 60 inches, length of bed from 2 to 36 feet; 100 Slide Rest and Screw Cutting Lathes varying from 12 to 36 inches swing; Length of Shears from 3 to 26 feet; 50 small hand Lathes; 2 very large Slide Rest, Wheel Lathe swing 6 ft. 6 in.; 25 Slotting machines various size strokes; 2 Merrick & Son's Large Steam Hammers; 20 double and Single Drill Presses; 1 Seller's Hydraulic Wheel Press; 1 Seller's large size Boring Mill with universal chuck; 1 Whitworth Radial Drill Press; 1 Whitworth Screw Cutting Slide Rest Lathes large size; 1 Whitworth 48 inch Planer; Double head gear cutting engine, large size; large and heavy Railroad Iron Shears; 1 Tyre Expanding and Rounding machine; 1 Tyre Bending machine with Furnace Castings with Fire Brick; Shafting, Hangers, Pulleys, and Couplings; 3 large Platform Scales; 6 small Platform Scales; 4 new Lever Beams—graduated to weigh 10 Tons each with weight complete—the above Scales made by Abbott & Co.; 2 complete Furnaces for Heating Scrap Iron with Boiler on top—to supply Steam Hammers; 100,000 Lbs. Slabs Wrought Iron faggottit from Boiler and machine shops scraps of the best quality; 1 complete Photographic Apparatus; Tons wrought and cast scrap Iron $50,000 worth; New Bar and Tool Steel; Bar Iron; 10,000 feet of Belting; 50,000 feet of Gas pipe; 200 feet large Lead Water Pipe; Machinists', Blacksmiths' and Boiler makers' Tools; complete assortment of Foundry Flasks; Ladders; 2 Cupolas; Large Foundry Cranes; 1,000 new Birmingham Boiler Fines; 2 in. Diameter No. 12 Wire Gauge; 200 Anvils; 500 Vices; Spinners, Lathes and Tools, Jacket, Machine, Wood Planing machines, Circular Saws, Large Locomotive Trucks, Turn Tables, Carts, Drays, Harness, &c., &c. Catalogue ready April 1st, can be obtained by applying to the Auctioneers. The sale will commence Tuesday, May 3rd, at 10 o'clock, and will be continued daily until the whole is sold. The Factory will be open on Monday, May 2d, for examination.

STEAM PACKING, &C.

The Springs manufactured by this Company, and stamped with their trade mark, are fully warranted; and any proving defective will be replaced at their own cost. Orders solicited, and samples forwarded on application.

W. W. WARD, Sec'y. J. J. BURGESS, Pres't.

Locked Safety Valves.

TO

MASTER MECHANICS

AND

LOCOMOTIVE BUILDERS.

THE UNDERSIGNED OFFERS FOR SALE, SAFETY VALVES, effectually guarded against tampering, invented and patented by himself; patent bearing date Sept. 24th, 1859.

Said Valves are sold with Spring, Guard, Studs, and Nuts, complete, and all ready to put on to boiler domes. Price for size suitable for Locomotives, $27 50.

The Valve and Seat are made of hard composition. Spring of best cast steel.

The above Valve is sensitive, and is not liable to stick from corrosion; and is particularly well suited for large stationary and marine boilers, giving large area for escape of steam, and requiring a short lever, and light weight or spring, for holding Valve against pressure.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,
IRON AND STEEL MANUFACTURERS,
No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

BRADY'S RAILROAD LANTERNS.

The strongest and best in use; are made principally of Malleable Iron. Here lies the secret of their strength, the frame being capable of supporting a weight of Four or Five Hundred Pounds; and yet they are little heavier than ordinary Lanterns. The guards are rivited through the top and bottom flanges, the rings wound with wire where they cross the guards, and the whole frame tinned, uniting each piece with the other, making it the *strongest* Lantern ever offered to the public. RAILROAD MEN *especially* cannot fail to see that it will be economy to purchase these Lanterns, as there is no part that can be broken with ordinary use, except the Globe, which being adjustable, is easily and cheaply replaced with any color and at a small cost; the greater weight being at the bottom, it cannot readily upset. Now used on the following Railroads: New York and New Haven; Hartford and New Haven; Shore Line, Conn.; Providence and Worcester; Boston and Maine; Conn. and Passumpsic Rivers; Fitchburg; Rensselaer and Saratoga; Troy and Boston; Boston and Providence; Boston, Clinton and Fitchburg; Charlotte, Columbia and Augusta; Connecticut River; European and North American; Hartford, Providence and Fishkill; Mobile and Ohio; Portland and Kennebec; Boston, Hartford and Erie; Worcester and Nashua; Lake Superior and Miss.; Hudson River, and many others.

The trade supplied from our Store, or from the Factory, New Britain, Conn,

TAYLOR MFG. CO.,

American Railroad Journal.

New York Saturday, April 16, 1870.

Vicksburg, Decatur and Cincinnati R. R.

Let the reader place before him a map of the Southern States, draw an air line from Cincinnati to Decatur and from Decatur to Vicksburg, and follow it with a full knowledge that at Cincinnati can now be concentrated the entire Manufacturing Agricultural and Mineral products of all the country East of the Missouri River and North of the Ohio and West of the Atlantic seaboard, at a very low rate of freight and in the shortest possible time, this, with the local advantages, large capital and indomitable energy of her large population, if sustained by proper facilities, will give a large impulse to all business at Cincinnati.

The Mississippi River delivers at Vicksburg the Rice and Sugar from Louisiana, and from New Orleans the entire products of the Gulf Coast and Islands. By the Southern Pacific, now nearly completed to Dallas, Texas, the entire products of Texas can be concentrated at Vicksburg, which in Cattle and Wool alone (produced at half the cost of any other part of the United States), would give a heavy through business to a railroad.

By locating this line as proposed, it would draw to it more of the Kentucky, Tennessee, Alabama and Mississippi products than any other proposed route. It runs on the North Western slope of the Alleghany Mountains to Aberdeen, Miss., so as to avoid tunnels, deep excavations and high grades, and approximates closely to an air line. It will be the first and nearest lines to the Atlantic cities that will be reached by the entire webb of roads working through the Alleghany Mountains, to reach the valley of the Ohio.

At Decatur it connects in direct air line with Memphis, El Paso and San Diego, and through East Tennessee with Washington City, through Montgomery with Mobile, Pensacola, Brunswick, Savannah and Charleston, and with the interior of Alabama, Georgia and South Carolina. There is no line of equal length in the United States having so wide a belt of equally productive country, at once opening the heart of the Cotton, Corn, Wheat, Tobacco and Stock region.

The climate is such that white labor can work the year round. The land is cleared, and there are good country roads, school houses and churches, but not half enough labor on any part of it to cultivate the cleared lands. The local business on this route will exceed that of any other road in the United States. The through business can, from both termini, be increased to an indefinite extent.

The road from Chattanooga to Atlanta is entirely owned by the State of Georgia, neither will a competing route be chartered nor will rates be equitably divided with other roads. ***

Mushet's Steel Patent.

A correspondent of the Philadelphia *Ledger* having stated, in his notice of the Bessemer patent for making steel, that a uniform and reliable product cannot be obtained without the use of an alloy containing iron, manganese and carbon, which was patented by Robert Mushet, an Englishman, further asserted that Mushet's patent will not expire for a year, being dated May 26th, 1857. In point of fact, however, says another correspondent of the *Ledger*, Mushet's patent will expire and his invention become public property in this country on the 22d day of September next. Mushet's invention was originally patented in England, September 22d, 1856, and repatented in the United States, May 26th, 1857. An American patent for an invention, previously patented in a foreign country, is limited to the term of fourteen years from the date or publication of the foreign letters patent. As every manufacturer and consumer of steel in this country is interested in the free use of Mushet's invention, it is important that they should not be misled into the payment of royalties and license fees on an extinct patent.

Buffalo Bayou, Brazos & Colorado Railroad.

This road is 83½ miles in length, extending from Harrisburg, on the Buffalo Bayou, a few miles below Houston, to Columbus, on the Colorado. Its course is nearly west. Its charter provides for its extension up the Colorado to Austin, and some fifteen miles of that distance have been graded, but no work has been done on it since the war.

Within the past two or three years, this company has expended a great deal in repairs and in building a splendid iron bridge over the Brazos, and a very substantial wooden one over the Colorado at Columbus. Previous to the construction of this bridge over the Brazos, the company were subject to annual heavy losses in the obstructions to their trains by the rises of the Brazos river.—Now, however, these difficulties have been overcome, and the road is said to be doing a heavy and profitable business. Passenger trains, which leave Harrisburg and Columbus daily, connect at the former place with the Galveston, Houston and Henderson Railroad, and at the latter with stages for Austin, San Antonio, and all parts of Western Texas.

We learn that there is now a prospect of its extension to Gonzales and San Antonio under the charter of the "Columbus and San Antonio Railroad Company," organized some two years since, and by great exertions on the part of Col. J. W. Stell, of Gonzales, all the necessary stock taken. Negotiations are said to be in progress for the consolidation of these two companies. The extension or the road to San Antonio is among the most important enterprises in the State, as it will doubtless control a large part of the western trade. The managing directors are: T. W. Pierce and J. W. Barrett, Boston, Mass. Superintendent, G. B. Nichols, Harrisburg, Texas.

South Carolina Railroad.

The earnings of this road for the years ending December 31, 1868 and 1869, were as follows:

	1868.	1869.
From passengers	$310,778 47	$325,180 85
" freight	961,704 30	1,009,067 40
" mail	20,575 00	30,088 46
" other sources	1,904 12	17,830 29
	$1,294,961 89	$1,382,167 00
Expenses, viz:		
Bureau Department	$15,430 33	$15,378 69
Transportation	358,392 87	394,859 55
Machinery	167,672 03	176,294 80
Roadway	155,952 17	147,892 49
	$697,447 40	$734,425 53
Earnings less exp	$597,514 49	$647,741 47
From which deduct—		
Interest—sterling	$113,765 28	$113,765 28
" domestic	119,405 79	149,909 94
Damages	4,395 44	48,993 68
Stock killed	2 412 53	3,241 23
	$239,979 04	$315,910 13
Net income	$357,535 45	$331,831 34

Compared with the previous year the gross earnings of 1869 show an increase of $87,205 11; with an increase in expenses of $36,978 13—making the increase of net earnings, $50,226 98. The net income, after payment of interest, damages, etc., shows a decrease of $25,704 11. The report says:

The results which are exhibited, the Board are confident, will excite amongst the Stockholders a degree of satisfaction quite equal to their own. They could hardly have been anticipated in view of the competitions and difficulties which opposed us, and we confess occasion us pride, gratification and even surprise.

Important transactions have marked the progress of the year just passed. The contests with the Columbia and Augusta Railroad Company culminated and were finally disposed of, with, it is hoped, the embittered feelings and acrimonious and expensive litigation which attended them.

The obligations of the Company to the Billholders of the Southwestern Railroad Bank, after years of objection and dispute, have been finally admitted, and, except to a small extent, discharged, and the efforts of the Company's negotiator abroad for the settlement of their Sterling Debt successfully concluded. These measures have all exercised no inconsiderable influence upon those interests of the Company which are the subjects of this report, and have had their full share in increasing and aggravating the difficulties of administering the affairs of an Institution so peculiarly circumstanced as this.

They will, in their proper places, be more particularly referred to hereafter.

The earnings of the year are stated to have been from all sources $1,382,167, and are in excess of 1868, $87,205 11. They also considerably exceed the earnings of any year since the war—a fact full of encouragement to the owners of the property. New lines of communication have been opened between points heretofore connected by our road, sharp competition excited, and, as a necessary consequence, lower rates of freights and passage established. Again, it is easy to concede that every new line of communication has in some respects advantages not possessed by pre-existing ones—in the direction of less distance or otherwise—which do not fail in the end to assert their due influence. Thus it has happened, for instance, that the completion of the Columbia and Augusta Railroad, last summer, whilst it developed competition with us to almost all important points, naturally, and almost without effort, appropriated that portion of our business which grew out of the relations of the business communications at Columbia and Augusta, and respective adjacent territories. Whilst, therefore, the income of the year has had to contend against a reduction of rates, made necessary by competition, as well as a diversion of some of its business not to be retained by any effort of the Board, a handsome increase is still shown over the previous years.

A further cause of satisfaction is found in the nature of that increase. It is derived principally from freights moving to the West, beginning in great part at the great centres North, and indicating by their rapidly increasing volume, the maintenance of this line's hold upon the confidence of the general public.

The operating expenses of the year are $734,425 53 and are 53.13 per cent. of earnings.

Whilst it might perhaps be sufficient to state here, that the management shows rather a less ratio of expenses to earnings than is usual upon roads operated under similar circumstances, and even more favorably situated, it is proper to add, that, in the judgment of the board there is room, even here, for a more favorable exhibit. For though it is quite true that in many items of expenditure, payments by this Company are very much below those of neighboring roads, it is not less true that the Company is, in other respects, affording service and accommodation, not justified by compensating equivalents. How much clamor and the unceasing efforts of the selfish have had to do with this, it is not of sufficient importance to inquire. The consideration of the Board will be given at a very early day to the subject.

The net earnings from what has been shown, stand as $647,741 47, and are 46.87 per cent. of gross. In comparison with the year 1868, there is a difference of $50,226 98 in favor of this year. The character of this account has been matter of reference and explanation so frequently, that there hardly appears occasion to add a word more here. But before proceeding further, the Board pause to ask the stockholders to contemplate the fact, which is here exhibited, to wit, a balance after deducting managing expenses of over $600,000, or ten per cent. upon their capital, and to consider it in connection with the policy of the present administration, which has constantly and earnestly been directed to the reduction of indebtedness, as constituting the truest and surest foundation of the stockholders' prosperity.

The disposition of this balance is accounted for in the Auditor's statement, as follows:

Net earnings as stated		$647,741 47
Deduct interest, damages and stock killed		315,910 18
Leaving net income of		$331,831 84
Add thereto reduction of previous balances of stocks of materials	19,947 36	
Payment under the contract with the City of Augusta, and the Charlotte, Columbia and Augusta R. R. Co.	75,000 00	
Making		$426,778 70
Which has provided for the following: Restoration of property, including cost of new rail iron after deducting sales of old, ($89,607 74)	$133,815 37	
Cars built at the company's shops, 2 first class and 6 second class passenger, 42 box, 2 platform and 6 stock cars	50,693 64	
Settlement of Confederate Claims, etc., deducting sundry credits	55,603 00	
	$240,112 01	

Leaving a balance of $186,666 69, which has gone to the reduction of general indebtedness.

In the exposition above given, the item "damages," on account of its unusual amount, may require some explanation. It is due to the fact that it includes the losses occasioned by the disaster in the Congaree swamp, September 18th, 1869, burning of cotton in Columbia, December 25th, 1868, and subsidy to Liverpool semi-monthly line of steamships.

Apart from interest and payments on account of debt, it will be seen that there have been again heavy expenditures for additions to and improvements of property, all rendered necessary by the demands of business, or the necessities of the case.

The report of the General Superintendent contains the usual interesting matter in connection with the details of the operative department of the road. The mileage and tonnage tables which accompany it, will be found interesting from their intimate connection with the expenses of management. The excess of tonnage is stated over last year at 25,436 tons, and greatly preponderates in the direction west.

The condition then is, that we are moving heavier masses of freight at lower prices in one direction, and returning a disproportioned number of empty or partially loaded cars, thus rendering the economic management of transportation a very difficult and perplexing task. The wants of this department for the year just entered are as follows: 3 passenger coaches, 50 box cars, 50 platform cars, 2,000 tons rails, new bridge across the Edisto River, trestle and stone culvert near Graniteville.

In so far as the absolute necessities of the road may seem to require outlay, a just regard to the interests of the company, and proper sense of their own responsibilities, will impel the Board to act, but only under such convictions and in such directions. It seems to them eminently fit to consider now the more immediate interests of the stockholders. Certainly, to the establishment of a sound and substantial value of their shares, but with equal certainty in the immediate interests of the public, the revenues of the property have been disposed of. It is meet, now, that these should be restored to their channel at the earliest practicable moment.

The extra work done in this department, the changes in the car and locomotive accounts, are briefly summarised from the Superintendent's report, viz:

Improvements at agencies and at stations on line of road	$9,978 45
Half cost of bridge at Wateree and Hampton Creek, culvert at True Blue	20,766 14
Rail iron laid down to the extent of 1,631 tons	89,607 74
Cars of all classes built at the company shops, fifty-eight	50,693 64

Five new locomotives were purchased to relieve the trains to some extent from the pressure of way freights. Of these, four have been recently received, and one is in North Carolina. Of the four received, three are now running and one is in the shops.

The papers and statements from the auditor convey a full, and, it is believed, faithful account of the transactions in that department for the year. The Board select for your present information the condensed balance sheet:

Roadway, track, structures, depots, &c		$7,733,996 49
Lands		435,378 26
Cars		312,978 66
Locomotives		438,258 00
Supply of materials		58,921 08
Commissary stores		1,808 20
		$8,981,330 69
Cash	$25,726 54	
Agents	97,986 29	
Postoffice department	14,657 21	
		138,330 14
Bonds of Columbia and Augusta Railroad Co		75,000 00
Sundries		19,961 00
Bills receivable		5,448 48
Stocks		448,212 50
Investments in first mortgage bonds and certificates of Indebtedness of Greenville and Columbia Railroad Company		57,398 03
Southwestern Railroad Bank		501,447 00
		$10,222,127 72

Stock		$5,819,275 00
Sterling bonds	$2,342,832 44	
Domestic bonds	1,704,519 00	
		4,047,351 44
Bills payable		295,664 39
Transient creditors	$145,263 38	
Less transient debtors.	85,426 42	59,836 96
		$10,222,127 70

This paper briefly, yet explicitly, expresses the financial condition of the company at the close of the year, and when the heavy losses, and still heavier obligations they have had to meet, are remembered, it will excite the liveliest gratification amongst the stockholders.

The movement of the principal accounts, "Bonds Payable" and "Bills Payable," are thus indicated:

Domestic bond debt, Dec. 31, 1869.	$1,704,519 00
Domestic bond debt, Dec. 31, 1868.	1,585,296 06
Increase in 1869	$119,222 94

This increase is the result of:

First, Issues of new bonds on account of the Southwestern Railroad Bank.	$445,000 00	
To retire past due bonds and coupons and for investments in Greenville and Columbia Railroad Bonds	4,000 00	
Add interest on past due bonds to December 31, 1869	13,651 25	
Making together		$462,651 25
Second, A reduction of past due and unmatured bonds	$316,025 00	
Reduction of interest on past due bonds	27,403 31	
		343,428 31
Producing the result as above stated.		$119,222 94
Bills payable December 31, 1869		$295,664 39
" " 1868		88,060 60
Showing an increase of.		$207,603 79

This has been occasioned by the issue of Notes during the year for the following purposes, viz:

To retire bonds and interest	$68,739 18
For loans	119,500 00
" interest due Bank of Charleston.	21,828 89
" rail iron	20,270 77
" general supplies, etc	35,825 55
Making	$266,164 39
From which deduct payment on account balance 31st December, 1868	58,560 60
And the above result is shown	$207,603 79

The balance of the account on December 31, 1869, is composed of what remains unpaid of balance 31st December, 1868 $29,500 00
And the new issues as stated above 266,164 39
$295,664 39

From this it will appear that, notwithstanding the heavy issues for the objects stated, the Bond Debt of the company has only been increased in the sum of $119,222 94. Nor does this exhibit present, in the most favorable point of view, the condition of that account.

It would be perfectly legitimate, in the opinion of the Board, to credit the amount charged to bonds with such portions of it as represent subscriptions to railroad, steamships and other property, not an integral part of the railroad proper. We should thus have:

Subscription to Macon and Augusta railroad	$160,000
Subscription to steamships	155,000
Making	$315,000
And this amount taken from	1,704,219
Would reduce the bond account to	$1,389,519

Equally favorable explanations can be offered of the bills payable account. As shown, that account, increased for debt and purchases, as compared with 1868 stands, $295,664 39; but upon the opposite side of your sheet you will find assets considerably in excess. Now if these were applied to your bills payable, you would have little or no floating debt. It is true it is not desirable to dispose of these assets: some of them are held for special purposes: all are yearly improving. That, however, does not affect their relation to the debt of the company.

It is doubtless expected that something should be said about future dividends. It was the earnest desire and confident expectation of the Board to commence the payment of dividends on the 1st of January, 1870. The necessity of assuming the payment of the issues of the bank, and the arrangement of other debts, has prevented them from carrying this resolution into effect.

But it is their present purpose, if nothing unforeseen should occur, to commence the payment of moderate quarterly dividends on the 1st of July next. They prefer to begin slowly and proceed cautiously. A portion of the past due bond debt remains out, and in April they have to provide for a portion then to become due. These, and other cash obligations, in a market with so small a money base, force upon them a policy narrower than their inclinations would adopt if any other were practicable.

In the progress of litigation with the Columbia and Augusta Railroad Company, with reasonable assurances of success, it became necessary to call upon the City of Augusta to perform her obligations under a contract made with this company, which contract provided, that no railroad from the City of Charleston or Columbia should be allowed to enter Augusta, except upon payment to the South Carolina Railroad of the subscription to the Macon and Augusta Railroad. This subscription was based upon agreements of such a nature, and these agreements were mainly relied on by the Board in the arrangement of the litigation. But to our surprise we were not only met with refusals, but with counter demands, if we declined the proposals jointly submitted by the Charlotte, Columbia and Augusta Railroad, and the City of Augusta, to conform to old and forgotten conditions of agreements made with preceding administrations, conditions which had never been enforced. These conditions involved the sacrifice of the company's through business—the work of years, of money, toil and care.

The Board could not hesitate. They accepted the proposals offered them, and united in a new contract, whereby litigation was to cease, the rights of this company in future to unrestricted freight arrangements recognized, and a cession until January 1st, 1870, to the Columbia and Augusta Railroad of the use by their trains, of this company's bridges across the Savannah River. In part consideration of which, the Columbia and Augusta Railroad was to pay in its bonds the sum of $75,000.

The stockholders of the road have from time to time been kept advised of the demands made by the holders of the bills of the Southwestern Railroad bank for payment. These demands have been persistently resisted, and every reasonable effort made to avoid a responsibility oppressive in its character and attended with doubts which utterly excluded a ready acknowledgment of our obligation. Nevertheless, it has always been the opinion of the Board that a just and judicious compromise of those claims should be sought in the true interests of the company, and to that end the directors have not failed always to direct their earnest attention. Litigation, however, in this connection assumed an aspect during the summer, which, in conjunction with Legislative enactments referring to banks in suspension, admonished the Board of the danger of delays. They therefore hesitated no longer to accept the offers of compromise submitted to them, and proceeded at once with arrangements for the settlement of the outstanding circulation of the bank. In that direction they have proceeded, until now, but a small sum remains unarranged. The settlements were made chiefly in the six and seven per cent. bonds of the company. The bank, as shown in the auditor's statements, is indebted to the road in the sum of $501,447.

Little is left to the Board to say, beyond the announcement of the fact of the return of the Hon. C. M. Furman from London, where he has been in charge of the negotiation for the past eighteen months of the company's first direct mortgage bonds for the exchange of past due five per cent. sterlings. That measure may be regarded as accomplished. Mr. Furman reports the acceptance of the necessary number of assents, qualified only by the very proper condition that the necessary legislation be had to relieve the company from the State lien originally imposed to protect the old guarantees. This legislation has been applied for as comprehended in the Act thereto appended, has the sanction of the Governor, and is expected to be in the possession of the Board at an early day, when it will be transmitted, and the exchange of bonds be consummated.

The company have 43 locomotives; (of these 33 are effective, 3 under repairs, 6 awaiting repairs, and 1 rebuilding;) 24 first class and 24 second class passenger, 808 box, 70 platform, wood and coal, 14 stock and 392 freight cars. Number of miles run, 801,171. Number of passengers carried, 109,275. Tons of freight, 185,968.

The debt and property accounts of the company at the close of the last and preceding years were as follows:

	1868.	1869.
Capital stock	$5,819,275 00	$5,819,275 00
Sterling bonds	2,275,444 79	2,342,832 44

Gen'l Superintendent.—H. T. Peake.

Auditor.—J. R. Emery.

Development of Pennsylvanvia.

The following is a correct copy of the Act recently passed by the Legislature of Pennsylvania, entitled "An Act to facilitate and secure the construction of an additional railway connection between the waters of the Susquehanna and the great lakes, Canada and the northwestern States, by extending the aid and credit of certain corporations to the Jersey Shore, Pine Creek and Buffalo Railway Company, and in like manner to aid the construction of the Pittsburg, Virginia and Charleston Railway, the Clearfield and Buffalo Railway, and the Erie and Allegheny Railway:

WHEREAS, It is a matter of much public importance to the State at large that a railway should be completed at an early date, to form an additional connection between the anthracite and bituminous coal fields of Pennsylvania and the great chain of lakes and States West; also, aid the construction of the Pittsburg, Virginia and Charleston Railway, the Clearfield and Buffalo Railway, and the Erie and Allegheny Railway, and thereby provide outlets for important portions of this Commonwealth that are filled with valuable coal, minerals and other products, now without such highways; and when these lines are constructed, adding greatly to the taxable values for State, county and municipal purposes—as well as to greatly increase the value of productions from those sections of the Commonwealth for manufacturing, agricultural and all other purposes; *And whereas*, It is believed that those desirable objects may be accomplished by the provisions of the annexed bill; and in order to grant sufficient authority for effective aid as aforesaid to secure the same; therefore,

SECTION 1. *Be it enacted by the Senate and House of Representatives of the Commonwealth of Pennsylvania in General Assembly met, and is hereby enacted by the authority of the same*, That the Jersey Shore, Pine Creek and Buffalo railway company be and are hereby authorized to execute a first mortgage to the amount of six millions of dollars in lieu and substitution of the loan said company have heretofore been authorized to make, which shall cover all their line of railway to be constructed from Jersey Shore to connect with the Buffalo and Washington railway as set forth in their charter, with its extensions, rights of way, equipment, engine houses, machine shops, tools, and property of every kind whatsoever appurtenant to and requisite for the maintenance, management and operation of said road, together with the corporate rights and franchises acquired and to be acquired, to secure the payment of bonds as hereinafter provided, each bond bearing interest at five per centum per annum, payable semi-annually, from and after the first day of April, A. D., 1870, which bonds shall be payable to the Commonwealth of Pennsylvania, to be deposited in the sinking fund of the Commonwealth, with the interest thereon, for application only to the payment of the public debt; these bonds to be received by the Commonwealth in lieu and substitution of the existing debt of that amount of five per centum bonds that is contracted to be paid by the Pennsylvania Railroad Company, and all liens and claims arising in connection therewith; and the said six millions of dollars of bonds shall be received in full satisfaction of said bonds of the Pennsylvania Railroad Company, and of all liens and claims arising thereunder or therefor.

One hundred thousand dollars of said bond of the Jersey Shore, Pine Creek and Buffalo Railway shall be payable each and every year, beginning with the first day of April, one thousand eight hundred and seventy-five, and so continue annually thereafter, until the first day of April one thousand eight hundred and ninety. On the first day of April, one thousand eight hundred and ninety-one, one million of dollars. On the first day of April, one thousand eight hundred and ninety-two, one million of dollars. On the first day of April, one thousand eight hundred and ninety-three, one million of dollars. And all the remaining balance of the entire debt, with the interest due thereon, shall be fully paid and liquidated on the first day of April, Anno Domini one thousand eight hundred and ninety-four.

Upon the delivery of the bonds and mortgages, as hereinbefore provided, the commissioners of the sinking fund of this Commonwealth are hereby authorized, empowered and directed to deliver to the Jersey Shore, Pine Creek and Buffalo Railway Company the obligations of the Pennsylvania Railroad Company now in the sinking fund, or in any way belonging to the Commonwealth, to the amount of six millions of dollars of five per centum bonds, and to cancel and fully satisfy all mortgages or claims of every nature and kind whatsoever existing therefor by legislative enactment, contract or otherwise, in favor of the Commonwealth against said Pennsylvania Railroad Company, and thereupon the entire proceeds that may be realized from the said bonds and claims against the Pennsylvania Railroad Company shall be applied from time to time by the Jersey Shore, Pine Creek and Buffalo Railway Company only to the immediate construction and equipment of the said line of railway between the points specified in the act incorporating the said company, and the said main line of railway shall be constructed and opened for public use within three years from the passage of this act: *Provided however*, That no delivery or exchange of bonds shall be made under the provisions or authority of this act by the commissioners of the sinking fund until a contract for the construction and equipment of the Jersey Shore, Pine Creek and Buffalo Railway with responsible parties duly executed shall be delivered to said commissioners, and an absolute guarantee for the fulfillment thereof within the time and conditions of this act by the Catawissa and Philadelphia and Reading Railroad Companies, or the Catawissa and Lehigh Valley Railroad Companies, or the Catawissa and Lehigh and Susquehanna Railroad Companies, or by the Philadelphia and Erie, Northern Central and Pennsylvania Railroad Companies, and also a guarantee in like manner of the payment by the Jersey Shore, Pine Creek and Buffalo Railway Company of three hundred thousand dollars interest per annum as it accrues to the State on the said bonds of the Jersey Shore, Pine Creek and Buffalo Railway Company during the construction of said line of railway, and until it is opened for traffic as required by this act.

And said companies, or such of them as may join in said guarantee for the purpose of providing additional security to the State, as aforesaid, are hereby fully authorized and empowered to execute such agreements and obligations, under their corporate seals, as may be needful to perfect their said guarantee as required by this act, and as further security to the Commonwealth for the execution of guarantees, as hereinbefore provided; the same shall be deemed and taken to be a lien upon the railways, their property and franchises, that may enter into the same, and so continue until the conditions thereof are fully complied with: *Provided, however*, That the said Pennsylvania Railroad Company shall give its consent in writing, duly executed under the seal of said company, to the transfer of the said Pennsylvania Railroad Company's bonds to the said Jersey Shore, Pine Creek and Buffalo Railway.

SEC. 2. That the three and a half millions of five per centum bonds now in the hands of the commissioners of the sinking funds given by the Allegheny Railroad Company to the Commonwealth of Pennsylvania, together with all the guarantees connected therewith, be and they are hereby appropriated for aiding in the development of certain districts of the Commonwealth as hereinafter provided: First. To the Pittsburg, Virginia and Charleston Railway Company, and to the branch road to Waynesboro', in Greene county, one million six hundred thousand dollars. Second. To the Clearfield and Buffalo Railway Company, one million four hundred thousand dollars. Third. To the Erie and Allegheny Railway Company, five hundred thousand dollars. For which the Commonwealth of Pennsylvania shall receive their bonds respectively, bearing the same interest, maturing at the same time, as the bonds the Commonwealth now holds in *pro rata* proportion from each company, all of which shall be secured by a second mortgage upon those lines, and the branches thereof, respectively, their property, franchises and equipment, which bonds shall be deposited in the sinking fund, and the proceeds thereof shall be applied only to the payment of the public debt, and the interest thereon, the said companies limiting their first mortgage to an amount not exceeding sixteen thousand dollars per mile, bearing interest at seven per centum per annum, the proceeds thereof, and also the proceeds of all the bonds received from the Commonwealth under this act, to be used only for aiding in the construction and equipment of their roads and branches, all of which bonds and mortgages they are hereby fully authorized and empowered to perfect in the usual form; upon this being done and the five per centum bonds of said companies delivered to them, the said commissioners of sinking fund are hereby authorized, empowered and directed to deliver to the companies named in this section of this act their respective portions of the bonds of the Allegheny Valley Railroad Company now in the sinking fund, or in any way belonging to the Commonwealth, to the amount of three million five hundred thousand dollars of five per centum bonds, and to cancel and fully satisfy all mortgages and claims of every nature and kind whatsoever existing therefor in favor of the Commonwealth against said Allegheny Valley Railroad Company, and the guarantors thereof, the consent of said guarantors to said transfer first being filed with the commissioners of the sinking fund, and to relinquish and transfers all and every claim of the Commonwealth against the Allegheny Valley Railroad Company and the guarantors thereof, to the parties receiving the bonds aforesaid; and the said lines of railway, and the branch to Waynesburg, in Greene county, shall be constructed and open for public use within three years from the passage of this act, as follows:

The Pittsburg, Virginia and Charleston Railway and the branch to Waynesburg, in Greene county, between such point in South Pittsburg, Allegheny county, and Greensboro,' in Greene county, Pennsylvania, including said branch to Waynesburg, by such route as the Pittsburg, Virginia and Charleston Railway Company may adopt.

The Clearfield and Buffalo Railway between such point on the line of the Allegheny Valley Railroad extension in Clearfield county, or other point in said county, and at a point of connection with the Buffalo and Washington Railway, in the county of McKean, by such route as may after careful survey be finally adopted by the Clearfield and Buffalo Railway Company.

The Erie and Allegheny Railway between such point on the Atlantic and Great Western Railway in the counties of Erie or Crawford, and the city of Erie, by such route as the Erie and Allegheny Railway Company may finally adopt: *Provided, however*, That no delivery or exchange of bonds shall be made under the provisions or authority of this act by the commissioners of the sinking fund until a contract for the construction and equipment of said lines of railway, and the said branch to Waynesburg, respectively, with responsible parties, duly executed, shall be delivered to the said commissioners, and an absolute guarantee for the fulfillment thereof, within the time and conditions of this act by a responsible railway company or companies, of which the Pennsylvania Railway Company shall be one, and also a guarantee in like manner of the payment by the said railway company or companies respectively of all interest as it accrues to the State on said bonds belonging to the Commonwealth of said companies respectively, during the construction of their lines of railway, and until they are open for traffic as required by this act. And said company or companies as may join in said guarantee for the purpose of providing security for the said lines, are hereby fully authorized and empowered to execute such agreements and ob-

ligations under their respective seals as may be needful to perfect their guarantee for the fulfillment of their contract as required by the provisions of this act, and as a further security to the Commonwealth for the execution of the guarantees as hereinbefore provided, the same shall be deemed and taken to be a lien on the railway or railways, their property and franchises that may enter into the same, and so continue until the conditions thereof are fully complied with and the guarantees provided for in this bill shall be taken as an entirety, and no delivery of bonds made until all of the said guarantees are executed in due form for delivery to the Commonwealth.

Kansas Pacific Railroad.

The annual meeting of this company was held at Lawrence, Kansas, on the 4th inst. The Report of the President which was presented, shows that the receipts from freight were $1,500,419 27; from passengers, mails and express, $717,551 19; from miscellaneous, $7,909 65—total, $2,225,870 11. The total working expenses were $1,386,180 02; and the net earnings, $839,690 09. The average length of road during the year was 368 miles, being 35 miles more than the previous year. Total number of passengers carried, 146,588; increase 37,251, or 34 per cent. over the previous year. Total amount of freight carried 175,518 tons; increase 5,441 tons, or 41 per cent. over last year. Mercantile traffic, 153,015 tons, an increase of 61,822 tons, nearly 68 per cent. Gross receipts from commercial business, $1,703,405 92, an increase of $421,686 38, nearly 33 per cent. over last year. The operating expenses were a trifle over 62 per cent. of the gross earnings, an increase of eight per cent. over the preceding year, which was occasioned by the general improvement of the road for repairing the damages occasioned by the floods in June and July, the expenses for the latter amounting to over $100,000.

The operations of the land department show the number of acres sold to be 384,185; cash received, $247,286 49; notes, $76,094 98 to $100,819,147; expenses, $3,555,182; net proceeds, $97,263,965.

The road from Kit Carson West is being pushed rapidly. The grading is all under contract, and the iron and other material provided for, and the road will be completed to Denver by September next. The road from Denver to Cheyenne will be in operation by July 1st.

Milwaukee and St. Paul Railway.

The Vice President of this company, Russell Sage, Esq., has notified the New York Stock Exchange that the company intend to increase their preferred capital stock 1,760 shares, and their common capital stock 1,760 shares—3,520 shares, or $352,000 in all—for the purchase of the railroad extending from Austin to the state line, now owned by the Minnesota Central Railway Company, a distance of 11 miles. This increase is made in pursuance of an act of the legislature of Wisconsin, passed April, 1867, and of a vote of the shareholders at their annual meeting held June, 1867.

Also, that the company have agreed to purchase a majority interest in the capital stock of the Western Union Railroad Co., and for this purpose will increase their capital stock and issue 15,075 shares of their common stock. This increase is made in pursuance of an act of the legislature of Wisconsin entitled: "An act to authorize the Milwaukee and St. Paul Railway Co. to own stock in or consolidate with the Western Union Railway Co., approved March 9, 1870.

Pneumatic Propeller.

Experiments were made on Friday and Saturday nights with a pneumatic machine intended to be used for the propulsion of cars on street railroads. The writer witnessed the experiments on both nights. Four cylinders or trunks to contain the compressed air, which is the motive power, were intended to be used on the car, but one of the cylinders had been injured by some thoughtless or malicious person so much that it was worthless, and there were only three fit for use.

On Friday night these three cylinders were charged to a pressure of 250 pounds to the square inch. Captain Roberts, under whose supervision the cylinders had been made, and who has tried them, says they will bear a pressure of over 300 pounds to the square inch. The car was started at Erato street, on the down-town track of the Crescent City Railroad Company, on New Levee street, and, running into Canal street, made the turn table at Magazine street, with a party of twenty-four riding, in eight minutes. Returning, the gauge showed 125 pounds to the square inch remaining. The car was taken back on the same track at a disadvantage, for the track is only used in one direction. Going at a rate of not less than ten miles an hour, a loose rail was met at Girod street, and, the car running off the track, the impetus was not stopped until it nearly reached the curbstone. It was again put upon the track, not without losing much of the compressed air, however, by leakage, caused by jarring. There was another run off the track before the close of the experiment, and at St. Joseph street the motive power was exhausted.

The trial on Saturday night was much more satisfactory. The run was made to Canal street with a car in nine minutes. The start was made with a pressure of 270 pounds to the square inch. At the turn table at Magazine street there were remaining 140 pounds. This time the car was taken up Tchoupitoulas street and was stopped at Erato street.

In these experiments it was immediately shown that curves can be turned and the car stopped as readily when the pneumatic is used as when the mule draws. The distance down and up is computed to be upwards of two miles. Those interested will seek, doubtless, an exact measurement. The machinery is imperfect, permitting a waste of power, nevertheless the trial on Saturday night proved beyond cavil or dispute that, with three cylinders charged to 270 pounds to the square inch, a faultless run of upwards of two miles was made with a car full of passengers. With this fact to deal with it is a simple arithmetical question as how many cylinders are required to propel a car any given distance.—*New Orleans Commerciel Bulletin 4th.*

Albany and Susquehanna Railroad.

At a meeting of the directors of this company, held in Albany on the 5th inst., it was resolved that the transfer books be closed on the 15th of April, and re-opened on the 25th of April at the National Bank of Commerce in the City of New York, which institution, in accordance with the request of the Delaware and Hudson Canal Company, is hereby appointed by this Board (to act until further notice) the sole agency for the transfer of the stock of this Company on and after that date. It was also resolved that as soon as the outstanding floating indebtedness of this Company shall be ascertained and liquidated, the funds realized from the assets of the Company on hand at the time of the lease of this road to the Delaware and Hudson Canal Company, and remaining after payment of all outstanding indebtedness, shall be ratably divided among the stockholders of record, on the closing of the transfer books, April 15, 1870.

Pennsylvania Railroad Legislation.

The Governor of Pennsylvania has vetoed the great railroad bill. The veto message states that the bill is returned without approval, because it violates the Constitution, and because it is against sound policy. The sections of the Constitution which he holds to be violated, are the twenty-fifth section of article one, and the eighth section of article nine, which forbids log rolling legislation, and the fourth, fifth and sixth sections of article nine, relating to the sinking fund, the inviolability of the moneys therein, the disposal of the proceeds of the sale of the public works, the prohibiting the loan of the credit of the Commonwealth to corporations, and forbidding the State to assume the debt of any corporation. The message goes to show the inexpediency of the scheme; that the contract of guarantee required by the bill is illusory, unbinding, and does not provide for the manner in which the road should be constructed or equipped; that the interest upon the six million dollars of bonds, to be surrendered, is payable, according to a recent decision of the Supreme Court, in gold, and the interest on bonds to be renewed would be payable in currency. The State is now receiving $460,000 per annum on bonds to be surrendered. If the contract of guarantee in the bill was performed to the letter, the State would receive but $300,000 for the next three years, and after that time the whole amount would be lost, unless paid by the projected road. The Governor doubts the success of the road, even if built. Similar enterprises present a sad history of failure. The Philadelphia and Erie Road is a conspicuous illustration. Existing roads would be rendered a success, but the proposed scheme is extremely hazardous. The State debt is now too heavy. Nine millions of debt will mature within three years. The debt must be paid off, the taxes reduced, and the State's credit preserved. Her citizens have heretofore condemned all enterprises of doubtful expediency.

Baltimore and Ohio Railroad.

The following is a copy of the resolution adopted by the General Assembly of Maryland, in reference to the application of the company to be released from the further payment of the capitation tax on the Washington Branch road. It passed the lower house by a vote of 57 to 12; and the Senate unanimously:

Be it resolved by the General Assembly of Maryland, That the Governor is hereby authorized to employ additional counsel to assist the Attorney General in instituting all proper proceedings, by suit at law or by bill in equity, to enforce the just demands of the State of Maryland against the Baltimore and Ohio Railroad Company, and that the same should be instituted without delay.

☞ The Crockett (Texas) *Journal* says a corps of Engineers are now in the field surveying the Houston, Trinity and Tyler Railroad. Mr. Converse, the Chief Engineer, commenced the survey at Houston, on the 11th inst.

☞ A movement is on foot to build a railroad from Milwaukee along the lake shore to Manitowoc, thence to Green Bay. Meetings have been held at Green Bay and Depere, and resolutions adopted encouraging the movement.

American Railroad Journal.

Saturday, April 16, 1870.

Stock Exchange and Money Market.

A more active call has been noted for Money from speculative and mercantile borrowers since our last, and rates have been stronger generally on the basis of 6@7 per cent. in a temporary form, and 7@10 per cent. per annum in the discount line. The offerings of capital have been less liberal, and lenders have been generally claiming rather higher figures, looking forward to a further increase of the demand for accommodation. The city banks have lost during the week 4⅝ millions of deposits, nearly 2¼ millions of legal tender notes and over a million of specie. They have added nearly half a million to their loan and discount averages; and moderately to their circulation. The legal tender reserve of the city banks is now 47½ millions against 58 millions on the 5th of Feb.; the specie hoard is 28¾ millions, against 40⅛ millions Jan. 29; the deposit average is 201¾ millions, against 214¾ millions, Feb. 5; the loan and discount average is 272⅛ millions, against 258½ millions at the opening of the year. The U. S. Sub-Treasury has added about a million to its coin balance, since our last. Its currency reserve has been further reduced. The coin balance of the Treasury Department was 105½ millions, April 1, against 102¼ millions, March 1; and the currency balance, 7⅛ millions April 1, against 10¼ millions March 1, 1870. The coin reserve of the Department on Monday was $109,277,872, including $37,986,500 in gold certificates; currency balance, $18,538,432.

The specie reserve of the city banks according to the latest return is $28,787,692, against $8,794,543 same time last year. The city bank deposits are now $201,752,434, against $171,495,580 week ending April 10 1869. The legal tender reserve amounts to $47,570,633, against $48,644,782 same time last year. The circulation now stands at $33,754,253, against $24,609,306 same time last year. The loans are now $272,171,388, against $257,480,227 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged about $79,474,226 a day, against a daily average of $86,008,700 the preceding week, and $80,208,839 the week ending with Mar. 27, 1870. The current week's exchanges average about 78 millions a day. The city banks, last week, reported a loss of $1,099,491 of specie, $4,659,996 of deposits, and $2,441,160 of legal tender notes. They increased their loans, $414,517; and their circulation, $77,689.

The city bank exchanges on Wednesday were 78½ millions.

National Bank notes to the amount of $212,860 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $322,586,711, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $23,260,108, leaving, with the existing 1,614 banks, (having an aggregate capital of $426,399,151,) an actual circulation at this date, of $299,526,608. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,274,650; and for the public deposits, $16,955,500—making a total of $359,230,150. The Treasury Department last week redeemed and destroyed $576,800 of worn and mutilated fractional currency, and issued $352,863 of new.

The U. S. Sub-Treasury receipts, week ending with April 9, were $3,416,825 in coin, (including $2,997,000 from customs duties,) and $3,508,828 in currency; payments, $2,547, 909 in coin, (including $174,976 of coin interest,) and $3,590,010 in currency; balance at the close of the week, $33,434,214 (including $79,620,746, of coin, and $2,596,215 of currency,) against $82,674,337 at the close of the preceding week, showing an increase of $759,877. The business of the Office on the first two days of the current week, was as follows: On Monday, receipts, $518,697 in coin, (including $426,143 from customs,) and $569,121 in currency; payments, $70,833 in coin, (including $20,093 of coin interest,) and $536,375 in currency. On Tuesday, receipts, $652,266 in coin (including $609,725 from customs), and $133,867 in currency; payments, $37,300 in coin(including $12,926 of coin interest) and $355,785 of currency. The balance at the close of business on Tuesday stood at $83,261,940, (including $2,407,043 of currency, and $80,683,526 of coin,) against $83,228,102 a week previous; and $

100,437 on March 25, 1870. The aggregate receipts of the office in March were $40,664,411, including $12,264,608 from customs; aggregate payments, $41,481,676 including $3,766,313 of coin interest; balance at the close of the month, $82,854,761, against $83,673,026 at the close of February.

The U. S. Sub-Treasurer issued in March $1,615,000 of coin certificates.

The U. S. Sub Treasurer retired, last week, $2,764,714 of coin certificates, received for customs.

The U. S. Sub-Treasury general balance on Thursday morning was $84,057,633.

A slight improvement in the yield of both customs and excises has been noted since our last. The excises, during the week yielded $3,202,377; customs at the port of New York, $2,988,715, and at the outports about a million (in coin) more, making the grand total income for the week equal to about $7,633,421 in currency. The receipts from excises, thus far in the current fiscal year, commencing with July 1, 1869, have been $128,519,596. The receipts from July 1, 1869, to March 31, 1870, were $124,008,603 against $103,499,334 same time preceding fiscal year.

There has been a more confident speculative inquiry for Gold, and the price has been advanced to 114⅛, on more liberal purchases, stimulated in part by the improvement in the foreign exchanges, early in the week under review. The later dealings have been on a less extensive scale, and the market has showed less buoyancy. The extremes of the week have been 111¾ and 114⅛, and the closing quotation on Wednesday was 112¾. The custom demand has been fairly active. The export call has been unimportant. The week's shipments hence of specie were only $77,500, against imports of foreign specie to the amount of $216,749.

The coin balance of the U. S. Sub-Treasury on Thursday morning was $81,386,610.

The customs revenue of the port on Wednesday was $612,000.

The coin interest payments of the Sub-Treasury on Wednesday were $25,791.

The customs demand for Gold last week, averaged $499,500 a day; thus far, this week, it has averaged $537,333 a day, or equal to a weekly aggregate of $3,224,298. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $216,749; and since Jan. 1, 1870, $6,035,703, against $4,766,943 same time in 1869. The total customs revenue of the Government, in coin, at this port, thus far in the current fiscal year, commencing with July 1, 1869, has been $102,946,371, against $98,807,977 in 1868–'69.

The customs revenue at the port of San Francisco, from Jan. 1 to April 1, was $1,889,655, against $1,915,785 same time last year.

The exports of specie, from this port, last week, were $77,500, against $326,350 same week last year; total, since July 1, 1869, $23,321,373, against $31,416,963 same time preceding fiscal year. Government disbursed last week through the U. S. Sub Treasury here, on account of the coin interest on the public debt $174,976, and since July 1, 1869, $67,167,280, against $67,391,636 in 1868–'69.

The specie exports from San Francisco, from Jan. 1 to April 1, were $9,850,562, against $9,512,304 same time last year.

The Foreign Exchanges showed increased firmness and buoyancy early in the week, but closed tamely and in favor of buyers. Bankers' prime sixty day bills on London closed rather buoyantly on Wednesday at 108⅜@109, and on Paris to 5.22½@5.18¾; sight bills on London to 109¼@109⅝, and on Paris to 5.17½@5.16¼. The offerings of produce bills have been up to a fair average. The week's exports of domestic produce have been to the currency value of $3,213,167, making the total since July 1, 1869, $159,503,557, against $125,301,647 same time preceding fiscal year.

Influenced to a considerable extent by the rise in Gold and the Foreign Exchanges, Government securities met with a readier sale at firmer prices, early in the week; but toward the end a lighter business was reported at less buoyant rates. On Wednesday, the latest dealings showed a revival of the purchasing demand, and renewed strength in values. Government bought in on Wednesday a million of Five Twenties at 107.10@107.54 net, out of an aggregate offering of $2,519,000. The accrued interest was $1.91 per cent.

U. S. sixes of 1881 closed here at 114⅛@114⅜; U. S. Five-twenties of 1862, 111¾@112; U. S. Five-twenties of 1864 at 110⅜@110⅝; U. S. Five-twenties of 1865 at 110⅞@111⅛; U. S. Five-twenties of 1865 consolidated, 109¼@109⅜; U. S. Five-twenties of 1867, 109⅝@109⅞; U. S Five-twenties of 1868, 109¾@110; U. S. Ten-forties at 106⅛@106⅜, ex the March coupon; U. S. Six per cent. currency bonds, 111⅛@111⅝.

Central Pacific Sixes closed on Wednesday at Frankfort at 78¾@79.

The latest quotations at the London Stock Exchange compare as follows with former returns:

* Ex coupon.

State bonds have been moderately dealt in at variable prices. A fair business, chiefly on investment account, has been reported in Railway bonds at generally firm rates. The Central Pacific Sixes closed at 92@92¼. Union Pacific Sixes at 84½@84⅝; and the new Chesapeake and Ohio First Mortgage Thirty year Bonds at 90 per cent. and accrued interest in currency.

Railway and miscellaneous share property has been somewhat brisker, opening at advancing prices, but closing less firmly.

It has been stated that the St. Paul Company, in exchange for 15,750 shares new Common Stock, receive 21,000 shares, or a controlling interest, in the old Racine and Mississippi Road, of late years known as the Western Union Railroad Company. The line represents 40,000 shares or $4,000,000 Stock, and $3,000,000 Mortgage Bonds. The line is 182 miles in length from Racine on Lake Michigan to a point on the Mississippi River, near Rock Island.

General business has shown rather more animation in the line of domestic produce, but at irregular prices. Middling upland cotton closed on Wednesday at 28¼ cts. per lb. The stock of cotton now here is given at about 45,000 bales. The receipts at the port this week, have averaged about 2,650 bales a day. The receipts at all the ports, thus far in the year commencing with Sept. 1, 1869, have been 2,405,850 bales, against 1,818,950 bales in 1868–'9; exports, same time 1,633,775 bales, against 1,063,650 bales same time in 1868–'9; stock on hand at latest dates, 347,400 bales, against 344,000 bales same date 1869. The exports of domestic cotton goods from this port, since Jan. 1, 1870, have been 3,684 pkgs., against 7,134 pkgs., same time in 1869. From Boston, 1,035 pkgs. in 1870, against 3,262 pkgs. same time in 1869.

Foreign goods have been in moderate request and generally pretty firm in price. The week's imports of foreign dry goods were to the specie value of $2,018,978; and of foreign merchandise, $4,814,753, making a total of $6,833,731, against $7,982,958 same week last year.

At the Live Stock markets, this week, Beeves have been in fair demand, at from 10@18c., per lb.; week's receipts, 5,748. Milch cows continue dull, at $40@$100 each, receipts, 100. Veal calves have been in moderate request, and quoted easier at from 8@15 c. per lb.; receipts, 1,885. Sheep moderately active at from 5½@9c.; lambs at 17@22c. per lb.; receipts, 15,862. Swine dull at 9@9¾ c. per lb., all live weight; receipts, 10,193.

There has been more animation in Ocean freight. For Liverpool we quote flour at 1s.@1s. 3d. by sail, and 1s. 3d@1s. 6d. by steamer, per bbl.; grain at 3d. by sail, and 3d.@3¼ by steamer, per bushel; cotton at ⅛d. by sail, and ¼d. by steamer per lb.; and heavy goods 12s. 6d.@25s. by sail, and 12s. 6d.@35s. by steamer, per ton. Total number of vessels in port on Wednesday, 474.

The balance in the Sub-Treasury on Wednesday was $84,057,633 19.

The following will show the exports (exclusive of specie) from New York to foreign ports for the week ending April 12th, and since the beginning of the year:

	1869.	1870.
For the week	$3,617,388	$3,213,167
Previously reported	40,982,106	44,495,386
Since Jan. 1	$34,599,494	$47,708,553

The imports for the week ending April 9, and since the beginning of the year, have been as follows:

	1869.	1870.
Dry goods	$2,288,958	$2,018,978
Gen. merchandise	5,693,865	4,814,753
Total for the week	$7,982,823	$6,833,731
Previously reported	77,367,354	73,816,628
Since January 1	$85,350,177	$80,650,359

West Wisconsin Railroad.

The enterprising proprietors of this important road are pushing it on to St. Paul rapidly. The bridge over the Eau Claire River is completed, and that over the Chippewa will be finished by May 1. The track between Eau Claire and Augusta will be ready for the rails by June 1. The business of the road is increasing rapidly as it penetrates farther and farther a region heretofore a stranger to the steam engine, and there is every indication that the West Wisconsin will be one of the best paying roads in the West.

Catawissa Railroad.

The annual meeting of the stockholders of this company was held in Philadelphia on the 5th inst. The report of the President, which was presented, states that the receipts of the year were $620,171 10, and working, maintenance and general expenses, $426,348 18, leaving a balance of $193,822 92. The result of the year's business is considered encouraging. A dividend of 7 per cent. on the preferred stock outstanding was declared,

☞ The earnings of the European and North American Railway in March, 1870, were $15,464 62; against $13,054 78 in March 1869, and $10,871 82 in March, 1868.

Little Rock and Fort Smith Railroad.

The Arkansas (Little Rock) *Gazette* of March 22d, notices the arrival at that place of 600 tons of railroad iron for the above road, with 400 tons more on the way from New Orleans, which, with the track already laid, will be sufficient to complete about 15 miles of road. Other shipments will rapidly follow as the work progresses. The ties are already laid down, and the bridges and culverts finished for 25 miles west. Work is also progressing rapidly on the remainder of the 3d, and on the 4th, 5th, 6th, 7th and 8th divisions. Track laying will commence at once and be prosecuted with all the energy and force the company can command.

The same paper notices the arrival of the locomotive "Pulaski," the pioneer engine on the above road, with two box and nine platform cars. The work of transporting the iron will be immediately commenced to the present temporary head of railroad navigation, near the Mountain Gap, three miles out, where track laying will commence. The *Gazette* thinks it may be safely said that the next sixty days will witness the completion of the road to the Palarm. It is proposed to have the cars running to Lewisburg, by the 1st of July, and if no untoward event happen, the rails will be laid through to Van Buren and Fort Smith, by the 15th of March, 1871. Two additional locomotives have been ordered and will be received by the time they are needed.

Houston and Gt. Northern Railroad.

The Houston *Telegraph* says it is confidently believed that before another season comes round the Houston and Gt. Northern Railroad will be in operation from that city to the Trinity Valley, in Walker county. This road was chartered by the Legislature of Texas in 1866–'67. Its route is from Houston, nearly north through Montgomery and Walker counties, crossing the Trinity into Houston county, and then proceeding direct to connect with the Memphis, El Paso and Pacific Railroad at the town of Clarksville, in Red River county. This is probably one of the most valuable charters in the State, as the road passes through a tier of counties about midway between the Texas Central, on the west, and the Red River on the east.

☞ A new bridge, a recent invention of Thos. A. Brien, of Queen Anne's county, Maryland, was exhibited at the council chamber, Baltimore, on the 11th inst. It is a caisson bridge that rises with the flood sufficient to allow all debris to pass, and resume its position as the water subsides. It requires no machinery, but works by the action of the water. It is claimed that by adopting this plan of bridge there will be no occasion for widening the falls, provided the proper height of wa be given.

☞ The following gentlemen have been elec ed directors of the Panama Railroad Company for the ensuing year: William H. Aspinwall, Joseph Alsop, James M. Brown, Henry Chauncey, Frederic G. Foster, David Doadley, Charles G. Francklyn, Governeur Kemble, Charles P. Leverich, Howard Potter, Theodore W. Riley, David Stewart and William Whitewright, Jr.

☞ The Howe Scale Company, at Brandon, Vt., and the Sampson Scale Company at New York have consolidated.

Journal of Railroad Law.

RAILROAD COMPANIES—MEASURE OF DAMAGES—WHEN CONTRACTS NEED NOT BE PERFORMED IN INSTALMENTS.

The facts of the recent case of The Illinois Central Railroad Company *vs.* Demars (44 Ill., 292,) are fully and clearly stated in the following opinion by

WALKER, CH. J.—This was an action of assumpsit, brought by appellee, in the Kankakee Circuit Court against appellant, to recover for a breach of contract to furnish six passenger cars upon three days' notice. On the trial below, appellee introduced in evidence a letter written by W. P. Johnson, as general passenger agent, in which he says that appellee's communication to Mr. Hughitt, general Superintendent, had been placed in his hands to reply. He says they will charter appellee six cars to Chicago, and to return, for fifty-six dollars each; that he can have them at any time by giving the station agent three days' notice, and requesting him to give notice. This was dated the 28th day of August, 1856.

Appellee proved that on the 22d of September following, he gave notice to the station agent that he wanted four cars on the following Tuesday morning. The agent telegraphed to Johnson on the day appellee gave notice that he wanted the cars. The station agent received no reply, nor were the cars furnished. The station agent testified that he had no authority to make a contract for cars with appellee, nor did he make any; that Hughitt was the agent for letting the cars. Appellee proved that he sold two hundred and forty-three tickets, at one dollar and fifty cents each, for the excursion, on the 25th of September, and that the money was refunded.

The jury found a verdict in favor of the appellee for $376. A motion for a new trial was entered, and overruled, and judgment rendered by the court on the verdict, to reverse which this appeal is prosecuted.

It is urged that the court below erred in allowing appellee to introduce evidence of the number of persons at the depot on the morning of the 25th of September, the time he had given notice that his excursion would be made. This was error, unless it had appeared that these persons intended to go on the cars chartered by the appellee, and were not of those who had purchased tickets. Had that appeared, then the jury would have been authorized to take into consideration the amount he would have thus received over and above that received on the sale of tickets. The object of this evidence was to ascertain the loss he had sustained by not obtaining the cars. It could, therefore, have made no difference what number of persons were there, unless they had intended to go on appellee's excursion train on that day.

The measure of damages would be the amount of money appellee lost by the breach of contract, and to ascertain the amount he had received by the sale of tickets and the sum he would have received from others had the train gone as proposed, and any other loss sustained, and from the gross sum deduct the cost of the cars and the difference would have been the damage sustained. This evidence was therefore improper and should have been excluded.

It is likewise urged, that the evidence did not warrant the verdict, as the damages were excessive. We have seen that appellee sold two hundred and forty-three tickets, which, at one dollar and fifty cents each, make the aggregate sum of $364 50. The amount he would have been required to pay for four cars would have amounted to $224, which, taken from the amount received for tickets, would have left $140 50, which might have been increased by proving expense for advertising and the payment of agents to sell the tickets. But in no view we can take of the evidence could such expense have reached the amount of the verdict. If twenty-five or thirty dollars were allowed for advertising, the sale of tickets and other incidental expenses, still the verdict would be more than $100 too large. The jury evidently overlooked the fact that the cost of the cars would have to be deducted from the receipts on the sale of tickets. The remainder would, under the evidence in this record, have been the measure for the recovery. For this error the court below should have set aside the verdict and granted a new trial.

The evidence no doubt varied from the contract described in the first count. It averred a contract to furnish six cars on three days' notice while the proof showed a request to furnish but four. When the company agreed to furnish a certain number of cars, they were guilty of no breach of contract in failing to furnish a larger or smaller number. Their contract was not to furnish four cars, but six. A demand to furnish but four was not a request to perform the contract they had made, but it was for a different thing. They could not be in default by refusing to perform their contract in parts. They had contracted to furnish a specific number to be furnished all at the same time, and appellee had no right to compel them to furnish the cars in instalments. They had a right to perform their contract as an entirety, and to require it to be performed otherwise would be to make for the parties a new contract. Until he demanded the six cars he claims to have contracted for, and the company had refused to furnish them, there was no breach of contract authorizing a recovery. The evidence does not tend to prove such demand, and the judgment was therefore unauthorized, and must be reversed and the cause remanded.

Judgment reversed.

Chicago and Northwestern Railway.

In response to an invitation issued by the Vice President of the Chicago and Northwestern Railway, a large number of the leading residents of Oconto and Menomonee counties, met him to confer in relation to the extension of the Northwestern Railway from Green Bay, the present terminus, to Menomonee and Escanaba. The building of this extension will complete a line of railway communication between Milwaukee and Marquette, and the iron mines of Lake Superior. Upward of twenty of the principal business men of the region vitally interested in the extension of the railway through the great lumbering district were present, and were unanimous in their desire for its completion. A committee was appointed to secure the right of way and solicit subscriptions to the building fund. The gentlemen present, representing the ownership of a large proportion of the lands along the line, signed the necessary papers granting the right of way through their territory. The prospect is that the road will be put through at an early day.

American Steel Rail Works.

Four large steel works for making rails have already been established in this country, and a fifth is nearly completed.

John A. Griswold & Co., proprietors of the Bessemer Steel Works, of Troy, N. Y., made about 2,000 tons of steel rails, half of them for the Erie Railroad, prior to the burning of their works in October, 1868. None of these rails have broken, and official certificates testify that they are equal to the best foreign rails. The new works, now nearly completed, will enable the proprietors to produce steel rails at the rate of 15,000 to 20,000 tons per year.

The Pennsylvania Steel Works at Harrisburg are now, and have been for some time, producing steel rails at the rate of 13,000 tons annually. They are mostly laid on the Pennsylvania Railroad, and the official reports show them to be equal to the best foreign rails. The yearly capacity of the works is 20,000 tons.

The Cleveland Rolling Mill Company is producing steel rails at the rate of 6,000 to 8,000 tons per year. The mill has only recently started and is not yet in full operation. Its capacity is from 15,000 to 20,000 tons per year. The steel is of Lake Superior iron, and is of excellent quality.

The Freedom Iron and steel works at Lewistown, Pa., are producing rails for the Pennsylvania and other roads, at the rate of some 8,000 tons per year. Their annual capacity is 10,000 to 12,000 tons. Their steel is pronounced by the Pennsylvania Railroad Company, after rigid tests, equal to the foreign.

The Cambria Iron Company has a Bessemer, steel works nearly completed at Johnstown, Pa. Its capacity will be 20,000 tons.

The above statements indicate that we shall be able the coming year to produce annually at least 80,000 tons of good American-made steel rails, a fact full of promise for the future of American railways.

Brooks' Patent Paraffine Insulator.

David Brooks, Esq., of Philadelphia, has issued a circular pamphlet in reference to his patent Paraffine Insulator. This circular contains about forty certificates. Some are from the highest authorities in this country and in Europe. Professor Morse, in his late report to Congress, speaks of this invention in the highest terms.

Besides certificates, the pamphlet contains an interesting article on the subject of insulation. The American certificates are from railroad companies who have adopted this insulator with great success.

But the greatest proof of its worth is the guarantee of the inventor. This guarantee is to exceed the ordinary glass insulator, in wet weather, one hundred times, which is equivalent to exceeding the English standard of a meghom per mile fifty times; and he agrees to maintain for any length of time this immense difference, at a compensation of two dollars per mile per annum, for one wire, and three dollars per mile for two wires.

Although the first cost of this insulator is about twice that of the ordinary insulator, the subsequent cost of maintenance makes the Paraffine Insulator much the cheaper, not taking into account the vast difference in results obtained.—*Telegrapher.*

Russian Railways.

The St. Petersburg papers announce the completion and opening of the Kharkov-Taganrog Railway, and thus, for the first time in the history of Russia, a rapid and uninterrupted communication is established from sea to sea across the whole breadth of the Empire. The two great ports of Russia in the southeast—Rostock, on the Don, and Taganrog, on the sea of Azoff—are, by the almost simultaneous completion of the Khar-

kov line and of that along the Azoff seaboard, brought into close connection with several of the great centres of Russian trade—Kharkov, Kourak, Orel, Tula, Moscow.

Quicksilver Mining Company.

At the annual meeting of the stockholders of the Quicksilver Mining Company, the following amendment to the by-laws and resolutions were adopted, by a unanimous vote of 75,658 shares:

Certificates of stock amounting to $10,000,000 shall represent the value of the property of the corporation, and the capital stock shall be divided into 100,000 shares of $100 each. Certificates of stock upon which $5 per share shall be paid, shall be distinguished as preferred stock.

The referred stock shall be entitled to interest at the rate of seven per cent. per annum, from the 1st of May, 1870, to be paid annually out of the net earnings of the Company for each year. Should there remain a surplus of earnings after the payment of the said interest upon the preferred stock, then this surplus shall be divided pro rata among the holders of preferred and common stock, in proportion to their several interests.

Resolved, That a preferred stock of the Company be issued in shares of $100 each, and that the Treasurer be directed to open books at the office of the Company, in the City of New York, and to receive subscriptions to said preferred stock. Such subscriptions shall be received only from the holders of the common stock of the Company on their surrendering to the Company common stock and paying to the Treasurer $5 per share on each share of stock surrendered.

The common stock, so surrendered, shall be cancelled before the issue of the preferred stock, share for share.

Resolved, That the books for subscription to the preferred stock shall be closed by the Board of Directors whenever the interests of the Company, in their opinion, will be promoted by so doing.

The Board of Directors have ordered that the books for subscription to the preferred stock shall be closed on Monday, April 18, at 3 o'clock P. M.

Pittsburg, Virginia and Charleston R. R.

We hope the friends of this important enterprise will not flag in their zeal on account of the failure of the railroad scheme vetoed by the Governor. An enterprise of such vital interest to our section of the State is important, and should be strong enough to stand on its own merits. The trade and traffic for the first one hundred miles south from this city, everybody knows, is ready for the proposed railway. Could trains be run immediately they would do a fine business from the start. It must be remembered that there are no less than a hundred coal mines within that distance, each giving employment to numerous miners, boatmen, mechanics, etc.

Nearly a score of prosperous towns are anxiously awaiting the completion of the railway within the limits of our own State, while the enthusiasm for the Pittsburg, Virginia and Charleston Railroad, throughout the contiguous portions of West Virginia, is too well known to need any extended mention.

We urge the Board of Directors, therefore, to go ahead. Show the Governor that the securities offered to be substituted by this railroad are considered good enough by our own moneyed men and institutions, no matter what may be thought of the Jersey Shore and Erie and Allegheny Railroads.

Mr. Walton's bill, authorizing the issue of five millions of first mortgage bonds, is law; those bonds would only need to be partially touched to place the first hundred miles under contract, after the subscribed capital has been used, and, we are sure, the parties most interested in the completion of the road to White Sulphur Springs and Christianburg, would be soon enough forthcoming to insure the completion to these points. It must be borne in mind that through Pittsburg only can be found the shortest route between New York and Chattanooga.—*Pittsburg Chronicle.*

Milwaukee and Rockford Railroad.

Among the most important bills passed by the Legislature at its late session was one incorporating the Milwaukee and Rockford Railroad. At an early day in the history of our city a railroad to this point was considered most important, and but for untoward circumstances it would have been built. There has been no time when such a road was not necessary, but now it is absolutely indispensable. In the bill the parties named as incorporators are: Angus Smith, Timothy Mower, Chas. W. Smith, Otis Preston, John Nazro, Martin Field, P. G. Harrington, Cyrus Church and Henry Dennis, and their associates and successors. All these gentlemen are active business men. The Milwaukee and Rockford road will accomplish a desirable object. It will give us an air line to St. Louis and the country in that vicinity. Section two of the law empowers the corporation to survey, locate and construct and perpetually to have, use, enjoy maintain and operate a railroad, with one or more tracks or lines over such route as they may select, from the city of Milwaukee, in the village of Mukwanago, in the county of Waukesha to East Troy and the village of Elkhorn, in the county of Walworth, and to the state line between Wisconsin and Illinois, at or near the village of Sharon, in the county of Walworth.

It is further provided that the first meeting of said company shall be held in the village of Elkhorn on the first Wednesday of the month of May next.—*Mil. Wis.*

Illinois Central Railroad.

The statement of this Company for the month of March, 1870, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	6,016.42 for	$57,342 80
Acres Int. Fund Lands sold	200.00 for	2,090 00
Acres Free Lands sold	360.00 for	6,560 00
Total sales during month of Mar., 1870	6,576.42 for	$65,992 80
To which add Town Lot Sales		95 00
Total of all	6,576.42 for	$66,087 80
Cash collected in March, 1870		$160,265 72

ESTIMATED EARNINGS—TRAFFIC DEPARTMENT.

	In Illinois 707 Miles.	In Iowa 258¼ Miles.	Total. 965¼ Miles.
Freight	$321,366 00	$62,471 00	$383,837 00
Passengers	143,272 55	33,889 90	177,162 45
Mails	6,375 00	1,029 08	7,404 08
Other sources	74,000 00	1,970 92	75,970 92
Tot'l Mar.,'70.	$545,013 55	$99,360 90	$644,374 45
Total actual earn'gs, Mar. 1869	$611,365 02	$98,279 36	$709,644 38

☞ The Nesquehoning Valley Railroad, 16 miles long, and connecting the Catawissa with the Lehigh and Susquehanna Railroad, is completed. By it the distance from that region to New York is shortened 20 miles. It will also give Catawissa another connection with Philadelphia as short as by the Reading Railroad. The importance of this road to the Lehigh Navigation Company is very great.

☞ At a meeting of the directors of the Kent County (Md.) Railroad, last week, it was decided to commence running tri-weekly trains from Kennedyville, on Mondays, Wednesdays and Fridays, until further notice. It also was decided to increase the force on the grading and bridging between Kennedyville and Chestertown.

Missisquoi Railroad.

The St. Albans (Vt.) *Transcript* says that every obstacle to the progress of this road has melted away. At the town meeting held in Richford on the 16th to see whether or no the town would bond in aid of the road, S. P. Carpenter, after a somewhat lengthy address presented the following resolution:

That the town aid in the construction of the Missisquoi Railroad, by issuing bonds to the amount of $19,900, payable after five and within twenty years, with interest annually; provided the road was completed and the cars running within two years: and that H. D. Farrar, James G. Powell and W. R. Willard be appointed commissioners to carry out the provisions of the resolution.

Which was adopted by a vote of 202 yeas, to 21 nays. A majority of the grand list was signed on the spot, and nearly a majority of the names.

Maryland Central Railroad.

This road, if built, will pass through the most fertile and densely settled portions of Baltimore and Hartford counties, and when finished is expected to add greatly to the trade and travel of this city. The council has passed an ordinance to endorse $600,000 of its bonds, which will be submitted to the voters in June next. It is learned that the corporators will hold a preliminary meeting in a few days to organize and prepare for the commencement of the work. The following are the corporators: John Hopkins, William B. Norris, H. L. Whitridge, Wm. Stirling, H. A. Silver, John H. Price, J. C. Neilson, Herman Stump, Robert Lehr, Wm. T. Walters, Thomas Symington, E. Stanley Rogers, John E. McJilton, Stevenson Archer, Benjamin Silver, Thomas E. Bond, Robert Gilmor, Jr., Jer. Yellott, James H. Warden, Cheyney Hoskins and James Silver.—*Balt. Sun.*

Iowa Railroad Tax Bill.

A bill has passed both Houses of the Iowa Legislature which provides for a tax of one per cent. on the gross earnings of all roads whose receipts exceed $4,000 per mile, two per cent. on all gross earnings between $4,000 and $6,000 per mile, and three per cent. on all gross earnings of over $6,000 per mile. Four-fifths of this tax is to be assigned to the counties, proportioned to the number of miles of road in each county; the remaining one-fifth goes into the State Treasury to be applied to the usual purpose of State taxes. The bridges across the Mississippi and Missouri rivers are to be taxed as other property in the localities where situated.

☞ Winchendon, the northern terminus of the proposed Ware River Road, voted to subscribe to the stock of the road to the amount of 8 per cent. of its valuation by a vote of 349 to 16. This amount is all that the town has authority to take, on account of its having previously subscribed to the stock of the Monadnock Railroad.

☞ The election held in Baltimore on the 7th inst., to decide whether or not the city should issue not exceeding $2,500,000 for the improvement of Jones' falls on the Tyson plan, resulted in the adoption of the measure. There were 16,382 votes polled, of which 8,989 were for the ordinance and 7,393 against it—making the majority for the measure 1,596.

☞ The Southern Pacific Railroad now running to Hallsville, 20 miles west of Marshall, Texas, is to be completed to Tyler, 20 miles further by the 1st of May—making a completed road of 80 miles.

Washington and Ohio Railroad.

The Moorfield (W. Va.) *Advertiser* states that the chief engineer of the Washington and Ohio (formerly Alexandria, Hampshire and Loudoun) Railroad Company and his corps of assistants have proceeded to Pomroy to begin the survey of that improvement at that end of the route. They will complete the survey it is thought, in the course of three months. The route has been surveyed from the present terminus of the road to some distance west of Moorfield. Pomroy is the point on the Ohio where the road will strike it, and it is about thirty miles from that point to a road leading direct to the city of Chicago. It is understood that as soon as the survey is finished the company will go to work locating and constructing.

☞ Messrs. Heckart, Reynolds and Keaveny have commenced work on the Columbia and Port Deposit Railroad, at the end near the Octorara creek, about three miles above Port Deposit, to which point, from the latter place, the road has been finished.

☞ The Honduras *Gazette* states the first and most difficult section of the Inter-Ocean Railroad, between Cortez and Santiago, will be finished this year.

☞ Templeton, Mass., has voted, 365 to 54, to subscribe $50,000 to the stock of the Ware River Railroad.

☞ The Grand trunk Railway of Canada, it is stated, will pay a cash instead of a stock dividend on its first preference bonds.

☞ The Welland canal will be opened for the passage of vessels on the 20th inst.

Notice to Contractors.

SEALED PROPOSALS will be received till one P. M. April, 22, 1870, for grading of the proposed extension of Cape Cod Railroad from Orleans to Wellfleet, eleven and one half (11½) miles.

The right is reserved to reject all bids not satisfactory.

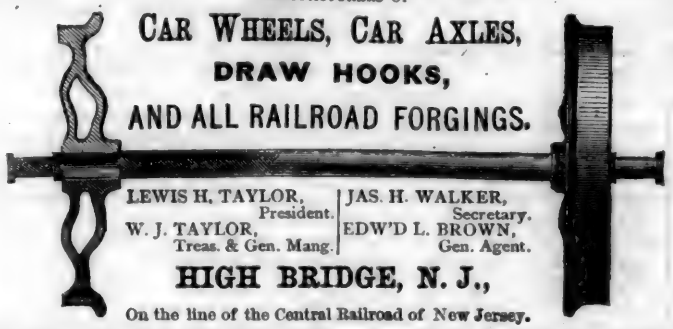
Profiles and Specifications may be seen at the office of the Company in Hyannis or Orleans.

E. N. WINSLOW, Engineer.

Notice to Contractors.

SEALED PROPOSALS will be received until the 26th of April next for the grading, masonry, bridging and superstructure of the Sugar River Railroad from Bradford, N. H., about thirty (30) miles to the Sullivan Railroad in Claremont.

The work will be let entire or in sections, as may be desired.



The right to reject all bids not satisfactory is claimed.

Plans, profiles and specifications can be seen at the office of the Company at Newport, N. H., or at the office of the Northern Railroad at Concord, N. H.

A. M. SHAW.

Locked Safety Valves.

TO

MASTER MECHANICS

AND

LOCOMOTIVE BUILDERS.

THE UNDERSIGNED OFFERS FOR SALE, SAFETY VALVES, effectually guarded against tampering, invented and patented by himself; patent bearing date Sept. 24th, 1860.

Said Valves are sold with Spring, Guard, Studs, and Nuts, complete, and all ready to put on to boiler domes. Price for size suitable for Locomotives, $27 50.

The Valve and Seat are made of hard composition. Spring of best cast steel.

The above Valve is sensitive, and is not liable to stick from corrosion; and is particularly well suited for large stationary and marine boilers, giving large area for escape of steam, and requiring a short lever, and light weight or spring, for holding Valve against pressure.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

BRADY'S RAILROAD LANTERNS.

The strongest and best in use; are made principally of Malleable Iron. Here lies the secret of their strength, the frame being capable of supporting a weight of Four or Five Hundred Pounds; and yet they are little heavier than ordinary Lanterns. The guards are rivited through the top and bottom flanges, the rings wound with wire where they cross the guards, and the whole frame tinned, uniting each piece with the other, making it the *strongest* Lantern ever offered to the public. RAILROAD MEN *especially* cannot fail to see that it will be economy to purchase these Lanterns, as there is no part that can be broken with ordinary use, except the Globe, which being adjustable, is easily and cheaply replaced with any color and at a small cost; the greater weight being at the bottom, it cannot readily upset. Now used on the following Railroads: New York and New Haven; Hartford and New Haven; Shore Line, Conn.; Providence and Worcester; Boston and Maine; Conn. and Passumpsic Rivers; Fitchburg; Rensselaer and Saratoga; Troy and Boston; Boston and Providence; Boston, Clinton and Fitchburg; Charlotte, Columbia and Augusta; Connecticut River; European and North American; Hartford, Providence and Fishkill; Mobile and Ohio; Portland and Kennebec; Boston, Hartford and Erie; Worcester and Nashua; Lake Superior and Miss.; Hudson River, and many others.

The trade supplied from our Store, or from the Factory, New Britain, Conn,

New York Saturday, April 23, 1870.

Saratoga, Schuylerville and Hoosac Tunnel Railroad.

Articles of association have been filed in the office of the Secretary of State of the State of New York by the Saratoga, Schuylerville and Hoosac Tunnel Railroad Company. The capital stock is fixed at $300,000. A committee appointed to consider the feasibility of the various routes proposed, have decided in favor of the one running directly east from Saratoga Springs, crossing the Hudson at Schuylerville, and thence through Greenwich or Union village, Washington Co., to Eagle Bridge and Hoosac Tunnel. A road is now constructed from the tunnel via Eagle Bridge and Johnsonville, on the Troy and Boston road, to Greenwich or Union village—thus making a complete line from the west mouth of the tunnel to Greenwich, a point only seventeen miles east from Saratoga. The exact distance from the point of departure in the village of Saratoga Springs to the center of the Hudson river at Schuylerville is twelve miles, and from that point to Greenwich, five and one-fourth miles. The entire line to be constructed, therefore, to secure complete railroad communication with the Hoosac Tunnel, will be about 17 miles. Competent engineers estimate that this line between Saratoga and the Hudson river can be constructed and laid with rails for actual service at a cost not exceeding $20,000 per mile.

Utica, Chenango and Susquehanna Valley Railroad.

The Delaware, Lackawanna and Western Railroad Company has leased the Utica, Chenango and Susquehanna Valley Railroad, agreeing to pay therefor a regular six per cent. dividend on all the stock of the company. The lease will continue during the term of the charter, and the company proposes to take possession on the first of May. The road is now in operation from Utica to Norwich 54 miles, and the lessees propose to extend it to Chenango Forks a further distance of 37 miles, there to connect with the road running directly to Scranton, and by way of the Morris and Essex Railroad to this city. It will probably be completed to Richfield Springs by the first of June, and that will also be included in the lease. The lessees contract to hasten the extension to Chenango Forks, and to make the necessary connections at an early day.

Pittsburg and Connellsville Railroad.

The work of extending the Connellsville railroad to Cumberland is being pushed forward with vigor, the progress making is in the highest degree satisfactory. We learn from the officers of the company that twenty-four hundred laboring men and upwards of four hundred horses are engaged upon the work. The first three miles of the road east of Connellsville are already completed and in operation. From that point to Brook Tunnell, about thirty-one miles distant the road bed is nearly completed, and will soon be ready for the track.

The contractor for Brook and Pinkerton Tunnels, with three intervening sections, is progressing finely with his work now, and says he is confident that he can finish his work within the required time, ready for the track; from that point to Meyers Mills, the heaviest part of the road is already completed; the remaining part being very light can easily be gotten ready. At the Mills there is still some very heavy work, but the contractors are confident of having all done within time. Next comes Sand Patch Tunnel, nearly five thousand feet long. The heading of the tunnel has been completed, but there is some bottoming yet to remove. Some three or four hundred feet of arching has been completed. The contractors are working energetically and expect to complete their work by the specified time. The East portal of the tunnel is completed and is said to be a very substantial as well as handsome piece of work. The remainder of the road from Sand Patch to Cumberland is well advanced, and will be completed as soon as the other portions.

It is expected that track laying will be commenced early in June. In consequence of the heavy work on some of the sections, it has been impossible to open the road to any great extent. These sections, however, are now far advanced towards completion, and when the laying of the track is once commenced the road will be opened up rapidly. It is expected that the road will be completed to Cumberland by November next and every effort will be made to secure the realization of those expectations. President Hughart, the engineers and other officers of the road, deserve credit for the energy displayed in pushing forward this important enterprise.—*Pittsburg Chronicle.*

Sky Railways.

Under this heading *Chamber's Journal* of April 2d has an interesting article descriptive of the wire tramway system. The following is a brief extract:

There are now several short lines of this singular overhead tramway at work, and others in course of construction. One, opened last year, is at Messrs. Ellis and Everard's granite quarry in Leicestershire. It is only three miles long, but it very well illustrates the kind of service which the system is fitted to render. It conveys granite from the quarry to the nearest railway station. The arrangement, when seen from a distance, has a good deal the appearance of an electric telegraph; but the posts are higher and stouter, and the wire-rope is much thicker than the single wires of a telegraph. A portable steam-engine, such as is used by well-to-do farmers for agricultural purposes, drives or rather draws the rope at a speed of about five miles an hour. The boxes hold a hundred weight of stone each, and follow one another merrily along the rope. The full boxes travel along one length or line of the rope; the empty boxes return along the other length; and all of them deftly keep clear of the supporting post, in virtue of the peculiar and ingenious mode of suspension. And so the loads travel on from Bardon Hill Quarry to the nearest railway station. The quarry owners used to employ a large number of horses, vehicles, and men to manage the transport; but now the Wire Tramway Company, who are working Mr. Hodgson's system, do the labor at the rate of thirty thousand tons of stone per annum. The supporting posts are a hundred

and fifty feet apart, except one bold span of six hundred feet across a difficult bit of country. The wire-rope is only half an inch thick, and yet it will bear upwards of a hundred laden boxes hanging to it at once, all at different stages of advance between the starting point and the terminus.

Commerce and Navigation.

The following is an abstract of the Report of the Bureau of Statistics, showing the foreign trade of the United States for the calender year ending December 31, 1869, compared with the corresponding period of 1868. Reducing our domestic exports to specie values, and adding the amount of the re-exports thereto, a careful analysis of the following table demonstrates the fact that our imports for the calendar year exceeded our exports to the extent of $68,817,092:

	Imports.*	Domestic Exports.†	Re-exp'ts.‡
In 1869.	$463,461,427	$464,878,309	$29,221,514
In 1868.	382,701,510	441,800,072	20,904,978

*Gold values. †Mixed values. ‡Foreign commodities.

The proportions of the foregoing shipped in American and foreign vessels, respectively, in 1869, are as follows:

Vessels.	Imports.	Exports.	Re-exp'ts.
American.	$146,362,766	$160,912,677	$15,798,226
Foreign ..	317,098,661	303,960,632	13,423,288

The percentage of total foreign trade carried in foreign bottoms is 66.26.

Of the total imports for the twelve months ended December 31, 1869, $416,718,974 were dutiable, $267,467,053 entered for consumption, and $195,994,374 entered warehouse.

Of the total value of re-exports for the twelve months, $12,280,063 were dutiable, $16,941,451 free of duty, $11,647,237 from warehouse, and $17,574,277 not from warehouse.

On December 31, 1869, foreign commodities valued at $51,763,403 remained in warehouse, against $39,736,163 December 31, 1868.

The entrances and clearances of vessels engaged in the foreign trade in 1868 and 1869 was as follows:

	Entered.		Cleared.	
1868.	No.	Tons.	No.	Tons.
American..	10,098	3,394,226	9,862	3,414,022

Baltimore and Ohio Railroad.

Ex-Governor Phillip Francis Thomas, Hon. S. Teackle Wallis and Hon. I. Nevitt Steele have been engaged by Governor Bowie to assist Attorney General Jones in prosecuting the claim of the people of the State of Maryland against the Baltimore and Ohio Railroad Company, under the joint resolutions passed at the late session of the Legislature. The resolutions are as follows:

Resolved, That it is the sense of this General Assembly that by section 8 of the fifth article of the Constitution, and under the act of Assembly of 1868, chapter 471, authority and power are conferred on the Governor to direct the Attorney Governor to institute appropriate proceedings in a court of justice having jurisdiction to enforce the legal obligations of the Baltimore and Ohio Railroad under its charter.

Resolved, That in the opinion of the General Assembly the public interest requires that the Governor should execute the power thus conferred upon him, unless within twenty days after the passage of these resolutions the said Railroad Company shall comply with and perform its obligations to the State under its charter.

Resolved, That the Governor be and he is hereby authorized, if in his discretion he considers it necessary, to employ additional counsel to aid the Attorney General in such proceedings.

Portland and Kennebec Railroad.

The receipts from operations of this road for the years ending December 31, 1868 and 1869, were as follows:

	1868.	1869.

The road is 63 miles in length, extending from Portland to Augusta, Me.; Barnch line, Brunswick to Bath, 9 miles; Somerset and Kennebec Railroad (leased) 37 miles—total length of road operated, 109 miles.

The company have 17 locomotives, 21 passenger, 12 baggage and mail, and 259 freight cars.

The trains have run 354,756 miles during the year, divided as follows: passenger, 143,610; freight, 155,235; wood and construction, 59,909; at a cost of $1.13 per mile. Number of passengers carried, 321,417. Tons of freight moved, 163,829. The report says:

The past year, though one of comparative depression in the general business of the country, exhibits a substantial increase in the traffic of your road over the previous year. This result is gratifying, as it not only shows the appreciation in which your road is held by the community in which it is located, but also that this community remains comparatively unaffected by the general depression which pervades the country.

It has been the policy of the managers of your road to afford the greatest possible accommodation to its patrons for the smallest possible tax upon them consistent with its safe and efficient administration. The success of all railroad enterprises is dependent upon the general prosperity of the country, but more especially upon the prosperity of the communities in which they are located. This is emphatically the case with the railroads of Maine, which, from their geographical position, can receive little support from the traffic of communities outside of the State, but must depend for their business almost wholly upon the enterprise and productive capacity of our own people, with whose prosperity our success is closely and inevitably identified.

The condition of the road for safety and efficiency has been fully kept up by supplying one new passenger car, twenty-five flat and box freight cars, fourteen section cars, and all needful repairs on those in use. Our engines have also been kept in good and efficient working condition, and several of them substantially rebuilt, while the capacity and efficiency of our shops for manufacture and repairs have been fully maintained.

Eight hundred tons of new and re-rolled iron have been placed in our track, together with a large quantity of repaired rails; 38,000 new sleepers have been laid, and fifteen miles of new fence built, and also a large quantity of gravel placed upon the road-bed. A new bridge has been constructed across the Presumpscot river at Falmouth to replace one which was accidentally destroyed by fire, but which was fully insured, and for which compensation will undoubtedly be obtained from the underwriters. In short it has been the object of the Directors to keep the road and its equipments at all times in such condition as to be able promptly to respond to all requisitions that may be made upon it, they have also made provision to meet any increase of business which may come during the ensuing year.

We have introduced what is known as the "Mileage Ticket System," by which customers having business at various points along the line of our road may purchase tickets for 500 or 1,000 miles, at reduced rates per mile, but which can be used on any part of the road, thus saving the higher rates of local fares, and the trouble of frequent purchases of tickets. These tickets have been received with much favor by the public and have been sold to the amount of 186,856 miles during the last year. In all cases where parties pay their fares in the cars we furnish an "excess ticket" for which they pay twenty-five cents more than is required for a ticket for the same trip at the regular ticket offices. A scrip is however given for this excess, which on presentation to any ticket office will be repaid in cash. The object of this is to discourage the sale of tickets in the cars, and to keep a responsible account of all tickets sold. Its operation has been satisfactory.

Our relations with other roads continue of the same friendly character as heretofore. The various railroad enterprises referred to in our last Report, have been prosecuted with as much vigor as could have been anticipated under the stringent condition of the money market during the

last year. Many of those roads are now rapidly approaching completion, and will, when completed, materially aid in the development of the sections of the country through which they pass, and directly or incidentally contribute to the business of this Company.

One of these new roads, the European and North American, we deem of particular importance to our railroad system, if that can be called a *system* which consists of a multiplicity of disjointed parts without legal connection or cohesion. This road now running to Matawamkeag Point, some fifty-five miles from Bangor east, will, when completed to the State line, constitute the last link unprovided for in an unbroken chain of railroad from New York through Maine to Halifax, and will place us in the shortest line, in time, between the commercial capital of the United States and Europe. In this respect it assumes the importance of an international thoroughfare, and as such, as well as for its local importance, should be cherished and encouraged by our people.

A bill is now before the Legislature authorizing railroad companies in this State who may agree upon terms of union, to consolidate and become one corporation, thus placing under one management, and in harmonious action roads now under different and often discordant and conflicting administrations. By this process it is believed our various railroad enterprises may be systematized and rendered more efficient and useful to the public and profitable to their stockholders, who hitherto have received little or no remuneration for their investments. In case this law should be passed, and no good reason is perceived why it should not be, preliminary arrangements have been made (subject to the approval of the stockholders, of course,) between the Maine Central Railroad Company and this company, for the immediate consolidation of the two lines, and looking also to the ultimate incorporation of other roads into the same consolidated company. If, however, from any cause the bill should fail to become a law, the same result may, and probably will be attained, under legal powers now existing; and though that form of consolidation would not be as convenient for the roads it would, so far as the public is concerned, be in effect the same.

Our city and town loan will fall due in November next. The sum for which we shall be called upon to provide will amount, after applying our sinking fund to its reduction, to about four hundred thousand dollars. For this we have already made provision in the consolidated bonds of the company, which may be negotiated at or near par, for its payment or re-investment—or in case the road shall be consolidated with any other road—then this loan will be provided for by the consolidated company. In any event we see no cause for solicitude on account of this maturing debt. As we are, we can provide for it without inconvenience—consolidated, we think our strength would be increased.

President.—RICHARD D. RICE.

Directors.—Richard D. Rice, Darius Alden, John B. Brown, William D. Sewall, Geo. F. Shepley, H. N. Jose, Geo. B. Patten, N. H. Whitmore, Philander Coburn.

Superintendent.—LEVI L. LINCOLN.

Treasurer.—JOHN S. CUSHING.

Gen'l Ticket Agent.—J. W. CLAFF.

The Arkansas (Little Rock) *Gazette* notices the arrival at the mouth of the river of 800 tons of railroad iron for the above road, together with the new locomotive "Conway," and 28 box and flat cars, and then adds:

It is with peculiar satisfaction that we record the preparations making by the company which has this road in charge. Since the resuscitation of the company in 1866, its progress has been unostentatious, steady and unintermitted, until now, it stands possessed of the full faith of the public, as to the determination and ability of those who manage it to prosecute the work to an early and successful completion. The company has already actually expended more than one and a half millions of dollars in cash, on the line of the road in our State, and in the purchase of locomotives, cars and iron, without asking of our people the aid of a dollar. How stands the other side of the account? Within a few days past bonds of the State to the sum of $200,000 have been turned over to the company, upon the shrowing that twenty miles of the road have been made ready for the iron. Nothing, however, has been realized on them as yet. Other items are wanting.

Arkansas.—Its Resources and Advantages.

Arkansas is a part of the purchase made by the United States from the French in 1882. It was erected into a separate Territory in 1819, taking its name from the large river which flows across it from west to east, and was admitted into the Union in June, 1836. It lies between latitude 33 deg. and 36 deg. and 30 min. north. In its width, from east to west, it varies from 170 to 250 miles, and extends 242 miles from north to south, possessing an area 52,158 square miles, or 33,382,120 acres, of which 15,000,000 acres remain open to purchase or entry from the State and United States governments. Of these lands, a large portion may be entered under the homestead acts of Congress by parties desirous of becoming actual settlers thereon.

Arkansas is bounded on the north by the State of Missouri; on the east, by the Mississippi and St. Francis rivers; on the south, by the States of Louisiana and Texas, and, on the west, by the State of Texas and the Indian Territory. Geographically its position is second to none and apperior to most of the States in the Union. On its eastern side the Father of Waters, burthened with the wealth of the many States above us, hastens with its freight to the highway of the world; and if, as has been demonstrated within the last two years, Wisconsin and Minnesota, one thousand miles north of us, can deliver their produce at European ports, by the way of New Orleans, at less cost of carriage than by any other route, it surely needs no argument to show that we can deliver the products of our labor at the same market at far less cost to the tiller of the soil.

On the west lies the Indian Territory, with a soil as good as any, the products of which will be carried through the center of this State by railroad or river paying tribute, as it passes in its transit, to the sea.

A railroad from Memphis, Tennessee, running west in almost a direct line through Little Rock, will strike the projected 35th Parallel Pacific Railroad at Fort Smith, on the border of the Indian Territory, and the projected South Pacific Railroad will run through Little Rock, *via* El Paso, in Texas, to the Gulf of California and San Francisco, making two grand highways of the nation through Arkansas—an indispensable necessity to at least three-fourths of the States in the Union—giving us equal facilities of communication with those old and wealthy States bordering the Atlantic, and the vast country west of us, to the Pacific shore.

There are to be found within the limits of this State every variety of soil and scenery, from the flat bottom lands bordering rivers, lakes and bayous, to the cloud-capped summit of the Boston [illegible] the State are level or undulating, while the northern and western portions are more broken and hilly, becoming in some localities mountainous.

The surface of the country is usually covered with a heavy growth of timber on the bottoms, consisting of several varieties of oak, hickory, gum, pecan, elm, black walnut, maple and ash, with an undergrowth of spice, paw-paw and large grape vines; and the hilly and mountainous regions are covered with a growth of oak, hickory, maple and pine remarkably straight, often fifty feet without a limb. Arkansas has untold wealth on her surface, in live growth of forest trees, sufficient to make her lumber interest of the first importance to the State.

Occasionally, throughout the State, small prairies are at intervals interspersed, covered with rich and nutritious native grasses. Cultivated grasses do well in all parts of the State—clover, white and red, timothy and blue grass.

The lamented David Dale Owen, late State Geologist of Arkansas, says of the soil of the bottoms: "These lands are not excelled for fertility by any in the world." Speaking of the black sand soil in the northeast part of the State, between Crowley's Ridge and the Mississippi river, he says: "The black sand soil is remarkably deep and rich, and will yield, on new land, eighty to one hundred bushels of corn to the acre; it is a quick, warm soil, and stands both dry and wet seasons well."

The soil of the valleys between the hills, called "hammock" or "second bottom," is good, but not as good as the first bottom. It, however, grows all kind of crops well. The ridges, hills and slopes, for fruit growing and grazing, cannot be surpassed. No locality excels the northern and western portions of the State in the growth of timothy, blue grass and clover. Springs are abundant and the water is pure. Stock raisers, dairymen and fruit growers can find no better location.

While in other States, until supplied by art with means of transit, farmers were obliged to haul their produce, in many instances, one hundred and fifty miles to a market, in this State an all-wise Providence has so disturbed the water courses that, intersecting every portion of the State, they give free access and egress by steamers to every part of this commonwealth.

The St. Francis River, rising in southeastern Missouri, runs through or borders parts of the counties of Green, Craighead, Poinsett, Mississippi, Cross, Crittenden, St. Francis and Phillips, and is navigable in this State to the Missouri line.

The White River has its rise in Washington county, runs into the State of Missouri, from thence southward through the following counties in Arkansas: Carroll, Marion, Izard, Independence, Jackson, White, Woodruff, Monroe, Arkansas and Desha. This stream is navigable for 300 miles at all times, and 100 miles further during high water.

Black River rises in southeastern Missouri and runs through the following counties in Arkansas: Green, Randolph, Lawrence, Independence and Jackson. This stream is navigable for small boats to the Missouri line.

Arkansas River comes through the Indian Territory from the Rocky Mountains, and enters this State, on the western border, at Fort Smith. It flows across the State through the counties of Crawford, Sebastian, Franklin, Johnson, Yell, Pope, Perry, Conway, Pulaski, Jefferson, Arkansas and Desha. It is navigable entirely across the State, and, in high water, far up into the Indian Territory.

Ouachita River rises in Polk, and runs through the counties of Montgomery, Hot Spring, Clark, Dallas, Ouachita, Calhoun, Union and Ashley, passing into the State of Louisiana. It is navigable in this State for one hundred and fifty miles, in high water, at least two hundred and fifty miles.

Saline River rises in Saline and runs through Hot Spring, Dallas, Jefferson, Bradley, Drew, Ashley and Calhoun counties, and is navigable one hundred miles.

Bayou Bartholomew is navigable in the counties of Desha, Drew, Chicot and Ashley. It empties into the Ouachita, and is navigable in this State about one hundred and fifty miles.

Red River running through the south-western portion of the State, is navigable in the counties through which it passes, viz: Little River, Hempstead, and Lafayette—a distance of about one hundred miles.

The Mississippi River forms the eastern boundary of the State, and borders the counties of Mississippi, Crittendon, Phillips, Desha and Chicot, a distance of about 400 miles.

Thus it will be seen that of the sixty-one counties in this State forty-three are watered by streams, each navigable in their course, through different counties, from seventy-five to four hundred miles, making, with their branches a navigable highway within this State of over 3,000 miles. And let it be borne in mind that the ice in Arkansas never obstructs navigation.

These streams have their rise in mountainous and hilly regions in the northwestern part of the State, in springs of clear, sparkling water that leaps from the craggy mountain side as if Moses had smitten the rugged cairn with his dividing rod, or, welling up from their base, become rivers where they bust from the Titanic grasp of the Genie of the hill.

One of these springs is so remarkable that I copy a description of it from Prof. D. D. Owen's Geological Reconnoisance of Arkansas:

"The country is well watered, and possesses many fine water powers—even at the very fountain-head of some of its numerous limpid calcareous streams, which frequently burst forth from among the ledges of rock. One of the most remarkable of these, forms the fountain-head of the main fork of Spring river, known as the "Mammoth Spring," welling up on the south side of a low, rocky ridge, from a submerged abyss beneath of sixty-four feet, and constituting, at its very source, a respectable lake of about one-sixteenth of a mile from north to south, and one-fifth to one-sixth of that distance from east to west.

"It is said by those who have sounded the bottom that there are large cavities and crevices in the rock, and that the main body of the water issues from a large cavernous opening of some forty yards in circumference. It has been estimated that it boils up at the rate of about eight thousand barrels per minute; the correctness of this estimate we had no means of verifying, but it may be safely estimated that the average constant flow would be at least sufficient to propel from twelve to fifteen run of stones.

"The uniform temperature and composition of the water is peculiarly congenial to the growth of a variety of cryptogamic, aquatic plants, possessing highly nutrative qualities, both for herbiverous animals and birds.

"In the early settlement of the country, herds of herbiverous wild animals traveled from great distances to this fountain for both food and water, as well as flocks of wild fowl. Now, the cattle of the neighboring farms may be seen wading in its waters up to their middle, and browsing on the herbage, which appears peculiarly congenial to their tastes; it is, also a general resort of geese, ducks, and other aquatic birds.

"This mammoth spring is located just south of the east and west line between Missouri and Arkansas, on section 5, township 21 north, range 7 west, of the 5th (fifth) principle meridian, and forms the most interesting feature of this section of the country, since it affords a water power which, if properly improved, might supply valuable mill-sites and water privileges for manufacturing purposes in general.

"The water of this remarkable fountain remains at a nearly uniform temperature, never freezing in winter. On the 17th of December, 1857, the temperature of the air being 17 deg. Fahrenheit, the spring showed only 57 deg. Fahrenheit. But the average temperature, when the thermometer is sunk deep in the spring, will probably be found to be 60 deg.

"The extent of the range of extreme low and high water is but three to four inches, so that the variation in the supply of water is very slight.

"A large proportion of the water now runs to waste, the present mill only requiring a limited supply; but if it were all saved, which it could easily be, there would be enough for many grist mills, as well as woolen factories, which would be well adapted to the resources of the country, since both the climate and herbage seem to be well suited to raising sheep. At least, the small flocks of sheep seen in the range appear both healthy and vigorous.

"The water is generally clear and limpid. It only becomes slightly muddy after long continued rains. From ten to eleven feet of fall can be obtained between the fountain-head and the present site of the dam.

"Many years can not elapse until, in such a country, locations of this description will become very valuable. Already the little mill at this point attracts custom from thirty miles distance."

At the commencement of the rebellion several railroads were in process of being built.

The Memphis and Little Rock road was graded nearly the whole distance, and running seventy miles of its length. During the latter part of the war only fifty miles at the Little Rock end of the road was in operation—this being the section between the Arkansas and White rivers. There is now in operation an additional 50 miles from Memphis to L'Anguille river. It is one of the most important roads in the State—running through a magnificent country and connecting Memphis, a large city, with Little Rock, a city which is the capital of the State and destined always to be its commercial center. This road, which is now under contract, will be completed and running through trains six months from this date. It has aid from the State to the amount of $10,000 per mile for ninety miles of its length.

The Little Rock and Fort Smith Railroad, which will, with the Memphis and Little Rock Railroad, form a continuous line from the eastern to the western boundary of Arkansas, has a valuable grant of land and some stock subscription. It is now under contract and will be completed at an early day, connecting Little Rock with the Indian territory at Fort Smith—an important commercial town in this State,—and being an important link in the 35th parallel Pacific route, it must prove a good investment and a paying road. This road has also State aid to the amount of 10,000 per mile for 150 miles. Of this road, the president, Jesse Turner, in his report to the Governor of Arkansas, says:

"Aside from its great importance, considered merely as an Arkansas road it will, in all probability, become the main trunk of a great national highway, commencing at a point on the Mississippi river, opposite the city of Memphis, and running thence near the thirty-fifth parallel of north latitude to the Pacific ocean. If this should be its destiny, and I confidently believe it will, it will, in my estimation, give it a prospective importance second to no railroad on the continent.

There was, also, before the war, a railroad projected from Pine Bluff, in Jefferson county, to Napoleon, at the mouth of the Arkansas river. This road is graded nearly its entire length, and will probably be completed at an early day. It passes through the valley of the Arkansas—as rich a cotton growing district as the sun shines upon.

A road was also projected from Eunice, on the Mississippi river, across the Ouachita, via Camden, to Red river into Texas. This road is partly graded, and, prior to the war, had cars running for a few miles on the eastern end of its line. It is now under contract, and will be speedily pushed to completion. It gives an outlet to one of the richest planting sections of the State, runs through extensive coal fields, and has upon its line some of the finest pine and oak timber in the world. This road will probably be constructed from the Mississippi river to Camden, a distance of about 100 miles, within the next twelve months, and will be pushed rapidly to completion. It has a large amount of land, and State aid to the amount of $15,000 per mile for 100 miles of its line.

The Cairo and Fulton is another important projected railroad. This road will run through a fertile country, has a large land grant from the general government, and is one of the most important roads. It runs diagonally across the State from the northeast to the southwest corner, and is about 300 miles long. It is the first link in the southwestern Pacific Railroad. This road has aid from the State to the amount of $10,000 per mile for its entire length.

Another of the most important projected roads in the State is the Little Rock, Pine Bluff and New Orleans Railroad. It will extend from Little Rock south, via Pine Bluff, to the State line; thence to connect with a road via Vicksburg to New Orleans. People residing along the line of this road estimate the amount of lands that will be contributed to it by parties on the line at 500,000 acres. It has State aid for 112 miles of its length, at $15,000 per mile. This road will connect with the Little Rock and Fort Smith Railroad at Little Rock, forming a continuous line of rail from New Orleans to Fort Smith, connecting at that point with the 35th Parallel Pacific Railroad, or a branch from the Central Pacific Road, in Kansas, to that place. Surveys are now being made, and it is estimated that this route will be completed by the 1st of January, 1871.

A railroad is also contemplated from Helena, on the Mississippi river, to Little Rock. This road will pass through a beautiful country. It has State aid to the amount of $15,000 per mile, and is expected to be completed at an early day.

There is also a railroad projected from Springfield, Missouri, to Fort Smith, which will run through the western and northwestern part of this State. With that finished, Arkansas will furnish the early fruit for St. Louis, Chicago and other cities farther north.

Gentlemen conducting these enterprises confidently assert that these railroads will give employment to from 3,000 to 5,000 laborers for the next three years.

The great staple of export for Arkansas has always been cotton. By growing this fibre, many became immensely rich, and all made money. It is now, on land particularly adapted to it, the most profitable crop raised in this State, and the bottom lands of Arkansas are second to none in the southwest. There is no country in the world, except, perhaps, a narrow strip upon the coast of Georgia, that can produce as much cotton, of as good quality, on a given area, as can be produced upon the bottom lands of this State. A fair crop, on these bottoms, is 450 pounds of lint cotton per acre, which, at the present price, (Sept. 1st, 1869,) 30c. per pound, will make the product of one acre $135. One man, in an ordinary season, can easily tend ten acres, making the result of his labor for one year $1,350, which is nearly double the product of one man's labor in raising corn or wheat in the more northern States.

These bottoms are also particularly adapted to the growth of corn. From sixty to eighty bushels per acre is not an unusual crop; and it is the opinion of good farmers that, let the same system of culture prevail here that has been adopted in Iowa and Wisconsin, and the crop of maize can be safely calculated to average sixty bushels per acre. The corn is not as flinty here as in the more northern States, and is considered better for feeding purposes.

Cotton and corn may safely be set down as the great staples of the bottoms. In addition to these, however, all the crops grown in the hills can be grown in the bottoms, viz: wheat, oats, rye, peas, beans, Irish and sweet potatoes, ground nuts, turnips, tobacco, hops, etc., also all kinds of roots and vegetables.

Wheat does well in the bottoms, in the seasons favorable to it, producing immensely—sometimes as high as sixty bushels per acre; but it is not considered as sure a crop there as in the hills in the northern and western part of the State, where the usual yield is from twenty to twenty-two bushels per acre. It is said to produce finely,

also, in the Red river country, in the southwestern part of the State. Winter wheat is usually grown here and is of a very superior quality.

Oats, barley and rye do well in all parts of the State, especially in the northern portion.

Peas produce immensely everywhere, and are a sure crop. No northern State can compete with Arkansas in the growth of the field-pea.

Beans grow and produce well. The delicious Lima, or butter-bean, is grown as easily here as the common white bean in the Northern States, and is one of our most common vegetables.

Irish potatoes do well, and, with care, keep as well as in the Northern States.

Sweet potatoes yield from three to five hundred bushels per acre, and are not surpassed in quality by any grown on any part of this continent. They sell readily at seventy-five cents per bushel, and must at an early day form no inconsiderable part of the exports of this State.

The uplands of Arkansas are peculiarly adapted to the growth of the ground-nut, or *goober pea*, the poorest soil growing them in great abundance; they yield largely. There is a great and increasing demand for them, not only as an article of food, but on account of the oil compressed from them, an article of great commercial value.

Turnips have here a most prolific growth. They are to be seen in the fields as late as January, growing with an exuberance unsurpassed, a single one often weighing nine or ten pounds. In connection with sheep raising in the hilly portions of the State, peas and turnips must prove very valuable crops.

All the varieties of garden vegetables, raised in any country, grow well here—squashes, peas, beans, okra, egg-plant, beets, turnips, radishes, onions, cabbage, celery, oyster-plant, lettuce and tomatoes. Vegetables are plenty in market in April, and last until Christmas.

Blue grass, in the timber on the bottoms, grows finely, and in the western and northwestern districts seems indigenous to the soil. In the report of Washburne and Denckla, to the Little Rock and Fort Smith Railroad Company, these gentlemen assert that "corn, cotton, cereals, grasses, (especially blue grass, which takes hold of the soil and spreads rapidly and close,) clover and fruits, are all grown here in great perfection." These gentlemen also assert that "tobacco grows far better than in Maryland, while hemp does as well as in Kentucky or Missouri."

Tobacco has long been grown here, and is of a very superior quality.

Hops grow wild, and when cultivated yield bountifully.

Honey is very plenty throughout the State. It is found wild in the hollow trees of every forest, and is accumulated by every one who desires it without any trouble. The numerous flowers afford to the bees plenty of food in summer, while the short, mild winters create a very light demand upon the stock. With hives arranged with caps, the farmer or bee-fancier can always supply himself through the year with honey without disturbing the swarm.

No portion of the United States is better adapted to stock-growing than this. Cattle, horses, and mules thrive and keep fat the year through, without care or feeding, in the central and southern portions of the State, where, in addition to the grasses, they feed and do remarkably well on small cane, which, in many localities, grows luxuriantly the entire year, affording a nutritious range during the winter. Fat cattle from this State find a ready market at St. Louis or Memphis. Hogs are raised here without cost, and fatten readily in the fall from the abundance of mast in the woods, acorns being plenty everywhere—that from the over-cup oak is nearly two inches in length, very nutritious, palatable, and is devoured by the hogs greedily.

There is no better corn country than this. With its natural advantages and facilities for a market, it must speedily become one of the first stock-growing States in the Union.

The rivers, lakes and bayous are well-stocked with good fish. Among the varieties are pickerell, black bass, buffalo, and cat-fish—the last are sometimes taken weighing 150 pounds.

Game is very plenty, and of almost every kind, consisting of bear, deer, turkey, duck, prairie chicken, and quail.

No locality in the world can grow a greater variety of fruit, and to greater perfection, than can be grown within the limits of this State. Apples, pears, peaches, apricots, figs, plums, and grapes, all do well. This is a natural peach country. They grow large, are well-flavored, and need no care.

Shrubs and flowers grow luxuriantly. The magnolia, the pride of the South, is in almost every inclosure; the glossy, green holly is by every road side, while roses of infinite variety blush and glow in this soft, genial climate from early March till late December. All kinds of flowering shrubs do well, many hot-house plants growing here in the open air eight months of the year.

The genial climate of this State, neither too cold in winter nor too hot in summer, is peculiarly adapted to the growth of the vine. Dr. Richard Thornton, with many years' experience, asserts that there is no portion of the American continent where the grape can be grown so successfully as in Western Arkansas. Leonard Withoff, Esq., of Van Buren, himself a native of a vine-growing region, near Wurtenberg, and for twenty-five years a resident of Arkansas, having been engaged in grape growing for twelve years, says the Catawba and White Hamburg have neither of them ever failed, and that in 1864 his Catawba yielded him one and one half gallons to the vine. Dr. Dibbrell, a well-known resident of this State, asserts that he has raised the Catawba, Diana, and Delaware, and has never known either of them to fail or be troubled with mildew.

There is said to grow wild, south of Fort Smith, a large, white, native grape, of very delicious flavor. Indeed, in every portion of the State, wild grapes of different varieties are abundant.

Says Mr. John R. Eakin, author of a work on grape culture: "This is the best region of wild grapes in America. What we mean to assert is, that the region between the Mississippi and the staked plains, and between the Missouri river and the swamp lands of the Gulf, produce more and larger and better wild grapes than any other portion of the known world. This is deliberately said, after much reading, inquiry, travel, and extensive observation."

Speaking of Arkansas, he further says:

"In the Eastern and Northwestern States, they all try to avoid a northern exposure. Our country is somewhat differently situated, especially that portion lying west of the Ouachita and between the mountain ranges south of the Arkansas. It may be well to dwell on this a little. This section of country, and also that north of the Arkansas river for a considerable distance, is the only part of the United States protected against violent winds. The mountains which shield it range east and west. The Blue Ridge, Allegheny and Cumberland mountains run in a north and south direction, and, except in sheltered nooks, protected by spurs, the winds rush down on each side of them from Labrador and Hudson's Bay. The same is the case with the northern portion of Missouri, with Ohio, Illinois, and Indiana, and on down the Mississippi and the Southern States east of the river. These north winds are very sudden and destructive, bringing in twenty-four hours the climate of the frigid zone—throwing against vegetation the identical air that was but yesterday on an iceburg. This influence is greatly modified with us. These hills, to our north, perform the same office which the Alps do to Italy. This is indeed, as to climate, the Italy of the United States."

Sudden changes are less frequent than in the Eastern States in the same latitude—and not to be compared to the country further west, where sudden northers sweep down to the Gulf, often causing the cattle to perish on the plains of Texas as far south as San Antonio. All evidence demonstrates that there is not, on this continent, any locality superior to this for the profitable growth of the grape; and, for the reason adduced above, it is believed that the climate of Arkansas possesses the most equable temperature of any State in the Union. The thermometer does not show here as high a temperature during the summer months as in the more northern States, and in our short winter—which hardly deserves the name—it rarely drops down to zero. The time cannot be far distant when our valleys, hill slopes and mountains' sides will rival sunny France in the products of the vine.

(To be continued.)

South Carolina Railroad.

The Charleston *News* says that Captain Alfred L. Tyler has formally accepted the position of Vice-President of the South Carolina Railroad Company. The prospects of the road are remarkably good. With the completion of the Macon and Augusta Railroad in June next, a vast field will be thrown open to the South Carolina Railroad, which must largely increase its business; and the proposed extension of the line, in Charleston to the water front will enable the company to carry on its huge operations with the closest economy and quickest dispatch. As an indication of what the South Carolina Railroad Company is now doing, we may remark that its freight business for the month of March was, in quantity and in amount of money, the largest month's business had since the close of the war.

☞ A company has been organized to build a railroad connecting Middle Village, Stonybrook, Setauket and Port Jefferson with New York. The term of the existence of the company is to be 99 years, and the capital stock $200,000, divided into shares of $25 each. The following persons were elected directors: J. Lawrence Smith, L. B. Smith, T. S. Seabury, J. M. Bayles, H. W. Sweny, T. S. Griffing, Jonas Smith, Nathaniel Smith, S. A. Smith, H. C. Webb, C. C. Smith, Milton Smith, Stephen Tabor, J. M. Waterbury and William Snyder. It is understood that the Long Island Railroad Company will subscribe toward the stock, and on completion lease the road of the stockholders.

☞ The rails on the Sag Harbor branch of the Long Island Railroad have been laid to within about a mile and a half of the Bridgehampton depot, and the road would have been completed to that place by the middle of next week were it not for a strike among the workmen. On Tuesday morning the laborers struck for $2 per day, they having heretofore received $1 75. On Wednesday, however, a small number of the men resumed work. The contract for building the depot at Sag Harbor has been awarded. It will cost about $6,000, and will be a neat structure when completed.

☞ Mr. Richard Randolph, of the Baltimore and Ohio Railroad, assisted by Mr. Charles G. Dandridge, with his corps of engineers, have commenced the survey of the Valley Railroad from Harrisonburg to Salem. When completed this will give a line of unbroken railroad communication from Boston *via* New York, Philadelphia, Baltimore, Winchester to New Orleans, and all parts of the South.

☞ The extension of the Cape Cod Railroad from New Orleans to Wellfleet has been commenced, and will be completed early in the autumn.

American Railroad Journal.

Saturday, April 23, 1870.

Stock Exchange and Money Market.

A very favorable city bank exhibit prepared the market for money for a turn in favor of the borrowing interest. The influx of lawful money from the West and Southwest has been unusually liberal, enabling the city banks to show, in their last weekly return, an increase of nearly 2⅝ millions in their legal tender averages, with a gain of $1,161,555 in their deposit item, and a reduction of over 2⅛ millions in their loan and discount line. Their specie reserve was reduced nearly two millions. The T. S. Sub-Treasury has added over two millions to its coin balances, within the week, or equal to a little more than the reported specie loss of the banks. The demand for money, though fairly active, has been readily met, at rates more favorable to borrowers, the closing figures having been from 4@6 per cent. on call, and 7@10 per cent. per annum, in the discount form, at which the offerings on Wednesday were decidedly liberal, especially in a temporary way to the leading street houses, in the Government and Stock business. On Wednesday, Government converted, by sale, a million of Gold into lawful money, on the basis of 113 41@113 51. The aggregate of the bids for the million was fully $3,470,000.

The specie reserve of the city banks according to the latest return is $26,879,513, against $7,811,780 same time last year. The city bank deposits are now $202,913,989, against $172,203,494 week ending April 17, 1869. The legal tender reserve amounts to $50,180,040, against $51,001,288 same time last year. The circulation now stands at $33,698,258, against $24,436,769 same time last year. The loans are now $269,981,721, against $255,184,882 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged about $71,561,500 a day, against a daily average of $79,474,226 the preceding week, and $86,008,700 the week ending with April 2, 1870. The current week's exchanges average about 75 millions a day. The city banks, last week, reported a loss of $1,908,179 of specie, with an increase of $2,161,555 of deposits, and $2,609,407 of legal tender notes. They reduced their loans, $2,189,667; and their circulation, $55,995.

The city bank exchanges on Wednesday were about 75 millions.

National Bank notes to the amount of $257,450 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $322,844,161, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $23,336,373, leaving, with the existing 1,614 banks, (having an aggregate capital of $426,399,151,) an actual circulation at this date, of $299,507,788. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,246,350; and for the public deposits, $16,950 500—making a total of $359,196,850. The Treasury Department last week redeemed and destroyed $437,100 of worn and mutilated fractional currency, and issued $1,603,382 of new.

The U. S. Sub-Treasury receipts, week ending with April 16, were $3,991,425 in coin, (including $3,365,000 from customs duties,) and $2,994,855 in currency; payments, $1,908,455 in coin, (including $99,387 of coin interest,) and $3,553,383 in currency; balance at the close of the week, $85,231,397 (including $81,703,716, of coin, and $2,037,687 of currency,) against $83,434,214 at the close of the preceding week, showing an increase of $1,797,183. The business of the Office on the first two days of the current week, was as follows: On Monday, receipts, $635,462 in coin, (including $551,000 from customs,) and $174,284 in currency; payments, $25,015 in coin, (including $17,024 of coin interest,) and $348,372 in currency. On Tuesday, receipts, $502,707 in coin (including $439,223 from customs), and $196,412 in currency; payments $63,819 in coin(including $35,176 of coin interest) and $105,750 of currency. The balance at the close of business on Tuesday stood at $84,803,840, (including $1,654,261 of currency, and $82,753,051 of coin) against $83,261,940 a week previous; and $83,223,102 on April 2, 1870. The aggregate receipts of the office in March were $40,664,411, including $12,264,608 from customs; aggregate payments, $41,481,676 including $3,766,313 of

coin interest; balance at the close of the month, $82,854,761, against $83,673,026 at the close of February.

The U. S. Sub-Treasurer issued in March $1,615,000 of coin certificates.

The U. S. Sub Treasurer retired, last week, $3,067,653 of coin certificates, received for customs.

The U. S. Sub-Treasury general balance on Thursday morning was $85,361,718.

Government revenues have been yielding liberally since our last. The excises, during the week yielded $3,100,000; customs at the port of New York, $3,278,654, and at the outports about $1,150,000 (in coin) more, making the grand total income for the week equal to about $8,082,000 in currency. The receipts from excises, thus far in the current fiscal year, commencing with July 1, 1869, have been $131,296,812. The receipts from July 1, 1869, to March 31, 1870, were $124,008,603 against $103,499,334 same time preceding fiscal year.

Gold has been in fairly active demand, through the week, chiefly on speculative account, at from 112½@113⅞, leaving off on Wednesday at 113⅜@113½. The customs inquiry has been somewhat brisker. The export drain has been under half a million. The Gold Exchange Bank clearances were up to 67 millions on Saturday, and down to 31½ millions on Tuesday. On Wednesday, they reached 40½ millions, with resulting balances on that day of 1¼ millions in coin, and about 1½ millions in currency. Government sold a million of Gold on Wednesday at from 113 41@113 51.

The coin balance of the U. S. Sub-Treasury on Thursday morning was $83,382,994.

The customs revenue of the port on Wednesday was $662,000.

The coin interest payments of the Sub-Treasury on Wednesday were $22,838.

The customs demand for Gold last week, averaged $560,921 a day; thus far, this week, it has averaged $481,500 a day, or equal to a weekly aggregate of $2,889,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $66,936; and since Jan. 1, 1870, $6,102,639, against $7,187,685 same time in 1869. The total customs revenue of the Government, in coin, at this port, thus far in the current fiscal year, commencing with July 1, 1869, has been $106,312,085, against $101,258,005 in 1868–'69.

The customs revenue at the port of San Francisco, from Jan. 1 to April 7, was $1,974,178, against $2,080,560 same time last year.

The exports of specie, from this port, last week, were $425,139, against $68,575 same week last year; total, since July 1, 1869, $23,746,514, against $31,485,538 same time preceding fiscal year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $99,387, and since July 1, 1869, $67,266,667, against $68,046,720 in 1868–'69.

The specie exports from San Francisco, from change compare as follows with former returns: Jan. 1 to April 17, were $11,656,874, against $10,861,276 same time last year.

Foreign Exchanges has been in reduced supply and fair demand at advanced rates, closing firmly. Bankers' prime sixty day bills on London closed buoyantly on Wednesday at 109@109¼, and on Paris to 5.22½@5.18½; sight bills on London to 109⅝@109⅞, and on Paris to 5.17½@5.16¼. The offerings of produce bills have been up to a fair average. The week's exports of domestic produce have been to the currency value of $8,306,325, making the total since July 1, 1869, $162,809,882, against $128,991,466 same time preceding fiscal year.

Government securities have been attracting more attention, and have been quoted higher, on light offerings of all issues, especially of the six per cent. coin-bearing bonds. The home investment inquiry has been increasing. There has been some export call for the six per cent. gold bonds, and also for the Ten Forties. The currency sixes have been in relatively less request, but have held their own well as to price, not having been offered in any considerable amounts. There has been no practical progress made in shaping the funding project now before Congress, and rumors have been circulated to the effect that an entirely new bill would be presently introduced, more simple in its details and more satisfactory to the country. The country, judging by the expression of the popular sentiment through the public journals, would be more generally satisfied, if Congress abandoned all funding projects, for the time being, and applied itself to the practical adjustment of the tariff and tax burthens, on an equitable and permanent basis, so as to enable business men to resume active operations, in good earnest, and without apprehensions of the disturbance of their plans and negotiations by legislative action.

U. S. sixes of 1881 closed here at 114¼@114½; U. S. Five-twenties of 1862, 112⅞@113; U. S. Five-twenties of 1864 at 111⅛@111⅜; U. S. Five-twenties of 1865 at 111⅞@112; U. S. Five-twenties of 1865 consolidated, 109⅞@110; U. S. Five-twenties of 1867, 110⅜@110½; U. S Five-twenties of 1868, 110¼@110½; U. S. Ten-forties at 106½@106¾, ex the March coupon; U. S. Six per cent. currency bonds, 111¾@112.

Central Pacific Sixes closed on Wednesday at Frankfort at 77¾@77⅞.

The latest quotations at the London Stock Exchange compare as follows with former returns;

	April 6.	April 13.	April 20.

* Ex coupon.

State bonds have been more sought after and quoted as a rule stronger in price. There has been more inquiry for Railway bonds and quoted steady. The Central Pacific Sixes closed at 91¼@92. Union Pacific Sixes at84⅞@85; and the new Chesapeake and Ohio First Mortgage Thirty year Bonds at 90 per cent. and accrued interest in currency.

Railway and miscellaneous share property has been more active, but quite variable in price. The later dealings showed less firmness.

General business has been on a moderate scale, though toward the close, rather more animation was apparent. Bread stuffs and provisions closed stronger. Cotton closed a fraction dearer. Middling upland cotton closed on Wednesday at 23⅛ cts. per lb. The stock of cotton now here is given at about 45,000 bales. The receipts at the port this week, have averaged abont 3,400 bales a day. The receipts at all the ports, thus far in the year commencing with Sept. 1, 1869, have been 2,448,600 bales, against 1,847,000 bales in 1868–'9; exports, same time 1,687,350 bales, against 1,108,325 bales same time in 1868–'9; stock on hand at latest dates, 355,100 bales, against 320,300 bales same date 1869. The exports of domestic cotton goods from this port, since Jan. 1, 1870, have been 3,926 pkgs., against 8,380 pkgs., same time in 1869. From Boston, 1,100 pkgs. in 1870, against 3,322 pkgs. same time in 1869.

The coin balance of the Treasury Department on Monday was $111,365,000, including $37,036,000 on private deposit; currency balance, $10,922,000.

Foreign goods have been in rather more demand and steadier in price, as a rule. The week's imports of foreign dry goods were to the specie value of $2,131,875; and of foreign merchandise, $4,291,603, making a total of $6,423,478, against $7,558,167 same week last year.

At the Live Stock markets, this week, Beeves have been in less demand and depressed in price at from 11½@16½c., per lb.; week's receipts, 6,597. Milch cows continue dull, at $40@$100 each, receipts, 84. Veal calves have been in liberal supply and moderate request, at from 6@13c. per lb.; receipts, 2,095. Sheep less active at from 6@9½c.; lambs at 12@20c. per lb.; receipts, 19,225. Swine dull at 9⅜@9⅞c. per lb., all live weight; receipts, 7,735.

There has been less activity in Ocean freights, with some irregularity in rates. For Liverpool we quote flour at 1s. by sail, and 1s. 3d@1s. 6d. by steamer, per bbl.; grain at 3d.@3½ by sail, and 3¾d.@4 by steamer, per bushel; cotton at ⅛d. by sail, and ¼d. by steamer per lb; and heavy goods 10s.@25s. by sail, and 12s.6d.@85s. by steamer, per ton. Total number of vessels in port on Wednesday, 502.

The balance in the Sub-Treasury on Wednesday was $85,361,717 50.

The following will show the exports (exclusive of specie) from New York to foreign ports for the week ending April 19th, and since the beginning of the year:

	1869.	1870.
For the week....	$3,689,819	$3,306,325
Previously reported...	44,599,495	47,708,553
Since Jan. 1	$48,289,314	$51,014,878

The imports for the week ending April 16, and since the beginning of the year, have been as follows:

	1869.	1870.
Dry goods	$2,263,406	$2,131,875
Gen. merchandise.....	5,294,761	4,291,603
Total for the week.....	$7,558,167	$6,423,478
Previously reported....	85,350,177	80,650,359
Since January 1.....	$92,908,344	$87,073,837

R., 18¾@19¼; George's Creek Coal, 65@67; Atlantic Coal, 2.50@2.50; Bare Hill, 0.10@0.15.

☞ Articles of association have been filed of the Boston, Saratoga and Western Railway Company. The road is to run from Saratoga, or from a point of junction on the line of the Adirondack road, at or near Sackett's Harbor or Oswego, with a right to construct a branch to Utica. Length of road to be about 150 miles. Capital stock, $10,000,000.

☞ The Savannah, Griffin and North Alabama Railroad will be completed from Griffin to Newnan by the first day of June next. Surveys of the route west of Newnan are now progressing.

☞ The survey of the Helena and Iron Mountain railroad has been commenced. The design is to construct immediately that portion of the line between Helena and Forrest City.

☞ The stockholders of the Woodstock (Vt.) Railroad have voted to increase the mortgage on the road $100,000, making in all $350,000.

☞ The City of Baton Rouge has voted in favor of a bonus of $35,000 to the New Orleans, Baton Rouge and Vicksburg railroad.

☞ The railway between Bombay and Calcutta has been opened for through traffic.

International Coal and Railway Co.

The Cape Breton *News*, of 26th ult., says the railway works of this company, between Sydney and Bridgeport, are being vigorously advanced from both ends of the line. The pier works on the eastern shore of the harbor, although somewhat interrupted, owing to the absence of the customary strong river ice, are also in a creditably forward condition. Mr. Rogers, the Superintendent, is advancing the work throughout with all possible expedition. There are at present over two hundred persons employed in and about the works.

This is the road now being constructed by Mr. Duncan Macdonald of Montreal. We further understand, in addition to the information conveyed above, that the rails have been contracted for, and that the work will be fully completed six months ahead of the contract time.

Honduras Railway.

The London *Railway Times* says that the work on the first section is now being proceeded with by the contractors, Messrs. Waring Brothers, under the personal supervision of Mr. W. M'Candlish. The second section is also to be commenced forthwith, and on Saturday, April 2, Mr. Drew, the representative of Messrs. Waring Brothers and M'Candlish, accompanied by a numerous staff of engineers, left Liverpool by the Cuba steamship for Honduras, and they hope to be able to commence work immediately on their arrival. When both sections are finished there will be complete communication between Puerto Caballos, on the Atlantic side, and Camayagua, the capital of the country.

☞ The Pine Bluff (Ark.) *Republican* says that work has actually commenced on the Little Rock, Pine Bluff and New Orleans Levee Railroad. We believe this company falls heir to the work and effects the original railroad project between Little Rock and Napoleon. A large amount of work in the way of cutting out timber and throwing up a road bed for half the distance between Pine Bluff and Napoleon, was done by the original company, before the war. This work already done, and the State aid granted, will go very far towards building it when a start is fairly made.

☞ As an evidence of Southern progress, it is stated that the two Carolinas, Georgia and Florida have twenty great railroads in progress of construction, while Delaware, Maryland, West Virginia, Missouri, Arkansas, Texas, Louisiana, Mississippi, and Alabama have about forty. These are additional to the roads already complete and in operation in these States.

☞ Articles of association have been filed for the organization of the Utica, Chenango and Cortland Railroad Company. The road is to run from the terminus of the Ithaca and Cortland Railroad, in the village of Cortland, to a branch of the Midland Railroad in the town of Otselic, Chenango county, a distance of about thirty-two miles. The capital stock is fixed at $800,000.

☞ O. H. Waldo has been elected President, and R. P. Ober Vice President of the Milwaukee and Northern Railroad Company. It is determined by the officers and those interested to make arrangements for building the road without delay.

Journal of Railroad Law.

RAILROAD COMPANIES—PASSENGERS PASSING FROM TRAIN AND RECEIVING INJURY GUILTY OF NEGLIGENCE—WHEN PASSENGER TRAIN MAY RUN ON SIDE TRACK.

The facts of the recent case of The Ohio and Mississippi Railroad Company *vs.* Schrebe (44 Ill. p. 400) are fully and clearly stated in the following opinion by

WALKER, J.—This was an action on the case brought by appellee, in the St. Clair Circuit Court, against appellants, for negligence in operating their trains, whereby he was injured. It appears that appellee became a passenger at Illinoistown for Lebanon, on a passenger train of appellants. That, on arriving at Lebanon, a freight train being too long for the side-track had stopped on the main track, and the passenger train, having slackened up, moved upon the side track to permit the freight train to pass. As the passenger train started, appellee attempted to get off, and in doing so fell, and one of his arms was crushed, and afterward amputated. He insists that the injury was produced by the carelessness of the employees of the company, while they contend that it arose from his own want of care and prudence.

Appellee swears, that, after the train had stopped and was starting again, some one said that the train was going to Summerfield, which was the next station. That he thereupon took his baggage and went out upon the platform, and just at that time "the locomotive gave a push backward, and I fell down by the wheels, and the locomotive then went backward and the wheel went over my right arm," and the doctor amputated it. "The locomotive came back with great force." "I think a man and his wife got out before me safely; it was forty or fifty yards from the station where I was hurt; I cannot tell whether Lebanon was announced or not; I did not hear it; I did not see any thing of the conductor, or any brakeman when I went to the door of the car, and no one told me not to get out." He says the night was very dark, and in this he is supported by other testimony.

Two witnesses, besides the conductor, testified that the conductor told him not to get off there; that it was not the station. They say they heard the warning. They were just behind him and had started to pass from the car. They say this occurred at the door of the car, and as the conductor met appellee on the platform in coming from the next car. Another passenger in the same car testifies, that, as the crowd started to go out, he heard some one at the door say. "We have not got to the station yet;" that it was about the time appellee was hurt. He says he does not know who it was that gave the warning; that he was about the middle of the car.

The conductor testified, that, as he came out of one car to the platform, appellee was coming out of the opposite car with some bundles in his hands, that witness said to him, "Do not get off here, we are not at the station;" but appellee walked along and stepped down on the steps of the car, and that he (witness) took hold of his shoulder and said, "Don't get off here," but appellee was too heavy for him to hold, in the position which witness then occupied, and he fell. There seems to be no other witness than appellee who testified that there was a violent jerking by the train at the time the accident occurred. Some of the witnesses gave it as their opinion that appellee was under the influence of liquor at the time; but this he denied, and said he only drank one glass of beer that day, and that was in the morning.

If the testimony given by appellee was alone considered, the jury might have been warranted in the conclusion at which they arrived; but his testimony is overcome by the testimony of at least four witnesses as to the warning given. "That they had not reached the station;" and three of them state positively that he was directed by the conductor, not to pass from the cars at that place. These witnesses, so far as we can see from this record, stand unimpeached, and are entitled to to credit. This evidence, may no doubt, be reconciled. Appellee may have been so fully possessed with the idea of getting from the cars, and thus avoid being taken to the next station, that he failed to give ordinary attention to what was said and done at the time. If his mind was greatly preoccupied with such an apprehension, and he was not giving his attention to what others were doing, he might and probably would not hear the warning or directions given by the conductor. The others, however, seem to have been giving proper attention, and state positively that the warning was given, and that they heard it distinctly.

Appellee states that the conductor did not take hold of him, while the latter states that he did, and is fully supported in the statement of Ellen Macken. We are wholly unable to comprehend how so many witnesses could be mistaken as to what they saw and heard. On the other hand appellee may have been, and no doubt was, badly stunned by the fall, and would be less likely to recall the circumstances, than others not subjected to such a peril. It is more than probable that the conductor took hold of him while he was in the act of falling, and if so, it was natural for appellee to have been entirely occupied with his situation, and the apprehension of its results; under such circumstances it would be remarkable if his attention was attracted to the fact that the conductor had hold of him, or, if noticed at the instant, that he could not recall it to memory. The evidence we think preponderates largely in favor of the occurrence as detailed by appellants witnesses.

This case proceeds upon the ground of negligence on the part of appellants. But, when we consider the circumstances, we are unable to see that they have been derelict in any duty. Appellee says he did not hear the name of the station announced, and it was, we presume not done, as the train had not reached the station. He either failed for want of attention to hear the emphatic warning of the conductor, or he failed to regard it. Nor was there any negligence shown in running the train on the side track, to permit the freight train to pass on the same track. The evidence shows that such a course was not unusual and in this instance it was necessary. And the weight of evidence is, that there was no violent jerking of the train; but if there had been, it was not negligence, as the train had not reached the platform where passengers were expected to get off. Appellee was attempting to pass from the train while in motion, and at an unusual place. If there was negligence it was on the part of appellee.

The judgment of the court below is reversed and the cause remanded.

Judgment reversed.

Trade and Commerce of Milwaukee.

The Twelfth Annual Report of the Trade and Commerce of Milwaukee, complied for the Milwaukee Chamber of Commerce by Secretary Langsdon, has been issued. From this we learn that the total receipts of grain at Milwaukee, in 1869, were 19,407,054 bushels of which 17,745,238 bushels were wheat. The receipts of flour were 807,763 barrels, and the amount manufactured in the city, 481,511 barrels—total 1, 288,274 barrels. The shipments of wheat from the city to Eastern and Canadian markets, during the year, amounted to 14,272,799 bushels, and of flour, to 1,220,058 barrels.

The following is a comparative statement, from official sources, of the receipts and shipments of wheat at Milwaukee and Chicago during 1869:

	Receipts. Bushels.	Shipments. Bushels.
At Milwaukee	17,745,238	14,272,799
At Chicago	16,876,760	13,244,249
Difference	868,478	1,028,550

It will be seen that Milwaukee received 868,478 bushels more, and shipped 1,028,550 bushels more wheat than Chicago, in 1869. But the amount claimed as receipts at Chicago, includes 312,515 bushels shipped from Milwaukee by rail in the early part of the year, to eastern points *via* Chicago. Deducting this from the receipts at Chicago, it will be seen that Milwaukee is 1,180,993 bushels ahead on receipts.

The total number of hogs packed during the season just closed, was 175,000, against 133,244 the previous season.

The total quantity of eastern and foreign merchandise carried to Milwaukee, in 1869, by railroads and lake steamers, exclusive of railroad iron, pig iron, salt, plaster and other articles of coarse freight, was 111,256 tons, against 94,468 tons in 1868.

In extent of marine commerce, Milwaukee ranks as the fourth city in the Union. The number of entries at the Custom House during the year, was 4,878, with a total tonnage of 1,974,119 tons, and of clearances 4,877, representing an aggregate tonnage of 1,938,414 tons.

The assessed valuation of real estate and personal property in the city is $43,493,313, against $39,204,542 in 1868.

There were manufactured in Milwaukee during 1869 a total of 481,511 barrels of flour.

The receipts of salt during the year were 179,673 barrels.

There were made there 90,509 barrels of beer, and 17,263 barrels of high wines.

Eighty-seven thousand six hundred and ninety tons of coal were received by lake, and 49,207 cords of wood.

During the year 1869 the receipts of American and foreign railroad iron at Milwaukee amounted to about 31,601 tons, and 9,000 tons additional were manufactured by the rolling mill there, making a grand total of 43,601 tons, worth, at the average price of $80 per ton laid down there, $3,488,080, or sufficient to iron 436 miles of road. Of the amount received by lake, 28,178 bars, or about 6,261 tons, were foreign iron. The American iron as entered at the Custom House, was

68,291 bars and 18,165 tons, total—estimating 4½ rails to the ton—28,340 tons. Nearly all of this iron was forwarded westward by rail from Milwaukee, to iron part of the new railroads, built last year in Western Wisconsin, Northern Iowa and Minnesota. From present indications a much larger amount of iron will be laid down this year. Double the amount that was made last year will be manufactured there, requiring for this purpose alone upwards of fifty thousand tons of coal. 12,180 tons of pig iron were received there during the year, and 4,695 tons of iron ore.

New York Savings Banks.

The annual report of the Superintendent of the Banking Department on Savings Banks, contains the following interesting points: Resources January 1, 1869, $181,958,648; do., January 1, 1870, $208,607,148. Amounts due depositors, 1869, $169,808,718; 1870, $194,360,299. Other liabilities, 1869, $61,714; 1870, $222,969. Excess of assets over liabilities, 1869, $12,088,216; 1870, $14,023,880.

	1869.	1870.
Number of institutions reporting	110	123
Number of open acco'ts	588,556	651,474
Average to each depositor or account	$288 51	$296 80
Number of accounts opened during the last year	183,822	209,624
Number of accounts closed during the last year	139,812	148,145
Amount deposited (not including interest credited) during the last year	$110,148,050	$133,389,700
Amount deposited (including interest credited) during the last year	118,814,424	143,709,907
Amount withdrawn during the last year	101,133,308	119,105,499
Interest or profits received or earned during the last ysar	11,283,415	12,918,009
Interest credited to depositors during last year	8,666,374	10,320,207

The management of the savings banks is highly commended, and they are defended by the Superintendent from the charge that their expenses are excessive. The proposal to sequestrate unclaimed deposits for the benefit of the State is strongly denounced.

Bridge over the Hudson River at Albany.

The Albany *Evening Journal* has obtained from official sources the following facts in reference to the new railroad bridge to be constructed over the Hudson River at Albany:

The east end of the Bridge will be located between the old Hudson River depot and the Boston freight house. The west end will touch Quay street on the south side of Maiden Lane, taking a portion of the building on the corner of these streets, and so curving, in a northwesterly direction, across Maiden Lane into the old depot, gradually descending, until it reaches the ground level, in the rear of the Delavan House.

The contract for the foundation and stone work of the bridge has been awarded to Charles E. Newman, of Hudson, the well known enterprising and accomplished Bridge Superintendent of the Hudson River road. The figures for this part of the work are not made public; but the contract price is surmised to be not far from $250,000. Bids for the superstructure are in hands of the engineer, but no award has yet been made.

The work will be begun early in the summer, and pushed with all proper speed.

The old bridge will remain where it now is, to be used after the new bridge is completed, exclusively for freight transit. The present wooden superstructure is to be superseded by iron.

The new bridge will be used exclusively for passenger trains. It is expected that its construction will occupy about eighteen months.

Bangor, Oldtown and Milford Railroad.

This road, as is well known, has been purchased by the European and North American Railway Company, and is to be discontinued. It was one of the first railroads built in Maine, was for a long time in sole possession of the late General Samuel Veazie, and has always been exceedingly profitable. The last passenger train over this road is to be run this afternoon, starting from Bangor, passing over the entire line, and returning this evening. It will partake of the nature of a farewell excursion, and of course a great many of the old citizens of Bangor will take advantage of the occasion. The formal discontinuance of a railroad which has never failed to give a handsome return on its cost, simply because it is superseded by another route, is a very rare occurrence in this country.—*Boston Adv. April* 16.

☞ The Boston *Commercial Bulletin* says that a provisional contract has been made with the government of Costa Rica by Overman, Freund & Co., of London, to build a railroad from the port of Limon, on the Atlantic, to Pacuare, about thirty miles inland, to meet there the cart road from San Jose, the capital, running through Cartago. The contractors give the government a loan, to pay for the same, and also for harbor improvements at Limon at seventy per cent., bearing interest at seven per cent. per annum, re payable in twenty-two years by a two per cent. sinking fund. Engineers will be sent out at once from London to survey the route.

☞ At a special town meeting, held at Essex, Mass., on the 11th inst., it was voted, 258 yeas to 35 nays, "that the town raise and appropriate the sum of fifty thousand dollars ($50,000) to aid the Eastern Railroad Company in the construction of a branch railroad, beginning at some point in the town of Essex, convenient for the business and travel of said town, and terminating at such point on the Eastern Railroad, or the Gloucester branch of said road, as may be found most suitable."

☞ The Milwaukee *Wisconsin* says the citizens of Platteville, Wis., expect the cars to be running to that place, on the Dubuque and Milwaukee road by the 1st of June. The President of the road has returned from New York, having effected an arrangement by which money is secured to complete the railroad to Platteville, and secured iron enough for the balance of the road, which will be pushed forward rapidly.

☞ The survey of the proposed railroad extension from Pittsfield to Alton Bay has been made. A mass meeting of all concerned in the enterprise is to be held at Gilmanton Iron Works, N. H., on the 10th of May.

☞ The following are the directors of the Green Bay and Lake Pepin Railroad Company; Anton Klaus, C. D. Robinson, W. J. Abrams, Joshua Whitney, Henry Ketchum, J. S. Featherly, J. H. Elmore, D. M. Kelly, Geo. Sommers.

☞ The engineers have completed the survey of the route of the Lynchburg and Danville Railroad.

Lake Superior Railroad.

A correspondent of the Baltimore *Sun*, writing from St. Paul, Min., says: "The Lake Superior Railroad, which is probably attracting the attention of the entire country more than any other road in the northwest, is now open to Kettle river, ninety-six miles, and the balance (fifty miles to Duluth) will be completed at the rate of about one mile a day, although the formal opening will probably not occur until the 4th of July next. Over two thousand men are constantly employed on the road. Negotiations are pending, to be completed in a few days, for a lease of the Sioux City Railroad to the Pennsylvania Central, thus virtually carrying out the original plan of having one controlling power and one unbroken line from Lake Superior via St. Paul to Sioux City, and then on to a junction with the Union Pacific Railroad. Men are already at work in surveying the Northern Pacific route, and in less than four years cars will run direct from St. Paul to Portland, Oregon."

Railway in Japan.

The last advices from Japan describe arrangements which have been completed for the first introduction of railways into that country. The line is to connect Yeddo and Osaka, the new and old capitals of the empire, a distance of 300 miles; and there are also to be branches from Yeddo to Yokohama, and from Osaka to Tsuruga, which will be along the Biwa Lake, and will connect the west coast with the two capitals. The work will belong to the Japanese Government, but it is to be carried out under the advice of English engineers. An English loan of one million sterling is to be raised to meet the cost, and this be secured not only by the line itself, but by a morgage on the Customs' duties collected at the ports. From three to five years are to be allowed for completion.

Richmond and York River Railroad.

We are authorized to state, in reference to this work, that surveys of the line to the lower waters of the Plankatank river were completed two months ago, and since then the President has been actively prosecuting his efforts to arrange for the necessary capital to put the work under immediate construction. Last week, at a meeting of the Board of Directors, the President was authorized to create the necessary liens by mortgage on the new work to raise the means required. He has already had the mortgage prepared, and on Thursday several capitalists from Baltimore were here in treaty with the President on this subject. Other arrangements have been effected that will probably secure not only dispatch, but also great economy in the execution of the work. —*Richmond Whig.*

☞ The Great Western Railway Company of Canada gives notice that from the accounts for the half-year ending 31st January last, after providing for a dividend on the preference stock, a dividend on the ordinary shares at the rate of 5½ per cent. per annum, free of income-tax, will be recommended, reserving £3,000 for renewal of ferry steamers, and carrying forward to current half-year the sum of £2,054.

☞ Articles of association have been filed of the Rochester, Nunda and Pennsylvania Railroad Company. The road is to be constructed from Mount Morris, Livingston county, to the town of Amity, Allegheny county, a distance of about thirty miles. Capital stock, $600,000.

Intercolonial Railway.

We received by the last mail two voluminous and interesting blue books respecting the progress made on the works of the International railway. From these it appears that the whole length of line will be under contract in the course of the present summer and that the progress already made is considered satisfactory, notwithstanding the fact that some of the sub-contracts have had to be relet. Portions of the line will, it is fully expected, be opened for traffic next year.—*Canadian News*, April 7.

☞ The Worcester and Nashua Railroad Company has begun to lay a double track between Worcester and Nashua, and will try to have it completed as far as Croton Junction in less than one year. This additional track has become necessary in consequence of the great increase of business on the road.

☞ A charter has been lately granted by the Wisconsin Legislature to the Berlin, Weyauwega and Lake Superior Railway Company, which proposes to build northward from Berlin to the lake, and also is empowered to construct a southerly line in the direction of Freeport, Illinois, crossing the state line in Green county.

☞ The Athens branch of the New York Central Railroad is about to be put into operation, the Hudson *Register* saying that it is intended that all of the heavy freight shall be shipped by this route. A line of barges will connect at the Athens depot and transport freight from there to New York.

☞ The following are the officers of the Sturgeon Bay and Fond du Lac Railroad Co.: President—R. C. Tate, of Racine; Vice-President—A. W. Lawrence; Secretary—R. M. Wright; Treasurer—H. Harris of Sturgeon Bay.

TO THE WORKING CLASS.—We are now prepared to furnish all classes with constant employment at home, the whole of the time or for the spare moments. Business new, light and profitable. Persons of either sex easily earn from 50c. to $5 per evening, and a proportional sum by devoting their whole time to the business. Boys and girls earn nearly as much as men. That all who see this notice may send their address, and test the business, we make this unparalleled offer: To such as are not well satisfied, we will send $1 to pay for the trouble of writing. Full particulars, a valuable sample which will do to commence work on, and a copy of *The People's Literary Companion*——one of the largest and best family newspapers published—all sent free by mail. Reader, if you want permanent, profitable work, address E. C. ALLEN & CO., AUGUSTA, MAINE.

Holden, Hopkins & Stokes,

Importers and Dealers in
IRON AND STEEL,
Also Agents for
Oxford Iron Company, Oxford,
CUT NAILS AND SPIKES,
AND RAILROAD SPIKES.
Agents "New Haven Car Company."

Notice to Contractors.

SEALED PROPOSALS will be received until the 26th of April next for the grading, masonry, bridging and superstructure of the Sugar River Railroad from Bradford, N. H., about thirty (30) miles to the Sullivan Railroad in Claremont.

The work will be let entire or in sections, as may be desired.

The right to reject all bids not satisfactory is claimed.

Plans, profiles and specifications can be seen at the office of the Company at Newport, N. H., or at the office of the Northern Railroad at Concord, N. H.

Locked Safety Valves,

TO

MASTER MECHANICS

AND

LOCOMOTIVE BUILDERS.

THE UNDERSIGNED OFFERS FOR SALE, SAFETY VALVES, effectually guarded against tampering, invented and patented by himself; patent bearing date Sept. 14th, 1869.

Said Valves are sold with Spring, Guard, Studs, and Nuts, complete, and all ready to put on to boiler domes. Price for size suitable for Locomotives, $27 50.

The Valve and Seat are made of hard composition. Spring of best cast steel.

The above Valve is sensitive, and is not liable to stick from corrosion; and is particularly well suited for large stationary and marine boilers, giving large area for escape of steam, and requiring a short lever, and light weight or spring, for holding Valve against pressure.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

BRADY'S RAILROAD LANTERNS.

The strongest and best in use; are made principally of Malleable Iron. Here lies the secret of their strength, the frame being capable of supporting a weight of Four or Five Hundred Pounds; and yet they are little heavier than ordinary Lanterns. The guards are rivited through the top and bottom flanges, the rings wound with wire where they cross the guards, and the whole frame tinned, uniting each piece with the other, making it the *strongest* Lantern ever offered to the public. RAILROAD MEN *especially* cannot fail to see that it will be economy to purchase these Lanterns, as there is no part that can be broken with ordinary use, except the Globe, which being adjustable, is easily and cheaply replaced with any color and at a small cost; the greater weight being at the bottom, it cannot readily upset. Now used on the following Railroads: New York and New Haven; Hartford and New Haven; Shore Line, Conn.; Providence and Worcester; Boston and Maine; Conn. and Passumpsic Rivers; Fitchburg; Rensselaer and Saratoga; Troy and Boston; Boston and Providence; Boston, Clinton and Fitchburg; Charlotte, Columbia and Augusta; Connecticut River; European and North American; Hartford, Providence and Fishkill; Mobile and Ohio; Portland and Kennebec; Boston, Hartford and Erie; Worcester and Nashua; Lake Superior and Miss.; Hudson River, and many others.

The trade supplied from our Store, or from the Factory, New Britain, Conn,

PROPOSALS FOR BONDS.

This Company offers for sale $235,000 of the FIRST MORTGAGE BONDS of the INDIANAPOLIS AND ST. LOUIS RAILROAD COMPANY. These Bonds are part of an issue of $2,000,000, which are authorized and issued for the construction and equipment of the line of Railroad between Indianapolis and Terre Haute, Indiana, about seventy-two miles in length, now nearly finished, and which will be finished and in operation early in July next. This road is constructed and will be operated by the Pittsburg, Fort Wayne and Chicago, (now assumed by the Pennsylvania Railroad Company, under their lease of the P., Ft. W. and C.,) and the Cleveland, Columbus, Cincinnati and Indianapolis Railroad Companies, and forms the connecting link between the main line of the road of this company at Terre Haute, and the road of the Cleveland, Columbus, Cincinnati and Indianapolis Company at Indianapolis. Of the $2,000,000 First Mortgage Bonds issued as above, $750,000 are taken by the Pittsburg, Fort Wayne and Chicago Railway Company, (and taken from it by the Pennsylvania Railroad Company, under the terms of their lease,) $750,000 are taken by the Cleveland, Columbus, Cincinnati and Indianapolis Railroad Company, and $500,000 were required to be taken by this Company. $600,000 of stock was taken at par and paid up in full by the two associated Companies first named, and the proceeds expended on the road. By stipulation between the parties in October, 1868, the Bonds were to be taken and paid for at the rate of 90. The Bonds now offered for sale are part of the number ($500,000) agreed to be taken or negotiated by this Company. The interest (seven per cent.) is payable July and January or March and September, according to the series. Sealed proposals (marked "Bids for Bonds") will be received until Wednesday, May 4th, and 12 o'clock, noon, by the President, to whom they should be addressed at the office of the Company, No. 12 Wall street, where any further information will be given. Bidders will please to take notice that the bids will be for the principal of the Bonds. The accrued interest will be added. Successful bidders will be notified immediately on or before May 5th, and the Bonds will be delivered and payment required at this office on or before 2 P. M., 6th May, 1870. The Company reserves the right to reject any bids not considered for its interest to accept.

By order of the Board,
CHARLES BUTLER,
President.

Central Mining Co.

From the report of this company for the year ending 1869, we learn that the amount of copper produced during the year was 1,117 tons 1,455 lbs. mineral, of 78¼ per cent., against 1,077 tons 859 lbs. of 80¼ per cent. in 1868; the gain in 1869 being equivalent to 14,784 pounds of ingot copper. Receipts for the year, $411,098 11; expenditures and decrease of available effects at the mine, $310,746 72; net profit, $100,351 39. The cost of all improvements and new machinery is included in the current expenses for the year. A dividend of $4 per share ($80,000) was paid March 10, 1870. Net available assets, after paying dividend, $162,008 11. On a paid in capital of $100,000, this company has divided, in cash, since Jan. 1, 1864, $390,000. The mine looks as rich as ever, and the stockholders have every reason to expect liberal annual dividends for years to come.

Opposition to the Income Tax.

In Philadelphia, on Saturday, 23d inst., at Nisi Prius, the Philadelphia and Reading Railroad Company, the Lehigh Valley Railroad Company, the Lake Superior and Mississippi Railroad Company, the Philadelphia and Trenton Railroad Company, the Harrisburg, Portsmouth, Mount Joy and Lancaster Railroad Company applied for injunctions to restrain William H. Barnes, collector of internal revenue, and his agents, from levying and collecting the income tax of five per cent. on interest and dividends for 1870. The bill of the Philadelphia and Reading Railroad Company, which is similar to all others, set forth:

That your Orator has been informed that the ground on which the attempt to enforce the collection of the aforesaid taxes is based, is that the 122d section of the Act of Congress entitled "An Act to provide Internal Revenue to support the Government to pay interest on the Public Debt, and for other purposes," approved June 30th, 1864, as amended by the 9th section of the Act of Congress approved July 13th, 1866, entitled "An Act to reduce Internal Taxation, and to amend an act entitled an Act to provide Internal Revenue to support the Government to pay Interest on the Public Debt, and for other purposes," was not intended merely to provide for collecting income tax chargeable under the 116th section of the said Act of June 30th, 1864, as subsequently amended, but that the tax chargeable under the said 122d section was and is an independent tax, indefinite in duration as to time, and collectable notwithstanding the expiration of the period during which incomes are taxable under the 116th and 119th sections of the Act of June 30th, 1864, as last amended by the 13th section of the act of Congress, approved March 2d, 1867, entitled 'An Act to amend existing laws relating to Internal Revenue, and for other purposes;" and your Orator charges that according to this construction of the law, your Orator unless relieved as hereinafter prayed for, will be compelled to retain from its stockholders and bondholders a tax of five per cent. on their interest and dividends whenever the same are hereafter payable, and will in all probability be involved in many suits, not only with the holders of its bonds, who are quite numerous, and who cannot be expected to submit to your Orator's retaining five per cent. from the interest due them, when there is no authority whatever for such retention, but also with the officers of the

Internal Revenue of the United States for the recovery back of taxes thus illegally exacted.

A preliminary injunction was granted for five days, at the expiration of which time the question is to be agrued. Some ten or twelve of the leading railroads of the State have refused to pay the above taxes, and await the action of the courts.

Mil., Minn. and Green Bay R. R.

The Manitowoc *Tribune* says: "The engineers and surveyors of Messrs. Easton & Co. have reached Sheboygan, on their way north, and may be expected at Manitowoc next week. As soon as Ozaukee and Appleton have voted for the amount of stock subscription like Sheboygan and Manitowoc, the work on all the roads under contract will be commenced in earnest, and in all probability accomplished much earlier than the time limited for them in the contracts."

North Eastern (S. C.) Railroad.

The earnings of this road for the years ending February 28, 1869 and 1870, were as follows:

	1869.	1870.
From passengers	$84,203 72	$87,667 31
" freight	151,844 89	172,465 88
" express	4,366 86	4,327 04
" mails	13,748 92	15,637 45
	$254,164 39	$280,097 68
Expenses, viz:		
Maintenance of road	$43,701 40	$40,399 05
Motive power	38,794 78	38,118 65
Repairs of cars	12,762 08	16,535 99
Transportation	35,312 00	54,520 02
Salaries & general exp.	14,868 88	14,986 52
	$145,439 09	$159,560 28
Net earnings	$108,725 30	$120,537 40
Less interest accrued on bonds to Sept. 1, 1869	$59,150 00	
Interest accrued on Preferred Stock to November 1, 1869	12,400 00	
Interest accrued on Certificates of indebtedness to January 1, 1870	7,560 83	
Interest on outstanding coupons to January 1, 1870	7,732 92	
Current interest	4,930 90	
Land claims settled the past year	325 00	
Claims for cotton lost and burned during the war, settled this year	1,446 75	
Claim for wood and services rendered in 1861 and 1862, settled this year	597 76	
Extra legal services, revenue stamps, engraving new bonds, etc	2,870 98	
	97,015 14	
Leaving a balance of	$23,542 26	
Add balance from previous year	22,120 11	
Total, as in Balance Sheet	$45,662 37	

Compared with the previous year, the gross earnings show an increase of $25,933 24; with an increase in operating expenses of $14,121 14—making the increase in net earnings, $11,812 10.

The President in his report says:

In reviewing the above, you will observe an increase of nearly fourteen per cent. in our freights of the past year, which, if not large, is still an acceptable evidence of the gradually improving condition of the agricultural and other interests of the country through which our road passes.

During the year we have transported 22,850 bales of cotton, 50,709 barrels of naval stores, and 3,896,600 feet of lumber, as against 18,988 bales, 40,521 barrels, and 3,884,000 feet the previous year. For the cotton in our interior, and for much of the merchandise returning therefrom, we have been unable to compete successfully, in consequence of the extremely low rates at which both were being passed through Wilmington,—growing out of a protracted and severe competition between rival steamship lines from that port, establishing rates infinitely lower than could be afforded us, by the steamers from Charleston. The recent consolidation, however, of these lines, induces the hope that we shall not, in the future, suffer to the same extent from this cause, and also, that arrangements may, eventually, be made with our own steamers, which will, measurably, counteract this disadvantage. In our travel but little improvement is noticeable, or, indeed, was to have been expected, as the circumstances affecting it have remained the same as at the date of our last report. All reasonable facilities have been given to it, but the absence of any connection with the system of roads south of us, together with the sparseness, and still restricted means of the population directly along our line, will, obviously account for this result.

The opening of the Savannah and Charleston road on the 11th March,—by placing us in direct communication with Savannah, Jacksonville, and all the important points in Florida and Southwestern Georgia, and thus establishing the best, shortest and most comfortable route by rail, between St. Mark's (Fla.) and all the northern cities, must considerably improve our through travel,—but sufficient time has not yet elapsed for us to judge of its full effect.

Our operating expenses have been heavier than those of the past year, which is to be explained by an expenditure of $16,500, upon the company's wharf, the extension and improvement of which had become necessary for the encouragement of our business in lumber and phosphate rock. We cannot, however, hold out the prospect of any reduction in them the ensuing year; on the contrary, we must anticipate their increase. It should be borne in mind that we are now operating the road with very nearly the same machinery which we had in use before the war, the advanced age and increased demand upon which, will, necessarily, entail constant attention and considerable expenditure to maintain its efficiency. To keep the motive power and various appliances of the company up to the standard requisite for the safe, regular and prompt discharge of the duties and responsibilities it assumes to perform, is one of those paramount necessities which must be met. With this in view, we have already contracted with the Rogers' Works for one new freight locomotive, and towards the close of the year may be compelled to order another. We are also much in need of new first class passenger cars, as a substitute for our present stock, the old style and lengthened service of which render them better suited for second class cars. We also require additions to our rolling stock and more extensive depot accommodations. In supplying these wants, however, we shall, as heretofore, endeavor to avoid pecuniary embarrassment and only move as our necessities shall, from time to time, dictate.

Under the authority conferred upon your board, at your last meeting, to rearrange the company's bonded debt, in conformity with a plan then submitted, a new general mortgage was executed with two preferences, securing an issue of 1640 "First Preferred" bonds, each for $500, amounting to $820,000, and 644 "Second Preferred" bonds, each also for $500, amounting to $322,000, which bonds were dated 1st of September, 1869, and were made payable 1st September, 1899, with coupons attached, representing an interest of seven per cent. per annum. These bonds were to be offered in exchange for our past due obligations, in accordance with statements then made to you in detail. But after they were partially prepared, many of our bondholders demurred to the proposed rates of interest, urging, that in view of their friendly disposition towards the company, and willingness to promote the readjustment of its debt, they were at least entitled to a higher rate of interest. After due consideration, this concession was yielded by your board, and a new issue of bonds made, of same tenor as the above, bearing an interest of eight per cent. per annum. This change involved some delay, and it was not until very nearly the close of our fiscal year, that they were finally executed and ready for delivery. So little progress had been made in their exchange up to that date, that we deemed it best not to alter our accounts, with reference to them, but on this occasion to present them in their original shape, as shown below. We may add that, up to this date, of the 1,640 first preferred bonds, we have issued 1,288, and of the 644 second preferred bonds, 465, leaving the entire issue of 2,284 or $1,142,000, but 536 bonds or $268,000 on hand.

The acknowledgments of the company are certainly due to those who have thus promptly responded to the only proposition it was in their power to have offered for the readjustment of its debt. An opposite course, and a resort to coercive measures, would have involved us in much difficulty, and have led to results scarcely warranted by the inconsiderable advantages which might ultimately have attended it.

The statements of the treasurer, herewith submitted, will show as at the credit of profit and loss, at the close of the past year | $22,120 11
Add net proceeds of transportation for 1869–'70 | 120,537 40
Dividend on stock in Cheraw Bridge | 20 00
| $142,677 51

Charged with the following items:

Interest paid during the year	$91,774 65	
Claims, etc., prior to 1865	2,571 68	
Cost of new bonds, revenue stamps, and legal exp.	2,668 81	
		97,015 14
Cr. profit and loss, Feb. 28, 1870		$45,662 37

The following will appear as the indebtedness of the company on that date:

1,400 first mort. bonds past due	$700,000 00
290 second " " " "	145,000 00
3,100 shares preferred stock, at $50	155,000 00
Certificates of indebtedness for interest prior to March 1st, 1867	108,048 45
Outstanding interest prior to March 1st, 1867	111,339 00
Outstanding interest due in cash	4,603 19
Bills payable	27,667 65
Real estate bonds	28,000 00
Profit and loss	45,662 37
Stockholders	898,950 00
	$2,224,270 66

To meet this indebtedness, we have the road 102 miles long, with its sidlings, equipments, etc., at a cost of | $2,148,130 65
And assets as shown by the treasurer. | 76,140 01
| $2,224,270 66

The amount of second mortgage bonds, originally issued, was $300,000, of which $145,000 were sold, the remaining $155,000 were subsequently pledged and deposited with trustees as a security for a corresponding amount of preferred stock, say $155,000. This preferred stock is then virtually a substitute for that amount of second mortgage bonds. As this stock has served the purpose for which it was originally issued, and as the bonds of which it is the representative now bear the same rate of interest, there would seem no valid objection to its reconversion into bonds, if so desired by its holders. The preferred stock has the simple advantage of being registered and transferable on the company's books, but many would prefer to forego this for the convenience of collecting their interest by coupons, and the greater facilities of sale, transfer, etc. Your board would therefore suggest a compliance

with such requests, when made by its holders, presenting the equivalent of a bond.

With reference to our certificates of indebtedness, a word of explanation may here be proper. At the close of the war, and while our road was in a prostrate condition, we were pressed to adopt some mode of settling our interest coupons, which had matured during that period, and never been presented. Their payment being an impossibility, we could only propose to fund them in certificates of indebtedness, as had been done by other companies and corporations throughout the south, under similar circumstances. These were accepted by a large number, while a few (mainly capitalists) determined to hold them until the period should arrive for the adjustment of the company's debt, with the intention of then demanding their settlement in bonds. As their legal rights in the premises were beyond dispute, a compliance with their demands became, subsequently, unavoidable. It is to be regretted that our certificates of indebtedness could not have been so arranged as to have entitled them ratably to the protection of the mortgages for the particular bonds, of which these coupons were a part; but, although the effort was made, there were legal and other difficulties in the way, which could not be overcome. To have given them this protection after their issue, was also impracticable. They are now simply the notes of the company, resting solely upon its credit and good faith, and hence it is specially incumbent upon the future management of the company to make in advance, and as their strengthened condition will permit, the necessary provision for meeting them at maturity. It is a debt due by our stockholders, which should be as, in one sense, not less binding upon them than that to their bondholders, and though not due until 1875, timely provision for its liquidation should not be overlooked.

In accordance with a resolution passed at your last meeting, authorizing your board to encourage the construction of the South Carolina Central railroad by such subscription towards its capital stock as they might deem proper—to be subject to your ratification—they beg to inform you that they have subscribed towards the same the sum of fifteen thousand dollars, and would now respectfully ask you to ratify their action. In view of the importance of this road, as placing us in direct communication with Sumpter, one of the most thriving of our interior towns, and also with the proposed Branch of the Wilmington and Manchester road, thence to Columbia, which, we are assured will be shortly commenced, they were disposed to have increased the above subscription, but afterwards concluded it might be proper to await the organization of the company, and the commencement of its operations, before further committing ourselves to its progress. We cannot too strongly urge the claims of that company upon this, to whom it naturally looks for all the assistance we may be able to extend it, but also upon the mercantile community, from whom, in view of the collateral benefits to be derived from its construction, we trust that it will receive the encouragement and support it really deserves.

The company have 12 locomotives, 9 first class and 4 second class passenger cars, 3 baggage, 2 mail and express, 70 box and 42 platform cars. Number of through passengers, 12,498; do. local do., 32,237—total, 44,735. Bales of cotton hauled, 22,850. Barrels naval stores, 50,709. Feet of lumber, 3,896. Number of miles run by trains, 197,707. Av. receipts per mile run, $1.42; expense do., $0.81. Receipts per mile of road, $27.46; expense do., $15.64.

The roadway has been kept in its usual good order. There have been used in repairs during the year 250 tons of rails and 23,090 cross ties. The company will probably require 400 tons more of rails during the coming year. The motive power is in comparative good order. A new locomotive has been ordered to be delivered in May, and it is very probable another will be required before the close of the year.

BALANCE SHEET.

Ohio Railroad Law.

The following is a copy of the act passed by the Legislature of Ohio on the 11th of April, 1870, entitled "An act to enable Railroad Companies to redeem their bonded debts:"

SECTION 1. *Be it enacted by the General Assembly of the State of Ohio,* That it shall be lawful for any railroad company, incorporated under the laws of this State, for the purpose of providing means for the redemption of its bonds, secured by mortgage or other lien, upon its road, property or income, to issue and dispose of preferred stock to such amount as may be authorized by the stockholders as hereinafter provided for, and to guarantee to the holders thereof semi-annual or quarterly dividends not exceeding eight per centum per annum, payable at its office, or at such other place as may be designated by the directors.

SEC. 2. The unpreferred stock of the company shall be entitled to dividends only out of the surplus of the profits after setting apart a sum sufficient to pay the dividends upon the preferred stock.

SEC. 3. Before any stock shall be issued under this act, a majority of the directors who desire the same, shall call a meeting of the stockholders of said company, designating the time and place, and distinctly the purpose of said meeting, which meeting shall be held at the principal business office of said company in this State; notice of said meeting shall be given at least thirty days by continued publication in at least two newspapers published and having most general circulation in this State, and one at New York City. If, at said meeting, the consent of a majority in interest of the existing stock of the company shall be given to the issue of such preferred stock of the company, it shall be the duty of the President and Secretary of said company to make out an abstract, stating the total amount of pre-existing stock, the amount of preferred stock authorized, and the vote at said meeting; to which they shall attach copies of said notice and designate the time for which, and papers in which the notices have been published, to which abstract and statement they shall make affidavit, and file the same in the office of the Secretary of State.

SEC. 4. It shall be lawful for the directors of such company to dispose of such preferred stock, on such terms as they may deem advisable in exchange for, or redemption of any outstanding bonds, for the payment of which said company is bound, whether as principal or guarantor, and whether the same have matured or not, or said company may dispose of such stock or any part thereof for cash, but in such event the proceeds thereof shall be set apart and appropriated only to the purchase and redemption of its bonded indebtedness as foresaid.

SEC. 5. This Act shall take effect from its passage.

Arkansas.—Its Resources and Advantages.

(Continued from Page. 457)

The lumber interest of this State is naturally suggested to the mind by the immense forest growth with which it is covered. The pines grow mostly on the hill lands, although they are occasionally found in the bottoms. It is not unusual for a single tree to make two thousand feet of good merchantable boards. No lumber makes better flooring. It is shipped to St. Louis, Memphis, New Orleans, and is used here in the manufacture of sash, blinds and doors; for inside finish, and, indeed, for all building purposes, suitably dressed and oiled, it is very beautiful.

Some portions of the State are very heavily timbered with black walnut. It is of great value and only awaits capital and labor to be added to the commercial wealth of the State.

Cypress grows on the bottom lands skirting the rivers, lakes and bayous. Some of these trees grow to an enormous size, making, in some instances, 6,000 feet of lumber to a single tree. It is an excellent timber for the manufacture of doors, etc., makes good shingles, and is used principally for that purpose in this locality.

Most of the varieties of oak grow luxuriantly. The white oak and a species of oak called here the "overcup," resembling the white oak, grow large, often four or five feet in diameter. It is applicable to all the uses to which oak is ever put, but, on account of its large size, more particularly to the manufacture of the pipe stave. This stave is worth in New Orleans $150 per thousand. They are rived sixty inches long, six inches wide, and two and a half inches thick.

With proper management it seems as if enormous wealth should be accumulated in this business; the profit ought to be at least 100 per cent. This timber can be obtained convenient to navigable streams and in large quantities.

Many other kinds of timber are found here—pecan, persimmon, which grow large enough for saw logs, elm hickory and cherry, all of which, as the country is developed, will seek their legitimate uses. Lumber is now worth $20 per M., and shingles $4.

Red cedar grows in extensive brakes in the northern and western part of the State. It is to be found in larger quantities near the White river and Petite Jean. Of the commercial value of this wood it is unnecessary to speak. Red cedar posts sell in Little Rock market readily at $40 per hundred.

The rich bottom lands of this State have always afforded ample employment for all the capital in the State, and it has proved so largely remunerative that but little attention has been given to the development of the mineral resources of Arkansas. It is, however, assured by geological surveys and other sources of information, that minerals, marble and mineral earths, exist in this State in sufficient variety and quantity to render Arkansas, in that respect, independent of the world. David Dale Owen, in his Geological Reconnoissance of Arkansas, says:

"There are resources of this State in ores of zinc, manganese, iron, lead, copper, marble, whet and house-stone, rock crystal, paints, nitre earth, kaolin, granite, freestone, limestone, marls, green sand, marly limestone, grindstone and slate, which may well justify the assertion that Arkansas is destined to rank as one of the richest mineral States of the Union. Her zinc ores compare fa-

vorably with those of Silesia, and her argentiferous galena far exceeds in percentage of silver the average of such ores of other countries. Her novaculite rocks cannot be excelled in firmness of texture, beauty of color, and sharpness of grit. Her crystal mountains stand unrivaled for extent, and their products are equal in brilliancy and transparency to any in the world. * * Arkansas is destined, I believe, to take the lead of all the Western States in her resources in ores of zinc and manganese."

Speaking of the coal on Spadra creek, he says: "It is semi-anthracite ore, richer in fixed carbon than the celebrated Zebra run coal of the Shamokin coal fields of Pennsylvania, and is superior for manufacturing purposes to any western coal at present known, where durability, intense heat and reduction are required."

The coal is plenty, covers a large area, and can be mined with but little expense. It lies in Johnson county, bordering the Arkansas river, and opens a large field for enterprise and capital.

At the commencement of the rebellion, attention was first being directed to mining in this State, since which time, owing to the unsettled condition of the country, but little advance has been made in developing her mineral resources. Coal is, however, obtained for local purposes, in many parts of the State, by digging into the side of some hill or by stripping the surface earth.

The report of the general land office for 1867 estimates the coal fields of Arkansas to comprise, in area, 12,000 acres. Coal is known to exist in twelve counties, and is mined extensively for local purposes.

Work has been commenced at the Kellogg Lead Mines, twelve miles north of Little Rock, where, I am informed by Mr. Chamberlain, the Superintendent, that the galena is rich enough in gold and silver to defray the expense of mining and smelting, so that the lead is clear profit.

Among the most remarkable of the natural wonders of Arkansas, are the Hot Springs. The cures produced by them are wonderful. Cases of old chronic disease, that have stubbornly resisted all attempts at cure by the profession, yield as if by magic to this great natural mediator. The Hon. James Hinds, in his speech in the house of Representatives, July 25, 1868, said:

"These springs are 54 in number, having a temperature varying from 93 to 150 deg. Fahrenheit, and discharged 317 gallons per minute. The amount discharged from each varies, but they are all qualitively allied. It is estimated by eminent medical gentlemen that there are over one hundred thousand afflicted persons in the United States who cannot be permanently cured except by a use of these waters; and the day is not far distant when a great city will rise on this mountain slope which will be the Baden-Baden of America. Here, where the salubrity of the climate is unsurpassed, especially in the summer season, and where the long genial twilights are inspiringly refreshing, will come the pleasure seekers from all parts of the world; and here will resort from year to year the millions of afflicted from all lands, to be healed of their many infirmities."

Dr. Lawrence, a resident physician for ten years, says:

"The properties of the waters depend not alone on their caloric qualities, but the springs all contain carbonates of the alkalies, and alkaline earth agents well known to therapeutists to possess active eliminative agency, consequently they produce valuable alterative effects in chronic diseases. Rheumatism, gout, stiff joints, contraction of the muscles and skin, old wounds and painful cicatrices are relieved; skin diseases, scrofulous ulcerations, and enlargement of the glands; prostrations from long-standing sickness or debility, following severe courses of powerful medicines, show a remarkable improvement; spinal diseases, neuralgia, nervous affections, partial paralysis, lead palsy, St. Vitus' dance (chorea), muscular and general debility, respond to treatment. Uterine diseases, as a class, are greatly benefitted; and the baths are particularly regarded for the grand climacteric change of life; when sterility is the consequent of functional disorder, the baths are of great importance. For mercurial diseases, mercurio-syphilitic, and all syphilitic affections, volumes of testimonials could be adduced in relation to the effects of those remarkable and unexcelled waters in the treatment of these obstinate and loathsome affections."

The large quantity of free carbonic acid which these springs contain, and which rises in volumes through the waters, produces, undoubtedly, an exhilerating effect on the system, enabling invalids to drink it freely when otherwise the stomach would promptly reject it.

At an early day, not only will these wonderful springs be sought for by invalids, on account of their curative properties, but the lovers of nature, and the traveler who seeks for the wonderful and the beautiful, will here find irresistible attractions.

Says Owen, in his Geological Reconnoisance of Arkansas, when speaking of the vicinity of the Hot Springs:

"This ridge or mountain is made up of the most beautiful variety of novaculite, equal in whiteness, clearness of texture, and subdued, waxy lustre, to the most compact forms and white varieties of Currara marble. Except in being less translucent, it approaches, in lustre and fineness of structure, to chalcedony."

The famous crystal mountains, in Montgomery county, are twenty miles from Hot Springs, of which he says:

"There is at present no region known on this continent which presents such extensive mines of rock crystal as the gorges of the mountainous ridges of Montgomery country. Almost every fissure of this vast sandstone formation, for a distance of one or two miles in length, and from three-quarters to a mile in breadth, is lined with these brilliants, which, exposed in bursting open the rock, glitter and flash in the sun's rays like a diadem."

Here, as in the Alps, we have the "Crystal Hunter," exploring the recesses of this great crystal mountain, and carrying his glittering "points" to Hot Springs and elsewhere, exposing them for sale on the door-steps of the hotel and in the shop windows, as attractions for strangers, to serve by their purchase as remembrances of the buyer's visit to the crystal regions of Arkansas; and truly by a judicious selection the lover of the mineral kingdom may here possess himself of gems of superior value that may vie in beauty and brilliancy with those of the Alps—Dauphin, Peidmont and Carrara. With proper tools, slabs might be rent off from the face of the sandstone rock, far more than a man could lift; in fact, even a cart load, studded over with limpid crystals of all sizes, from the fraction of an inch to five and six inches in length.

There are many other springs in this State possessing curative properties, but it is believed that, in the cure of disease, there are no springs in the world that can compare with the Hot Springs of Arkansas.

The city of Little Rock, located near the centre of the State, is built upon a high, rolling plain, overlooking the Arkansas river and surrounding country for miles, and is as healthy as any other city in the United States. Back of it, lie wooded rocky hills, covered with a heavy growth of timber, while east and south stretch out the bottom lands of Arkansas. Its drainage is excellent. The banks washed by the river are mostly solid rock, which rise from thirty to sixty feet above its level. Its population is about 10,000. It has two steam saw-mills, two steam sash, blind and door factories, eight churches, eight school houses, one college and one seminary, three daily papers, and five hotels.

The public buildings are good, and it has many fine residences, with grounds tastefully ornamented, and a profusion of shrubs and flowers, making it in fact as well as name the "Flower City," or "City of Roses."

Business is good, and it presents all the aspects of a thriving city. In addition to the retail trade, quite a large wholesale business is done from this point. During the past year about 800 bales of cotton have been shipped from this place.

The railroad system of this State finds its common center at the capital, making it the commercial as well as political center of the State, and it is confidently predicted that five years hence will find it a city of 25,000 inhabitants.

Mechanics' wages here are from three to five dollars per day. Farm laborers can be obtained at from twelve to twenty dollars per month; good house servants from six to ten dollars per month.

Emigrants coming to Little Rock will be near the center of the State, and will from here find all points easily accessible. The State land office is located here. Those in charge of it will always be glad to give any information or assistance in their power to immigrants. The different United States land offices are located at Little Rock, Washington (Hempstead county), and Clarksville in Johnson county.

The lands belonging to the State are the swamp and overflowed lands granted to the State by Congress in 1850. Of these, there remain unsold about 2,000,000 acres, divided into first and second class. The first class comprises those lying within six miles of a navigable stream, and are sold at seventy-five cents per acre. The second class are those lying more than that distance from navigable streams, and are sold at fifty cents per acre. This grant comprises some of the finest land in the State.

In 1840 the Legislature enacted what is termed the "donation law," by which the lands not sold by the Auditor at the annual sale of lands for non-payment of taxes, are donated to any person in tracts of 160 acres or less, who shall reside on the land and cultivate five acres, or who, in lieu thereof, shall fence and cultivate five acres within eighteen months after the date of donation. In 1850 the provisions of the law were so extended that a person might take up a quarter section for his wife and each of his minor children; the wife and children are not required to make any improvements, the applicant being required to swear that the land so obtained was for his or her own use, or for the benefit of his child, and not for speculation.

The sixteenth section in each township is set apart for common school purposes. A portion of these lands have been disposed of, but many fine tracts are still in the market. They are sold principally on time and afford good opportunities for the landless to secure comfortable homes. Further information regarding these can be had upon application to the Superintendent of Public Instruction, at Little Rock.

Five hundred thousand acres of land were donated to the State by the general government, in 1841, for the use of internal improvements in the State. They were selected with great care, and comprise the best lands then unsold. A portion of these lands are yet subject to entry. They are scattered over the entire State, and are sold by the State at $1 25 per acre, on a credit of one, two, three, four and five years, with interest payable annually at six per cent.

There was also donated by Congress to this State, for the purpose of establishing a seminary of learning in this State, seventy-two sections of land, which were carefully selected from the most valuable tracts. These lands are sold by the State at $2 per acre, upon the same terms as the internal improvement lands, except that the interest is ten per cent. per annum.

Congress donated to this State a certain amount of land contiguous to the various salt springs. A part has been sold and the remainder is subject to entry at $1 25 per acre, one-fifth cash and the balance on time.

The Commissioner of Immigration and State Lands has by law entire control of all the lands owned by the State, except the school or "sixteenth section" lands, and all applications to purchase must be made to his office, at Little Rock.

There are of government lands in this State about twelve millions acres unsold. These lands are subject to entry only under the homestead

acts of Congress, in tracts not exceeding 160 acres each. Any of these lands may be obtained by actual settlement upon them. Persons who desire to procure a home upon these lands have to settle upon them and make a small improvement, and reside thereon for five years. After they have done so, government gives them a title at the simple cost of preparing the papers, amounting to not more than ten or fifteen dollars.

The homestead law of this State is more liberal than that of any State in the Union, the homestead act of Minnesota exempting but eighty acres of land, while in this State, by a wise provision of the constitution, adopted by the Constitutional Convention, 11th of February, 1868, and subsequently ratified by the people, one hundred and sixty acres of land are exempted from execution. The benefits of this exemption, should the head of the family be removed by death, inure to his widow while she remains unmarried; also to his children during their minority. The constitution further provides: "The personal property of any resident citizen of this State, to the value of two thousand dollars, to be selected by such resident, shall be exempted from sale or execution or other final process of any court, issued for the collection of any debt contracted after the adoption of this constitution.

"Hereafter, the homestead of any resident of this State, who is a married man or head of a family, shall not be encumbered in any manner, while owned by him, except for taxes, laborers' and mechanics' lien, and securities for the purchase money thereof. Every homestead not exceeding one hundred and sixty acres of land, and the dwelling and appurtenances thereon, to be selected by the owner thereof, and not in any town, city or village; or, in lieu thereof, at the option of the owner, any lot in a city, town or village with the dwelling thereon, owned and occupied by any resident of this State, and not exceeding the value of $5,000, shall be exempted from sale or execution, or any other final process of any court." Further, it says: "The homestead of a family, after the death of the owner thereof, shall be exempt from the payment of his debts, in all cases during the minority of his children, and also so long as his widow shall remain unmarried, unless she shall be owner of a homestead in her own right." It also provides that the property of a female, before marriage, shall be held by her in her own right as long as she shall so elect, to be disposed of by her as she shall deem proper. These just provisions of the constitution, it will be seen, provide against the possibility of any one's being distressed or deprived of a home.

The constitution of this State provides "That the General Assembly shall require by law that every child of sufficient mental and physical ability shall attend the public school during the period between the ages of five and eighteen years, for a term equivalent to three years, unless educated by other means," and the Legislature has provided a very efficient school law, now being set in operation, which secures to all the State ample school privileges. The law provides that the white and colored children shall be educated in separate schools.

Section 3, in the educational clause in the new constitution, says: "The General Assembly shall establish and maintain a State University, with departments for instruction in teaching in agriculture and the natural sciences, as soon as the public school fund will permit."

Section 4 provides for a fund as follows: "The proceeds of all lands that have or hereafter may be granted by the United States to this State, and not otherwise appropriated by the United States or this State; also, all mines, stock-bonds, lands and other property now belonging to any fund for purposes of education; also, the net proceeds of all sales of lands and other property and effects that may accrue to the State by escheat, as from sales of estrays, or unclaimed dividends, as distributive shares of the estates of deceased persons, or from fines penalties or forfeitures; also, any proceeds of the sales of public lands which may have been, or may hereafter be, paid over to this State, (Congress consenting,); also, all the grants, gifts, or devises, that have been, or may hereafter be, made to this State, and not otherwise appropriated by the tenure of the grant, gift, or devise, shall be securely invested and sacredly preserved as a public school fund, which shall be the common property of the State. The annual income of which fund, together with one dollar *per capita*, to be annually assessed on every male inhabitant of the State over the age of twenty-one years, and so much of the ordinary annual revenue of the State as may be necessary, shall be faithfully appropriated for the establishing and maintaining the free schools and the university in this article provided for and for no other purpose whatever." In addition to this, the 16th section of land in every township is set apart for school purposes, much of which it is thought can be saved to the State. It is, in any event, safe to assert that the educational interests of Arkansas, are fully provided for.

"In 1860, Arkansas had 518 manufacturing establishments, with a capital of $1,316,610. The annual product was $2,880,578; the cost of labor $554,240, and of raw material $1,280,503, leaving a profit of $1,055,835, or 80 per cent. on the capital. Over three fourths of this production consisted of lumber, flour, meal and leather." Since which time manufactures, especially of lumber have largely increased. From 1850 to 1860 the increase in value of sawed and planed lumber in Arkansas was 1,000 per cent.

In 1850, the population was 209,877; in 1860, 435,450; and is now rapidly increasing by immigration from the older States.

Many farmers in this State realized last year a net income from their crops of from $15,000 to $30,000, and, in one case, $45,000, and this not at the expense of the labor—as in many instances heads of families, having aid of the same only in the picking season, realized, besides cost of living, from $900 to $1,100.

This State is one sixth larger than the State of New York. In 1860, the cash value of farms and farming tools was $100,000,000. Live stock was valued at $22,000,000. The State produced, as near as can be ascertained, 367,000 bales of cotton, 1,000,000 pounds of tobacco, 500,000 bushels of oats, 18,000,000 bushels of corn, 80,000 bushels of rye, 1,000,000 bushels of wheat, 500,000 bushels of peas and beans, 500,000 bushels of Irish potatoes, 1,500,000 bushels of sweet potatoes, 4,000,000 pounds of butter, and 1,000,000 pounds of honey.

The value of the slaughtered animals, in the same year amounted to $4,000,000, showing that of the open land in the State fully one third has not been in cultivation since the war, and that the demand for labor and capital in Arkansas is not exceeded by any part of the United States.

Among the most thriving cities in the State, are Little Rock, Pine Bluff, Camden, Fort Smith, and Helena, all good business points. There are many other thriving towns, desirable localities for immigrants.

This State is easy of access by boat from any point on the Mississippi river. Immigrants from the North and East, *via* Memphis, can come from that city to Little Rock by the way of White river to DeVal's Bluff, by the Memphis and Little Rock Railroad, or by boat *via* the Arkansas river. Immigrants from Germany will find an easy route to this State by either the Bremen or Hamburg line of steamers to New Orleans; from thence by Mississippi and Arkansas or Ouachita river steamers to any point.

Since the war, in common with other Southern States, there have been some local disturbances in Arkansas, but under the strong and well administered State government now in power, all discord has ceased, the evil disposed have either subsided into quite or left the State, gangs of desperadoes have been broken up and offenders brought to justice, until life and property are as well protected in Arkansas as in any State in this Union, and the people every where express an earnest desire for immigration.

Although almost a repudiator for many years, the State government has taken steps to establish her financial reputation. Her debt is funded and provision made for the payment of the interest on the first of January next. She has awarded aid to 850 miles of the railroads in her limits to insure their early completion. These were not party measures. All classes were in favor of a funding bill, and the people of the State, by almost a unanimous vote, pledged her aid to the building of the most important lines of road. Together with this, let it be borne in mind that there are within the limits of (and bordering on) the State, 3,000 miles of navigable streams.

With these great natural resources, and her immense agricultural and mineral wealth, it is confidently expected that but a short time will elapse until Arkansas, rivalling Missouri and Illinois, will stand among the first of the States of the Mississippi valley.

In conclusion, it may be truthfully asserted that any person who can strike a blow, or has a moderate sum to invest, can not do amiss by coming to Arkansas.

All letters addressed to this office seeking information will be promptly answered.

This pamphlet will be sent free to any person on receipt at this office of name and address.

J. M. LEWIS,
Commissioner of Immigration and State Lands.

Kansas City and Memphis R. R.

We learn that this road is to be immediately located and put under contract, and the construction of the same pushed forward as rapidly as possible. The directors are: J. M. Richardson, J. D. Williams, C. E. Kearney, R. T. Van Horn, C. M. Ferree, A. A. Tomlinson, S. Young and Wm. Cresman. President, J. M. Richardson, Springfield, Mo.; Secretary, J. D. Williams, Kansas City; Treasurer, C. E. Kearney, Kansas City; Chief Engineer, A. L. Mortimer, Kansas City.

Cape Cod Railroad.

We learn from the Barnstable *Patriot* that the bids for grading the proposed extension of the Cape Cod Railroad from Orleans to Wellfleet were opened on Friday last, and were found to be upon more favorable terms than had been anticipated. The Directors are about to contract with one of the parties for the entire distance of eleven and a half miles, at about 19 cents a square yard, and the work will be commenced at once. In all probability the work will be completed and the cars running to Wellfleet by the first of October.

☞ The Cumberland *Transcript* says that surveys are being made through Ohio, by way of Canton, for a route direct to Chicago, in connection with the Pittsburg and Connellsville Railroad. This will give the most direct line in the country from Chicago to the seaboard. The route from that city to Washington, through Cumberland, will be the shortest that can possibly be built between the two points.

☞ The Erie *Gazette* says an important lake connection for the Pittsburg and Connellsville railroad will be afforded under the new act authorizing the Erie Canal Company to construct a railway from Pittsburg to Erie. Negotiations are stated to be already on foot for commencing the work and prosecuting it successfully.

☞ The Pittsburg *Gazette* says the work on the Pittsburg and Connellsville railroad is still progressing, with a good prospect of completion inside of twelve months. The grading is being pushed with all possible speed, and contracts have been made for the delivery of ties on many of the sections.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisk* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, April 30, 1870.

Stock Exchange and Money Market.

The money market has been more freely supplied with loanable funds, and rates have favored responsible borrowers, the prevailing figures having been from 4@6 per cent. on call, and 6½@9 per cent. per annum in the discount form. The demand for accommodation has been more active, in view of the increased animation in financial and commercial circles, which has been quite notably developed, since it was definitely ascertained that the House of Representatives at Washington had practically rejected the Senate funding project, and determined to introduce an entirely new bill, providing for a funding loan of about $1,200,000,000 of four per cent. long date bonds, without any foreign agency clause. The city banks have added nearly three millions to their reserve of legal tender notes, and five-eighths of a million to their deposit average, while reporting a loss of 1½ millions of specie, and a reduction of about a million in their loan and discount item. The U. S. Sub-Treasury has enlarged its specie and currency reserves, since our last. Under instructions from Washington, the U. S. Sub-Treasurer commenced on Monday the anticipatory payment of the May c in interest on the public debt. Some six millions have been thus disbursed, in the form of coin checks, up to the close of Wednesday, which will not be charged off on the books of the office until May 1, but counted as cash.

The specie reserve of the city banks according to the latest return is $25,310,322, against $8,850,360 same time last year. The city bank deposits are now $203,583,375, against $177,340,080 week ending April 24, 1869. The legal tender reserve amounts to $53,119,646, against $53,677,898 same time last year. The circulation now stands at $33,616,928, against $24,060,581 same time last year. The loans are now $269,016,279, against $257,458,074 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged about $740,767,552 a day, against a daily average of $71,561,500 the preceding week, and $79,474,526 the week ending with April 9, 1870. The current week's exchanges average about 97 millions a day. The city banks, last week, reported a loss of $1,569,191 of specie, with an increase of $669,886 of deposits, and $2,989,606 of legal tender notes. They reduced their loans, $965,442; and their circulation, $81,330.

The city bank exchanges on Wednesday were about 87 millions.

National Bank notes to the amount of $245,770 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $323,089,931, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $23,543,263, leaving, with the existing 1,614 banks, (having an aggregate capital of $426,399,151,) an actual circulation at this date, of $299,546,308. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,542,350; and for the public deposits, $16,673 000—making a total of $359,215,350. The Treasury Department last week redeemed and destroyed $624,000 of worn and mutilated fractional currency, and issued $606,588 of new.

The U. S. Sub-Treasury receipts, week ending with April 23, were $4,479,085 in coin, (including $3,206,000 from customs duties,) and $3,709,815 in currency; payments, $3,293,316 in coin, (including $240,572 of coin interest,) and $3,003,987 in currency; balance at the close of the week, $87,271,970 (including $82,889,486, of coin, and $2,743,515 of currency,) against $85,231,397 at the close of the preceding week, showing an increase of $1,940,573. The business of the Office on the first two days of the current week, was as follows: On Monday, receipts, $573,500 in coin, (including $379,313 from customs,) and $811,185 in currency; payments, $74,764 in coin, (including $27,410 of coin interest,) and $656,045 in currency. On Tuesday, receipts, $677,267 in coin (including $533,756 from customs), and $163,564 in currency; payments, $32,558 in coin(including $19,001 of coin interest) and $331,780 of currency. The balance at the close of business on Tuesday stood at $88,453,470, (including $2,727,490 of currency, and $84,082,930 of coin,) against $84,803,840 a week previous; and $88,-

261,946 on April 9, 1870. The aggregate receipts of the office in March were $40,664,411, including $12,264,608 from customs; aggregate payments, $41,481,676 including $3,766,313 of coin interest; balance at the close of the month, $82,854,761, against $83,673,026 at the close of February.

The U. S. Sub-Treasurer issued in March $1,615,000 of coin certificates.

The U. S. Sub Treasurer retired, last week, $2,866,618 of coin certificates, received for customs.

The U. S. Sub-Treasury general balance on Thursday morning was $87,879,318.

Government revenues have been yielding moderately, since our last. The excises, during the week yielded about $2,950,000; customs at the port of New York, $3,092,618, and at the outports about a million (in coin) more, making the grand total income for the week equal to about $7,554,196 in currency. The receipts from excises, thus far in the current fiscal year, commencing with July 1, 1869, have been $133,578,950. The receipts from July 1, 1869, to March 31, 1870, were $124,008,603 against $103,499,334 same time preceding fiscal year.

The coin balance of the Treasury Department on Monday was $113,814,000, including $35,620,000 on private deposit; currency balance, $9,250,000.

The Gold speculation has been unusually active since our last, at much stronger rates, the range of the week having been from 112¾@114⅞, and the closing figures on Wednesday, 114⅝@114¾. The diminished offering of strictly prime bankers' and commercial bills of Foreign Exchange has tended to increase the purchasing call for Gold, partly in anticipation of a revival of the export drain. Government, which has already begun the disbursement of the May coin interest on the Public Debt, it is now thought will augment its Gold sales, and bond purchases in the coming months of May and June.

The *Alaska* from Aspinwall on Wednesday brought a specie freight of $53,585.

The coin balance of the U. S. Sub-Treasury on Thursday morning was $84,511,376.

The customs revenue of the port on Wednesday was $470,694.

The actual coin interest payments of the Sub-Treasury on Wednesday were $23,353.

The customs demand for Gold last week, averaged $584,335 a day; thus far, this week, it has averaged $456,534 a day, or equal to a weekly aggregate of $2,739,204. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $19,188; and since Jan. 1, 1870, $6,121,827, against $7,503,976 same time in 1869. The total customs revenue of the Government, in coin, at this port, thus far in the current fiscal year, commencing with July 1, 1869, has been $109,519,658, against $103,955,528 in 1868–'69.

The customs revenue at the port of San Francisco, from Jan. 1 to April 7, was $1,974,178, against $2,080,560 same time last year.

The exports of specie, from this port, last week, were $240,572, against $597,625 same week last year; total, since July 1, 1869, $23,984,497, against $32,083,163 same time preceding fiscal year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $240,572, and since July 1, 1869, $67,507,289, against $66,910,626 in 1868–'69.

The specie exports from San Francisco, from change compare as follows with former returns: Jan. 1 to April 7th, were $11,656,874, against $10,861,276 same time last year.

Foreign Exchange though not in very active request, has been quoted strong and buoyant; particularly toward the close, on a reduced offering of strictly prime bills. Bankers' prime sixty day bills on London closed buoyantly on Wednesday at 109⅛@109¼, and on Paris to 5.21¼@5.18¾; sight bills on London to 109⅝@109⅞, and on Paris to 5.16¼@5.14½. The offerings of produce bills have been fair since our last. The week's exports of domestic produce have been to the currency value of $3,308,547, making the total since July 1, 1869, $166,118,425, against $133,463,161 same time preceding fiscal year.

Government securities have rapidly advanced in price, within the week, on a brisk purchasing inquiry, largely on investment account, and a much reduced offering of all issues, particularly of the six per cent. coin-bearing bonds. Government bought in a million of Five Twenties on Wednesday at from 109 70@110 20, out of an aggregate offering of only $1,810,000. The latest dealings in the funds on Wednesday showed a very strong and buoyant market, the highest figures made on the new upward movement in values having been reached late in the afternoon of that day. A further notable reduction of the public indebtedness is looked for in the next monthly exhibit.

We believe that Congress will do but little of immediate practical importance, in relation to the debt funding question, at this session. It is to be hoped, however, that it will not adjourn without, according to the great industrial interests of the country, the consideration and protection, to which they are legitimately entitled, and which should not be withheld from any important element or agency of production on the prosperity of which the Government is largely dependent for its revenues, in one form or another.

U. S. sixes of 1881 closed here at 116⅛@116¾; U. S. Five-twenties of 1862, 115@115⅛; U. S. Five-twenties of 1864 at 113⅛@113¾; U. S. Five-twenties of 1865 at 114@114⅛; U. S. Five-twenties of 1865 consolidated, 112⅝@112¾; U. S. Five-twenties of 1867, 113@113⅛; U. S Five-twenties of 1868, 112⅞@113; U. S. Ten-forties at 108⅛@108¾; U. S. Six per cent. currency bonds, 112⅛@112⅝.

Central Pacific Sixes closed on Wednesday at Frankfort at 78¼.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	April 13.	April 20.	April 27.

*Ex coupon.

State bonds have been active and buoyant in price. There has been a good inquiry for Railway bonds at stronger figures. The Central Pacific Sixes closed at 92¼@92½. Union Pacific Sixes at 86½@86¾; and the new Chesapeake and Ohio First Mortgage Thirty year Bonds at 90 per cent. and accrued interest in currency.

Railway and miscellaneous share property has been universally active at much higher prices, closing buoyantly.

There has been more movement in domestic produce at generally firmer prices, though cotton showed less firmness toward the close. Middling upland cotton closed on Wednesday at 23⅜ cts. per lb. The stock of cotton now here is given at about 45,000 bales. The receipts at the port this week, have averaged about 1,650 bales a day. The receipts at all the ports, thus far in the year commencing with Sept. 1, 1869, have been 2,488,650 bales, against 1,874,125 bales in 1868–'9; exports, same time 1,744,000 bales, against 1,178,850 bales same time in 1868–'9; stock on hand at latest dates, 323,550 bales, against 268,850 bales same date 1869. The exports of domestic cotton goods from this port, since Jan. 1, 1870, have been 4,369 pkgs., against 8,686 pkgs., same time in 1869. From Boston, 1,134 pkgs. in 1870, against 3,483 pkgs. same time in 1869.

At the auction sale of Scranton Coal on Wednesday, 80,000 tons were disposed of at rather easier prices, ranging from 4.20@5.30, as against 4.27½@5,50 at the preceding monthly sale.

Foreign goods have been in fair request and generally held with firmness. The week's imports of foreign dry goods were to the specie value of $2,139,866; and of foreign merchandise, $5,010,764, making a total of $7,150,130, against $5,885,230 same week last year.

At the Live Stock markets, this week, Beeves have been in more demand at from 12@17c. per lb.; week's receipts, 5,895. Milch cows have been in request, at $40@$100 each, receipts, 120. Veal calves have been moderately sought after, at from 6@10½c. per lb.; receipts, 2,895. Sheep in less urgent request at from 6@9c.; lambs at 12@18c. per lb.; receipts, 16,159. Swine quiet at 9⅞@10¼c. per lb., all live weight; receipts, 10,797.

The Ocean freight market has been somewhat brisker. For Liverpool we quote flour at 1s. 3d. by sail, and 1s. 3d@1s. 6d. by steamer, per bbl.; grain at 8½d.@4 by sail, and 4d. by steamer, per bushel; cotton at ⅛d. by sail, and ¼d. by steamer per lb.; and heavy goods 10s.@25s. by sail, and 12s.6d.@35s. by steamer, per ton. Total number of vessels in port on Wednesday, 511.

The following will show the exports (exclusive of specie) from New York to foreign ports for the week ending April 26th, and since the beginning of the year:

	1869.	1870.
For the week	$4,471,695	$3,308,547
Previously reported	48,289,313	51,014,878
Since Jan. 1	$52,761,008	$54,323,425

The imports for the week ending April 23, and since the beginning of the year, have been as follows:

	1869.	1870.
Dry goods	$1,505,843	$2,139,866
Gen. merchandise	4,379,387	5,010,764
Total for the week	$5,885,230	$7,150,130
Previously reported	92,908,344	87,073,837
Since January 1	$98,793,574	$94,223,967

The balance in the Sub-Treasury on Wednesday was $87,879,817 71.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Buffalo, New York and Erie 1st mort., 90; Pacific R. R. 7s, guar. by Mo., 98; Dubuque and Sioux City 1st mort., 97; St. Louis and Iron Mt., 44⅛; do., 1st mort., 88½; Peninsular 1st mort., 90; Am. Dock and Imp. 7s, 95; Toledo, Wabash and Western consol. bonds, 81; Arkansas 7s, issued to Little Rock and Fort Smith R. R. Co., 75½; Toledo, Peoria and Warsaw 1st mort., W. ☞ The New Jersey Western Railroad Company, Sussex Valley Railroad Company, Hoboken and Ridgefield Railroad Company and the Hudson and Delaware Railroad Company are about to be be consolidated into one under the name of the New Jersey Midland Railroad Company. The directors and stockholders of the Company have already consented to the transfer of the stock of the various companies.

☞ THE LOAN OF THE CHESAPEAKE AND OHIO RAILROAD COMPANY, being a first mortgage upon the entire line, property and equipments between the tidal waters of the Atlantic on the Chesapeake Bay, and reliable inland navigation on the Ohio River, worth, when completed, at least $30,000,000, is one of the most substantial, conservative and reliable railroad loans ever offered in the market, and is peculiarly adapted to the wants of investors and capitalists who desire to make their investments with the most satisfactory assurance of positive and undoubted security. The bonds are in denominations of $1,000, $500 and $100, and may be had COUPON or REGISTERED.

Interest Six per Cent. per annum, payable MAY 1 and NOV. 1.

Principal and interest payable in GOLD in the City of New York.

Price 90 and accrued interest in currency, at which price they pay nearly Seven per Cent. in gold on their cost.

Government bonds and other securities received in exchange at their full market value.

Purchases made before May 1 will have the advantage of the gold premium on the accrued interest.

Particulars furnished on application.

FISK & HATCH,

Bankers, &c., No. 5 Nassau-st.

☞ Sealed proposals will be received until the 4th of May, at the office of the St. Louis, Alton and Terre Haute Railroad Company, 12 Wall st., N. Y., for the purchase of $235,000 of the First Mortgage Bonds of the Indianapolis and St. Louis Railroad Company. For a full description of these bonds see Advertisement in another column.

☞ The New York and the New Haven Railroad Company are preparing to construct an iron truss bridge over the Housatonic River at Stratford, in the place of the present old wooden structure. The new bridge will be 1,000 feet long, and is expected to cost $250,000.

☞ The track of the Newark and Elizabeth horse railroad has been laid as far as the Newark and New York Railroad crossing. The extension to Clinton street will be completed by the 1st of May. The cost from Waverly to Centre street is estimated at $10,000 per mile.

☞ The shareholders of the Great Western Railway of Canada have given their assent to the bill authorizing the construction of a branch road from Glencoe, east, forming a southern road. A double track is to be laid on the main line between Windsor and Glencoe—the work to commence this season.

☞ The main line of the New Jersey Southern Railroad will be open in a few days to Jackson, and another route is proposed from Medford to Tuckerton.

☞ All the bids have been received and opened for completing the Western Maryland Road through from Baltimore to Hagerstown, and the awards will be made at the next meeting of the directors.

☞ Mr. Wendell Bollman has resigned the Presidency of the Western Maryland Railroad Company.

Canadian Trade and Commerce.

The following is a comparative view of the commerce of the Dominion of Canada, exhibiting the value of exports to, and the value of goods imported and entered for consumption from, Great Britain her colonies, and foreign countries, and the amount of duty, collected thereon, together with the tonnage of vessels arriving and departing —including in such tonnage the vessels engaged in the inland trade during the fiscal years ending the 30th of June, 1868 and 1869:

DOMINION EXPORTS.

	1868.	1869.
Great Britain	$21,329,010	$20,498,324
B. N. A. colonies	1,634,166	1,246,915
British West Indies	1,718,463	1,546,590
United States	27,534,292	30,923,929
France	96,672	133,907
Germany	44,943	56,242
Other foreign countries	2,248,920	3,991,406
Add short returned	2,961,722	3,077,468
Total	$57,567,888	$60,474,781

DOMINION IMPORTS.

Railroad over the Alps.

Before many years have elapsed the railway will supersede the diligence on most of the great Alpine passes. The Mont Cenis and the Brenner are even now traversed by the steam engine. The success of the St. Gothard route may be regarded as assured; and the same telegram which announces the assent of the last canton which had not already contributed its subsidy, contains the promise of similar support to the proposed railway across the Splugen. The last line which has been promoted by the United Swiss Railway Company will be a much less expensive under takingthan the St. Gothard and will run through some of the most romantic scenery of the Alps. Starting from Chew, it will pass along the level country by Ems and Rhazars to Thusis, at the entrance of the Via Mala. Thence, through tunnels and over bridges, it will wind its way to the village of Splugen, and passing through a tunnel 9,700 yards in length, emerge on the other side of the mountain at Isola, whence it will lead to Chiavenna, a little to the north of which there will be a station for the Upper Engadin. The entire cost has been roughly estimated at 98 millions of francs, of which 50 are to be raised by private capitalists and 48 to be granted by way of subvention by the interested cantons. The works, it is thought, will be completed in five years from their commencement. The railway over the Simplon will probably soon follow, and before long the traveler in search of solitude will be compelled to confine his wanderings within the limits of perpetual snow.—*London Globe.*

Journal of Railroad Law.

RAILROAD COMPANIES—TAXES—ROADWAY MUST BE VALUED AS REAL ESTATE, INCLUDING IMPROVEMENTS.

The facts of the recent case of The Chicago and North Western Railway Company *vs.* The Board of Supervisors of Lee County, (44 Ill., 248,) are fully and clearly stated in the following opinion by

Breese, J.—This was an appeal from the Circuit Court of Lee County by the Chicago and North Western Railway Company, from a judgment rendered by that court in favor of the Board of Supervisors of Lee County.

This case differs from the case of The Board of Supervisors of Bureau County *vs.* The Chicago, Burlington and Quincy Railroad Company Ante, p. 229. The difference is presented by the first point argued by appellants, and that is, that, under the revenue laws of 1855, the real estate or "land" of a railroad company can be valued only as land, without regard to the cost of fitting it for use as a railroad, or of preparing it for receiving the track and superstructure. That it can only be valued as land by superficial measure, like other lands in that place and neighborhood.

The statute declares that the real property owned or occupied by a railroad company in each county, town, and city through which it may run, and the actual value of each lot or parcel of land, including the improvements thereon, except the track or superstructure of the road, shall be annexed to the description of such lot or parcel of land. Such list must set forth the number of acres taken for right of way, stations, or other purposes, from each tract of land through which the road may run, etc., giving the width of the strip or parcel of land, and its length through each tract, also the whole number of acres and the aggregate value thereof in the county, town and city; all this property is denominated "real property."

The counsel for appellants insist that the land occupied as right of way and fitted for use as such, by grading, filling, culverts and bridges, should be assessed as land only, without regard to the work upon it.

We cannot concur in this view. The Legislature have declared that this strip of land shall be particularly described in the schedule, and, with the improvements upon it, shall be taxed at its value. There can be no doubt on this point.

An objection is made by appellants to the form of the verdict, they insisting that it cannot be executed.

So far as appellants are affected by it, there can be no doubt but a proper mode will be adopted, by which the county authorities will dispose of the money when appellants pay it. This is all, we think, which concerns them. The mode or manner in which the authorities may distribute it among the several towns concerns the county alone.

The cross errors, for reasons we have given in the case referred to, decided by this court at the present term, are not well assigned.

Perceiving no error in the record, the judgment of the Circuit Court must be affimed.

Judgment affirmed.

Northern (Canada) Railway.

At the adjourned meeting of the stockholders of this company at Toronto on the 9th of March, the following report of the Canadian directors for the past year was read and accepted:

The Canadian directors have the honor to submit their report for the year ending the 31st December, 1869, with the accompanying statement of account, auditors' reports, and departmental returns. This report would have been presented at an annual meeting held on Wednesday, the 9th February, but the auditors having been unable to complete their examination of accounts and their report thereon in due time, the directors acted upon their suggestion and adjourned the meeting for one month, after having first proceeded with the election of directors for the ensuing year and transacted other business, of which the minutes will be found hereto attached.

The gross traffic receipts of the year have amounted to $671,076 51 (£137,892 8s. 8d. stg.), as in comparison with $550,070 24 (£113,028 2s. 7d. stg.) in 1868; showing an increase of $121,006 27 (£24,864 5s. 9d. stg.), or equal to 21.99 per cent.

The ordinary working expenses of the year have amounted to $338,035 91 (£69,459 8s. 11d. stg.), as against $335,894 31 (£69,019 7s. 7d. stg.) in 1868; giving a rate on gross traffic receipts of of 50.37 per cent., as in comparison with 61.06 per cent. in 1868. To these sums have to be added $164,122 49 (£33,728 15s. 1d. stg.) expended on additional locomotive and car stock, new sidings, and other works of extension necessary to meet the demands of the increasing traffic.

The balance of the year carried to the net revenue account has amounted to $168,918 11 (£34,709 3s. 11d. stg.), which, with the balance brought forward from 1868, has enabled the directors to pay all accruing interest dividends on the company's debentures and to liquidate in full the arrears of interest dividend of three per cent. overdue on the second preference bonds.

By "The Northern Railway Act of 1868," the company was empowered to make an issue of third preference bonds (Class A) to the extent of £50,000 stg, and to "expend the proceeds thereof in the construction of elevators, the increase and extension of the rolling stock, and other equipment works for the further accommodation and facilities of the traffic."

Under the authority given by the proprietary at the special general meeting held on the 9th February, 1869, the above issue is now in progress for works then approved; the expenditure on this account to 31st December 1869, having amounted to $165,466 66 (£34,000 stg.), being $14,016 00 (£2,880 stg.) to new rolling stock and $151,450 66 (£31,120 stg.) to new elevators, wharfage, and other extension works.

The directors expect that the new Toronto elevator will be finished and ready for service immediately on the opening of the ensuing season of navigation; and they are already engaged in preparations for the construction, during the coming summer, of a similar structure, but of less capacity, at Collingwood.

By the act of 1868 already quoted authority was given, under certain conditions precedent, for the preferment of certain arrears of interest debentures representing interest on the original bonds of the company overdue and unpaid in 1859, and then capitalised. The conditions thus imposed having now been complied with, and the earnings of the line being sufficient to warrant the procedure, the directors recommend that the exchange of bonds provided for by sections 6 and 7 of the said act be now made.

During the last session of Parliament a charter was obtained by the Toronto, Simcoe, and Musko-

ka Junction Railway Company with the object of constructing a railway from some point upon this line, at or near the town of Barrie, to Lake Muskoka. The organization is a very powerful one, and, with the municipal aid which it expects to secure, would soon be well able, from local resources, to conduct the undertaking to a successful issue. Appeal has been made to this company for such co operation as may tend to strengthen this enterprise to mutual advantage; and the directors, whilst strictly adhering to the policy of a close capital account, have expressed a cordial desire to contribute such aid and influence as with due regard to the protection of existing interests, and subject to the sanction of the proprietors, may be prudently extended to an undertaking which is of prime importance to the commercial centres served by this railway, and must ultimately become an important and valuable feeder to it.

F. C. Lowthorp, Esq.

We have received from F. C. Lowthorp, Esq., Civil Engineer, Patentee and Builder of Iron Bridges, Pivot Bridges and Turn Tables, a circular containing numerous references to Railroad Companies for Bridges and Turn Tables, and to Commissioners and Freeholders of counties for Public Road Bridges constructed by him, besides a number of testimonials from parties who have had them in use. For instance:

The Commissioners of Lehigh Co., Penn., certify that the Iron Public Road Bridge across the Lehigh River and Canal at Allentown has been executed in a good workmanlike and substantial manner, to their entire satisfaction, and has met with the entire approbation of the public in general; being not alone both substantial and durable, but also very tasteful and ornamental.

The Central Railroad Company of New Jersey has in use, on the main road and branches eleven of his Iron Turn Tables. During six years' service they have required but very slight repairs, and have given general satisfaction. During the past year Mr. Lowthorp has erected for this company twenty-four Double Track Iron Railroad Bridges, varying from 55 to 162 feet spans, and also built the large pivot draw in Newark Bay, and put up a large number of his Iron Turn Tables, all of which are complete in themselves, both as to the excellence of the workmanship, and the materials used in their construction. The draw, which weighs about 225 tons, is very easily worked by *two* men, and *one* man can turn a locomotive engine upon one of his turn tables.

The Iron Pivot Double Track Draw Bridge erected by Mr. Lowthorp at Bridgeport, Ct., for the New York and the New Haven Railroad Co., is giving excellent satisfaction in every respect.

The Lehigh Coal and Navigation Co., after a fair trial of two 50 feet Tables, ordered eight more of smaller size.

The Lehigh Valley Railroad Co., who have had these Iron Tables, with Improved Pivot, in use for a number of years, say they are all that can be desired in the way of a reliable good Table. They have never given a particle of trouble, have not been out of order for an instant, and have cost nothing whatever for repairs. They show no perceptible wear in either pin or plate, and there is no reason to doubt their being as good twenty years hence as to-day.

The circular containing the testimonials, of which the above is but a brief abstract, together witg the names of the Railroad Companies, etc. to whom reference is made, may be had by addressing F. C. Lowthorp, Esq., Trenton, New Jersey.

Railroad Dividends.

The Northern Central Railway Company have declared a semi annual dividend of three per cent., payable on and after the 25th of May next, free from State and National taxes, at the office of the company in Baltimore, and by Geo. Taber, Transfer Agent, No. 234 South Third st., Philadelphia.

The Concord Railroad Company have declared a dividend of five cent. payable, free of government tax, May 2, 1870. Stockholders in Boston and vicinity will be paid at the office of F. M. Weld, Esq., No. 50 Congress street; in Nashua N. H., and vicinity, at the First National Bank; in Concord, N. H., and vicinity, at the office of the Superintendent; in Lebanon, N. H., and vicinity, at the National Bank of Lebanon; all others at the office of the Treasurer in Manchester, N. H.

The Manchester and Lawrence Railroad Company have declared a dividend of five per cent., exclusive of government tax, payable May 2. Stockholders in Boston and vicinity will be paid at the office of Abbott, Downing & Co., 32 Broad street; all others at office of the Treasurer in Manchester, N. H.

Virginia Valley Railroad.

At the last term of the County Court of Roanoke Co., Va., the following order was entered:

On motion, it is ordered that at the election to be held in this county on the 4th Thursday in May next, a poll be opened to take the sense of the qualified voters of this county according to law, on the question whether the county shall subscribe to the capital stock of the Valley Railroad Company, a sum not exceeding $200,000, the subscription to be made in bonds of the county, payable within twenty years after their date, with interest thereon, payable at the rate of six per centum per annum, payable annually, subject to the following conditions:

First. That the said Railroad penetrate the county to some point on the Virginia and Tennessee Railroad.

Second. That the said Railroad, to that extent, be actually let to contract before the delivery of the said bonds.

Thirdly. That the company agree that the money subscribed by the county be expended within the county.

☞ Thomas McKissock, Esq., has been appointed Chief Eugineer and General Superintendent of the Pacific Railroad of Missouri, and has issued the following order:

"Mr. Jacob Johann has this day been appointed Master Mechanic, vice B. Warren, resigned, to take effect April 1, 1870. Mr. Johann will have general supervision over the entire motive power and machinery department, and his authority will be respected and his orders obeyed by all employes in his departments."

Mr. Johann has been Master Mechanic of this road before.

☞ The Pennsylvania and Sodus Bay Railroad Company was organized at Ovid, N. Y., on the 22d inst., by the election of a board of directors. The stock has all been subscribed, and ten per cent. paid in. The road will be 100 miles in length, extending from Waverly, via Trumansburg, Ovid, Seneca Falls and Waterloo, to Great Sodus Bay.

☞ The New York State Canals are to be opened to navigation on the 10th of May.

Boston Water Power Co.

The annual meeting of the stockholders of this corporation was held in Boston on the 26th inst. The treasurer presented his report, which was received and placed on file. It stated the total receipts during the year as $86,415 60, and the total expenditures $42,679 70; balance in favor of the company, $43,735 91. The largest sale of land made by the company during the year was one of about 170,000 feet of flats at 50 cents per foot, realizing $81,500. This has reduced the debt to about $98 000, and the company expects to soon receive $37,000 from the city. The company owns about 9,000,000 feet of flats, and has 51,500 shares of stock sold. The following gentlemen were chosen directors: Messrs. J. A. Dupee, Daniel D. Broadhead, Jarvis D. Braman and Samuel P. Bird.

Norfolk and Gt. Western Railroad.

The editor of the Bristol *News*, writing from Richmond says:

In a conversation yesterday with Col. Davis, he informed me that a contract of the most favorable character, for the building of the Norfolk and Great Western Railroad has been signed, sealed and delivered, and that our people are required to do but very little to secure its very early completion. A large force will be put to work at several points upon the line early in the summer. Col. Flournoy, who has the contract, comes from New York, by way of Lexington, where an effort will be made to secure the services of Commodore Maury in the establishment of a line of Steamships between Norfolk and European ports. This line is to be under the control of the Land, Loan and Trust Company, incorporated but a short time since. I am not at liberty to make known the terms and conditions of the contract.

Railroads of Michigan.

The annual report of the Auditor General of Michigan concerning the various railroad companies of the State, is just issued, embracing the business of the corporations during the year ending December 31, 1869. Of the companies reporting it appears that the aggregate capital stock at the time of the report was $39,748,603; the capital stock paid in $30,234,667; the bonded debt, $24,454,630; the floating debt, $1,717,875. They received for the transportation of passengers, $4,930,107; for the carrying of freight, $7,494,285; for carrying the mails, $107,214; from other sources, $552,150—making a total of $13,082,759. For repairs, cars, engines, buildings, salaries and other expenses, they have expended $8,501,767 out of their receipts.

☞ The citizens of Baltimore have ratified the ordinances passed by the City Council authorizing the issue of bonds of the city to the amount of $1,000,000 for the erection of the new City Hall, to authorize the funding of the floating debt of the city to the extent of $800,000, and to issue $370,000 of certificates of indebtedness, to be called water stock, and to be used in completing Druid lake and for other improvements.

☞ The contract for furnishing all the materials and workmanship required for a sea wall at Point Allerton, in Boston harbor, has been awarded to James W. Andrews of Gallop's Island, by Gen. Foster, U. S. Engineers.

☞ Work was commenced on the western division of the Chesapeake and Ohio railroad near Charleston, West Virginia, on the 9th inst.

Norfolk and Gt. Western Railroad.

Mr. Davis, one of the directors of the Norfolk and Great Western Railroad Company returned to Richmond on Wednesday from New York, where he has been for some time past with Col. Flournoy and others, looking after the interest of his line. He states that their negotiations have been successful, and every mile of the road is now under contract, and that work will be commenced on it in a very short time. This line extends from Norfolk to Bristol *via* Danville, and passes through a rich section of the State which has hitherto been so far from any line of communication with the markets of the country that its productions have not been made valuable.—*Richmond Enquirer.*

Baltimore and Potomac Railroad.

Superintendent Seabrook, Mr. Emack, chief engineer, and Messrs. Hammond Worrell, and other attaches of the company, have been in Marlboro' for the past few days arranging for the immediate resumption and vigorous prosecution of the work below that town, Mr. McCann having fully completed his contracts to the Western branch. The contracts for six sections of one mile each, have been awarded to the following gentlemen: No. 1, on the southern side of the Western branch, to Clement Hill, Nos. 2 and 3 to John W. Belt, of Oak Grove, and Nos. 4, 5 and 6 to Daniel McCann. —*Prince Georgian.*

☞ The contract for building the Spuyten Duyvil and Port Morris railroad, from the Hudson River railroad at Spuyten Duyvil to its proposed junction with the Harlem railroad at Mott Haven, about a quarter of a mile north of the Harlem river, has been awarded to Mr. Nicholas Decker, who is to complete the work by the 1st of March, 1871.

☞ A bill authorizing the Great Western (Canada) road to change its gauge to 4 feet 8½ inches has been reported favorably to the Dominion Parliament, and is likely to pass. The road has now a third rail for the narrow gauge, and the proposed law will authorize the company to take up the outside rail which forms the wide gauge required by the original charter. It is now almost useless to the line.

☞ The work on the new railroad from Atsion, in Burlington county, to the Delaware at Greenwich Point, is rapidly progressing. Three sets of men are grading it at three different points. It crosses the Atlantic track at Winslow, and extends through Vineland and Bridgeton to the Delaware.

The San Antonio and Mexican Gulf Railroad.
FOR SALE AT PUBLIC AUCTION.

HEAD QUARTERS FIFTH MILITARY DISTRICT, State of Texas.
CHIEF QUARTER MASTERS OFFICE, Austin, Texas, April 11th, 1870.

IN COMPLIANCE WITH THE ORDER OF THE Secretary of War, dated March 26th, 1870, there will be sold at Public Auction at Indianola, Texas, between the hours of 12 M. and 3 P. M., on Wednesday, the 25th day of May, 1870, all the right, title and interest of the United States of America in and to the

San Antonio and Mexican Gulf Railroad from Lavaca to Victoria, Texas.

The Sale will include the Road Beds, Tracks and Sidings, Buildings, Water Stations, Turn Tables, &c.

The Railroad Materials and Supplies pertaining to the road, together with the Rolling Stock, Cars, Machinery and other Equipments, as follows:

28 Miles of Track, (more or less).
1 Passenger Car.
1 Baggage Car.
6 Box Cars.
6 Platform Cars.
1 Engine and Tender.
1 Engine.
1 Engine House at Lavaca.
1 Depot Building at Victoria.
1 Depot Building at Lavaca.
1 Machine Shop at Victoria.
20 prs. trucks loose at Depot in Victoria.
4 prs. trucks under 2 Platform Cars.
1 Miscellaneous lot of Railroad Material, Boxing Straps, &c.
1 Worthless lot of Blacksmiths Tools.
1 Mixed lot of Machinery being odd pieces, &c., in shops at Victoria.
8 prs. trucks lying loose along the Road between Lavaca and Victoria.
2 prs. driving Wheels at Victoria.
1 Tank at Victoria.
1 Pistern at Victoria.
1 Iron Safe.
2 Stoves.
2 pr. Scales.
3 Hand trucks.
1 Cross Cut Saw.

The property may be inspected on Application to the agent of the Road and any information desired may be obtained from the Chief Quarter Master Fifth Military District, at Austin, Texas.

Full particulars given on day of sale.
Terms of payment cash in United States Funds.

Portable and Stationary Engines; Car Irons Complete; Wheels and Axles; IRONS FOR RAILROAD BRIDGES; and other articles required by Railroad Companies.

SECURITIES OF ALL KINDS NEGOTIATED ON FAVORABLE TERMS.

Locked Safety Valves.

TO

MASTER MECHANICS

AND

LOCOMOTIVE BUILDERS.

THE UNDERSIGNED OFFERS FOR SALE, SAFETY VALVES, effectually guarded against tampering, invented and patented by himself; patent bearing date Sept. 14th, 1869.

Said Valves are sold with Spring, Guard, Studs, and Nuts, complete, and all ready to put on to boiler domes. Price for size suitable for Locomotives, $27 50.

The Valve and Seat are made of hard composition. Spring of best cast steel.

The above Valve is sensitive, and is not liable to stick from corrosion; and is particularly well suited for large stationary and marine boilers, giving large area for escape of steam, and requiring a short lever, and light weight or spring, for holding Valve against pressure.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

BRADY'S RAILROAD LANTERNS.

The strongest and best in use; are made principally of Malleable Iron. Here lies the secret of their strength, the frame being capable of supporting a weight of Four or Five Hundred Pounds; and yet they are little heavier than ordinary Lanterns. The guards are rivited through the top and bottom flanges, the rings wound with wire where they cross the guards, and the whole frame tinned, uniting each piece with the other, making it the *strongest* Lantern ever offered to the public. RAILROAD MEN *especially* cannot fail to see that it will be economy to purchase these Lanterns, as there is no part that can be broken with ordinary use, except the Globe, which being adjustable, is easily and cheaply replaced with any color and at a small cost; the greater weight being at the bottom, it cannot readily upset. Now used on the following Railroads: New York and New Haven; Hartford and New Haven; Shore Line, Conn.; Providence and Worcester; Boston and Maine; Conn. and Passumpsic Rivers; Fitchburg; Rensselaer and Saratoga; Troy and Boston; Boston and Providence; Boston, Clinton and Fitchburg; Charlotte, Columbia and Augusta; Connecticut River; European and North American; Hartford, Providence and Fishkill; Mobile and Ohio; Portland and Kennebec; Boston, Hartford and Erie; Worcester and Nashua; Lake Superior and Miss.; Hudson River, and many others.

The trade supplied from our Store, or from the Factory, New Britain, Conn,

The "Double Header" Locomotive.

A company of railroad men, comprising the Superintendents of nearly all the leading railroads of New England, and also the master mechanics of several, visited Taunton on the 26th ult., for the purpose of witnessing the working of a new Fairlie engine recently constructed at the shops of Mr. William Mason. This species of locomotive, known familiarly as the "double header," was invented by Robert Fairlie of England, and is in use on some of the roads there, but is a novelty in this country. Mr. Mason has Americanized Mr. Fairlie's ideas and produced a machine which he believes to be eminently adapted to the American roads, and especially to those having heavy grades and requiring very powerful locomotives. It is essentially two engines in one, having a smoke-pipe at either end, and is very appropriately termed the "Janus." There are two sets of cylinders (of 15 inch diameter and 22 inch stroke), but both are operated by a single throttle, as in a single engine. The water and fuel are carried upon the sides and no tender is required. There are three pairs of driving wheels (of 3½ feet diameter) at each end, making twelve wheels altogether, and there is a contrivance in effect similar to the trucks on which common cars rest, to facilitate the passage of short curves. The weight of the machine is something over sixty tons. Mr. Mason claims that the "Janus" is as powerful as three ordinary locomotives. It was run with a freight train and a newly-finished locomotive attached, some four or five miles up the track and back, and appeared to work in a highly satisfactory manner.

Chesapeake and Ohio Railroad.

Between the waters of the Ohio and the waters of the Cumberland rivers, stretching eastward to the James and Potomac divisions of the great Chesapeake Bay, there lies a diversified and fertile belt of country, blessed with a salubrious climate, abundance of timber, water power, coal and iron deposits, and natural advantages which fit it to become the home of ten millions of people, and the foundation of a mighty system of industry far transcending our present attainments. Within the area described by this ellipse may be found the rich tobacco and corn lands of Kentucky, whose fields, pastures and live stock are renowned, the elevated cotton and vine lands of Tennessee, the wheat and grazing lands of Virginia and West Virginia, at present scarcely disturbed by the cultivator. Favored as this region is by nature it is still but scantily supplied with railroad communication with the markets of the world. We note with satisfaction that a company of gentlemen in this city, have become associated with others in Virginia to carry forward the old Virginia Central Railroad line—which with its consolidated connections is now known as the Chesapeake and Ohio Railroad—from its present terminus at the summit of the Allegheny to the Ohio River at or below the town of Guyandotte.

Along the completed portion of this road are thousands of square miles of precious iron ores; in the Kanahwa Valley, a hundred miles beyond its terminus, are inexhaustible beds of cannel and splint coal, the latter a variety especially valuable for smelting purposes. Still further to the westward at the western terminus, are the iron ores and furnaces of Southern Ohio and Eastern Kentucky. This line of road it is said will connect these several inter-dependent supplies, and lay down at the Kanahwa the elements of our immense iron industry, which must redound to the profit of the whole State. Over the same line of road may be drawn the cotton of Arkansas and Tennessee, the live stock and tobacco of Kentucky, the wheat and corn of the Upper Mississippi Valley, and the provisions of the culture tear of States. By this line also the hemp and iron of Missouri can be cheaply brought to tide water as it is understood that the advantages of operating are very great, and connecting the cheap river navigation of the West with the still cheaper navigation of the Atlantic. The work of completing this line which formerly received a large amount of aid from the State Treasury of Virginia has been lodged in responsible and energetic hands. Messrs. A. A. Low, Wm. H. Aspinwall, C. P. Huntington, Stewart, and others would hardly have identified themselves with any but promising and safe projects.

Messrs. Fisk & Hatch the Bankers who have the Bonds of the Chesapeake and Ohio R. R. for sale—and whose recommendation carries great weight—report a very satisfactory demand for the Loan. The fact that this House has taken charge of the company's Loan is, of itself, a good evidence of its merit and eminence.

Railroad Operations in Virginia.

We had the pleasure of a short interview recently with Gen. Wisewell, a contractor for railroad construction between Fredericksburg and Charlottesville, Va., some thirty miles of which route are already graded. At Charlottesville the road will communicate with the Chesapeake and Ohio railroad, and of course with the railroad connecting toward the Southwest, via Lynchburg. Thence it will have connection, we take it, with Danville, by a projected railroad, and so on to Charlotte, N. C., &c. From Fredericksburg the road first named, or that from Charlottesville, is to connect with the Baltimore and Potomac railroad at Belle Plain, a point a few miles southeast of Aquia Creek. This Fredericksburg or Belle Plain and Charlottesville railroad is in process of construction by the Pennsylvania Railroad Co., just as they are constructing the Baltimore and Potomac railroad. It is understood they are to build a railroad from Fredericksburg to Alexandria. Thus we shall have another railroad from the South of Washington. The charters for all these roads—that from Fredericksburg or Belle Plain to Charlottesville, that from Baltimore to the Potomac, with branch to Washington, and

that from Fredericksburg to Alexandria—were dead and inert things, but being acquired at very moderate outlay, they will, when constructed, command the situation, both toward the south and southwest, and also in the connection of the Chesapeake and Ohio railroad extension. It is stated that the same great railroad interest now controls the Richmond and Fredericksburg railroad, and that extending to the head of the York river. Said party is also forming, or has formed, railroad connections beyond Richmond to the Gulf. Things look, indeed, as if Mr. Garrett has been outflanked in the South, and that his control of railroad affairs will be confined to Virginia alone, and that the lower part of the Valley of Virginia. Meantime, the Manassas railroad taps that rich valley, and most assuredly will bring a large trade to Alexandria and Washington, while the gradual extensions of the Loudoun and Hampshire railroad will not only tap the Valley lower down, but must in the end cross it, and in piercing the coal region compete with the great Baltimore and Ohio railroad itself in rapidity and cheapness of transport of the black diamonds to tide-waters.—*Washington Chronicle.*

Grand Trunk Railway of Canada.

REPORT OF THE DIRECTORS FOR THE HALF YEAR ENDING DECEMBER 31, 1869.

The gross receipts upon the whole undertaking, including the Buffalo and Champlain, have been		£791,193
Deduct—ordinary working expenses (being at the rate of 61.25 per cent. against 59.44 of the corresponding half of last year)	£484,571	
Renewals, &c., of the permanent way and works in the half year debited to revenue	73,745	
		558,316
Leaving an available balance earned in the half year of		£232,877
Deduct—Loss on American currency		32,899
Net balance		£199,978

in comparison with 136,586*l.* for the half-year ending 31st December, 1868.

To this sum of 199,978*l.* has to be added, the balance carried from the net revenue account of last half-year of 18,754*l.*, making a total balance of 218,732*l.* From this, however, has to be deducted the amount of postal and military revenue due for the last half-year to the postal bondholders of 18,769*l.*, leaving the balance of 199,963*l.* applicable for the following payments, viz:

Interest, &c., paid on lands	£1,790
On mortgage to Bank of Upper Canada	4,423
On loans, bankers' balances, promissory notes, European exchange, &c.	5,220
On British American Land Company's debentures	616
On Montreal Seminary debentures	616
On Island Pond debentures	2,700
Half-yearly installment on Portland Sinking Fund	2,369
	£17,737
Atlantic and St. Lawrence lease (in full)	32,486
Detroit lease (in full)	11,250
Montreal and Champlain	13,383
Buffalo and Lake Huron	43,750
	100,870
Equipment bond interest	12,000
On account of first preference interest	67,737
Balance carried forward	1,618
	£199,963

Comparing the results of the half-year with those of the corresponding six months of 1868, there is an increase of 6,180*l.* in the passenger receipts, which average 6s. 3d. per passenger against 6s. 9d. in 1868, and an increase of 24,507*l.* in the freight receipts, which average 15s. 7d. per ton against 16s. 3d. in 1868. The sum of 4,153*l.* has been received in settlement of the company's claim upon the United States Government for the carriage of the mails between Port Huron and Detroit. The original contract for this service, at the rate of $45 per mile per annum, proved to be inadequate, and the United States Government have at length admitted the company's claim for increased remuneration by paying $75 instead of $45 per mile, as from June, 1864 to June, 1869. From this latter date the rate is to be $100 per mile per annum. These receipts are not divisible amongst the holders of the Postal and Military bonds, but form part of the general revenue of the company.

The interest on the first preference bonds will, in fulfilment of the prospect held out in the last report, be paid in full for the half-year. The directors have decided upon this course after careful consideration of all the circumstances in which the company is placed. While concurring in the views which the President expressed at the meeting of 17th December, 1869, as to the desirability of charging the cost of all renewals, as well as of maintenance to revenue; they have nevertheless thought it right to debit the capital account in this case, with that portion of the renewals and improvements during the past year which represents increased value and solidity of the roadway in extra weight of iron. All renewals of bridges and culverts have, even when they added to the value and permanence of the undertaking, been charged to revenue. The impossibility that has previously existed of raising capital for capital purposes, and the necessities of the line, have compelled the directors in some measure to ignore the claims of first preference holders; who, under the exceptional circumstances of the past year, and bearing in mind the large amounts of revenue expended in recent years upon works ordinarily chargeable to capital, are fairly entitled to the full half year's interest on the present occasion. For the present and future years, however, the directors believe they will best consult the permanent interest of all classes of proprietors by acting, under all ordinary circumstances, upon the principle laid down by the President at the last adjourned half-yearly meeting, of charging to capital such expenditure only as enlarges the carrying capacity and traffic accommodation of the railway. All outlay in substitution or renewal of the permanent way and its accessories, and of bridges and works of art, however much they may improve or give increased solidity and value to the railway, the directors purpose henceforth to charge the revenue.

The reports of the engineer and locomotive superintendent are satisfactory as showing the improved condition of the permanent way and rolling stock. The total number of miles of railway relaid with new iron during the half-year was 109¼ miles, against 88¼ miles in 1868. The cost of re-rolling the rails at Portland and Detroit has been reduced from an average of $55, which was paid in 1865 and 1866, to about $36 a ton.

The loss on conversion of American currency was less by 10,418*l.* than in the corresponding half-year of 1868, owing to the lower rates of the premium on gold. Those rates fluctuated between 160 and 119¼, to which latter point the premium fell on 30th December last. Since that date it has still further declined, and should the premium disappear altogether, this company will be saved from a direct loss of net revenue which has in the past seven years averaged upwards of 65,000*l.* per annum.

The directors are pleased to state that the most cordial relations now exist between the company and the Great Western in regard to the policy of using joint stations wherever practicable. The adoption of this system will not only afford additional facilities in the interchange of traffic, but will also be the means of effecting a considerable saving in the working expenses of both companies. Arrangements have been already completed by which that company work over the Grand Trunk tracts at Toronto: and negotiations are pending by which the Grand Trunk station at Guelph and the Great Western station at London will be jointly used. It is expected that two of the narrow gauge railways which are to run into Toronto will be completed, in part, during the present year, and arrangements are in progress with these companies for their use of the Grand Trunk station in that city on the payment of a certain annual rental. The opening of these narrow gauge lines cannot fail to give an important stimulus to the trade of the province of Ontario.

The directors are happy to state that the bill for confirming the Buffalo agreement, which was approved by the proprietors at the late special meeting, has passed through the Commons House of the Dominion Parliament; and they hope to be able to announce at the forthcoming meeting that the bill has become law.

The prompt response to the recent circular offering 228,000*l.* of the second equipment mortgage bonds, the applications for which exceeded 1,300,000*l.*, was very gratifying to the directors, and they regret they were only able to allot so small a proportion of the amount applied for.

The capital so provided has enabled the directors to authorise the necessary outlay for some of that reproductive expenditure which from necessity has remained in abeyance for so long a time, and instructions have been sent to Canada to proceed immediately with the construction of twelve new engines and twelve new first-class passenger cars. These, with the Pullman cars, which Mr. Pullman's company have agreed to place upon the road by 1st July next, will so entirely change and improve the passenger service of the line, that a large proportion of the summer pleasure traffic hitherto seeking other channels will be secured to the Grand Trunk route. Full provision has also been made for a large increase in emigrant passenger traffic. Instructions have also been given to provide forthwith the engine-sheds so much needed at Toronto and Brockville—two most important locomotive centres on the line. The funds at the disposal of the directors will provide for other urgent works necessary for the development of the business of the road, and by thus giving additional facilities for the working of the traffic, tend to secure increased economy.

As regards rolling stock for the freight traffic, the extra supply needed for present wants has been found outside the company's own resources. The Montreal Car Company is now delivering the 500 cars they have contracted to supply at the rate of about ten cars a week, so that the whole number will be on the line by the close of the year. The additional 300 changeable gauge cars are also being rapidly proceeded with, and it is expected that the whole of them will be running at the close of the current year. So great is the demand by freighters at Chicago and Boston for this class of car that extra rates on the through freight conveyed in them are readily obtained. They have hitherto been run by the company most successfully, as regards both profit and freedom from accident, and they have enabled the Grand Trunk favorably to compete for this through traffic—as greater dispatch is frequently obtained for the freight than by shorter routes.

The works of the Intercolonial have been suspended during the winter; but with the return of spring the whole of the several sections now under contract will be energetically proceeded with. In the meantime the commissioners have invited tenders for forty locomotive engines, 250 box cars, and 150 platform cars, with a view to certain lengths of the line being opened for traffic next year. The construction of the Intercolonial will no doubt bring to the Riviere du Loup branch a considerable increase of traffic during the coming summer, and this line affording continuous communication on the same gauge from Halifax to Lake Huron, must, when completed, be beneficial generally to the Grand Trunk system.

The General Government at Ottawa and the Local Government of Ontario are making strenuous efforts to attract emigration to Canada, and it is expected that there will be a larger number of emigrants settling within the borders of the Dominion this, than in any previous year.

Cash warrants for 2*l.* 10*s.* on the first preference

capital with the certificates for interest to be capitalized on the first, second, third and fourth preference bonds and stocks will be issued shortly after the meeting.

The directors who retire by rotation are Messrs. Hodgson, Hodgkinson, Molson and Captain Tyler, and the retiring auditor is Mr. Newmarch. These gentlemen are eligible and offer themselves for re-election.

Morris Canal and Banking Co.

We have the report of this company for the fiscal year ending February 28, 1870. From this we learn that the income of the company from tolls and other sources during the year was:

From tolls		$408,292 43
" rents		14,050 94
" water rents		2,962 00
" other sources		5,940 43
		$431,245 80

And the disbursements were:

Repairs of canal & works	$163,078 36	
Operating canal	59,265 22	
Salaries, law and other expenses	21,762 46	
Transportation expenses	2,291 05	
		246,397 09
Balance—profits of the business		$184,848 71
Balance at credit February 27, 1869		37,348 98
Total		$222,197 69

Thus accounted for:

Dividends on preferred stock	$58,750 00
Interest on mortgage bonds	47,100 00
" boat loan	17,466 76
" dividend scrip	7,404 18
Depreciation of boat stock	3,632 54
Bad debts	217 85
State of New Jersey	25,000 00
Balance, February 28, 1870	63,226 36
Total, as above	$222,197 69

The income of 1869 as compared with that of 1868 shows an increase of $7,769 50. The current expenses and repairs of 1869 as compared with 1868 are greater by the sum of $10,011 22. The report says:

The canal was opened for business, and navigation resumed on the 25th day of March, 1869, with every prospect of an increased trade.

During the winter the work of general repairs had been unusually large; Lock 1 East at Beavertown having been almost entirely re-built, and the Locks at Dover thoroughly repaired.

About the middle of April, rumors that a general strike of the miners in the coal regions was probable, not only deterred boatmen from manning our boats, but also induced many who had already started to abandon the canal, thus checking very materially our business. The strike took place about the 7th of May and continued for about ten weeks, causing for that time an entire suspension of shipments to us from the mines. About the first of July shipments from the mines were resumed, and we at once began the labor of remanning the boats, which was found to be more difficult than at the opening of navigation, as the season was so far advanced and boatmen had found other employment. To meet this emergency, the system was adopted by the company of purchasing teams and leasing them to boatmen at a given sum per trip, and it was soon found that this experiment fully met our expectation, and our weekly tonnage was steadily increased, so that during the month of September and to the 4th of October, our aggregate receipts were more than during the corresponding time of any previous year, except 1866.

The great and almost unprecedented freshet which occurred on the 4th of October, and which caused serious loss and damage to adjacent canals and to property (particularly in the County of Warren) made five breaks in the western division of our canal within a distance of three miles of Port Delaware. The largest of these was about three-quarters of a mile from the Andover Furnace, and extended about 500 feet in length. For a distance of 300 feet the tow path embankment, and the bottom of the canal to the depth of 10 feet, was entirely washed away. The work of repairs was completed in two weeks with crib work in a good and substantial manner at an expenditure of $18,621 30, thus swelling the aggregate of our current expenses and repairs.

On the 19th of October our shipments of coal from Port Delaware were resumed, but by reason of the damage on the Lehigh canal, by the freshet, we received no shipments from that source till the 19th of November.

Our shipments of ore to furnaces on the Lehigh, from the 4th of October, were almost entirely cut off by reason of the damages on the Lehigh canal, as above alluded to—thereby causing a decrease in our ore tonnage of at least 50,000 tons.

It is highly important that we have increased and more direct facilities for delivering ore to the iron companies, and we are arranging for a railway connection at Port Delaware which should be completed at an early day.

Navigation was closed by ice on the 5th of December.

A dividend of 5 per cent. upon the amount of preferred stock has been declared—the interest falling due on all the outstanding mortgages, boat loan bonds and scrip certificates of the company, and the annual payment for the State grant ($25,000) have been paid, which leaves a balance to the credit of profit and loss of $63,226 36.

The Trustees of the boat loan have purchased and surrendered to the company $10,400 of the boat loan bonds which have been cancelled in accordance with the terms of the trust.

Pursuant to the order of the Directors, certificates of the seven per cent. dividend scrip have been purchased amounting to $5,853, which were duly cancelled at the close of the fiscal year, and the company now hold $969 in addition.

TONNAGE.

1st. The coal tonnage of the canal for the year 1869 was as follows:

	Tons.
Received from Lehigh Canal	78,787
" " R. R. at Port Delaware	134,570
" " " " Port Washington	68,269
" " Jersey City and Newark for shipment west	11,322
Bituminous coal shipped westward	11,417
Making a total coal tonnage of	304,365

of which amount 205,062 tons came to tide water, and the balance was delivered on the line of canal west of Newark.

2d. The total amount of ore transported on the canal was 227,696 tons—of this amount 93,574 tons crossed the Delaware river into the Lehigh valley—and 47,809 tons were trans-shipped to the Del. Lack. & W. R. R. at Port Washington—leaving 86,313 tons belonging strictly to the way trade of the canal.

The total tonnage of the canal was 650,200 tons—equivalent to 38,099,994 tons carried one mile.

During the past winter we have laid 100 tons of Bessemer steel rails upon four planes.

During the past winter the unusually mild weather has enabled us to make important improvements and repairs. At our point of shipment at Port Delaware, we have enlarged the canal to twice its former width for a distance of nearly half a mile. The canal has received a very thorough cleaning, and especially that part extending through the City of Newark, and is now open and navigation was resumed on the 28th of March.

A new feature in our trade has been the stocking of 50,000 tons of coal under our trestle work at Port Delaware, which has enabled us to furnish prompt loading at the commencement of the present season, and also to guard against any irregularity in the supply of coal by reason of obstacles which were so prominent last year.

GENERAL STATEMENT TO FEBRUARY 28, 1870.

Cost of 'canal' and appurtenances		$3,373,611 26

President and *Sup't.*—JACOB RANDOLPH.
Vice President.—BLAKELEY WILSON.
Secretary.—JOHN RODGERS.

New Railroad Project.

We learn that Mr. Moe, the New Jersey gentleman who recently purchased the splendid estate of Colonel Wimbish, on Staunton river, is agitating the scheme of constructing a railroad between Pamphlin's depot, on the Southside railroad, and the North Carolina line at Leaksville. A charter authorizing the organization and incorporation of a company for the building of the road has been prepared, and will soon be proposed in the Legislature. The cost of the projected improvement is calculated at two million dollars; and it is stated that the people of the section which it is designed to traverse are disposed to use every exertion to raise it.

It is stated, also, that the Legislature of North Carolina has already chartered a road between Leaksville and High Point, which latter locality is on the line of the road between Goldsborough and Greensborough. The line from Pamphlin's purposes to connect with this road, and to constitute an additional link in our Virginian system of Northern and Southern intercommunication.—*Lynchburg Republican.*

☞ The stockholders of the Midland Railroad Company held a meeting on the 2d inst. in Jersey City. The local railroad companies in New Jersey, whose proposed lines extend from Hoboken to the State line, were consolidated with the Montclair railroad, to form the New Jersey division of the through line. The Hoboken, Ridgefield and Paterson road was not admitted. An election for officers was held, which resulted in the choice of C. A. Wortendyke for President; J. P. Loomis, Vice President; H. R. Low, Treasurer.

☞ By the recent survey of the Delaware River, to ascertain the best foundation for a bridge between Philadelphia and Camden, it has been found that the average depth of the Jersey channel is thirteen feet. On the Philadelphia side the water averages fifty-six feet in depth. The distance across the river is as follows: Opposite Chestnut street, 3,450 feet; opposite Market, 3,330; opposite Arch, 3,594; opposite Race, 3,333; opposite Vine, 3,285; opposite Callowhill, 2,793.

West Jersey Railroad.

The receipts from operations of the roads of this company for the year ending December 31, 1869, were as follows:

From passengers		$427,914 41
" freight		180,988 78
" marl		14,098 17
" express		18,108 48
" telegraph		764 39
" rent		195 00
" mail		10,115 00
		$652,184 23

And the disbursements were:

Maintenance of way	$124,781 14	
Motive power	97,462 23	
Train expenses	66,054 46	
Station & terminal exps	79,976 75	
General expenses	16,577 82	
		384,852 40
Earnings less operating expenses		$267,331 83

Leases:

Salem Railroad	$12,919 85	
Cape May and Millville Railroad	18,229 06	
Swedesboro' Railroad	5,619 25	
R. D. Wood branch (Millville)	1,000 00	
		37,768 16
Leaving		$229,563 67

From which deduct:

Interest on bonds	$82,274 35	
Taxes	11,023 08	
Sea Breeze House	4,013 20	
		97,310 63
Balance applicable to dividend		$132,253 04
Add balance from previous year		125,578 14
Total		$257,831 18
Dividend February 3, 1869	$60,445 00	
" August 16, 1869	60,445 00	
Tax on divid'd and surplus	7,157 88	
		128,047 88
Balance January 1, 1870		$129,783 30

The cost of operating the road is 59 per cent. of earnings. Net profits for the year, 10.9 per cent. on capital stock. The capital account for the year ending December 31, 1869, is as follows:

West Jersey Railroad	$167,163 81
Cape May and Millville Railroad	55,629 63
Salem Railroad	163 00
Swedesboro' Railroad	6,213 45
Total	$229,169 39

The cost of the several Railroads December 31, 1869, as per Construction Journal, is as follows:

West Jersey Railroad including Millville and Glassboro' Railroad	$2,007,467 09
Salem Railroad	270 58
Cape May and Millville Railroad	56,014 88
Swedesboro' Railroad	6,213 45
	$2,069,966 00

The cost of the West Jersey Railroad and equipments, excluding cost of Millville and Glassboro' R. R., is	$1,602,447 09
Cost of Millville and Glassboro' R.R.	221,020 00
Amount paid Millville and Glassboro' Railroad Company as premium for consolidation	184,000 00
Total, as above	$2,007,467 09
The cost of the Salem Railroad at date of Lease was	$278,320 43
Capital disbursements by the West Jersey R.R. Co. since date of leasing	270 58
Total cost to date	$278,591 01
The original cost of the Cape May and Millville Railroad, as per contract was	$500,000 00
Capital disbursements by that Company from the acceptance of the road to the date of the Lease	253,365 49
Capital disbursements by the West Jersey R. R. Co., since leasing the road	56,014 88
Total cost to date	$809,380 37
The cost of the Swedesbro' Railroad at the execution of the lease was	$271,431 24
Capital disbursements by West Jersey R. R. Co., since leasing the road	6,213 45
	$277,644 69
Capital stock Swedesboro' Railroad	$80,000 00
Bonded indebtedness	171,000 00
Due West Jersey R. R. Co	19,333 65
Other indebtedness	6,661 11
	$276,994 76
Capital stock West Jersey R. R	$1,209,000 00
Loan of 1883 $400,000	
Loan of 1896, mortgage 1,000,000	
Loan of 1899, mortgage 316,500	
	1,716,500 00
Other indebtedness	244,176 38
	$3,169,876 38

The investments by West Jersey R. R. Co., in auxiliary works is $1,217,872 77. Amount of sinking fund to secure loan of 1869, $43,750.

The increase in earnings over the previous year is $86,540 94; and the increase in expenses, $66,-337 68.

The cash receipts of the West Jersey Express Company during the year were $36,853 17; and the disbursements, $18,744 69—leaving balance for the year, $36,853 17.

The number of passengers carried during the year was 545,971½; do., carried one mile, 17,-620,193. Av. number of miles traveled by each passenger, 32.27. Av. receipts per passenger, 78.38 cts.; do., per passenger per mile, 2.43 cts. Cost per passenger, 44.34 cts.; do., per passenger per mile, 1.32 cts.

Total tons carried, 106,608; do., carried one mile, 3,497,157. Av. distance each ton was carried, 32.80 miles. Av. receipts per ton $1.68; do., per ton per mile, 5.15 cts. Av. cost per ton $1.23; do., per ton per mile, 3.74 cts.

The company have 17 locomotives, 38 passenger, 6 mail, 59 platform, 30 box, 2 stock, 2 crate, 130 dump, 22 lever, and 17 push cars. Number of miles run, 288,365. Av. cost per mile run, 35.18 cts.

The office of the company is at Camden New Jersey. The officers are:

President.—T. Jones Yorke.

Treasurer and Secretary.—George J. Robbins.

Superintendent.—Wm. J. Sewell.

Chief Engineer.—John G. Stevens.

Railroad from Hillsboro' to Jackson.

An important railroad meeting is to be held at Hillsboro', Highland county, Ohio, on Thursday next. The unfinished line of railroad extending east of Hillsboro' to Piketon and Jackson, passes from the Baltimore and Ohio and Marietta and Cincinnati railroads to the landholders on the line, in accordance with the provisions of the law of May, 1868. It is proposed at this meeting to form a new company to finish the line from Hillsboro' to Piketon, a distance of thirty-five miles, thence to Jackson, twenty miles farther, as soon as possible. When finished, this line is expected to connect with the Ironton and Columbus railroad, and will form an easy and cheap connection between Cincinnati and the western terminus of the Chesapeake and Ohio railroad, at or near Ironton.—*Pittsburg Chronicle.*

Great Western Railway of Canada.

REPORT OF THE DIRECTORS FOR THE HALF-YEAR ENDING JANUARY 31, 1870.

The receipts on capital account for the half-year ending 31st January, 1870, amount to £207,579, principally arising from the payment of the second instalment, due 1st December, 1869, on the 5 per cent. perference stock of the company, including the proportion of discount thereon, which has been charged as previously against the remission of interest allowed by the Government. The first annual series of the four per cent. bonds issued to the Government in settlement of the loan and commuted interest, amounting to $142,204, became due on the 1st January, 1870, and were paid. The aggregate expenditure at 31st January amounted to £5,487,437, leaving a balance to the credit of capital account of £96,817. The outlay on capital account during the half-year amounted to £94,844 (after deducting proceeds of surplus lands sold), and included 55 new broad gauge flat cars, 2 new 12-wheel narrow gauge baggage cars, 369 new narrow gauge freight cars, patent right for car platforms and car brake—8 7-10ths mile of new sidings, &c. The Directors authorized the construction of the narrow gauge freight cars in order to obviate the cost of hiring additional cars to conduct the large "Blue Line" freight business. The construction of five narrow gauge locomotive engines has also been authorized, and this outlay cannot fail to be of a remunerative character. As stated in the engineer's report, the entire cost of laying down 1,100 tons of steel rails during the half-year has been charged to revenue. The receipts and expenditure on revenue account for the half-year were as follows:

Gross receipts		£424,183
Working expenses, including renewals,		243,380
		£180,803

From which there has to be deducted—

Interest on bonds, loan, &c.	£44,556	
Loss on conversion of American funds	37,156	
Loss on working Erie and Niagara railway	1,125	
Amount set aside for renewal of ferry steamers	3,000	
		85,838
		£94,965
Add surplus from last half-year		1,851
Saving on conversion of June dividend on Detroit and Milwaukee preference shares		1,325
Amount of dividend on Detroit and Milwaukee preference shares, half-year to 31st December, 1869, as per net revenue account		9,098
Profit on working Galt and Guelph Railway		519
Available for dividend		£107,757

The dividend to 31st January on the 5 per cent. preference stock amounts to £8,060 15s., leaving a balance of £99,697. From this balance the Directors recommend a dividend on the ordinary shares at the rate of 5½ per cent. per annum, free of income-tax, payable in London on 28th April, which will absorb £97,642. The balance to be carried forward to the credit of next half-year will be £2,054. The renewal fund for the ferry steamers now amounts, with interest, to £15,875. The loss on conversions of American currency for the half-year amounts to £37,156, as compared with £70,362. The average rate of conversions during the half-year was 126, the average price of gold for the same period being 131¼. The amount of assets in American funds in hand at 31st January, 1870, amounted to $182,009 09, against $218,635 41, at the commencement of thehalf-year. The fol

lowing table exhibits the receipts and expenses for seven corresponding half-years:

RECEIPTS.

Half-year ending	Passengers, mails, and sundries. £	Freight and live stock. £	Rents. £	Total. £
Jan., 1864	129,684	171,329	621	301,634
Jan., 1865	154,125	157,874	730	312,730
Jan., 1866	205,131	181,071	837	387,039
Jan., 1867	168,986	161,254	1,273	331,513
Jan., 1868	186,537	213,476	800	400,813
Jan., 1869	188,703	238,764	846	423,312
Jan., 1870	183,741	239,535	907	424,183

EXPENSES.

Half-year ending	Including renewals. £	Per cent. of gross receipts.
Jan., 1864	171,336	56.80
Jan., 1865	168,577	53.91
Jan., 1866	170,003	43.93
Jan., 1867	166,682	50.26
Jan., 1868	193,667	48.31
Jan., 1869	209,752	49.55
Jan., 1870	243,380	57.37

The aggregate total traffic receipts, compared with the corresponding half-year, show a small increase £810; the increase in the local being nearly balanced by the decrease in the through traffic, viz.:

Increase in local passenger traffic	£2,469
" emigrants	288
" local freight and live stock	15,491
	£18,249
Decrease in foreign passenger traffic	£1,945
" mails and express	775
" foreign freight and live stock	14,720
	17,439
Total increase	£810

The reduced rates for through freight traffic were protracted until the end of October last, and are not even at this time restored to the rates in force in 1868. The tonnage carried, per mile, has, however, increased by 10 per cent. over the corresponding half-year, but the receipts for its carriage have decreased by £14,720. The cost of ordinary working expenses per train mile for seven corresponding half-years is as follows:

	Sterling.
January 31, 1864	4 9¼
" 1865	5 1½
" 1866	4 6¾
" 1867	4 7¼
" 1868	4 5¾
" 1869	4 3¾
" 1870	4 9½

The excessive expenditure on maintenance and renewals consists entirely of outlay for rails and fastenings, and wages of platelayers, and principally occurs in the months of November, December, and January last. The engineer explains that in October last he found the extent of renewals executed up to that time would be insufficient to carry the increasing traffic safely through the winter, with the speed necessary to ensure through connections with the American lines; that the main track having deteriorated to a greater extent than he had anticipated, rendered increased outlay necessary, and this forms the greater part of the total increased working expenses. In the last half-year's report reference was made to measures contemplated for the development of the through traffic between Chicago and New York, and to the desirability of a closer alliance in the nature of a consolidation of interests between this Company and the Michigan Central Railroad. The Directors have now to report that this has been accomplished by a deputation from the London board, which visited Canada and America in the month of December last, and concluded an arrangement with the Michigan Central and Detroit and Milwaukee Railroad Companies for the division in certain fixed proportions of the joint through traffic earnings on the one-purse system. The agreement for carrying out these arrangements was sanctioned by the shareholders at a special general meeting held on the 16th February, 1870. The effect of this agreement will be to obviate competition for traffic, and tend materially to reduce the expenses of the working staff, and of the agency offices in the United States; but as the agreement did not come into operation until the 1st of January, 1870, the advantages of this agreement will only be apparent in the future. Circumstances have rendered it prudent for the friends of this company, and of the Michigan Central Company, to obtain from the Ontario Legislature, a permissive and protective charter for a loop line to occupy the territory south of the main line of this company, which is receiving the careful consideration of the board. The Michigan Central Railway in alliance with the Great Western Railway, is now promoting the construction of a branch line from one of its stations (Ypsilanti, State of Michigan) in a southwest direction to the State of Indiana, through a fertile country not reached by any connecting line. The directors are desirous of assisting this undertaking by the investment of a certain portion of the earnings, which the new road may bring over the main line, in the first mortgage bonds of this new road. The receipts and expenditure of the Detroit and Milwaukee Railroad for the year ending 31st December, 1869, have been as follows:

Gross earnings	£331,976	7	1
Working expenses	195,072	8	6
Net revenue	£136,904	3	7

This is sufficient to meet the year's interest on all classes of bonds of the company, and 7 per cent. dividend on the preference shares; but the expenditure on construction account having absorbed its immediate cash resources the representatives of the Commercial Bank and the Great Western propose to receive payment of the half year's interest to 31st December, 1869, in Detroit and Milwaukee Railroad 7 per cent. Bonds of the creation of 1st September, 1866.—On behalf of the Board of Directors,

THOMAS DAKIN, President.

London, March 30, 1870.

DIRECTORS.—Mr. Alderman Dakin, Creechurch-lane, London, President. Gilson Homan, Esq., Sandford House, Kirkstall, near Leeds, Vice President. Hon. John Carling, M. P., London, Ontario, Canada; Thomas Faulconer, Esq., 12, Copthall-court, E. C.; John Fildes, Esq., Woodlands, Crumpsall, near Manchester; M. K. Jesup, Esq., New York; Donald MacInnes, Esq., Hamilton, Ontario, Canada; Hon. William McMaster, Senator, Toronto, Ontario, Canada; Paul Margetson, Esq., Clapham-common; George Smith, Esq., 23, Albermarle-street, W.; William Weir, Esq., 12, Somerset-place, Glasgow. Auditors.—John Young, Esq., 16 Tokenhouse-yard, London; Sidney Smith, Esq., 31, Bush-land, London.

☞ John W. Garrett, President of the Baltimore and Ohio Railroad, states that the suspension bridges at Wheeling and Benwood, on the Ohio river, intended to connect that road with the Pan Handle route, as well as the one at Parkersburg, connecting the Marietta and Cincinnati Railroad, will be completed as soon as possible. The latter, it is expected, will be ready by the first of November next.

☞ The following gentlemen have been elected directors of the projected Androscoggin Valley Railroad Company: A. D. Lockwood and J. B. Ham of Lewiston, E. F. Packard of Auburn, Lee Strickland of Livermore, Philo Clark of Turner, Thomas J. Cox of Dixfield. The office of the company is at Lewiston, Me.

A SAFE INVESTMENT.

First Mortgage Bonds of the Chicago, Cincinnati and Louisville Railroad Company.

These bonds are part of the first and only issue of the Company for $1,000,000, covering its entire property, and are at the rate of $13,700 per mile. Of the whole amount $600,000 have been already placed, leaving but $400,000 to be sold. They are 7 per cent. coupon bonds due in 1887, interest payable 1st January and July in New York. The Road is in operation. It is 73 miles long, extending from La Porte on the Lake Shore and Michigan Southern to Peru, where it connects with the Toledo, Wabash and Western and the Peru and Indianapolis Roads. It runs through one of the finest sections of Indiana, and makes a connecting link in the best through line from Chicago to Indianapolis, and thence to Cincinnati and Louisville.

We confidently offer these bonds as a desirable security to investors, AS THE NET EARNINGS OF THE ROAD FROM THE OPENING HAVE BEEN IN EXCESS OF THE INTEREST ON ITS BONDED DEBT, AND ARE CONSTANTLY INCREASING. Besides it is designed to extend the Road to Lake Michigan at New Buffalo or Michigan City the coming season, which will also greatly increase its earnings.

J. A. UNDERWOOD & SON,

Pearls.—Gulf of California.

The revenue returns for 1869 received by last mail from City of Mexico, show that the catch of pearls and shell for the past year on the gulf coast of the territory granted to the "Lower California Company" amounted to the large sum of $78,000.

This, of course, is the valuation of the pearls given by the divers and speculators, and is consequently very much below the actual value of the catch.

A pearl is sold frequently for $20, which resold at Panama at $200, brings $1,000 in Paris; and in many cases much greater profits have been made on very fine gems.

Not over one-half the catch is ever reported to the Government, and the yield of the gulf for 1869 may be safely estimated at $300,000 in gold.

Western Lead Mines.

There has been a large falling off in the production of the Western lead mines. Not many years ago they supplied nearly the whole country. Now the west alone consumes, for various manufacturing purposes, fifteen thousand tons, while it produces scarcely eleven thousand. The whole amount consumed last year in the United States was more than fifty thousand tons, seventy-five per cent. of which was imported. The decreased production of the mines of Wisconsin, Illinois, Iowa, Missouri, and Arkansas, is doubtless due to the superior attractions and profits offered in the gold mines of the far west. Another cause is the exhaustion of the surface beds, necessitating deep shafting, expensive machinery and large capital in order to reach the ore.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." *A dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "†."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterick (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, May 7, 1870.

Stock Exchange and Money Market.

Money has been in more active demand since our last, chiefly for speculative use, but the wants of the principal borrowers have been promptly met on the basis of 4@6, mainly at 5@6 per cent. on call, and 6½@9 per cent. per annum in the discount form. An unusually strong exhibit was made by the city banks in their last weekly statement, which showed a gain of about 5¼ millions of deposits, 3½ millions of specie, and 1⅞ millions of legal tender notes, as the result of the week's movements. The U. S. Sub-Treasury added 2¼ millions to its specie reserve, but reported a loss of nearly a million of currency. The general balance of the office at the opening of business on Monday was 88¼ millions against 82⅞ millions at the commencement of April. The Treasury Department controlled 122½ millions of coin and currency, all told, on the 1st inst., as against 112⅞ millions on the 1st of April. The coin balance on the 1st inst. was 115½ millions, including 33⅞ millions represented by outstanding coin certificates. The currency balance was nearly seven millions.

The specie reserve of the city banks according to the latest return is $28,817,596, against $9,267,635 same time last year. The city bank deposits are now $208,789,350, against $183,948,565 week ending May 1, 1869. The legal tender reserve amounts to $54,944,865, against $56,495,722 same time last year. The circulation now stands at $38,506,393, against $38,972,058 same time last year. The loans are now $269,504,285, against $269,435,160 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged about $108,919,186 a day, against a daily average of $74,076,755 the preceding week, and $71,561,500 the week ending with April 16, 1870. The current week's exchanges average about 123 millions a day. The city banks, last week, reported a gain of $3,507,274 of specie, with $5,205,975 of deposits, and $1,825,219 of legal tender notes. They increased their loans, $488,006; and reduced their circulation, $110,535.

The city bank exchanges on Wednesday were about 129 millions.

National Bank notes to the amount of $230,655 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $323,320,586, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $23,853,223, leaving, with the existing 1,614 banks, (having an aggregate capital of $427,004,247,) an actual circulation at this date, of $299,467,363. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,251,350; and for the public deposits, $16,663,000—making a total of $358,914,350. The Treasury Department last week redeemed and destroyed $785,175 of worn and mutilated fractional currency, and issued $492,325 of new.

The U. S. Sub-Treasury receipts, week ending with April 30, were $3,618,947 in coin, (including $2,713,000 from customs duties,) and $2,646,740 in currency; payments, $1,385,007 in coin, (including $672,407 of coin interest,) and $3,476,915 in currency; balance at the close of the week, $88,231,250 (including $85,123,426, of coin, and $1,913,340 of currency,) against $87,271,970 at the close of the preceding week, showing an increase of $959,280. The business of the Office on the first two days of the current week, was as follows: On Monday, receipts, $561,311 in coin, (including $414,000 from customs,) and $327,222 in currency; payments, $7,873,807 in coin, (including $7,772,407 of coin interest,) and $432,997 in currency. On Tuesday, receipts, $991,150 in coin (including $443,994 from customs), and $1,287,831 in currency; payments, $1,816,469 in coin (including $1,300,000 of coin interest) and $100,419 of currency. The balance at the close of business on Tuesday stood at $89,412,673, (including $2,694,977 of currency, and $76,985,611 of coin,) against $88,453,470 a week previous; and $84,803,804 on April 16, 1870. The aggregate receipts of the office in April were $38,914,767, including $18,198,882 from customs; aggregate payments, $33,538,278 including $836,564 of coin interest; balance at the close of the month, $88,231,250, against $82,854,761 at the close of March.

The U. S. Sub-Treasurer issued in April $1,317,500 of coin certificates.

The U. S. Sub Treasurer retired, last week, $2,428,434 of coin certificates, received for customs.

The U. S. Sub-Treasury general balance on Thursday morning was $89,595,099.

Government revenues have been yielding quite satisfactorily, since our last. The excises, during the week yielded about $3,617,449; customs at the port of New York, $2,601,434, and at the outports about $850,000 (in coin) more, making the grand total income for the week equal to about $7,586,674 in currency. The receipts from excises, thus far in the current fiscal year, commencing with July 1, 1869, have been $137,196,399.

The coin balance of the Treasury Department on Monday was $115,525,214, including $33,840,400 on private deposit; currency balance, $6,952,094.

Gold has been more active and, on the whole, much firmer in price since our last, the range having been from 114⅜@115⅝, and the closing quotations on Wednesday 114⅜@114½. The speculative demand has been more confident. On Monday, Government officially announced that it would sell four millions of Gold in May, namely a million on May 4th, 11th, 18th, and 25th respectively; and further that it would purchase in May, six millions of Five-Twenties as follows: Thursday, May 5, $2,000,000; Thursday, May 12, $1,000,000; Thursday, May 19, $2,000,000; Thursday, May 26, $1,000,000. On Wednesday, the opening sale of Government Gold, for May took place, when the million was awarded at from 114 60@114 76. The subsequent sales at the Gold Exchange were on a lower basis, the market closing less buoyantly. At the close of April the U. S. Treasurer at Washington, drew about $1,000,000 May interest on the Bonds which he holds as Commissioner *ex officio* of the Sinking Fund. This amount he caused to be sold on Saturday, through the Assistant Trdasurer in this city, and at the same time caused $1,000,000 United States 5-20s to be purchased, as with the proceeds, thus compounding or reinvesting the accumulated interest on the Bonds held for Sinking Fund account. The export of specie from this port last week were $774,919, including over half a million of silver.

The coin balance of the U. S. Sub-Treasury on Thursday morning was $77,161,128.

The customs revenue of the port on Wednesday was $658,000.

The actual coin interest payments of the Sub-Treasury on Wednesday were $560,645.

The customs demand for Gold last week, averaged $452,170 a day; thus far, this week, it has averaged $429,000 a day, or equal to a weekly aggregate of $2,574,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $187,056; and since Jan. 1, 1870, $6,308,883, against $8,314,442 same time in 1869. The total customs revenue of the Government, in coin, at this port, thus far in the current fiscal year, commencing with July 1, 1869, has been $112,223,662, against $106,197,350 in 1868–'69.

The customs revenue at the port of San Francisco, from Jan. 1 to April 22, was $2,890,150, against $2,288,890 same time last year.

The exports of specie, from this port, last week, were $774,919, against $569,289 same week last year; total, since July 1, 1869, $24,778,297, against $32,691,854 same time preceding fiscal year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $672,407, and since July 1, 1869, $68,179,646, against $74,633,286 in 1868–'69.

The specie exports from San Francisco, from change compare as follows with former returns: Jan. 1 to April 22d, were $12,995,698, against $12,264,553 same time last year.

Foreign Exchange has been less active closing weak and irregular. Bankers' prime sixty day bills on London closed less buoyantly on Wednesday at 109⅛@109⅜, and on Paris to 5.21¼@5.16¼; sight bills on London to 109¾@110, and on Paris to 5.15⅝@5.13¾. The offerings of produce bills have been fair since our last. The week's exports of domestic produce have been to the currency value of $3,439,671, making the total since July 1, 1869, $169,558,096, against $186,372,995 same time preceding fiscal year.

Government securities have been in active demand, mainly on investment account, at advanced prices, though the later dealings showed a slight reaction from the highest figures of the week. The offering of bonds have been moderate at the going rates. Government bought in two millions of Five Twenties on Thursday at about the open market prices. The last Public Debt statement was unexpectedly favorable. It showed a reduction in the aggregate indebtedness of nearly 11¾ millions, making the aggregate liquidation, since May 1, 1869, $97,933,066.

U. S. sixes of 1881 closed here at 116½@116¾; U. S. Five-twenties of 1862, ex May coupon, 111½@111¾; U. S. Five-twenties of 1864 at 110⅛@110⅜; U. S. Five-twenties of 1865 at 110⅝@112⅞; U. S. Five-twenties of 1865 consolidated, 112⅛@112⅜; U. S. Five-twenties of 1867, 113⅜@113½; U. S. Five-twenties of 1868, 113¼@113⅜; U. S. Ten-forties at 107⅝@107⅞; U. S. Six per cent. currency bonds, 112¼@112½.

Central Pacific Sixes closed on Wednesday at Frankfort at 77@77¼.

The latest quotations at the London Stock Exchange compare as follows with former returns;

	April 20.	April 27.	May 4.
Consols	94¼	94⅛	94⅛
U. S. 5-20's of 1862	88⅛	88⅜	88⅝
U. S. 5-20s, 1865	87¾	87⅞	88⅛
" 1867	89⅛	89⅜	90⅛
" 10-40s	86	86	86
Erie	20¼	18¾	18¾
Ill. Central	113	111½	112
At. and Gt. West		27	27½

A fairly active business has been reported in State and Railway bonds at generally buoyant prices. Central Pacific Sixes closed at 91¼@92. Union Pacific Sixes at 85¾@86; and the new Chesapeake and Ohio First Mortgage Thirty year Bonds at 90 per cent. and accrued interest in currency.

Railway and miscellaneous share property has been unusually active, since our last, at much higher prices, though the fluctuations have been wide and frequent.

Business in domestic produce has been fairly active. Prices have been quoted steady and buoyant in most instances. At the close, the market showed less firmness for cotton, Breadstuffs, and Provisions. Middling upland cotton closed on Wednesday at 23 cts. per lb. The stock of cotton now here is given at about 45,000 bales. The receipts at the port this week, have averaged about 4,600 bales a day. The receipts at all the ports, thus far in the year commencing with Sept. 1, 1869, have been 2,540,000 bales, against 1,897,550 bales in 1868–'9; exports, same time 1,778,150 bales, against 1,210,675 bales same time in 1868–'9; stock on hand at latest dates, 826,500 bales, against 255,150 bales same date 1869. The exports of domestic cotton goods from this port, since Jan. 1, 1870, have been 4,896 pkgs., against 8,812 pkgs., same time in 1869. From Boston, 1,252 pkgs. in 1870, against 3,525 pkgs. same time in 1869.

Foreign goods have been in fair demand and held with confidence. The week's imports of foreign dry goods were to the specie value of $1,692,265; and of foreign merchandise, $5,746,255, making a total of $7,438,520, against $9,703,952 same week last year.

At the Live Stock markets, this week, Beeves have been in less demand at from 12@17c. per lb.; week's receipts, 6,970. Milch cows have been in moderate request, at $40@$100 each, receipts, 90. Veal calves have been less sought after, at from 5@10c. per lb.; receipts, 4,003. Sheep moderately active at from 6@9⅛c.; lambs at 12 @19c. per lb.; receipts, 12,401. Swine quiet at 9⅞@10¼c. per lb., all live weight; receipts, 11,690.

The Ocean freight market has been comparatively quiet since our last. For Liverpool we quote flour at 1s. 3d. by sail, and 1s. 3d@1s. 6d. by steamer, per bbl.; grain at 3½d.@4 by sail, and 4d. by steamer, per bushel; cotton at ⅛d. by sail, and ¼d. by steamer per lb.; and heavy goods 10s. @25s. by sail, and 12s.6d.@85s. by steamer, per ton. Total number of vessels in port on Wednesday, 447.

The following will show the exports (exclusive of specie) from New York to foreign ports for the week ending May 3, and since the beginning of the year:

	1869.	1870.
For the week	$2 809,834	$3,489,671
Previously reported	52,761,008	54,323,425
Since Jan. 1	$55,570,842	$57,763,096

The imports for the week ending April 30, and since the beginning of the year, have been as follows:

	1869.	1870.
Dry goods	$1,880,467	$1,692,265
Gen. merchandise	7,823,485	5,746,255
Total for the week	$9,703,952	$7,438,520
Previously reported	98,793,574	94,223,967
Since January 1	$108,497,526	$101,662,487

The balance in the Sub-Treasury on Wednesday was $89,577,089 97.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Alabama and Florida Union Railway Co.

We are informed that an organization of this Company is being effected through responsible parties here, and that they will be in working condition at an early date. With the liberal State aid, and ample means, there is no doubt that this road from Montgomery to the Florida line will soon be an accomplished fact. Particulars with Messrs. Paulding & Harnickell, 12 and 14 Cliff street, N. Y.

☞ We invite attention to the card of Messrs. J. A. Underwood & Son, and Caldwell & Co., in another column, offering for sale $400,000 of the First Mortgage 7 per cent. coupon bonds of the "Chicago, Cincinnati and Louisville Railroad Company." A full description of these bonds is given in the Advertisement, and in Circulars which will be forwarded upon application.

☞ It is stated that the Fredericksburg and Gordonsville Railroad Co. has purchased four thousand tons of "T" iron already, enough to complete it to Orange Courthouse, a distance of thirty-nine miles. Hands will immediately be set to work in grading the road, building bridges, laying sills and cross-ties and rails. The work is understood to be under the patronage of the Pennsylvania Railroad Co.

☞ FOR SAFE, ELIGIBLE, FIRST-CLASS INVESTMENTS we recommend the BONDS OF THE CHESAPEAKE AND OHIO RAILROAD COMPANY. The railroad line, of which the greater part is in successful and profitable operation, traverses the largest coal and iron fields in the country, and is also a direct, cheap and constant through route between the Mississippi Valley and the seaboard. It is backed by responsible and experienced management, and the bonds based thereon are abundantly secured by mortgage on the whole valuable property. Principal and interest in coin. PRICE 90 AND ACCRUED INTEREST. Coupon or registered. Interest payable May 1 and Nov. 1. Bonds of $100, $500 and $1,000.

An important advantage can now be realized by exchanging Government securities, at current rates, for these bonds, obtaining thereby a reliable investment having thirty years to run, bearing six per cent. gold interest, and a difference of over twenty per cent. for reinvestment.

For further particulars apply to

FISK & HATCH,

Bankers, &c., No. 5 Nassau st.

Northern Pacific Railroad.

The Northern Pacific Railroad Company will receive proposals, until the 1st of June, for the grading, masonry, bridging, etc., of 230 miles of road in the State of Minnesota, extending from the Dallas of the St. Louis river to the Red river, together with everything requisite to complete the road bed for a single track, with necessary side tracks, ready for the rails. Proposals will also be received for cross-ties, rails, spikes and fixtures. It is the intention of the company to push through this portion of the road as rapidly as possible, and to have it open in twelve or fifteen months. In the mean time surveys will be made for other portions of the road, to be put under contract as fast as they can be got ready. Provisions for 3,000 men for seven months have been taken in on the line by sleighs. Plans, maps, profiles, etc., can be seen, and printed circulars containing full information obtained, by calling on Edwin F. Johnson, Esq., Chief Engineer, or J. Gregory Smith, Esq., President, at the office of the company, No. 120 Broadway, N. Y.

West Wisconsin Railroad Bonds.

We call the attention of our readers to the Bonds of the West Wisconsin Railroad Company, which are advertised for sale by Messrs. White, Morris & Co., of 29 Wall street. These bonds are Government first mortgage, 7 per cent., Gold, sinking fund, with coupons payable January and July, free of tax, and are secured by a land grant which by disinterested and competent judges is estimated to be worth twice the amount of the mortgage when the road is completed. The proceeds of the lands are to be held by the Trustees as a sinking fund for the purchase or liquidation of the bonded debt. The road, when completed, will enter at once upon a heavy freight business between St. Paul and Milwaukee and Chicago—it being by far the shortest route between these important points. With these bonds at 90 flat, and gold at 115, together with the accrued interest from 1st January, it makes them a 12 per cent. investment the first year and 9 per cent. thereafter. The investor can at a glance appreciate the safety and cheapness of this security.

The Public Debt Statement.

The following is a recapitulation of the public debt statement April 30, 1870:

DEBT BEARING COIN INTEREST.

Five per cent. bonds	$221,589,300 00
Six per cent. bonds	1,886,353,900 00
Total	$2,107,943,200 00
Accrued interest	52,821,778 66

DEBT BEARING INTEREST IN LAWFUL MONEY.

Three per cent. certificates	$45,535,000 00
Navy Pension fund 3 per cent	14,000,000 00
Total	$59,535,000 00
Interest	310,443 33
Debt on which interest has ceased since maturity	$3,790,567 35
Interest	$490,553 30

DEBT BEARING NO INTEREST.

Demand and legal tender notes	$356,107,221 00
Fractional currency	39,354,321 08
Gold certificates of deposit	33,840,400 00
Total	$429,301,942 08
Total amount outstanding	$2,600,570,709 43
Total interest	53,622,775 29
Total debt, principal and interest, to date, including coupons due and not presented for payment	$2,654,193,484 72

AMOUNT IN TREASURY.

Coin	$115,525,213 63
Currency	6,954,094 06
Sinking fund in United States coin interest bonds, and accrued interest thereon	33,266,162 68
Other United States coin interest bonds purchased, and accrued interest thereon	77,583,680 00
Total	$233,329,150 37
Debt less amount in Treasury	$2,420,864,334 35
Debt less amount in Treasury April 1, 1870	2,432,562,127 74
Decrease of debt during the past month	$11,697,793 39
Decrease of debt since March 1st, 1869	$104,598,925 66

Bonds issued to the Pacific Railroad Companies, interest 6 per cent. payable in lawful money:

	Amount outstanding.	Accrued interest, not yet paid.
Union Pacific	$27,075,000	$541,500 00
Kansas Pacific, late Union Pacific, Eastern division	6,303,000	126,060 00
Sioux City and Pacific	1,628,320	32,566 40
Central Pacific	25,881,000	511,795 78
Central Branch Union Pacific—assignees of Atchison and Pike's Peak	1,600,000	32,000 00
Western Pacific	1,970,000	38,266 40
Totals	$64,457,320	$1,282,188 58
Interest paid by United States		$6,879,832 51
Interest repaid by transportation of mails, etc.		2,063,784 16
Balance of interest paid by United States		4,816,048 35

☞ Articles of consolidation of the Bennington and Rutland and Lebanon Springs Railroad companies were filed in the office of the Secretary of State on the 28d of April. The officers of the road are Augustus Schell, President; R. J. Niven, Vice President; Russell C. Root, Secretary; Cornelius Vanderbilt, Jr., Treasurer. The road extends from Chatham Four-Corners, New York, to Bennington, Vermont. The capital stock is fixed at $4,000,000.

Journal of Railroad Law.

RAILROAD COMPANIES—JURISDICTION OF STATE COURTS OVER FOREIGN JUDGMENTS.

The facts of the late case of Latimer *vs.* The Union Pacific Railway Eastern Division (43 Mo. 105) are fully and clearly stated in the following opinion by

WAGNER, J.—This was a suit brought upon a judgment rendered in the Supreme Court of the State of New York against the defendant, a corporation created under the laws of Kansas. The answer denied that there was any judgment that was binding on the defendant. It appears from the transcript that service of the summons was had upon Adolphus Meier, one of the directors of the corporation, whilst he was temporarily in the City of New York. There was no appearance at the return term, and judgment was taken by default. It is alleged that the cause of action arose in that State, and that the service was good under the code of procedure in relation to the service of writs, which provides that "If the suit be against the corporation the service shall be to the president or other head of the corporation, secretary, cashier, treasurer, a director, or managing agent thereof; but such service can be made in respect to a foreign corporation only when it has property within this State, or the cause of action arose therein, or when such service shall be made within this State, personally, upon the president, treasurer, or secretary thereof."

The well-established and settled principle is, that to give a court jurisdiction, a real defendant, against whom the plaintiff is entitled to a judgment, must be found and served with process within the limits of the jurisdiction; or some property or chose in action of his must be found there upon which the court can proceed *in rem*.

Every attempt on the part of one nation or State by its Legislature, to grant jurisdiction to its courts over persons or property not within the territory, is regarded elsewhere as mere usurpation; and all judicial proceedings in virtue thereof are held utterly void. This proceeds upon the known maxim, "*Extra territorium jusdicenti impune non paretur.*" (Story Confl. Laws § 539.)

As regards action in the nature of proceedings *in rem*, there is very little difficulty. To enforce any right of action against property, either real or personal, it must be within the jurisdiction or possession of the tribunal assuming to give judgment aginst it. (Rose *vs.* Himeley, 4 Cranch, 241.) Of this description may be cited the action of attachment. Where the proceedings by attachment terminate in a judgment against the person of the defendant, they rest upon the same grounds as other actions *in personam*, and must disclose the same kind of service of process. If there is a failure in this, the judgment will not be recognized in other jurisdictions as extending beyond the property actually seized or levied upon; and hence, a personal judgment obtained in a sister State, upon notice to the defendant by publication only, there being no appearance of the defendant, will be deemed null and void outside the State in which it was rendered, and will support no action here. (Winston *vs.* Taylor 28 Mo., 82, and cases there cited.) The authorities all concur in denying jurisdiction in actions *in personam* over non resident foreigners upon anything short of actual notice given within the territorial limits of the forum, or voluntary appearance there.

In the case of D'Arcy *vs.* Ketchum 11, How. U. S. 165, it appeared that a judgment had been rendered in the State of New York in favor of Ketchum against Gossip and D'Arcy upon a partnership note of theirs. There was personal service on Gossip and no service on D'Arcy, who was an inhabitant of Louisiana. Judgment was rendered against him in accordance with a New York statute which provided where joint debtors were sued, and one of them was brought into court, judgment should go against the others in like manner as if they were served with process, the service of process upon one being regarded as constructive service upon the rest.

An Action upon this judgment was brought in the Circuit Court of the United States against D'Arcy. The court held that under the act of May 26, 1790, the record was entitled to full faith and credit and gave judgment accordingly. This judgment of the Circuit Court was reversed in the Supreme Court on appeal, where it was held that the Courts of New York acquired no jurisdiction over D'Arcy; and that, not being a citizen or inhabitant of that State, he could not be affected by laws to which he was not amendable.

The question which arises here seems to be well settled in New York, and the courts there have given the statute a practical construction.

In Hulbert *vs.* Hope Mutual Insurance Company, 4 How. Pr. 275, it is decided, after great consideration in a well reasoned opinion, that the service of a summons upon a president of a foreign corporation, who happens to be temporarily in that State, and who does not voluntarily appear to the action, does not give the court jurisdiction of the corporation for the purpose of rendering personal judgment upon contracts made in the State, or for debts due to residents of the State—such notice being simply regarded, for all practical purposes, as a statutory notice that proceedings are about to be instituted against the property of the defendant, and that an action against a foreign corporation is to be deemed a proceeding against its property only, unless there is a voluntary appearance. In other words it amounts to constructive notice only against the foreign corporation, and is a substitute for notice by publication. The same doctrine is repeated and affirmed in Brewster *vs.* The Michigan Central Railroad Company 5 How. Pr. 183. And in the very case mostly relied on by the plaintiff in error it is distinctly stated that the section of the Code (§ 134) authorizing the service of the summons on the president, etc., of a corporation is merely a substitution of that mode for service by publication as provided in another section. (Bates *vs.* New Orleans, etc., R. R. Co., 18 How. Pr. 576.)

The proceeding in this case was strictly *in personam*. It does not appear that the defendant had any property in the State of New York; and, if it had, no effort was made to subject it to the jurisdiction of the court. This being the case, and as there was no voluntary appearance of the defendant, the service of process on Meier was ineffective, and the judgment must be held null and void.

Judgment affirmed.

Northern Pacific Railroad.

The proposals for contracts for this important railroad enterprise is now open, the section to be immediately constructed extending from Duluth, West, some two hundred miles. There are many considerations of general interest which commend this road to the public favor, but we have in this section a particular interest in desiring its prosperity, five millions of the stock being held in Pittsburg. That this route will be a commanding and successful one, is beyond all reasonable question. It will develop hundreds of thousands of square miles of territory, much of which is adapted to agriculture and grazing, richly supplied with timber and minerals, and greatly aided by noble water courses, and a delightful climate.

It has been over and over again demonstrated that it is nearer to Puget Sound, the Pacific terminus, by three hundred miles than any other route, that it is the directest line from the East to the West, that it is not so much exposed to obstructions by snow, that the grades are lighter, and that the country it traverses is susceptible of a finer agricultural development than that crossed by other routes. There will be an organized effort to colonize the country dominated by the road, and of its success we have no apprehension whatever. Soil, climate, timber, minerals and water invite population, and few years will elapse before there will be a lucrative way traffic along a large portion of the route. We desire to call attention to one significant fact, that even the papers most bitterly hostile to any Congressional appropiation in aid of the road, have based their opposition to the principle of Government promoting railronds, but have admitted that the advantages claimed for this particular route did exist. Within decent limits it is wise policy on the part of the Government to foster great national thoroughfares which open up and develope the national domain, build communities, increase the general wealth and create new bonds of union. The Northern Pacific Road has received no moneyed assistance from the public treasury. It solicits none. The value of the original grant of land has been impaired by the occupancy of squatters, and it has asked that an equivalent be conferred. It will however enlist in its behalf individual capital and individual enterprise. Shrewd and far-seeing capitalists will not be blind to the advantages of this magnificent route which will one day be the channel of the silks and spices and teas of the East and the rich products of the West, and which will assuredly, berore many years stretch its iron lines through valleys filled with herds, and villages teeming with people. Nature beckons on the enterprise with smiles of welcome, and firm hand and stout heart go forth to respond to the invitation. The road will be built and it will be the crowning triumph of the grand highways which unite the Atlantic with the great ocean on the other side of our continent.—*Pittsburg Chronicle.*

Michigan and Mansfield R. R.

Committees, consisting of J. G. Wait and Richard Reed, of Sturgis, Michigan, and Wm. Strong and E. G. Fay, of Bryan, Ohio, were in Mansfield, April 22d, in the interest of a new railroad project between that point and Sturgis, Michigan. Organizations are already completed, and officers elected in Michigan, under the name of Sturgis and Mansfield Railroad, and in Indiana under the name of the Michigan, Indianapolis and Ohio Railroad.

A meeting of leading citizens was held which resulted in the preliminary steps being taken for the incorporation of a company. Papers were made out, certified and acknowledged, and will be filed at once at the office of the Secretary of State. The title of the Company in Ohio, having *termini* at the State line and Mansfield, is the Michigan and Mansfield Railway Company. Capital stock, six hundred thousand dollars.

The following persons are incorporators: H. H. Sturgis, Wm. Bushnell, Hubbard Colby, Willard S. Hickox, James H. Cook and Henry C. Hedges, of Mansfield; Wm. Stough and E. G. Fay, of Bryan, Ohio; Chas. Foster, of Fostoria, Ohio.

The road is to pass through the counties of Williams, Henry, Fulton, Hancock, Wood, Seneca, Crawford and Richland.—*Railroad Record.*

Greenville and Columbia Railroad.

The receipts from operations of this road for the year ending September 30, 1869, were:

From passenger		$114,196 61
" freights		274,506 89
" mails		11,400 00
		$400,103 50
Expenditures:		
Operating expenses	$247,686 52	
New Iron	17,924 21	
		265,610 73
Net earnings		$134,492 77

The road and outfit, including real estate, cost $3,081,213 50. The total amount of capital stock paid up is $1,510,374 54. The bonded debt of the company is as follows:

First mortgage bonds outstanding	$262,000 00
Non mortgage bonds outstanding	260,500 00
Guaranteed bonds due in 1881, 1882 and 1883	688,000 00
Guaranteed bonds in 1888	118,500 00
Certificates of indebtedness, guaranteed, due in 1888	429,293 30
Bonds and certificates issued under second mortgage	54,063 68
Coupons of first mortgage bonds outstanding	3,745 00
Coupons of non-mortgage outstanding	66,570 00
Coupons of guaranteed bonds outstanding	7,997 50
Coupons of second mortgage bonds and certificates	9,461 15
Total	$1,900,130 63
This is subject to a reduction of 2/3 on the non-mortgage bonds and coupons, say	218,046 66
Whole amount of bonded debt when adjusted	$1,682,083 97

The following bonds and coupons have not been reported to the company, for either the payment of interest or adjustment of any kind, and as the company has advertised for them for three or four years, and the courts for about two years, the presumption is that most of them are lost or destroyed, and will never be presented as a claim against the company to wit:

First mortgage bonds	$22,500 00
Non-mortgage bonds	260,500 00
Guaranteed bonds	50,000 00
Coupons from first mortgage bonds	3,745 00
Coupons from non-mortgage bonds	66,570 00
Coupons from guaranteed bonds	7,997 50
	$411,312 50

All the interest upon the entire mortgage and guaranteed debt that has been presented has been funded up to the 1st July, 1868, and from that to the present time paid in cash.

☞ Geo. P. Rumbough has been appointed Chief Engineer of the Iron Mountain and Helena Railroad with instructions to begin at once the preliminary surveys from Helena to the Memphis and Little Rock Railroad.

☞ Work is progressing on the Troy and Greenfield Railroad. A gravel train is running between Greenfield and Stillwater. The road will be open to Shelburne Falls for passenger and freight traffic about the last of May.

☞ FIRST MORTGAGE SEVEN PER CENT. BONDS of the WEST WISCONSIN RAILROAD COMPANY, PRINCIPAL AND INTEREST PAYABLE IN GOLD, FREE OF GOVERNMENT TAX.

FIFTEEN YEARS TO RUN FROM JANUARY, 1870.

LAND GRANT OF OVER 1,000,000 ACRES FROM GOVERNMENT, upon which, together with road and all its property, these bonds are a First Mortgage.

70 MILES OF ROAD FINISHED AND RUNNING, from which income is already derived, with rapidly increasing receipts.

This road, with its connections, forms an AIR LINE FROM ST. PAUL TO MILWAUKEE, and is a SAVING OF NEARLY 100 MILES on the great North-western route to Chicago.

ELEVEN COUNTIES along the line of this road DONATE $50,000 EACH, with right of way for construction.

This Company is EXEMPTED FROM TAXES UPON ITS LANDS FOR FIFTEEN YEARS, by special act of Legislature.

These bonds have the option of being converted into stock, and are receivable at par, as cash, for the purchase of any of the lands of the Company.

The immense tonnage of grain and lumber accumulating weekly at St. Paul must, upon completion of this road, be carried to Milwaukee and Chicago by this direct route.

The advantages, resources, connections and land grant of this Company are fully set forth in a pamphlet which can be obtained at our office.

A large number of these Bonds have been placed in Europe, and we now offer a LIMITED NUMBER IN THIS MARKET AT 90 FLAT, and recommend them with confidence to our friends and capitalists, fully believing them to be one of the safest and cheapest investments ever offered.

WHITE, MORRIS & CO.,
Bankers and Financial Agents.
No. 29 Wall-st.

☞ The stockholders of the Marietta and Cincinnati R. R. Co. have voted to accept the provisions of the recent laws of the State allowing bonds to be issued with power to vote. They also ratified the previous action of the directors, authorizing the issue of $3,000,000 third mortgage bonds with powers to bondholdholders contemplated by this law.

☞ The Worthingston's Valley, Hampstead and Bachman's Valley Railroad Company was organized at Hampstead, Carroll Co., Md., on the 30th inst. This road will connect one of the most fertile sections of Carroll Co. with the Western Maryland and Northern Central Railroads.

☞ B. F. Loney, Benj. Price, Moses Weisenfeld and A. P. Burt have been appointed directors of the Western Maryland Railroad Company on the part of the city of Baltimore.

☞ The Worcester and Nashua Railroad Company has begun to lay a double track between Worcester and Nashua, and will try to have it completed as far as Groton Junction in less than one year.

☞ The survey of the Mt. Dallas and Bedford (Pa.) Railroad will be commenced in a few days by Mr, Fulton.

Ohio Railroad Law.

The following is a copy of the act passed by the Legislature of Ohio on the 6th of April, 1870, entitled "An act to extend the time for the completion of unfurnished Railroads:"

SECTION 1. *Be it enacted by the General Assembly of the State of Ohio,* That in all cases in which any railroad company heretofore incorporated has been duly organized under any law of this state, and has commenced in good faith, the construction of any portion of its railroad, and has made expenditures thereon, and the act incorporating said company, or any law of this state, requires the completion, sufficient for use, of said railroad, or any part thereof, within any limited period after the passage of the ac incorporating such company, or after the organization thereof, and such company has not so completed said railroad or such specified part thereof within said limited period, and such period has not expired, or has been temporarily extended by order of any court of competent authority or by act of the Legislature of the State of Ohio, it shall be lawful for said railroad company to proceed in the construction of said railroad or such part thereof, and complete the same at any time within five years from and after the expiration of the time limited by the laws in relation thereto. *Provided,* however, that the provisions of this act shall not apply to any railroad company that has completed any portion of its road under its original or amended charter, and has for ten years previous to the passage of this act abandoned or suspended work upon the remaining portion of its line of road.

SEC. 2. This Act shall take effect from its passage.

☞ The Wheeling *Register* says that the contracts for the completion of the Chesapeake and Ohio railroad from Gauley to the Ohio (100 miles) have been awarded, and the time for their fulfilment fixed, under heavy penalties, at May 1, 1871. The contracts for the heavy work on the line from Gauley eastward have also been let. This portion of the road, owing to the tunnelling, heavy cuts and embankments along the route, will require two and a half years to finish. About 2,000 laborers are already at work and, their number will be increased to 6,000 within two weeks.

☞ The distance completed on the east side to the central shaft of the Hoosac tunnel was, on the 22d inst., 6,946 feet; from the west end to the first shaft, 2,447 feet; from the shaft to the face, 2,372 feet, making a total at the west end of 4,819 feet, and a total of 11,765 feet at both portals. The work is now progressing at the rate of four feet a day from the west end, and five or six feet from the east end. The central shaft is progressing at the rate of a foot a day, and will be completed, at the present rate of progress in about four months.

☞ A laboring force of 2,400 men and 400 horses is now engaged in the work of construction of the Pittsburg and Connellsville railroad, between Connellsville and Cumberland. The progress making is regarded by the officers of the road as in the highest degree satisfactory, and there is reasonable ground for the expectation that the close of the year 1870 will witness its completion.

☞ A project is on foot in Gallatin, Tenn., to construct a cheap railroad from that city to the Cumberland, a distance of three miles, for the purpose of bringing coal and timber from the river. It is thought the road proposed can be built and equipped at a cost of $7,500 per mile.

☞ The jury, in the case of Patrick Lane, who fell from the Hackensack bridge, returned the following verdict: "We find that Patrick Lane came to his death by accidentally walking or falling from the Hackensack bridge into the river, after being ordered out of the cars of the New Jersey Railroad Company; and we censure the company for ordering conductors to put persons off the cars except at stations, and for not having a rail at each side of the bridge."

☞ Mr. Henry H. Boody, of No. 12 Wall street, long and favorably known on the street in connection with important and successful railway enterprises, received into partnership, the 1st day of May, his nephew, Mr. D. A. Boody, and his son, Mr. H. P. Boody, for the transacting of a general banking and commission business, under the style and title of Henry H. Boody & Co.

Northern Pacific Railroad.

To Railroad Contractors.

SEALED PROPOSALS will be received at the office of the Northern Pacific Railroad Company, 120 Broadway, corner of Cedar street, New York, until Wednesday, the 1st day of June, 1870, at 12 o clock noon, for the grading, masonry, bridging and ballasting of that portion of the Northern Pacific Railroad in the State of Minnesota extending from the Dallas of the St. Louis river to the Red river, the western boundary of Minnesota (a distance of about 230 miles), including everything requisite to complete the road bed for a single track and necessary side tracks, ready to receive the rail superstructure. Proposals may be for the work in detail or by the mile.

The said company will also receive proposals, at the same time and place, for the timber cross-ties, and for the iron rails, spikes and fixtures for the road as above. The iron rails to be delivered on the dock at Duluth, Minnesota, or at the crossing of the Mississippi River, and the ties to be received according to blank forms which will be ready for distribution on Wednesday, May, 4, 1870, at the office of the company, as above, where plans of the structures and maps and profiles of the road, with full specifications, can then be seen, and the time allowed for completion of the contracts made known.

The company reserve the right to reject any or all bids not deemed to be for the interest of the company.

Printed circulars, containing full information, will be furnished on application, by mail or otherwise, to Edwin F. Johnson, Chief Engineer, or to the President of the company, at the office, 120 Broadway, as above.

The San Antonio and Mexican Gulf Railroad.

FOR SALE AT PUBLIC AUCTION.

HEAD QUARTERS FIFTH MILITARY DISTRICT, State of Texas.
CHIEF QUARTER MASTERS OFFICE, Austin, Texas, April 11th, 1870.

IN COMPLIANCE WITH THE ORDER OF THE Secretary of War, dated March 26th, 1870, there will be sold at Public Auction at Indianola, Texas, between the hours of 12 M. and 3 P. M., on Wednesday, the 25th day of May, 1870, all the right, title and interest of the United States of America in and to the

San Antonio and Mexican Gulf Railroad from Lavaca to Victoria, Texas.

The Sale will include the Road Beds, Tracks and Sidings, Buildings, Water Stations, Turn Tables, &c.

The Railroad Materials and Supplies pertaining to the road, together with the Rolling Stock, Cars, Machinery and other Equipments, as follows:

28 Miles of Track, (more or less).
1 Passenger Car.
1 Baggage Car.
6 Box Cars.
6 Platform Cars.
1 Engine and Tender.
1 Engine.
1 Engine House at Lavaca.
1 Depot Building at Victoria.
1 Depot Building at Lavaca.
1 Machine Shop at Victoria.
20 prs. trucks loose at Depot in Victoria.
4 prs. trucks under 2 Platform Cars.
1 Miscellaneous lot of Railroad Material, Boxing Straps, &c.
1 Worthless lot of Blacksmiths Tools.
1 Mixed lot of Machinery being odd pieces, &c., in shops at Victoria.
8 prs. trucks lying loose along the Road between Lavaca and Victoria.
2 prs. driving Wheels at Victoria.
1 Tank at Victoria.
1 Pistern at Victoria.
1 Iron Safe.
2 Stoves.
2 pr. Scales.
3 Hand trucks.
1 Cross Cut Saw.

The property may be inspected on Application to the agent of the Road and any information desired may be obtained from the Chief Quarter Master Fifth Military District, at Austin, Texas.

Full particulars given on day of sale.

Terms of payment cash in United States Funds.

By order of

Portable and Stationary Engines; Car Irons Complete; Wheels and Axles; IRONS FOR RAILROAD BRIDGES; and other articles required by Railroad Companies.

SECURITIES OF ALL KINDS NEGOTIATED ON FAVORABLE TERMS.

Locked Safety Valves.

TO

MASTER MECHANICS

AND

LOCOMOTIVE BUILDERS.

THE UNDERSIGNED OFFERS FOR SALE, SAFETY VALVES, effectually guarded against tampering, invented and patented by himself; patent bearing date Sept. 14th, 1869.

Said Valves are sold with Spring, Guard, Studs, and Nuts, complete, and all ready to put on to boiler domes. Price for size suitable for Locomotives, $27 50.

The Valve and Seat are made of hard composition. Spring of best cast steel.

The above Valve is sensitive, and is not liable to stick from corrosion; and is particularly well suited for large stationary and marine boilers, giving large area for escape of steam, and requiring a short lever, and light weight or spring, for holding Valve against pressure.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,
IRON AND STEEL MANUFACTURERS,
No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

BRADY'S RAILROAD LANTERNS.

The strongest and best in use; are made principally of Malleable Iron. Here lies the secret of their strength, the frame being capable of supporting a weight of Four or Five Hundred Pounds; and yet they are little heavier than ordinary Lanterns. The guards are rivited through the top and bottom flanges, the rings wound with wire where they cross the guards, and the whole frame tinned, uniting each piece with the other, making it the *strongest* Lantern ever offered to the public. RAILROAD MEN *especially* cannot fail to see that it will be economy to purchase these Lanterns, as there is no part that can be broken with ordinary use, except the Globe, which being adjustable, is easily and cheaply replaced with any color and at a small cost; the greater weight being at the bottom, it cannot readily upset. Now used on the following Railroads: New York and New Haven; Hartford and New Haven; Shore Line, Conn.; Providence and Worcester; Boston and Maine; Conn. and Passumpsic Rivers; Fitchburg; Rensselaer and Saratoga; Troy and Boston; Boston and Providence; Boston, Clinton and Fitchburg; Charlotte, Columbia and Augusta; Connecticut River; European and North American; Hartford, Providence and Fishkill; Mobile and Ohio; Portland and Kennebec; Boston, Hartford and Erie; Worcester and Nashua; Lake Superior and Miss.; Hudson River, and many others.

The trade supplied from our Store, or from the Factory, New Britain, Conn,

$18 IMPROVED WALTHAM WATCHES.

GET THE BEST, AND BUY WHERE YOU CAN BUY THE CHEAPEST.

Engineers, Railroad Men, Master Mechanics and Machinists, if you wish to obtain a genuine Waltham Watch, with all the late improvements, and run no risk whatever of not obtaining a reliable timekeeper, send for Descriptive **PRICE LIST**, giving full particulars of Watches, style and quality of cases, or call and examine. In Coin Silver Cases, **$18.** In 18k Gold Cases, **$90.** Ladies' Size, **$70.** Every Watch thoroughly examined and regulated, and if any one should prove imperfect, return it at once and we will correct or exchange it for one that is perfect, FREE OF CHARGE. H. O. FORD & CO.

Eight years with American Watch Company, 64 Tremont street, opposite Tremont House.

Watches sent to any address, and by selecting from Price List you can get as good a Watch as if selecting in person.

James River and Kanawha Canal.

The United States Senate recently directed the Committee on Commerce to inquire into the expediency of causing a survey and examination to be made of the line of water communication between the James and Ohio Rivers, with a view of ascertaining the practicability and utility of such water communication for the transportation of military and commercial supplies. On Thursday the Committee were, at their own request, discharged from the further consideration of the subject. As explanatory of the reason for their request they submitted to the Senate a letter on the subject from Gen. HUMPHREY, Chief of Engineers, in which he says that the propriety of reviving at this time the old project of a continuous canal navigation to the Ohio River by this route is questionable. Judging by the analogous improvements—the Chesapeake and Ohio and the Pennsylvania Canals, and in view of the probable speedy completion of the Chesapeake and Ohio Railroad, so as to give a through line of road from Richmond to the Ohio River, the latter enterprise, in the opinion of the General, would serve military purposes infinitely better than a canal, and would probably supplant any canal likely to be built, necessarily limited in capacity to admit it to the supply of summit water and encumbered with the amount of lockage indispensable to overcome the intervening elevation.

Boston, Hartford and Erie Railroad.

The following is a summary of the provisions of the bill reported by the Railway Committee of the Massachusetts Legislature for granting additional State aid to secure the completion of this road:

First. It provides for an additional loan of three and a half millions of dollars by the State, in five per cent. scrip, expressed either in the sterling currency of Great Britain or in Federal currency, as the Governor and Council shall determine, and payable in the year 1900.

Second. No scrip shall be issued until a majority of the shares of the capital stock of the corporation shall have been transferred to, and delivered to, the Treasurer of the Commonwealth, to be held by him for the purpose of voting at all meetings of the Corporation, and said majority of shares shall be so delivered before the first day of January next.

Third. The company shall have thirteen Directors, eight of whom shall be chosen by the Treasurer, voting upon the stock transferred to him, and shall be persons named and approved by the Governor and Council.

Fourth. No scrip shall be delivered until after a new election of officers in accordance with the above provisions, nor until the Trustees of the Berdell bonds shall be persons who are satisfactory to the Governor and Council.

Fifth. No scrip shall be issued until an agreement has been executed in a manner satisfactory to the Governor and Council, that the company will comply with the provisions of this act; will hold the Commonwealth harmless from all expenses, loss or damage on account of said scrip; will pay the principal and interest when due, with cost of exchange thereon; and until the company shall have delivered to the State, Berdell bonds to the amount of three and a half millions of dollars.

Sixth. No scrip is to be delivered until contracts are made with suitable persons for the completion of the road between Boston and Hartford, within six months from the time of contract, for less than $500,000; and from thence to the Hudson, at Fishkill, within eighteen month from the time of contract, for less than $2,800,000.

Seventh. No scrip is to be issued or delivered until all attachments and other liens or incumbrances upon the property of the company—excepting existing mortgages, intervening between the recording of the Berdell mortgage and a mortgage to be made, under the provisions of a vote of said railroad company, to Dwight Foster, Benjamin E. Bates, and Edward C. Sherman, trustees—shall have been released, removed, or disposed of for the benefit of the Commonwealth, and said last-named mortgage shall have been duly executed in such manner as to create, after the same shall have received all necessary ratification and confirmation, a valid and effectual lien upon the franchises and all the property, real and personal, now owned or which may hereafter be acquired by the company, subject only to the Berdell mortgage, and the incumbrances prior thereto so far as they embrace and cover the same; nor until all the real estate, franchises and other property held or claimed to be held by the Boston, Hartford and Erie Ferry Extension Railroad Company, and leased or claimed to be leased to the Boston, Hartford and Erie Railroad Company, shall have been conveyed to the last named railroad company, or such provisions and agreements shall have been made respecting the same as shall be satisfactory to the Governor and Council.

Eighth. The scrip or the proceeds thereof is to be delivered only to the persons who agree to construct said railroad, or to their legal representatives or assigns, and upon the certificate of the State Engineer that they are entitled to the same by the terms of their contracts; and the scrip is to be issued by the Treasurer, under the direction of the Governor and Council; and on each $100,000 issued there shall be reserved and paid to the Commissioners of the sinking fund an amount not less than shall, with the accumulations, produce at the maturity of such scrip an amount equal to the scrip so issued.

Economy of Steel Rails.

The following calculations exhibit very clearly the great economy of using hammered steel rails on all roads which have so heavy a traffic that four years will fairly represent the average life of the best unhammered iron rails. The cost of re-rolling is estimated at $30 per ton, and the loss, at each renewal, from wear of iron, expense of taking up and relaying, and other contingencies, at $15 per ton.

Years' Duration.	20	40	60
Best hammered steel rails.	$110	$110	$110
Compound interest a 6 p.c.	242	1,021	3,518
Total cost of steel rails....	352	1,131	3,628
Cost of iron rails....	76	76	76
Compound interest.....	167	705	2,431
Expense of re-rolling.....	180	405	680
Compound interest.....	153	1,141	4,809
Total cost of iron rails....	577	2,328	7,946
Deduct cost of steel rails..	352	1,131	3,628
Saving pr ton by using steel	224	1,197	4,317
Present worth of saving...	69	116	130
Present saving per mile...	6,995	11,640	13,088
Increase of dividends on a road costing $40,000 per mile, per cent....	17.49	29.10	32.72

Therefore, if the average life a steel rail is only twenty years (= 5 iron rails), it is as cheap to lay steel rails as to lay the best iron rails at a cost of $6 05 per ton ($76—69 95 = 6 05).

If the life of steel is forty years (= 10 iron rails), which is probably a moderate estimate, a saving of $4,040 per mile could be made by laying steel even if the best iron rails were offered as a gift.

If the life of steel is sixty years (= 15 iron rails), an estimate which is more than justified by the experience of the Pennsylvania, the Philadelphia, Wilmington and Baltimore, and other railroads, and by a long series of experiments at home and abroad, the saving effected, by having the whole road in steel, would be sufficient to add nearly 2 per cent. to the annual dividends, on a road which could pay 5 per cent. with a track of the best iron rails.

On roads with a lighter traffic, the saving is still an important consideration. If, for example, the life of an iron rail is ten years, and a steel rail will only wear out five iron rails, the present worth of the saving by the use of the steel is $17 87 per ton, which makes steel rails at $110 as cheap as the best iron rails would be at $58 63 per ton.

Even allowing 8 per cent. compound interest for the use of money, it would be cheaper to buy steel rails that would wear out in twenty years than to pay $22 for iron rails that would require re-rolling in four years.

The great increase of saving on curves and grades, in yards, and in other places where the wear is so great that the life of the best iron rails is two years or less, is shown in the following table, which is computed at the prices now ruling ($110 per ton for the best steel, and $76 for best iron) allowing 6 per cent. compound interest.

The following table is meant to show the present worth of saving on 100 tons (about one mile) of steel rails, taking the wear of iron rails at two years, one year, six months, and three months respectively, and on the different suppositions that 1 steel rail will equal 3, 5, 10, 15, or 20 iron rails:

Iron wear.	Two years.	One year.
As 1 to 3....	$4,196 41	$4,850 18
As 1 to 5....	10,165 03	12,192 99
As 1 to 10.....	20,252 52	27,207 60
As 1 to 15....	25,885 30	38,427 41
As 1 to 20....	29,030 62	46,811 59
Iron wear.	**Six months.**	**Three mos.**
As 1 to 3....	$5,210 01	$5,401 48
As 1 to 5....	13,326 96	13,944 18
As 1 to 10....	31,637 49	34,222 38
As 1 to 15....	47,027 31	53,045 19
As 1 to 20....	61,057 10	70,417 01

There are some roads of heavy traffic, but only a few, which claim that they can get a year's average service for the best iron rails, where the wear is most severe. The above table shows that by substituting a steel rail which would wear only five years they could effect a saving which would be equivalent to an immediate addition to their capital of $121 on every ton, or $12,192 on every mile of steel laid down. In the extreme case supposed, when the life of an iron rail would be only three months, and the life of a steel rail five years, the saving would be $70,417 07 per mile.—*Monetary and Commercial Times.*

Cincinnati, Hamilton & Dayton Railroad.

PRESIDENT'S OFFICE C., H. & D. R. R. Co.
CINCINNATI, May 3, 1870.

To the Stockholders:

GENTLEMEN—In accordance with the requirements of the charter, I herewith submit a statement of the business of your road for the year ending March 31, 1870. It will be seen from the report of the Secretary that the

Gross earnings have been	$1,191,457 45
Transportation expenses	579,964 08
Leaving for interest on bonds, taxes and dividends.....	$611,493 37

The working expenses have been 49.76 per cent. of the gross earnings.

The earnings per mile have been. $19,357,062	
Number of passengers carried.....	669,252
Number of tons of freight removed in narrow gauge cars	395,482

During the past year two dividends have been paid to the stockholders, one of five and the other of four per cent., free of Government tax. The net earnings have been a fraction over eleven per cent.

The road has been operated with its usual freedom from accidents and loss of life, and maintained in first class condition.

The business of the Dayton and Michigan railroad continues to increase, and meet the expectation of our company. From the time it was leased, it has earned more than sufficient to pay running expenses and the interest on its bonded debt, which was the consideration of the lease. Its property has been largely increased by the purchase of valuable depot grounds in the city of Toledo, measuring about half a mile of river front, and by building freight depots for the increasing business at that important point. It is generally conceded that the location of the depot grounds in Toledo of the D. & M. road are preferable to those of any other railroad terminating there.

The equipment of the road has been largely increased and kept in first-class order.

More depot buildings are required at different stations on the line of the road, and the fencing must be extended.

Arising out of jealousy and differences springing from the location of the county seat between Troy and Piqua, an unfortunate location of a few miles, both for the interest of the road and for Piqua, was made. The citizens of both Troy and Piqua are at this day desirous that the location should be changed; and it is believed that the additional business to be derived from both places would fully justify the measure if the company had the means on hand to make the improvement. The change involves the removal of about nine miles of track from one side of the river to the other, and a new bridge over the Great Miami in place of the present one that can last but a few years longer.

It will be remembered by our stockholders that at the time the Dayton and Michigan road was leased perpetually to our company, a bonus of one million dollars of their stock was made a part of the consideration. This stock, together with that previously held and since purchased, at a very low figure, gives our company a majority interest of 26,494 shares to 21,506.

The business of the Cincinnati, Richmond and Chicago railroad, for want of an outlet beyond Richmond, has not met the hopes of our company. So far, since we leased the road, it has not paid for the necessary renewal of bridges, running expenses and interest on its bonds. Its local business, however, is increasing slowly, which will ultimately, we hope, make it fairly remunerative to the C. H. & D. Co.

The extension of the Richmond and Fort Wayne road to Ridgeville the present year will add something to the traffic of the road. The position which this road occupies in relation to ours, with a charter more liberal, if not extraordinary, forbids any idea of letting it pass into other hands that might prove adverse to the C., H. & D. Co.

The Cincinnati and Indianapolis railroad, which connects with the Cincinnati, Hamilton and Dayton at Hamilton, continues to give us a large amount of business, and to receive from us in return about an equal amount. It will be remembered that our company originally subscribed two hundred thousand dollars to this road, more than it has to all our other connecting roads combined. The business done in connection with us, which otherwise would not have reached our road, has amply repaid us for the outlay. Our board still regard that road as one of great importance, and when it shall have been completed, in its extension to Fort Wayne, one of still greater importance to our city. It has had its struggles, more than ordinarily met with in similar enterprises, and great credit is due the untiring energy and faith of those who have had charge of its construction and management, and our board unite in the general sentiment of hope and belief that final success is about to reward its owners.

Our relations with the Atlantic and Great Western and Erie railways remain harmonious, and all obligations on the part of both parties are promptly met. The present contract between the Cincinnati, Hamilton and Dayton and Erie, made for the period of ten years, is believed to be fair and satisfactory. It gives the Erie all the advantages she would have if her own road actually terminated in Cincinnati, and relieves our company of the anxiety and trouble of a through Eastern business; is fairly remunerative to our company for the large expenditure of building an extra track for the broad gauge business, and leaves us full time to devote to the local traffic of our road, by far the most important.

Our business with the Cleveland, Sandusky and Cincinnati railroad remains as heretofore, satisfactory and profitable to both companies. The amount of traffic interchanged is steadily on the increase, and the rates received for the transportation of both passengers and freight are remunerative. In some articles of traffic, such as lumber from Northern Michigan, ice from Sandusky and Toledo, to Cincinnati and other points, there has been lately sharp competition between the Dayton and Michigan and C., S. and C. roads; but this has been overcome by an agreement between the parties to select a common agent, to secure and equally distribute the lumber from points beyond Toledo and Sandusky.

This pioneer road of Ohio, under its present management, has been greatly improved, and bids fair to again assume its old position as one of the most important roads of the State. The travel over it, in connection with our road to and from the islands of Lake Erie, during the summer season, is rapidly increasing, and the full improvements being made at Put-in Bay and other points, for the accommodation of visitors during the summer, will doubtless prove profitable to the roads.

In closing this, my twenty-second annual report, it is proper to refer to a few facts in the history of the company, that may well be considered causes of congratulation to our stockholders and to the public.

It should be remembered that whilst your company never asked or received aid from any city, county, or township, by way of subscription, donation or loan of credit, it has gone straight forward in building one of the best roads in the West, meeting all its obligations, large and small, punctually, without even having a piece of paper protested, for lack of means to pay or disposition so to do. That from the year 1849, after a million of dollars had been subscribed and the rights of way secured, and when the contract for construction was closed, it has earned and paid to

its stockholders an average dividend of upward of eight per cent. per annum, more than any other road terminating in Cincinnati has paid to its stockholders, from its commencement. And this, notwithstanding the large and continued outlay necessary to provide for increasing business, and the subscriptions voted by our stockholders to aid connecting and branch roads.

That the company is now free from any floating, and has but a comparatively small bonded debt; that it has no longer any occasion to apply its net earnings to any other purpose than cash dividends to its stockholders, with a fair prospect of their being satisfactory; that the company hold good reserved assets, sufficient to secure regular dividends, in case of any unforeseen casualities; that their property, on the whole, is worth a large amount more than it cost, or which is represented by stock and bonds; that those of its Directors who, after many years of faithful service, have departed this life, and those who still remain, had the foresight to secure, within a reasonable distance of the center of the present city of Cincinnati, a large amount of real estate, at a small cost, sufficient for the present and the future requirements of a great business.

That since the day the road was opened for business, in the fall of 1851, it has been remarkably free from accidents to either persons or property, and that of *nine millions* carried, but nine passengers have lost their lives.

That the superior accommodations furnished, in the number of passenger trains for local travel, beyond that of any other road leading from our city, has built up an almost continued village from Cincinnati to Hamilton, and has contributed largely to the wealth and population of all the cities on its line. That its employes of all ranks, with scarcely an exception, have proven faithful to their trusts, and have been educated and promoted on the road, each one being taught to feel that they had an interest in the same, beyond their mere salary; that the best of feeling toward the road has been cultivated and manifested by those whose lands were of necessity taken for rights of way, and wherever destruction came from fire or flood, they have always been the first to the rescue; that the best of relations have been maintained with all connecting roads, and a liberal course pursued toward them; that the road has earned the reputation among the best railroad men of the country of being one that is well constructed and well managed, and worked at a per centage of the gross earnings much below other well-managed roads; that while its stock has not commanded as high a price in the market, from causes not necessary here to enumerate, its intrinsic value has been all the while increasing, and it should not be parted with now at less than par in gold.

The Cincinnati, Hamilton and Dayton occupies the position of a trunk road, for business from the Cincinnati and Indianapolis Junction, the Cincinnati, Richmond and Chicago, the Dayton and Union, the Dayton and Michigan, the Cleveland, Sandusky and Cincinnati, the Atlantic and Great Western and Erie Railroads.

It has not only the narrow, but broad gauge tracks, with ample means to accommodate the immense Cincinnati and Southwestern business of all these roads, besides the large local business of our own Miami Valley. Its policy is to extend equal facilities to all, and maintain strict neutrality between them, asking for nothing which they are not willing to concede, and agreeing to no contracts which are not equally fair to both and all parties. So long as such a policy is pursued by our company, there will exist no real necessity for another road down our valley, it having already a canal and a railroad, as well as a railroad of the very first class running parallel and distant only fourteen or fifteen miles.

The scare crow of a railroad for the past twenty years has served the purpose of frightening timid stockholders and of depressing the market value of the stock.

The day is distant when the C., H. and D. road will not be able to accommodate the business of all roads terminating at Dayton, and that of those leading to our valley this side of Dayton, at one-third what it would cost them to build independently into Cincinnati, and do their own work; and until this company gives just cause of offense by pursuing a different policy from the past, there will be no occasion for a road being built, which would probably not pay more than running expenses. Respectfully submitted,

S. S. L'HOMMEDIEU.

Lehigh Coal and Navigation Company.

The Board of Managers respectfuily submit their report for the year 1869 as follows:

The profits of the year from all sources were:

Net profits on railroads, including car service		$907,895 36
Net profits on Lehigh Canal		166,260 29
Net profits on coal—		
Summit Mines	$436,951 64	
Newport Mines	54,824 72	
		491,776 36
Net profits on real estate sold		96,968 86
Net profits from rents		55,120 86
Miscellaneous receipts		80,432 08
		$1,797,453 81
Less general expenses	$116,333 07	
Taxes chargeable to Railroad	36,925 83	
Taxes chargeable to Lehigh Canal	7,810 17	
Taxes chargeable to Delaware Division Canal	6,211 55	
Taxes chargeable to coal	56,523 58	
Taxes on interest and capital stock	104,182 98	
Taxes on landed prop'rty and improvements	6,100 80	
Balance of interest account for 1869	984,071 48	
Loss on Delaware Division Canal	143,692 81	
		1,462,752 27
Surplus to credit of profit and loss account		$334,701 54

The coal tonnage on the Lehigh and Susquehanna Railroad and Lehigh Canal, compared with that of 1868, was as follows:

	1869. Tons. Cwt.	1868. Tons. Cwt.
From the Wyoming Region	841,719 18	519,279 19
From the Upper Lehigh Region	77,261 17	141,499 06
From the Hazleton Region	120,938 02	332,817 06
From the Beaver Meadow Region	98,113 17	117,086 16
From the Mahanoy Region	2,705 07	4,711 18
From the L. C. and N. Co.'s Lehigh Mines	450,350 12	427,017 04
Other shippers	6,562 02	9,750 19
Total	1,597,651 15	1,552,163 03

Distributed as follows:

	1869. Tons. Cwt.	1868. Tons. Cwt.
Delivered east of Mauch Chunk by railroad	933,569 06	493,774 05
Delivered east of Mauch Chunk by canal	605,143 16	989,947 05
Consumed along the line above Mauch Chunk	33,901 02	26,605 03
Delivered to connecting lines in Wyoming Valley	25,037 11	41,836 10
Total	1,597,651 15	1,552,163 03

There was an increase on the railroad tonnage of	430,292 01
There was a decrease on the canal tonnage of	384,803 09
Showing a net increase of	45,488 12

The production of the company's mines was as follows:

	1869. Tons.	1868. Tons.
Shipped by railroad	204,872	7,585
Shipped by canal	189,079	363,346
Sold at Mauch Chunk	5,938	6,278
Sold at Summit Hill	1,028	759
Used at planes for engines, &c.	11,692	9,307
Total from Summit mines	412,609	387,220
Room Run mines	56,401	57,620
Newport mines	26,502	.....
Sugar Notch mines	65,002	.....
Greenwood mines, under lease	3,400	22,286
Total	563,914	467,126

The details of the business of the year will be found in the accompanying reports of the heads of departments. The next result is very gratifying, considering the extreme irregularity of the business throughout the year. During the winter the only source of profit was the railroad, as the canal was not in operation and the demand for coal light and prices low. Early in May business was almost entirely suspended by the general strike of the miners, and only partially resumed late in June, and fully when our own and other Lehigh men went to work early in July.

A second suspension occurred in the Hazleton, Beaver Meadow and Upper Lehigh regions soon after, and the coal from our own mines and the Wyoming region gave only partial employment to our canal and railroad equipment for several weeks before the freshet of 4th of October, which not only cost the company largely for repairs to railroad and canal, but interrupted business on the railroad, and almost entirely cut off the revenues of the canal for the season. On the 27th of October the coal-breaker of the Upper Lehigh Company was destroyed by fire, which deprived us of the transportation of an average of over 3,000 tons per week for the remainder of the year.

The rates of transportation charged on coal were high during the last four months of the year, but the irregularity of business was so great as to neutralize to a considerable extent the benefit of these rates, and the net result on the railroad was less than a fair profit on the same amount of trade at lower rates, but distributed with more regularity through the year. The business of the canal shows a very unsatisfactory result, instead of the anticipated profit of over $350,000, based on the average of the twenty years previous of nearly that amount, and the profits on our coal product were no more than we ought to realize in an ordinary season. The aggregate net result of the year's business, while satisfactory under the circumstances, was less by over $500,000 than the estimates made early in September, which would have been realized but for the strikes and flood.

RAILROAD.

The reports of income for the year indicate the increasing importance of the railroad, and that the company must in the future regard this as its most certain source of revenue. The canal is more liable to injury from freshets, and, while a valuable auxiliary, its entire destruction would still leave the company the means of transporting to market all of its own coal and a large amount for other parties, with ability to increase only limited by its financial resources for extending track and increasing equipment and its necessary adjuncts. The stockholders may therefore now, as they could never before, feel that a freshet, no matter how severe, cannot deprive the company of the means of earning interest and dividends.

The Wilkesbarre planes were completed and commenced raising coal September 25th, and they promise to meet our expectations fully. Such ad-

ditions have been made to the road and equipment as our means would permit; not sufficient, however, to meet fully the requirements of our customers. The details of these extensions and purchases will be found in the report of the President's assistant. The Railroad Car Trust Association, referred to in the last annual report, has invested its capital of $750,000 in 8 locomotives, 50 flat cars, and 2,250 coal cars. The urgent demand for more cars and motive power, and the satisfactory working of the first trust association, induced the organization in October of the Lehigh Equipment Trust, with a capital of one million of dollars. There have been ordered by the managers of this trust 10 locomotives, 150 flat cars and 2,000 coal cars. With this addition, our available equipment will include 70 locomotives and 10,592 6-tons coal cars, beside passenger and freight cars sufficient for present need, being probably an aggregate much greater in proportion to length of road than ever before controlled by one company soon after the opening of its line, and probably sufficient to move all the coal we can handle without important additions to our tracks, and shops and other buildings.

CANAL.

The water was let into the Delaware Division Canal on the 10th March, and into the Lehigh Canal on the 24th of the same month, and both canals were in good boating condition until the freshet of 4th October, which interrupted navigation on the Lehigh until November 15, and on the Delaware Division for the remainder of the season, excepting on the upper ten miles and the portion below New Hope. The Lehigh was closed by ice on December 6, and the Delaware Division December 16. The freshet referred to has, for volume of water and destruction of property, been paralleled in the history of the company only by those of 1841 and 1862. The damages to the Lehigh Canal, though extended over a distance of thirty-three miles, were of such a nature that they could all have been repaired within three weeks. Those to the Delaware Division were more serious. On this canal two aqueducts were carried away by the sudden raising of the streams they cross before the flood in the Delaware river had attained a dangerous height, and two others were seriously injured by the same cause. To have restored these aqueducts hastily would have left them still, as they always had been, frail structures, liable to be carried away by the next severe storm of a few hours' duration. It was decided, therefore, to rebuild them deliberately and substantially during the winter, and when completed they ought, with the increased water-way under them and their very substantial masonry and superstructure, to resist future floods. As no through business could be done on this canal during the remainder of the year, economy rather than expedition was consulted in the repairs to the Lehigh Canal, and it was not opened until November 15, at which date the portions of the Delaware Division above and below the aqueducts were also repaired.

The extraordinary repairs to the Lehigh Canal during the year amounted to about $70,000, and those to the Delaware Division to about $50,000. The additional amount required beyond the cost of ordinary repairs to restore the Delaware Division will be not far from $75,000, which will properly be chargeable to the revenue of 1869, having been made necessary by the freshet of that year.

In connection with the subject of the freshet the Board desire to express their obligations to their associate, Mr. John Leisenring, for his efficient aid during the height of the storm in preserving the dam at Mauch Chunk from destruction. Also, for his assistance and advice thereafter in both railroad and canal repairs. All of the company's officers and employes labored earnestly in restoring our works, and they derived great benefit from Mr. Leisenring's large experience in the freshets of the previous thirty years.

A reference to the reports of this company for the last thirty years will show that the Lehigh Canal was seriously damaged in 1841, 1850 and 1862, and that the injury done by freshets in the intermediate years was trifling. The freshet of October last, while making evident the fact that the encroachments on the river by the iron furnaces, with their cinder banks, increase from year to year the danger to the canal, by narrowing and increasing the depth and rapidity of the river during seasons of high water, also shows that where the greatest damage was done in 1862, a change of location saved the canal at those points from any injury, and that similar changes can be made at other points, which suffered severely in this freshet, with a like result.

Much has already been done to improve the Delaware Division and to protect it from high water by raising the banks, building stop-gates and renewing locks, and with the completion of the new aqueducts and other works now in progress, that canal may be regarded as less liable to injury than at any previous period.

The expenditures in thus improving that canal have always been charged to maintenance for the current year. It is proposed to continue these improvements and to strengthen all weak points on the Lehigh Canal developed by the last freshet.

COAL INTERESTS.

In the supplementary report submitted last year reference was made to indications of an approaching suspension of labor in the coal regions. The miners demanded that their wages should be governed by the price of coal, and after a suspension of six weeks they carried their point in the Schuylkill and Wyoming regions. After eight weeks' suspension the Lehigh operators also yielded. The terms of settlement were so unsatisfactory to the operators in the latter region that, after a trial of a few weeks, they generally notified the men that they could no longer pay the prices, and a second suspension for over two months resulted. This company having arranged with its men on more favorable terms than others in July, did not join in the second suspension, which resulted to those who participated in a considerable saving from their previous contract, and lower rates than we were paying. Even with this gain the prices of labor are very much higher throughout the Lehigh than in either the Schuylkill or Wyoming region, thus taking, to a certain extent, from these operators their advantages of nearness to market and superior quality of coal.

The greater portion of our Lehigh coal was sent to market by the canal until navigation was intert rupted by the freshet. Arrangements for the shipment of our whole product by rail during the winter were in progress at the time, and were completed as speedily as possible, but the production during October, November and December was much less than if no change of mode of transportation had been necessary. This cause, added to the strike of eight weeks from May 10 to July 6, prevented the realization of our expectations of a large increase over 1868. The total increase amounted to but 24,170 tons. During the last few months of the year coal sold at high prices, but the cost of mining was increased in a much greater proportion over previous years than the increase of prices at which the coal was sold, so that we made no greater profit for the year than we should have made on the same amount of coal in a season of moderate prices but greater regularity.

The coal agency established in New York, referred to in the last annual report, has worked satisfactorily, and promises to be of increasing advantage to the Company.

There is a considerable demand in this city for our coal for family use, and not having succeeded in other arrangements to supply this demand, the Board has decided to open a yard from which to sell and deliver the product of our various mines. With this view we have purchased a property on the North Pennsylvania Railroad, between Diamond and Susquehanna streets, and are fitting it up with a capacity to meet a large demand.

The 17,144 shares of Wilkesbarre Coal and Iron Company stock purchased in 1867, was sold in June last, and the company received in exchange a tract of 2,000 acres of land near the foot of our Wilkesbarre planes, and a considerable sum of money in addition. Valuing the land at the very low price of $245 per acre, we realized the par value of our own stock given in exchange for the Wilkesbarre stock in September, 1867. Whatever the land is worth in excess of the $245 per acre may be regarded as profit on the transaction.

The purchase of stock was made for the purpose of ensuring tonnage for our railroads and canals, and was introduced by the policy of some of the large companies operating in the Wyoming region of controlling large bodies of coal lands. That policy is still continued, and at this time all of the railroad and canal companies leading from that region own and lease extensive tracts of land. It was not regarded as prudent to dispose of the company's interest in the Wilkesbarre Coal and Iron Company stock, possibly resulting in the withdrawal of their business, without making other arrangements for trade.

The lands received from the Wilkesbarre Coal and Iron Company in Hanover township adjoin the Biddle lands, and the two tracts amount to over 2,800 acres, nearly all within the coal field. The Cook tract near this body of land has about 100 acres of coal. In addition purchases have been made to the extent of 3,580 acres located in Newport township, five miles distant from the western limit of the Hanover township tract.

The reasons that led to the sale of the stock and the purchase of these lands were various. The price offered was considered higher, relatively, than the lands could be purchased at.

Large expenditures would be necessary during the next two or three years to continue the coal product of the Wilkesbarre Coal and Iron Company at the rate of 1869, and further expenditures were deemed judicious to increase the product and diminish the cost of mining. While we owned a marjority of the stock, the remaining stockholders were indisposed to advance any portion of the money necessary for these developments. It was estimated that no larger expenditure during 1869 and the two following years would be necessary, beyond the proceeds of the sale of the Wilkesbarre Coal and Iron Company stock, to purchase the large body of land and give us the entire control of and profit on a large product of coal, than it would be necessary for us to advance to retain the control and half ownership of the property of the Wilkesbarre Coal and Iron Company.

The only operation on the Hanover lands are those of Messrs. Parrish & Thomas, who mine from a portion of the property under a lease granted in 1865, which yields a rental of about $30,000 per annum. A shaft near the middle of the property on the line of the Pennsylvania Canal shows the top vein to be unusually fine in quality at that point, and at an early period it will be advisable to build a breaker and open the mine.

On the Newport lands extensive developments were in progress at the time of purchase, for the details of which see the report of the superintendent. They contemplate a production of 300,000 to 400,000 tons a year, and further developments are practicable to at least the extent of doubling that product.

The Hanover and Biddle tracts offer an apportunity for an equal number of collieries.

The interest of the company in coal lands in the Wyoming region is:

	Acres.	Cost.
Hanover tract, from Wilkesbarre Coal and Iron Company, over	2,000	$493,001 30
Biddle lands, over	800	169,497 32
Cook lands, portion underlaid with coal	100	45,000 00
Newport township lands	3,580	1,413,976 96
In the aggregate	6,480	$2,121,475 58

Of which 5,700 acres are within the coal field.

We have thus nearly as many acres of coal in the Wyoming as in the Lehigh region. The developments thus far made indicate that the coal is of a very superior quality, and that it can be

mined at a much lower cost than at our Lehigh mines,

The amount of available coal belonging to us is about equal in the two regions. Carefully prepared estimates give over 300,000,000 of tons available in the Wyoming lands, after allowing for faults and waste in mining, against 282,000,000 estimated as available in our Lehigh lands.

The Wyoming Valley is well known for the fertility of its soil, and a considerable portion of the company's lands are under a high state of cultivation; and portions of the Hanover and Cook tracts are available as building or town lots, and surface lots on adjoining properties, no better located, are selling at the rate of $2,000 or $3,000 per acre.

The extent to which we shall develop the Wyoming lands the coming year depends in a great measure upon the price of coal, and the condition of the labor question. The building of a third breaker next fall will give us a capacity for 1871 of from 300,000 to 400,000 tons; and there are three other points offering, at least, equally favorable opportunities for the cheap mining of coal of very superior quality.

We sent to market 63,846 tons from our Summit mines in September, and this may be regarded as nearly the monthly capacity of our present openings in Panther Creek Valley. Further developments would be unwise before the completion of the Nesquehoning tunnel, as the gravity road and planes cannot transport any considerable increase without expensive additions to the machinery. The tunnel will, no doubt, be completed before the close of 1871; and after that we can readily increase our production to 80,000 or 90,000 tons per month.

FINANCES.

The floating debt incurred in 1868, in the purchase of rolling stock and in adding sidings, &c., to the railroad, was increased during 1869, by expenditures of the same character rendered necessary by the amount of business pressing upon us.

The five-year loan issued in 1868 was regarded as a temporary expedient, and was used almost exclusively as collateral security for loans to the company. When the sale of the Wilkesbarre Coal and Iron Company stock was made it became necessary to retire a considerable portion of this loan, and for the purpose of funding the floating debt and providing means for permanent improvements on our railroad and coal lands, it was decided to issue a new loan of two millions of dollars, secured by a first lien on the newly acquired coal lands and on real estate in Philadelphia, the value of the properties being at least three millions of dollars. The loan matures in 1894, bears 6 per cent. interest, clear of taxes, payable, principal and interest, in gold. A sinking fund of ten cents for five years, and fifteen cents thereafter, on every ton of coal mined and carried away from the property, is payable monthly to the Trustees, and will provide for the loan before maturity. The payments on this account were, for October, $1,414 02; November, $1,269 44; December, $1,253 92, and will increase to $3,500, or perhaps $4,000 a month before the close of 1870.

The loan is convertible into the stock of the company until 1879. The Board entertained the hope that the business of the year would show such satisfactory results to the stockholders as to create a demand for the new bonds by reason of this privilege of conversion. The freshet in October not only reduced our receipts, and rendered necessary heavy expenditures in repairs, but delayed the negotiation of the loan. The loss of receipts and increased expenditures amounted to fully $500,000, which sum and the proceeds of the loan would have relieved the company of floating liabilities. The Board look forward with confidence to the funding of this indebtedness at an early period.

In October, 1867, the stockholders were invited to subscribe to a six per cent. ten year convertible loan of the company, to the aggregate amount of $3,800,000. The subscriptions received amounted to about $1,200,000. During 1868 a small portion of the remainder was issued in payment for equipment and purchase of coal lands, and there remains of the amount originally authorized about $1,800,000 available for future use.

NESQUEHONING VALLEY RAILROAD.

The completion of this road has been delayed beyond the period named in the last report. Work was not pressed vigorously early in the year, and the weather during the fall was very unfavorable, rendering it almost impossible to make any considerable progress for weeks at a time. An early period in the spring is named for the connection of the main line with the Catawissa railroad, and it is hoped in time for spring lumber trade. The road will beyond question earn, as soon as its trade is developed, the dividends of ten per cent. per annum, free from taxation, which this company has undertaken to pay on its stock, besides adding largely to the profits of our main line.

Sales have been made from time to time of stock at par, and as means beyond the proceeds of these sales have been needed for prosecuting the work, this company has subscribed and paid for stock to the extent of 2,140 shares, which form a portion of the contingent fund. It is proposed to sell this whenever purchasers can be found at par and accrued dividends.

Work on the tunnel is progressing satisfactorily.

By order of the Board of Managers of the Lehigh Coal and Navigation Company.

E. W. CLARK, President.

Philadelphia, January 1, 1870.

SUPPLEMENTARY REPORT.

The annual report refers only to the business of the company for the year ending December 31, 1869. The repairs of the Delaware Division Canal, at that time in progress, were completed on the 14th of April, and boats were passed into the canal on the 16th of the same month. The delay in completing the acqueducts was due to the frequent and heavy rains during the fall and winter, which drove us away from work on the piers by raising the streams fourteen times in about as many weeks, and delayed their completion about a month. The contractors for the superstructure did not press their portion of the work with proper vigor, and the two causes lost us about three weeks' business at the opening of the season. The one day of through business on the 16th of April, was followed by a severe freshet in the Lehigh on the 18th of April, with the river at Mauch Chunk within six inches as high as in October last. Fortunately but little damage was done to the Lehigh Canal, and none whatever to the Delaware Division proper. A portion of the guard wall at Easton was, however, carried away, and until the river can be turned to its usual course, we have no means to transfer from the Lehigh Canal to either the Delaware Division or Morris Canal. Unless unexpected causes intervene, boats can pass freely on Saturday or Monday next.

The total outlay in repairs to both guard wall and canal can hardly amount to so much as $20,000. Our customers have many canal orders which they are anxious to fill, and we have completed arrangements to run all of our boats, so that when strikes or freshets do not interfere we shall pass a large amount of coal through the canal. The loss of tonnage on the canal has been partly made up by a gain on the railroad, and the cash receipts of the latter have been increased almost to the extent of the loss on the former. The principal cause of diminished revenue, thus far this year has been the suspension of work at our Summit and Room Run mines. During a long term of years there was a well established relation existing between the wages paid in the Hazleton and Beaver Meadow regions and at our mines. We did not participate in the demands of the operators last fall, which resulted in the second suspension, and when work was resumed in November we lost our relative position. Our efforts to regain the lost ground resulted in a suspension of our men, who have done no work since February 12. At the time of the suspension we were paying higher wages than any other operator working on the sliding scale or "basis" plan. We have offered our men wages equivalent to those paid in the Beaver Meadow region, and considerably higher than the rates the Schuylkill county men offer to resume work at, and which the operators, there decline for the reason that they are too high. We cannot yield the point in dispute without establishing the precedent of paying much higher wages than any of our neighbors in the Lehigh region, and they now pay excessive rates compared with the Schuylkill and Wyoming regions.

The Nesquehoning Valley Railroad was turned over to us on the 18th of April, and we commenced running freight trains on the 2d of May. We shall find full employment for all the cars we can send to the Catawissa road in the lumber, ore and miscellaneous trade, and shall start passenger trains soon, with the promise of a fair and increasing business. We are using the Burleigh drills in the work on the tunnel, and they have already given good results, and promise better when the workmen have acquired greater skill in the use of them.

When we sold our Wilkesbarre Coal and Iron Company's stock we gave that company the right to terminate the contract binding their tonnage to our line by giving six months' notice. We have recently closed a new contract with them for a long term of years, by which they agree to send not less than 400,000 tons of coal per annum over our works, giving us the choice of routes by which it shall be sent to the New York market from the terminus of our lines. We regard the new contract as more favorable to us than the one previously in force.

We did very little remunerative business last year previous to the 6th of July, and the only very good months we had were July and August. It is hardly likely that the commencement of our paying business can be so long delayed this year, and when it does begin we shall be very much better prepared for it in every department than we were at any time last year.

By order of the Board of Managers of the Lehigh Coal and Navigation Company.

E. W. CLARK, President.

Philadelphia, May 3, 1870.

☞ The commission of Russian engineers, who lately visited England for the purpose of seeing Mr. Fairlie's narrow gauge railway plant, and the Festiniog railway where his engines are at work, have, according to the *Iron and Coal Trades Review*, reported strongly in favor of the system. They recommend it to be adopted for a portion of the railway between St. Petersburg and Moscow, and estimate the cost of construction at about £4,500 per mile.

☞ Suit has been entered in the Superior Court at Baltimore, by the State of Maryland against the Baltimore and Ohio Railroad Company, under the resolution passed at the late session of the General Assembly, directing said suit to be entered if the claim of the State for one-fifth of the receipts from passengers on the Washington Branch was not satisfied within twenty days.

☞ John Taylor Johnston has been re-elected president of the Central Railroad Company of New Jersey, and Samuel Knox secretary and treasurer. The directors are: John Taylor Johnston, James Boorman Johnston, Sidney Dillon, Adam Norrie, John C. Green, F. T. Frelinghuysen, B. Williamson, Asa Packer, H. D. Maxwell.

☞ The contract for the grading and bridging of the extension of the Littlestown Railroad to the Pennsylvania and Maryland State lines has been awarded to Cyrus Diller, Esq., of Hanover, Pa.
